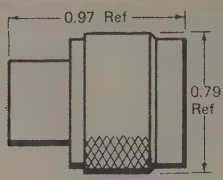
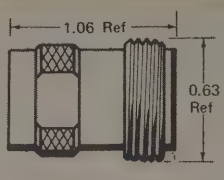
## type n/dc to 12.4 GHz — MDC1042M/1042F



TYPE N MALE
MDC1042M



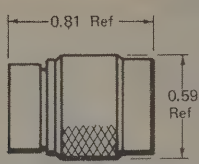
TYPE N FEMALE
MDC1042F

PRECISION/MINIATURE SPECIFICATIONS:

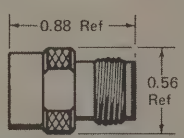
| | |
|---|---|
| Material: | Brass with bright alloy finish |
| Power: | 2 watts average, 1kW pk |
| Impedance: | 50 ohms |
| VSWR: | 1.15 max. thru 12.4 GHz |
| RFI: | −90 dB |

**PRICE 1 TO 9 $25.00**

## type tnc/dc to 12.4 GHz — MDC1044M/1044F



TYPE TNC MALE
MDC1044M



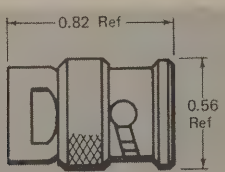
TYPE TNC FEMALE
MDC1044F

PRECISION/MINIATURE SPECIFICATIONS:

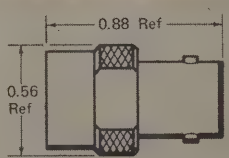
| | |
|---|---|
| Material: | Brass with bright alloy finish |
| Power: | 2 watts average, 1kW pk |
| Impedance: | 50 ohms |
| VSWR: | 1.15 max. thru 12.4 GHz |
| RFI: | −90 dB |

**PRICE 1 TO 9 $25.00**

## type bnc/dc to 8.0 GHz — MDC1043M/1043F



TYPE BNC MALE
MDC1043M



TYPE BNC FEMALE
MDC1043F

PRECISION/MINIATURE SPECIFICATIONS:

| | |
|---|---|
| Material: | Brass with bright alloy finish |
| Power: | 2 watts average, 1kW pk |
| Impedance: | 50 ohms |
| VSWR: | 1.15 max. thru 8.0 GHz |
| RFI: | −90 dB |

**PRICE 1 TO 9 $25.00**

## type smb and smc/dc to 4.0 GHz

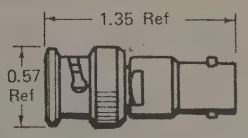
# midisco coaxial components

## type bnc/feed-thru terminations — MDC1079

The MIDISCO Feed-Thru Termination is ideal for terminating pulse microwave or UHF instruments in their characteristic impedance.

**PRICE 1 TO 9 $12.50 EACH**

| | |
|---|---|
| Impedance: | 50 ±1 ohm |
| Average Power: | 2 watts |
| Connectors: | BNC male/female |
| Finish: | Bright alloy |
| Frequency: | DC-500 MHz |
| VSWR: (Max.) | 1.1 (DC-250 MHz)<br>1.2 (250-500 MHz) |



## coaxial shorts — MDC1025

| S/M P/N SHORT | TYPE | D (REF.) | L (REF.) | MATERIAL | |
|---|---|---|---|---|---|
| MDC1025M-S | SMA Male | 0.31 | 0.33 | Stainless Steel | PRICE 1 TO 9 $18.00<br>WITH BEAD CHAIN (SUFFIX -C) $19.75 |
| MDC1025F-S | SMA Female | 0.31 | 0.34 | | |
| MDC1025M-T | TNC Male | 0.59 | 0.70 | Brass with Bright Alloy Finish | |
| MDC1025F-T | TNC Female | 0.50 | 0.58 | | |
| MDC1025M-N | N Male | 0.78 | 0.69 | | |
| MDC1025F-N | N Female | 0.78 | 0.75 | | |

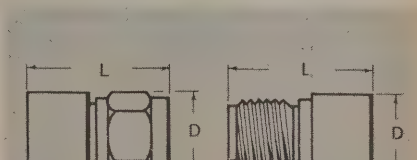
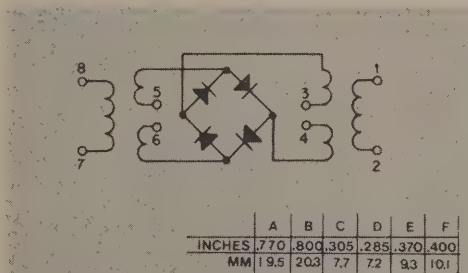
| MDC1025F-B | BNC Female | 0.50 | 0.58 | | |



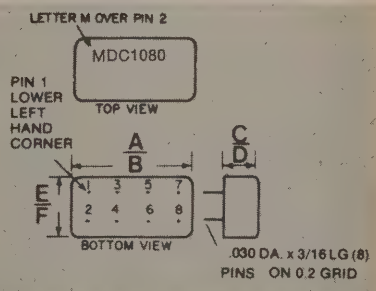
## double-balanced mixers — MDC1080

For demanding industrial and commercial applications, where low-cost and high performance are critical; Model MDC1080 will fill your need. MDC1080 covers the broad frequency range of 1-500 MHz with 6 dB conversion loss and isolation greater than 40 dB. Every MDC1080 is RF tested twice, all transformer leads are double-wrapped, every solder connection is 100% inspected under high power microscopes and all components are rated for more than +85°C operation. The weight is .18 oz. (5.2 grams).

**PRICE 1 TO 9 $5.00 EACH**



| | A | B | C | D | E | F |
|---|---|---|---|---|---|---|
| INCHES | .770 | .800 | .305 | .285 | .370 | .400 |
| MM | 19.5 | 20.3 | 7.7 | 7.2 | 9.3 | 10.1 |

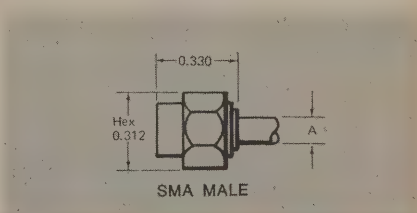


## sma semi-rigid midgets — MDC1141/1085

The MIDISCO Midgets are the smallest SMA Connectors for Semi-Rigid Cable available. The self facing design and the retractable coupling nut make these solder type connectors desirable for quality and ease of assembly. Material: Gold Plated BeCu. Interface dimensions are in accordance with MIL-C-39012.

**MDC1141**
For .141 (RG402/U) Cable
Uses insulator and center conductor of cable.
**PRICE $1.50 EACH**
**(PACKED IN BAGS OF 25)**

**MDC1085**
For .085 (RG405/U) Cable
Supplied with insulator and contact.
**PRICE $2.20 EACH**
**(PACKED IN BAGS OF 25)**



**MIDISCO**

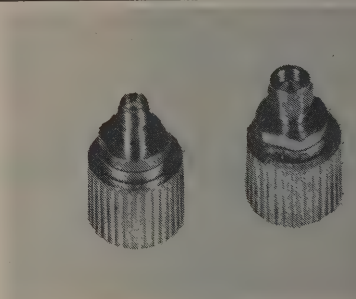
**PRICE 1 TO 4 $125.00 EACH**



## precision radius adapters

The MIDISCO Radius Adapters consist of a bent section with a one piece center conductor that eliminates the vibration and shock failures that normally would occur at the solder joint. VSWR to 18 GHz is superior to that of mitered right angle adapters.

| TYPE | PART NUMBER | A | B | PRICE 1-9 |
|---|---|---|---|---|
| N Male — N Male | RRNM-NM | 1.094 | 1.084 | $25.00 |

# midisco adapters

## adapto-kits

The MIDISCO Adapto-Kit consists of a hanging display board with spring clips which holds a total of 15 inter and intra Series Adapters. Kits are available in N, TNC, BNC, and SMA Series. This enables the technician to adapt from one series to all of the other series.

**PRICE:**
**AK - SMA — $195.00**
**AK - N — 175.00**
**AK - TNC — 175.00**
**AK - BNC — 175.00**
Replacement adapters are available at **$15.00 ea.**

### FOR COMPLETE SERIES ADAPTATION

**The SMA Series Adapto-Kit (AK-SMA) consists of 1 each:**

| | | | |
|---|---|---|---|
| SMA Male to SMA Male | (SM-SM) | SMA Male to BNC Female | (BF-SM) |
| SMA Female to SMA Female | (SF-SF) | SMA Female to N Male | (NM-SF) |

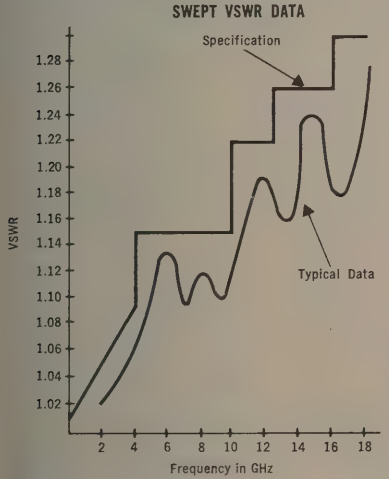
| SMA Male to BNC Male | (BM-SM) | | |

# phase adjustable sma connector

### ELECTRICAL SPECIFICATIONS

Nom. Impedance: 50 ohms
Frequency Range: DC — 18 GHz
VSWR: (See chart)
Insertion Loss: dB =
.1 x $\sqrt{F}$ for Adapter version
.08 x $\sqrt{F}$ for Connector version
(F is Frequency in GHz)
Phase Adjustment (Degrees): 10° x F
Phase Change per Revolution of Adjustment Nut: .636° x F
Voltage Rating: 500 Volts RMS



### MECHANICAL SPECIFICATIONS

**Mating Characteristics:** Mating face dimensions compatible with the mating requirements of MIL-C39012 (Type SMA).
**Connector Durability:** (SMA Interface) 500 cycles of mating and unmating without deterioration.
**Materials and Finishes:**
Center Conductor —
Beryllium Copper, Gold Plated
Connector Body —
Brass or Beryllium Copper, Gold Plated
Adjusting Nut and Locking Nut —
Brass, with non-tarnish finish.
Connector Coupling Nut —
Stainless Steel, Passivated
Insulation — TFE

### ENVIRONMENTAL SPECIFICATIONS

Corrosion: MIL-STD-202, Method 101, Test Condfition B
Mechanical Shock: MIL-SD-202, Method 213, Test Condition I
Vibration: MIL-STD-202, Method 204, Test Condition D
Thermal Limits: −65°C to +125°C

| P/N | MAX. LENGTH, IN. | DIA., IN. | DESCRIPTION | PRICES 1-9 |
|---|---|---|---|---|
| MDC1089-1 | 2 1/32 | 1/2 | In-Line Adapter | $85.00 |
| MDC1089-2 | 2 1/32 | 1/2 | .141" Cable Conn. | 79.00 |
| MDC1089-3 | 2 1/32 | 1/2 | .085" Cable Conn. | 79.00 |

NOTE: Phase adjustable SMA Connectors are available for other semi-rigid cables. Please consult factory.

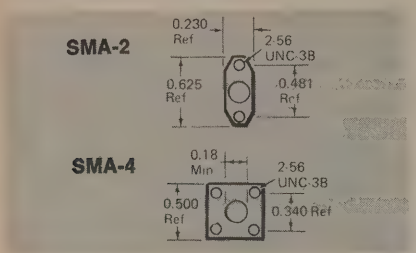
## multi-nut type sma-2 and sma-4

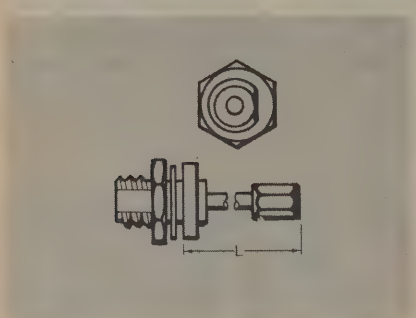


Where an SMA Connector must go through a panel, and assemblers have to use four separate nuts to hold it in place, you will be interested in the MIDISCO Multi-Nut. It cuts down assembly time and eliminates the use of nuts in tight places. They can be purchased in packs of 10.

Material: Aluminum 0.061 thick
Part Number: SMA-4 & SMA-2

**PRICE 75¢ EA. — OVER 500 50¢ EA. (minimum 10 pcs.)**

## bulkhead adapters/semi custom



MIDISCO makes use of their large inventory of connectors and Quick Reaction Cable Assembly Department to bring you a line of Semi-Custom Bulkhead Adapters. These adapters are also available in "Bent" configurations. See the MIDISCO Simplified Adapter Part Number Table on page 2884 and specify as follows:

B = Bulkhead

L = Length from panel face to interface of internal connectors in inches.

**HOW TO SPECIFY:**

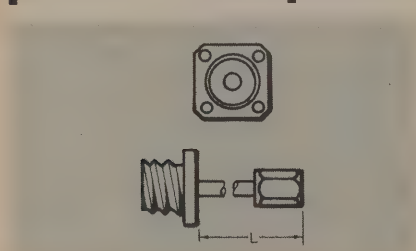
| Outside Conn. | Sex | Inside Conn. | Sex |
|---|---|---|---|
| B ( ) | ( ) | —L—( ) | ( ) |

Example: BNF-4-SM is a Bulkhead N female to SMA male and L = 4.

**PRICE**
**(for Bulkhead or Panel Types)**
**10 PIECES $25.00 EACH***

* These prices are for any combination between N, TNC, BNC, and SMA, SMB and SMC.

## panel adapters/semi custom



These adapters are the same as the Bulkhead adapters above except we make use of a four hole panel mount for the outside connector. L is dimensioned from the back of the flange to the interface of the internal connector. Use the part numbering system as shown.

**HOW TO SPECIFY:**

| Outside Conn. | Sex | Inside Conn. | Sex |
|---|---|---|---|
| P ( ) | ( ) | —L—( ) | ( ) |

Example: PNF ie a Panels N female to SMA male and L = 4 inches.

**PRICE**
**(for Bulkhead or Panel Types)**
**10 PIECES $25.00 EACH***

* These prices are for any combination between N, TNC, BNC, and SMA, SMB and SMC.

| | 90° E | E-1900 | 8.50 | | | | .193 | | |

The bends listed in this bulletin are part of an ever growing line of 90° and acute angle E and H castings. Material can be either dip-brazeable aluminum or a beryllium copper alloy suitable for silver brazing or soft soldering. All elbows are frequency compensated and have VSWR generally less than 1.05 over the waveguide band. E bends are designed with a radius on the inside corner to discourage arcing at high power levels. Bends can also be supplied pressure tight. **

A data sheet is available on each model. The data sheet gives complete information, including mechanical tolerances and typical VSWR.

Please specify the catalog number, the style (i.e. M1, M2, etc.) and material. Also advise if casting must be pressure tight.

* Add 20% for Be Cu. ** Add $1.00 or 10%, whichever is greater, for pressure tight bends.

- All Bends and Adapters are available in Dip Brazeable Aluminum or Beryllium Copper Alloy.
- VSWR is typically less than 1.05:1 over the full waveguide band.
- E Bends are designed with a radius on the inside corner to discourage arcing at high power levels.

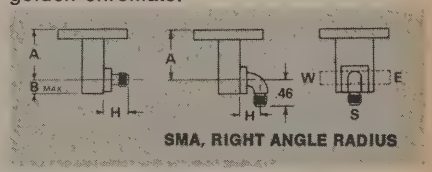
MIDISCO Coax To Waveguide Adapters are available as standard items in fourteen common waveguide sizes and with a choice of four connector styles. Standard material is aluminum and finish is golden chromate.



SMA, RIGHT ANGLE RADIUS

### NOTES ON SPECIALS AND MODIFICATIONS

When inquiring, specify restricted frequency ranges whenever possible for better performance or lower cost.

### WHEN ORDERING

Please specify flange type for sizes WR650 through WR137. CPR, CMR, and UG Series are standard. Right angle connectors will be tested in position "S" if orientation is not specified. All right angle SMA connectors are MIDISCO RRSF.

SPECIFICATIONS AND PRICES ARE SUBJECT TO CHANGE WITHOUT NOTICE.

# midisco cable assemblies

## right angle bent assembly

MIDISCO employs newly achieved bending techniques and the MIDISCO MDC1141 and MDC1085 Connectors to eliminate the need for conventional right angle SMA Connectors.

By mounting the MIDISCO connector to the semi-rigid cable and bending (90°) immediately at the plug entry, we obtain the basic dimensions of a right angle plug with performance of a straight connector.

**MIDISCO Part Numbers = Connector (A) — RG ( ) — Connector (B) — Length in Inches**

**EXAMPLE:**

**RNM - 58 - BF-36** is a 3-foot, RG58 Cable Assembly with a right angle Type N Male and a BNC Female. Price = $13.50 plus $3.00 for one right angle connector.

NOTES:
A. All connectors are (where possible) in accordance with MIL-C-39012.
B. Finish — Type N, TNC, BNC — Non-tarnish — Bright Alloy; SMA — Gold Plated.
C. Other cable and connector types are readily available.
D. Length — L equals overall length of cable assembly in inches.
F. For right angle connector, prefix connector part number with "R" and add $3.00 to cable assembly price for each right angle connector.
G. Bulkhead or Panel connectors available at additional cost.

COVER TYPE
0=Std. Flush
1=Extended (1); Flush (1)

MIDISCO's Connectorized Series consists of many standard case sizes, each having a top and bottom flush cover mounted in place with four screws (extended covers available), and a selection of three flange mounted "female" connectors (SMA, TNC, BNC). One nut plate is supplied with each connector which secures the connector to the case, and supports the circuit board providing an excellent ground plane. MIDISCO cases offer very easy accessibility to the circuit board. By removing the four screws, the top and bottom covers disengage to allow complete accessibility to both sides of the board.

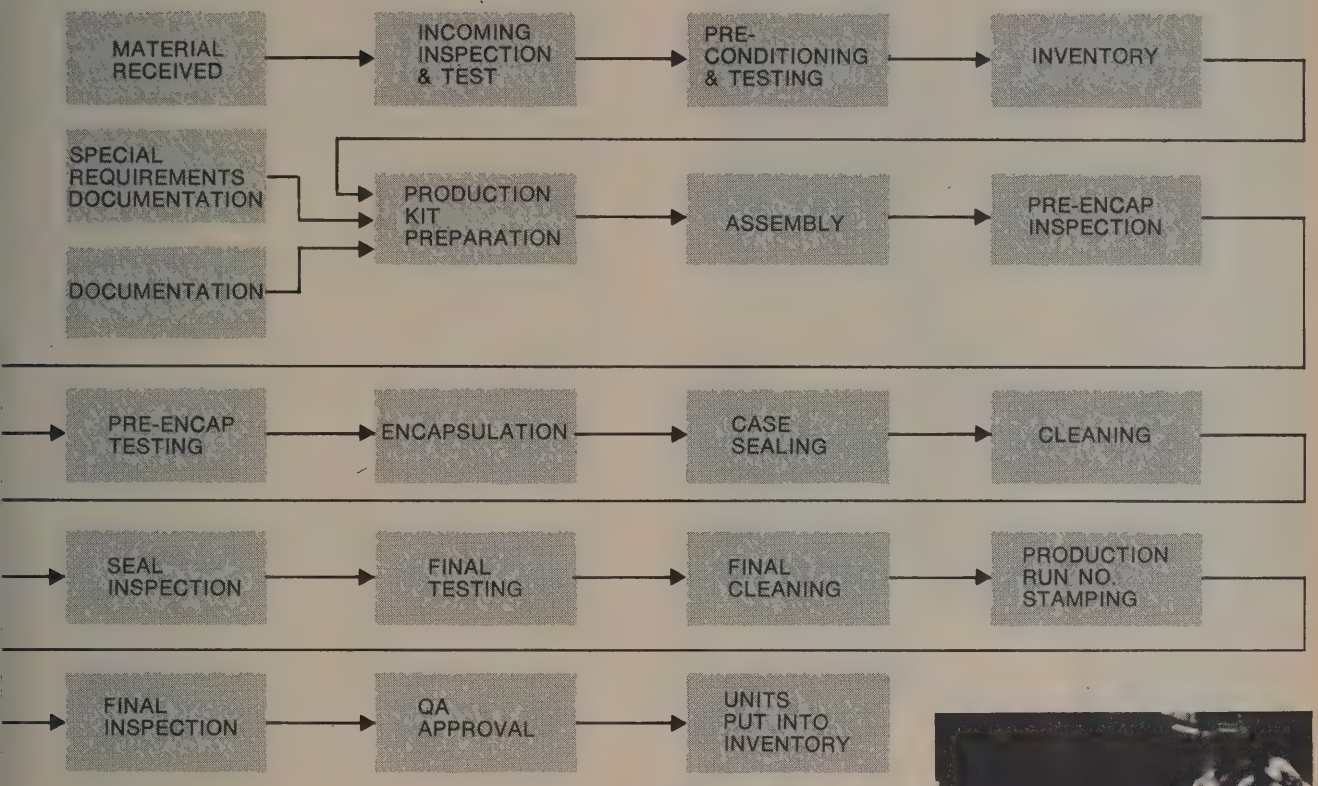
WORLD'S LARGEST MANUFACTURER OF DOUBLE-BALANCED MIXERS

Mini-Circuits Laboratory
*A Division of Scientific Components*

Mini-Circuits 2625 E. 14th St., Brooklyn, NY 11235 (212) 769-0200/Dom. Telex 125460/Int'l. Telex 620156

Mini-Circuits

# HERE'S HOW MINI-CIRCUITS ACHIEVES HIGH RELIABILITY



## Ordering Information

Your local representative or distributor is the contact for both sales and service assistance for products listed in this catalog. These local offices have the latest price and delivery information on all models. They can also provide details on ordering procedures, service information and application engineering data.

Your order may be sent directly to Mini-Circuits Laboratory or to any of the local sales offices.

Prices listed in this catalog are domestic F.O.B. Brooklyn, New York.

Mini-Circuits Laboratory reserves the right to change specifications, models, prices, or designs without prior notice and without liability for such changes.

## Shipping

Shipments can be made by either air or surface carriers. If specific shipping instructions do not accompany the order, Mini-Circuits Laboratory will specify the carrier to be used.

## Terms

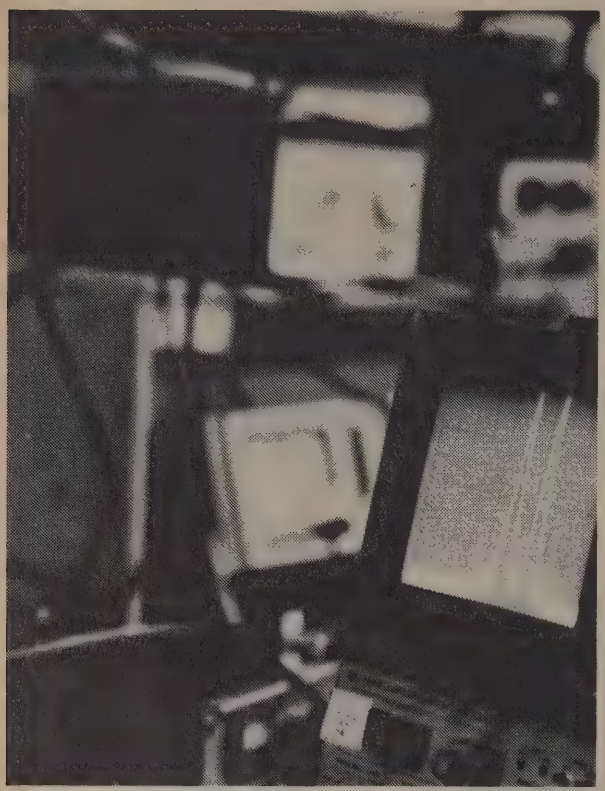
Net 30 days from date of invoice. If credit is not established with Mini-Circuits Laboratory, shipments will be made C.O.D. (cash on delivery) or prepaid. When sending prepayments please include freight.

## Warranty

Scientific Components Corporation, Mini-Circuits Laboratory division, warrants each new device to be free from defects in material and workmanship. The sellers obligation under this warranty is limited to repairing, or at his option, replacing any device or parts except tubes, semiconductors, lamps, fuses, or batteries, for any device returned to the sellers premise, transportation charges prepaid, within one year after delivery to the original purchaser, and which after examinations by the seller shall prove to be defective within the terms of the warranty. This warranty excludes all other warranties expressed or implied. Seller shall not be liable for any special, indirect, or consequential damages. This warranty does not extend to any device or part which in the opinion of the seller has been subjected to use in violation of seller's instructions or to any misuse, negligence, or accident.

PROMPT SERVICE / ONE WEEK DELIVERY Mini-Circuits

# RELIABILITY CONSIDERATIONS



**Performance characteristics are checked** to assure compliance with data-sheet specs.

It is very important that the mixer should provide reliable service under adverse environmental conditions. The user should also expect satisfactory performance after years of operation. Since these two criteria are somewhat subjective, the manufacturer should utilize procedures, techniques, and criterion which will enhance the reliability and quality of the finished product. After manufacturing hundreds of thousands of RF components Mini-Circuits is confident that we are doing the "right thing"

At Mini-Circuits reliability and quality control is one of the most important considerations in the manufacture of our products. Some of the procedures which are incorporated to ensure that every unit shipped has quality built in are as follows:

**A.** 100% testing of each diode.

**B.** 100% testing of each unit.

**C.** 100% inspection of every solder connection.

**D.** All transformers bonded to the header for protection against severe shock and vibration condition.

**Every single solder connection** is closely inspected to detect potential flaws.

**Transformer leads are doubly wrapped** to eliminate potential flaws.

**Mini-Circuits** 2625 E. 14th St., Brooklyn, NY 11235 (212) 769-0200/Dom. Telex 125460/Int'l. Telex 620156

# Mini-Circuits

**E.** All diodes, resistors and capacitors bonded to the header for protection against severe shock and vibration conditions.

**F.** Diode and resistor power dissipation derated greater than 50%.

**G.** All Components rated for greater than +125° C operation.

**H.** All transformer leads double wrapped.

**I.** Heavy coated wire insulation for Hi-Pot/ altitude requirements.

**J.** Completely encapsulated for protection against mechanical shock and vibration and temperature shock.

**K.** Permanent case marking of model number, cannot be removed by cleaning agents or ultrasonic baths.

**L.** Cupro-Nickel case for long lasting finish especially under salt atmosphere conditions.

As a consequence of these considerations Mini-Circuits guarantees its products for one full year after shipment and guarantees an SRA-1 high-rel double balanced mixer for 2 years!! In addition Mini-Circuits guarantees its units will meet the following environmental specifications.

**Matched diodes are carefully mounted** to the header assembly for rugged protection against severe shock and vibration.

**Every single solder connection is closely inspected** to detect potential flaws.

# ENVIRONMENTAL SPECIFICATIONS

All MCL components are manufactured under exacting quality assurance and control standards. They will meet or exceed published specifications over the operating temperature range of −54° to +100° C, and after being subjected to any or all of the following physical or environmental tests of MIL STD 202E which are applicable.

| | | |
|---|---|---|
| Temperature Cycling: | | |
| −65° to +125° C | 102 | C |
| Altitude: 656,000 feet | 105 | G |
| Humidity: 90% RH, 65° C | 106 | |
| Thermal Shock: | | |
| −65° C to +125° C | 107 | B |
| Seal: Less than $10^{-5}$ Atm. cc/sec | 112 | A |
| Drop: Random, 45 min. | 203 | |
| Vibration: | | |
| 2 to 2,000 cps, 20g, 12 hrs. | 204 | D |
| Solder Heat: 260° C, 10 sec. | 210 | B |
| Solderability: 95% coverage | 208 | |
| Terminal Tensile Strength: | | |
| 4½ lbs., 10 sec. | 211 | A |
| Terminal Fatigue: 2 lbs., 3 cycles | 211 | C |
| Mechanical Shock: 100g, 6ms | 213 | I |
| Solvent Resistance: | | |
| Alcohol, Trichloroethan, Freon | 215 | |

**DESCRIPTION** — Having a volume of only .128 cu. inches, the SRA series covers a very broad frequency range from 500 Hz to 2000 MHz. Offered at the lowest prices available in the industry, these rugged units provide low conversion loss, 6 dB, high isolation, 40 dB, and exceptional unit to unit matched performance.

Packaged within an RFI shielded metal enclosure and hermetically sealed header, these high performance units have their pins oriented on a 0.2 inch grid. Unit weight is .18 ounces (5.2 grams).

Only well matched hot carrier diodes and ruggedly constructed transmission line transformers are used. Internally, every component is bonded to the header and case with silicone rubber to provide super reliable protection against shock, vibration and acceleration.

## FEATURES

**Broadband:** 500 Hz to 2000 MHz
**Low Conversion Loss:** typically less than 6 dB
**High Isolation:** typically greater than 40 dB
**Miniature:** 0.128 in.$^3$, 0.4″ x 0.8″ PC area, 0.4″ high
**High Reliability:** 100% tested, 2 year guarantee SRA-1, 1 year guarantee all other models
**Low Cost:** as low as $9.95 in small quantity

## APPLICATIONS

- Frequency mixing
- Pulse and amplitude modulation
- Phase detection
- Current controlled attenuation
- Bi-phase modulation

## ABSOLUTE MAXIMUM RATINGS

- **Input Power:** 50 mW
- **Peak IF Input Current:** 40 mA
- **Operating and Storage Temp.:** −55°C to +100°C
- **Pin Temperature:** (10 sec.) 510°F
- **Environmental Specifications:** See Index Page

## * WHAT IS HTRB TESTING?

The model SRA-1 has become an industry standard through the world and is used by all branches of the Department of Defense, NASA, FAA, and every major communications company. In over 500 different military contracts, over a period of years, the SRA-1 has proven to be one of the most reliable mixers obtainable, even when considering high priced models.

Schottky-diodes selected for high-reliability mixer service are deliberately stressed to accelerate aging and thus force temperature related failure modes to take their toll. In the HTRB (High Temperature Reverse Bias) technique, the diode is operated at 168 hours at 150°C with 1-V reverse bias applied.

In conventional testing, or "baking", the diode does not experience anywhere near the stress encountered with the HTRB program. Thus, the HTRB process screens out potentially unreliable diodes before they are assembled into completed Hi-rel mixers.

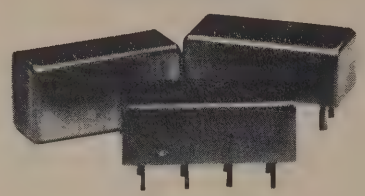
## SBL SERIES



| MODEL | FREQUENCY | Z (Ohms) | COST |
|---|---|---|---|
| SBL-1 | 1 MHz-500 MHz | 50 | $3.95 (10-49) |
| SBL-1X | 10 MHz-1000 MHz | 50 | $4.95 (10-49) |

### FEATURES

**Broadband:** 1 MHz to 1000 MHz
**Low Conversion Loss:** typically less than 6 dB
**High Isolation:** typically greater than 40 dB
**Miniature:** 0.096 in.$^3$, 0.4″ x 0.8″ PC area, 0.3″ high
**High Reliability:** 100% tested, 1 year guarantee
**Low Cost:** as low as $3.95 in small quantity

### APPLICATIONS

- Frequency mixing
- Pulse and amplitude modulation
- Phase detection
- Current controlled attenuation
- Bi-phase modulation

### ABSOLUTE MAXIMUM RATINGS

- **Input Power:** 50 mW
- **Peak IF Input Current:** 40 mA
- **Operating and Storage Temp.:** −20°C to +85°C
- **Pin Temperature:** (10 sec.) 510°F
- **Environmental Specifications:** See Index Page

**DESCRIPTION** — For demanding industrial and commercial applications, where low-cost and high-performance are critical; Series SBL will fill your need. Don't let the low price mislead you. As the world's number one manufacturer of double-balanced mixers, Mini-Circuits' has accumulated extensive experience in high-volume production and testing, a key factor in achieving a successful low-cost/high-performance line of products. The tough SBL covers the broad frequency range of 1-1000 MHz with 6 dB conversion loss and isolation greater than 40 dB. Only well-matched hot-carrier diodes and ruggedly constructed transmission-line transformers are used. Internally, every component is bonded to the header for excellent protection against shock, vibration and acceleration. Weight is .18 oz. (5.2 grams).

Here are some of the steps taken to ensure quality: Every SBL is RF tested two times, every solder connection is 100 per cent inspected under high power microscopes, all transformer leads are double-wrapped, and all components are rated for more than +85°C operation. Of course, our one-year guarantee applies to these units.

| TAK-9 | 5 MHz-1250 MHz | 50 | $21.95 (1-4) |

**DESCRIPTION** — Only 0.2 inches high, the low profile TAK series of double balanced mixers cover a very broad frequency range from 10 KHz to 1250 MHz. Exhibiting a flat conversion loss, these low profile units have a conversion loss typically 5.5 dB and isolation typically greater than 40 dB.

Packaged within an RFI shielded metal enclosure and hermetically sealed header, this low profile unit is only .064 cubic inches. The TAK series has its 8 pins located on a 0.2 inch grid. Unit weight is .13 ounces (3.7 grams).

Internal components include well matched hot-carrier diodes and extra wideband transmission line transformers supported with silicone rubber for vibration and shock requirements.

| TFM-15 | 10 MHz-3000 MHz | 50 | $49.95 (1-9) |

### FEATURES

**Broadband:** 40 KHz to 3000 MHz
**Low Conversion Loss:** typically less than 6 dB
**High Isolation:** typically greater than 45 dB
**Microminiature Flatpack:** 0.025 in.$^3$, 0.1″ x 0.1″ PC area, 0.25″ high
**High Reliability:** 100% tested, 1 year guarantee
**Low Cost:** as low as $11.95 in small quantity

### APPLICATIONS

- Frequency mixing
- Pulse and amplitude modulation
- Phase detection
- Current controlled attenuation
- Bi-phase modulation

### ABSOLUTE MAXIMUM RATINGS

- **Input Power:** 50 mW
- **Peak IF Input Current:** 40 mA
- **Operating and Storage Temp.:** −55°C to +100°C
- **Pin Temperature:** (10 sec.) 510°F
- **Environmental Specifications:** See Index Page

**DESCRIPTION** — The TFM microminiature series offers a number of significant advantages over other available models: (1) versatility in mounting configuration, (2) simpler PC layout and wiring, (3) smaller size and (4) very low cost. The TFM series covers the 40 KHz-3000 MHz range and features wide bandwidth, isolation greater than 45 dB and conversion loss of 6 dB.

The TFM units require less PC area than a flatpack or TO-5 can. Unit weight is .07 ounces 1.8 grams. Use the TFM series to solve your tight space problems. Take advantage of the mounting versatility — plug it upright on a PC board or mount it sideways as a flatpack. Simplify PC layout and reduce board connections with the TFM series . . . **only four pins have to be wired.**

Packaged within an EMI shielded metal enclosure and hermetically sealed header (enclosure is 0.5 by 0.2 by 0.2 in.) the TFM series exhibits a typical noise figure of just ½ to 1 dB greater than its conversion loss. It's pins are oriented on a 0.1 inch grid for PC board mounting.

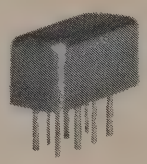
## TSM SERIES



| MODEL | FREQUENCY | Z (Ohms) | COST |
|---|---|---|---|
| TSM-1 | 1 MHz-500 MHz | 50 | $16.95 (5-24) |
| TSM-3 | 0.1 MHz-400 MHz | 50 | $18.95 (5-24) |

**DESCRIPTION** —Representing a performance and price breakthrough in microminiature low profile double balanced mixers, the TSM series covers the frequency range 100 KHz to 500 MHz.

Although smaller than mixers presently available, the TSM series offers extra wide bandwidth, low conversion loss, and high isolation. These tiny units have isolation of greater than 55 dB and conversion loss of 5.5 dB. The TSM units require less PC area than a flat-pack or TO-5 can. Unit weight is .07 ounces (1.8 grams).

Packaged within an EMI shielded metal enclosure and hermetically sealed header (enclosure is 0.5 by 0.2 by 0.25 in.) The TSM series exhibits a typical noise figure of just ½ to 1 dB greater than its conversion loss. Its pins are oriented on a 0.1 inch grid for printed circuit board mounting.

Only well matched hot-carrier diodes and rugged transmission line transformers are used. Internally, silicone rubber is incorporated as an insulator against any wire shorts and to provide protection against shock and vibration.

### FEATURES

**Broadband:** .1 MHz to 500 MHz
**Low Conversion Loss:** typically less than 5.5 dB
**High Isolation:** typically greater than 55 dB
**Microminiature:** 0.025 in.$^3$, 0.5″ x 0.23″ PC area, 0.25″ high
**High Reliability:** 100% tested, 1 year guarantee
**Low Cost:** as low as $16.95 in small quantity

### APPLICATIONS

- Frequency mixing
- Pulse and amplitude modulation
- Phase detection
- Current controlled attenuation
- Bi-phase modulation

### ABSOLUTE MAXIMUM RATINGS

- **Input Power:** 50 mW
- **Peak IF Input Current:** 40 mA
- **Operating and Storage Temp.:** −55°C to +100°C
- **Pin Temperature:** (10 sec.) 510°F
- **Environmental Specifications:** See Index Page

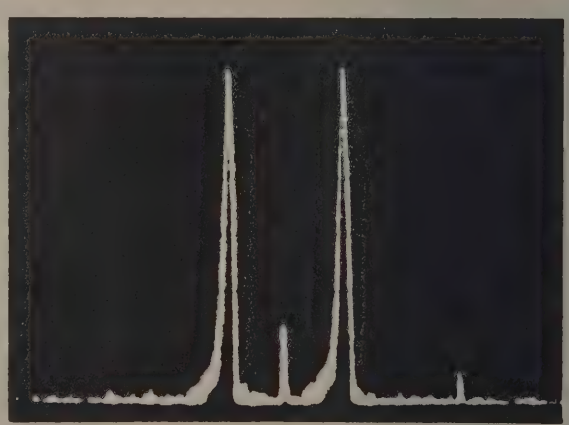
## BALANCED MODULATOR

For double-sideband, suppressed-carrier applications, the balanced mixer is used with the carrier, signal $f_c$, applied to the R port and the modulating signal, $f_m$, applied to the IF port. In this balanced modulator configuration, the output signal composed of the $f_m$ signal centered on the suppressed carrier $f_c$, is taken from the L.O. port.

The high isolation of Mini-Circuits mixers enable higher, 40 dB, suppression of the carrier while the undesired higher-order sidebands are almost totally removed.



Vertical: 10 dB/Div. Horizontal: 1 MHz/Div.

## Pulse and Amplitude Modulation

For amplitude modulator applications, the carrier, $f_c$, is applied to the R input while the modulating signal, $f_m$, is routed to the I.F. port. A dc current is also fed to the I.F. port and its setting determines the quiescent point on the amplitude vs control current curve. The modulated output is taken from the L.O. port.

Another approach involves the use of a balanced modulator arrangement with the carrier reinserted at the mixer output, as shown. Improved control of modulation index as well as lower distortion is offered by this technique versus the variable bias approach.

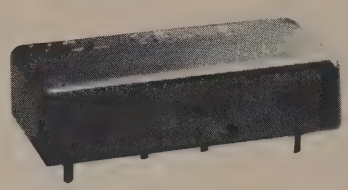
## GRA SERIES



| MODEL | FREQUENCY | Z (Ohms) | COST |
|---|---|---|---|
| GRA-1 | 0.5 MHz-500 MHz | 50 | $10.95 (6-49) |
| GRA-3 | 0.25 MHz-200 MHz | 50 | $13.95 (6-49) |
| GRA-6 | 3 KHz -100 MHz | 50 | $20.95 (5-24) |
| GRA-8 | 500 Hz -10 MHz | 50 | $25.95 (5-24) |

**DESCRIPTION** — These double-balanced mixers are exact mechanical and electrical replacements for existing designs, see table. Offered at the lowest price available in the industry these rugged units provide low conversion loss, 6 dB, high isolation 40 dB and exceptional unit to unit matched performance. The units are packaged within an RFI shielded metal enclosure and hermetically sealed header.

Ruggedness and durability are built into the GRA series. Only well matched hot-carrier diodes and ruggedly constructed transmission line transformers are used. Internally every component is bonded to the header and case with silicone rubber to provide super reliable protection against shock, vibration and acceleration.

High reliability is associated with every GRA series mixer. Every production run is 100% tested and every unit must pass our rigid inspection and high quality standards. Naturally, our 1 year guarantee applies to these units.

### REPLACEMENT TABLE

| Use Mini-Circuits | To replace |

NATIONAL STANDARD NUMBER ZAD-1B NSN-5985-00-280-7750

**DESCRIPTION** — The ZAD series mixers are economically priced while covering the very broad frequency range from 500 Hz to 2000 MHz. They offer low conversion loss, 6 dB, high isolation, 40 dB, and exceptional unit to unit matched performance.

BNC connectors are standard. TNC connectors are a no-cost option.

These rugged units are double shielded to meet tough RFI requirements. The die-cast aluminum case is finished with a blue baked enamel per Federal Standard 595 #25109 over phosphoric etch per MIL-C-15328A. Unit weight is 2.6 ounces (74 grams).

Only well matched hot-carrier diodes and ruggedly constructed transmission line transformers are used. Internally, every component is bonded with silicone rubber to provide protection against shock, vibration and acceleration.

## FEATURES

**Broadband:** 500 Hz to 2000 MHz
**Low Conversion Loss:** typically less than 6 dB
**High Isolation:** typically greater than 40 dB
**Compact:** 2.25″ W, 1.15″ D, 1.4″ H
**High Reliability:** 100% tested, 1 year guarantee
**Low Cost:** as low as $24.95 in small quantity

## APPLICATIONS

- Frequency mixing
- Pulse and amplitude modulation
- Phase detection
- Current controlled attenuation
- Bi-phase modulation

## ABSOLUTE MAXIMUM RATINGS

- **Input Power:** 50 mW
- **Peak IF Input Current:** 40 mA
- **Operating and Storage Temp.:** −55°C to +100°C
- **Environmental Specifications:** See Index Page

## *WHAT IS HTRB TESTING?

The model ZAD-1 has become an industry standard through the world and is used by all branches of the Department of Defense, NASA, FAA, and every major communications company. In over 500 different military contracts, over a period of years, the ZAD-1 has proven to be one of the most reliable mixers obtainable, even when considering high priced models.

Schottky-diodes selected for high-reliability mixer service are deliberately stressed to accelerate aging and thus force temperature related failure modes to take their toll. In the HTRB (High Temperature Reverse Bias) technique, the diode is operated at 168 hours at 150°C with 1-V reverse bias applied.

In conventional testing, or "baking", the diode does not experience anywhere near the stress encountered with the HTRB program. Thus, the HTRB process screens out potentially unreliable diodes before they are assembled into completed Hi-rel mixers.

## ZFM SERIES

| MODEL | FREQUENCY | Z (Ohms) | COST |
|---|---|---|---|
| ZFM-2 | 1 MHz-1000 MHz | 50 | $41.95 (4-24) |
| ZFM-3 | 40 KHz -400 MHz | 50 | $49.95 (1-24) |
| ZFM-4 | 5 MHz-1250 MHz | 50 | $49.95 (1-24) |
| ZFM-11 | 1 MHz-2000 MHz | 50 | $79.95 (1-24) |
| ZFM-12 | 800 MHz-1250 MHz | 50 | $69.95 (1-24) |
| ZFM-15 | 10 MHz-3000 MHz | 50 | $79.95 (1-9) |

**DESCRIPTION** — The ZFM series mixers are economically priced while covering the very broad frequency range from .04-3000 MHz. They offer low conversion loss 6 dB, high isolation 40 dB, and exceptional unit to unit matched performance.

This series is housed in an extremely rugged 1¼ in. square metal case with one connector on each of three sides.

BNC connectors are standard. TNC connectors a no-cost option, must be specified. Either SMA (3mm) or Type N connectors can be specified at an added cost of $5.00 per unit. Unit weight with BNC connectors is 1.92 ounces (54.5 grams).

Case finish is grey epoxy paint.

## DIMENSIONS AND CONNECTIONS

**MOUNTING OPTIONS:** Two .125" (31.8mm) thruholes standard. Two 4-40 tapped holes optional at no cost. Add suffix A to part number. Mounting bracket on request. Add suffix B and $1.50 to unit price.

**CONNECTORS:** BNC standard. Specify TNC at no cost if required. Either SMA (3mm) or Type N can be specified at an added cost of $5.00 per unit.

**WEIGHT** 54.5 grams 1.92 ounces

## FEATURES

**Broadband:** 40 KHz to 3000 MHz
**Low Conversion Loss:** typically less than 6 dB
**High Isolation:** typically greater than 40 dB
**Low Profile:** 1.25" W, 1.25" D, 0.75" H
**High Reliability:** 100% tested, 1 year guarantee
**Low Cost:** as low as $41.95 in small quantity

## APPLICATIONS

- Frequency mixing
- Pulse and amplitude modulation
- Phase detection
- Current controlled attenuation
- Bi-phase modulation

## ABSOLUTE MAXIMUM RATINGS

- **Input Power:** 50 mW
- **Operating and Storage Temp.:** −55°C to +100°C
- **Peak IF Input Current:** 40 mA
- **Environmental Specifications:** See Index Page

| NATIONAL STANDARD NUMBER | ZLW-1W | NSN-5840-00-607-7010 | |

**DESCRIPTION** — The ZLW series mixers are economically priced while covering the very broad frequency range from 500 Hz to 2000 MHz. They offer low conversion loss, 6 dB, high isolation, 40 dB, and exceptional unit to unit matched performance.

Available with SMA (3mm) connectors the ZLW series is housed in a die cast aluminum case. These rugged units are double shielded to meet tough RFI requirements. The case is finished with a blue baked enamel per Federal Standard 595 #25109 over phosphoric etch per MIL-C-15328A. Unit weight is 1.02 ounces (34 grams).

Only well matched hot-carrier diodes and ruggedly constructed transmission line transformers are used. Internally, every component is bonded with silicone rubber to provide protection against shock, vibration and acceleration.

## FEATURES

**Broadband:** 500 Hz to 3000 MHz
**Low Conversion Loss:** typically less than 6 dB
**High Isolation:** typically greater than 40 dB
**Miniature:** 1.5″ W, 0.88″ D, 1.15″ H
**High Reliability:** 100% tested, 2 year guarantee ZLW-1, 1 year guarantee all other models
**Low Cost:** as low as $34.95 in low quantity

## APPLICATIONS

- Frequency mixing
- Pulse and amplitude modulation
- Phase detection
- Current controlled attenuation
- Bi-phase modulation

## ABSOLUTE MAXIMUM RATINGS

- **Input Power:** 50 mW
- **Peak IF Input Current:** 40 mA
- **Operating and Storage Temp.:** −55°C to +100°C
- **Environmental Specifications:** See Index Page

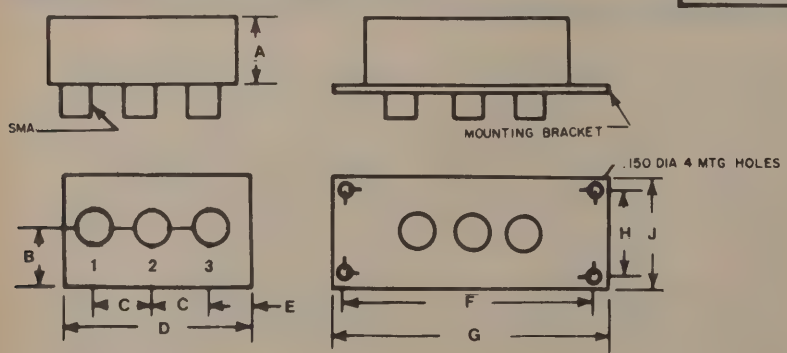
## *WHAT IS HTRB TESTING?

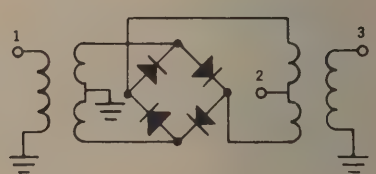
The model ZLW-1 has become an industry standard through the world and is used by all branches of the Department of Defense, NASA, FAA, and every major communications company. In over 500 different military contracts, over a period of years, the ZLW-1 has proven to be one of the most reliable mixers obtainable, even when considering high priced models.

Schottky-diodes selected for high-reliability mixer service are deliberately stressed to accelerate aging and thus force temperature related failure modes to take their toll. In the HTRB (High Temperature Reverse Bias) technique, the diode is operated at 168 hours at 150°C with 1-V reverse bias applied.

In conventional testing, or "baking", the diode does not experience anywhere near the stress encountered with the HTRB program. Thus, the HTRB process screens out potentially unreliable diodes before they are assembled into completed Hi-rel mixers.

## DIMENSIONS AND CONNECTIONS





**MOUNTING BRACKET AVAILABLE ON REQUEST.** Add suffix B to part number and $1.50 to unit cost.

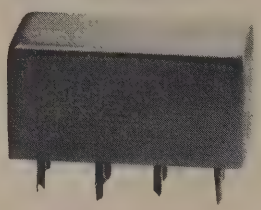
## SRA-H SERIES



| MODEL | FREQUENCY | Z (Ohms) | COST |
|---|---|---|---|
| * SRA-1H | 0.5 MHz-500 MHz | 50 | $15.95 (5-24) |
| * SRA-1WH | 1 MHz-750 MHz | 50 | $19.95 (5-24) |
| SRA-2H | 2 MHz-1000 MHz | 50 | $29.95 (5-24) |
| * SRA-3H | 50 KHz-200 MHz | 50 | $17.95 (5-24) |
| SRA-11H | 10 MHz-3000 MHz | 50 | $49.95 (1-24) |
| NATIONAL STANDARDS NUMBER | SRA-1H | NSN-6625-00-594-0223 | |
| | SRA-1WH | NSN-5840-00-576-0716 | |

**DESCRIPTION** — Having a volume of only 0.1 cu. inches, the SRA-H series covers a broad frequency range from 50 KHz to 3000 MHz. Designed to solve severe intermodulation distortion problems, the SRA-H series offers linear operation up to +10 dBm signal input at only 1 dB of compression. Reducing all higher order signal harmonic IMD, the SRA-H series provides a conversion loss of typically 6 dB and isolation of greater than 40 dB.

Packaged within an RFI shielded metal enclosure and hermetically sealed header, this tiny unit has its 8 pins located on a 0.2 inch grid. Unit weight is .18 ounces (5.2 grams).

Internal components include well matched hot-carrier diodes and very broadband, low distortion transformers. Supported with silicone rubber, the SRA-H series withstands high shock, vibration and acceleration environments.

### FEATURES

**Broadband:** 50 KHz to 3000 MHz
**Low Conversion Loss:** typically less than 6 dB
**High Isolation:** typically greater than 40 dB
**Miniature:** 0.128 in.$^3$, 0.4" x 0.8" PC area, 0.4" high
**High Reliability:** 100% tested, 2 year guarantee SRA-1H, -1WH, -3H, 1 year guarantee all other models
**Low Cost:** as low as $15.95 in small quantity

### APPLICATIONS

- Frequency mixing
- Pulse and amplitude modulation
- Phase detection
- Current controlled attenuation
- Bi-phase modulation

### ABSOLUTE MAXIMUM RATINGS

- **Input Power:** 500 mW
- **Peak IF Input Current:** 40 mA
- **Operating and Storage Temp.:** −55°C to +100°C
- **Pin Temperature:** (10 sec.) 510°F
- **Environmental Specifications:** See Index Page

### *HTRB TESTING MODELS SRA-1H, SRA-1WH, SRA-3H

Schottky-diodes selected for high-reliability mixer service are deliberately stressed to accelerate aging and thus force temperature related failure modes to take their toll. In the HTRB (High Temperature Reverse Bias) technique, the diode is operated at 168 hours at 150°C with 1-V reverse bias applied.

In conventional testing, or "baking", the diode does not experience anywhere near the stress encountered with the HTRB program. Thus, the HTRB process screens out potentially unreliable diodes before they are assembled into completed Hi-rel mixers.

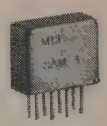
## SAM-H SERIES



| MODEL | FREQUENCY | Z (Ohms) | COST |
|---|---|---|---|
| SAM-1H | 1 MHz-600 MHz | 50 | $19.95 (5-24) |
| SAM-2H | 5 MHz-1000 MHz | 50 | $34.95 (1-24) |
| SAM-3H | 0.1 MHz-500 MHz | 50 | $19.95 (5-24) |

**DESCRIPTION** — Representing a performance and price breakthrough in microminiature double balanced mixers, the SAM-H series covers the frequency range 100 KHz to 1000 MHz. Although smaller than mixers presently available, the SAM-H series offers extra wide bandwidth, low conversion loss, and high isolation. These tiny units have isolation of greater than 55 dB and conversion loss of 6.0 dB. The SAM-H units require less PC area than a flatpack or TO-5 can. Unit weight is .07 ounces (1.9 grams).

Packaged within an EMI shielded metal enclosure and hermetically sealed header (enclosure is 0.5 by 0.2 by 0.4 in.) the SAM-H series exhibits a typical noise figure of just ½ to 1 dB greater than its conversion loss. Its pins are oriented on a 0.1 inch grid for printed circuit board mounting.

Only well matched hot-carrier diodes and rugged transmission line transformers are used. Internally, silicone rubber is incorporated as an insulator against any wire shorts and to provide protection against shock and vibration.

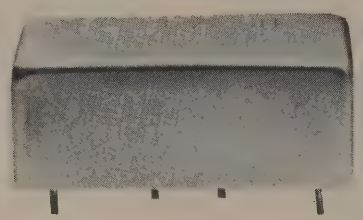
## GRA-H SERIES



| MODEL | FREQUENCY | Z (Ohms) | COST |
|---|---|---|---|
| GRA-1H | 0.5 MHz-500 MHz | 50 | $16.95 (5-24) |
| GRA-3H | 50 KHz -200 MHz | 50 | $18.95 (5-24) |

**DESCRIPTION** — The high level GRA-H series covers a broad frequency range from 500 Hz to 500 MHz. Designed to solve severe intermodulation distortion problems, the GRA-H series offers linear operation up to +10 dBm signal input at only 1 dB of compression. Reducing all higher order signal harmonic IMD, the GRA-H series provides a conversion loss of typically 6 dB and isolation of greater than 40 dB.

Packaged within an RFI shielded metal enclosure and hermetically sealed header, this tiny unit has its 6 pins located for exact replacement in existing designs for models shown in table.

Ruggedness and durability are built-in features. Internal components include well matched hot-carrier diodes and very broad band, low distortion transformers. Supported with silicone rubber, the GRA-H series withstands high shock, vibration and acceleration environments.

Naturally our 1 year guarantee applies to these units.

## FEATURES

**Broadband:** 500 Hz to 500 MHz

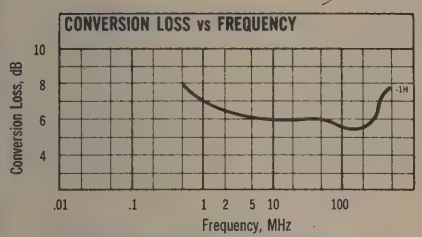
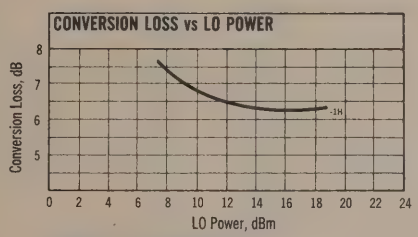
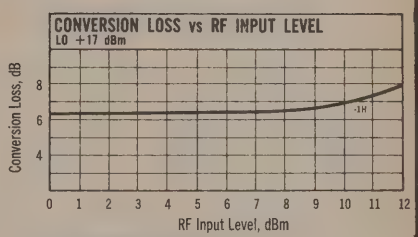
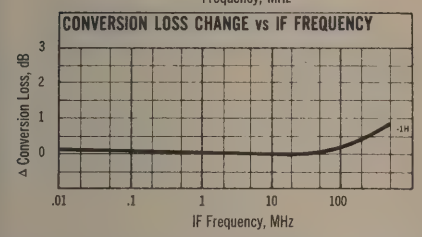
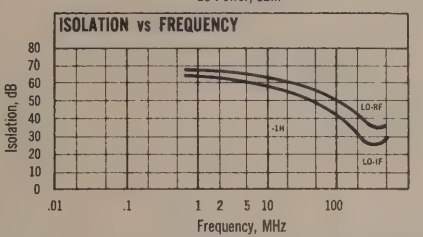
## MODEL GRA-1H

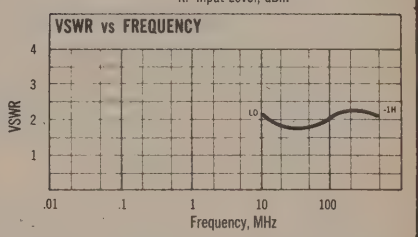




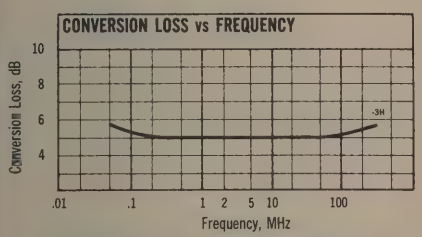


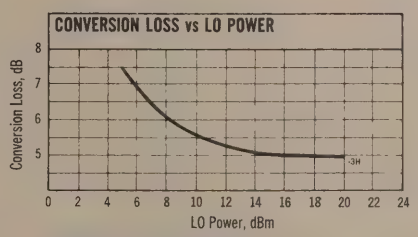


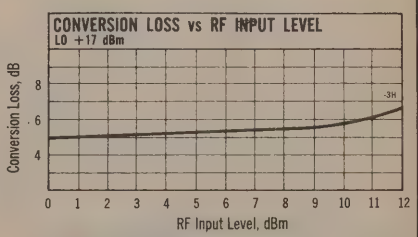


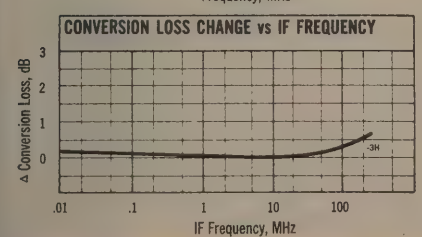


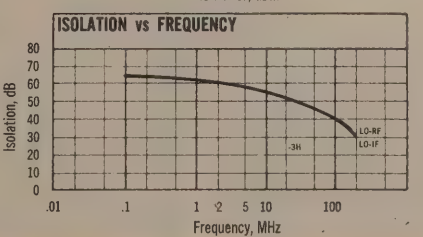
## MODEL GRA-3H

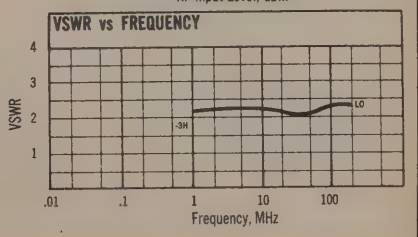








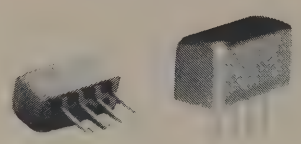




# High Level (+17dBm LO) DOUBLE-BALANCED MIXERS

SUPER LOW DISTORTION

## TFM-H SERIES



| MODEL | FREQUENCY | Z(Ohms) | COST |
|---|---|---|---|
| TFM-1H | 2 - 500 MHz | 50 | $23.95 (5-24) |
| TFM-2H | 5 - 1000 MHz | 50 | $31.95 (5-24) |
| TFM-3H | 0.1 - 250 MHz | 50 | $23.95 (5-24) |

**DESCRIPTION** —These new super low distortion mixers represent the new generation of high performance mixers. The TFM-H series are the only units in the world offering a guaranteed 55 dB intermod. spec. in a microminiature package — at only $23.95.

The TFM-H units require less PC area than a flatpack or TO-5 features wide bandwidth, isolation greater than 55 dB and conversion loss of 6 dB.

The TFM units require less PC area than a flatpack or TO-5 can. Take advantage of the mounting versatility — plug it upright on a PC board or mount it sideways as a flatpack. Simplify PC layout and reduce board connections with the TFM-H series . . . **only four pins have to be wired.**

Packaged within an EMI shielded metal enclosure and hermetically sealed header, a typical noise figure is just ½ to 1 dB greater than its conversion loss. Its pins are oriented on a 0.1 inch grid for PC board mounting.

One year guarantee, of course.

## TAK-H SERIES

| MODEL | FREQUENCY | Z (Ohms) | COST |
|---|---|---|---|
| TAK-1H | 2 - 500 MHz | 50 | $19.95 (5-24) |
| TAK-1WH | 5 - 750 MHz | 50 | $23.95 (5-24) |
| TAK-3H | 50 KHz - 300 MHz | 50 | $21.95 (5-24) |

**DESCRIPTION** — These new super low distortion mixers offer state-of-the-art performance while still being economically priced. These are the only units in the world offering a guaranteed 55 dB intermod. spec. in a low profile package — at only $19.95.

Only .25 inches high, the low profile TAK-H series of double balanced mixers covers a very broad frequency range from 50 KHz to 750 MHz. Exhibiting a flat conversion loss, these low profile units are designed to operate with a 50 ohm impedance at all ports. Conversion loss is typ. 6 dB and isolation is typ. greater than 55 dB.

Packaged within a RFI shielded metal enclosure and hermetically sealed header, this low profile unit is only .064 cubic inches. The TAK-H series has its 8 pins located on a 0.2 inch grid.

High reliability is characteristic of the TAK-H series. Each unit carries with it a one year guarantee by Mini-Circuits.

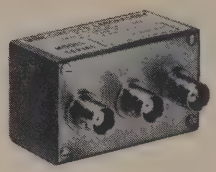
# High Level (+17 dBm LO) DOUBLE-BALANCED MIXERS

## ZAD-H SERIES



| MODEL | FREQUENCY | Z (Ohms) | COST |
|---|---|---|---|
| * ZAD-1H | 0.5 MHz-500 MHz | 50 | $30.95 (4-24) |
| * ZAD-1WH | 1 MHz-750 MHz | 50 | $34.95 (4-24) |
| ZAD-2H | 2 MHz-1000 MHz | 50 | $44.95 (4-24) |
| * ZAD-3H | 50 KHz -200 MHz | 50 | $32.95 (4-24) |
| ZAD-11H | 10 MHz-3000 MHz | 50 | $79.95 (1-24) |

**DESCRIPTION** — The ZAD-H series mixers cover a broad frequency range from 50 KHz to 3000 MHz. Solving severe intermodulation distortion problems, the ZAD-H series offers linear operation up to +10 dBm signal input at only 1 dB of compression. Reducing all higher order signal harmonic IMD, the ZAD-H series provides a conversion loss of typically 6 dB and isolation of greater than 40 dB.

BNC connectors are standard. TNC connectors are a no-cost option.

The ZAD-H series is housed in a die cast aluminum case. These rugged units are double shielded to meet tough RFI requirements. The case is finished with a blue baked enamel per Federal Standard 595 #25109 over phosphoric etch per MIL-C-15328A. Unit weight is 2.6 ounces (74 grams).

Only well matched hot-carrier diodes and ruggedly constructed low distortion transformers are used. Internally, every component is bonded with silicone rubber to provide protection against shock, vibration and acceleration.

### FEATURES

**Broadband:** 50 KHz to 3000 MHz
**Low Conversion Loss:** typically less than 6 dB
**High Isolation:** typically greater than 40 dB
**Compact:** 2.25″ W, 1.15″ D, 1.4″ H
**High Reliability:** 100% tested, 1 year guarantee
**Low Cost:** as low as $30.95 in small quantity

### APPLICATIONS

- Frequency mixing
- Pulse and amplitude modulation
- Phase detection
- Current controlled attenuation
- Bi-phase modulation

### ABSOLUTE MAXIMUM RATINGS

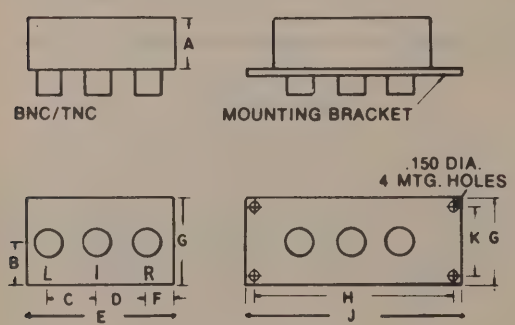
- **Input Power:** 500 mW
- **Peak IF Input Current:** 40 mA
- **Operating and Storage Temp.:** −55°C to +100°C
- **Environmental Specifications:** See Index Page

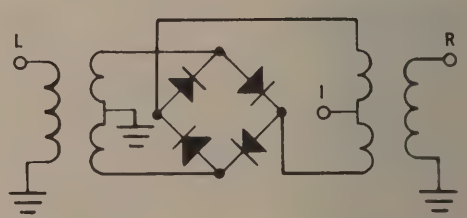
### *HTRB TESTING MODELS ZAD-1H, ZAD-1WH, ZAD-3H

Schottky-diodes selected for high-reliability mixer service are deliberately stressed to accelerate aging and thus force temperature related failure modes to take their toll. In the HTRB (High Temperature Reverse Bias) technique, the diode is operated at 168 hours at 150°C with 1-V reverse bias applied.

In conventional testing, or "baking", the diode does not experience anywhere near the stress encountered with the HTRB program. Thus, the HTRB process screens out potentially unreliable diodes before they are assembled into completed Hi-rel mixers.

### DIMENSIONS AND CONNECTIONS





**NOTE:** For Model -11H connector/terminal I is at DC ground through an inductance.

**MOUNTING BRACKET AVAILABLE ON REQUEST.** Add suffix B to part number and $1.50 to unit cost.
**CONNECTORS:** BNC standard. TNC on request (no charge).

## ZFM-H SERIES

| MODEL | FREQUENCY | Z (Ohms) | COST |
|---|---|---|---|
| ZFM-1H | 2 - 500 MHz | 50 | $53.95 (1-24) |
| ZFM-2H | 5 - 1000 MHz | 50 | $61.95 (1-24) |
| ZFM-3H | 50 KHz - 300 MHz | 50 | $54.95 (1-24) |

**DESCRIPTION** — The ZFM-H series are state-of-the-art low distortion mixers. Economically priced they cover the very broad frequency range from 0.05 MHz to 1000 MHz. They offer low conversion loss, 6 dB, high isolation 55 dB, and exceptional unit to unit matched performance.

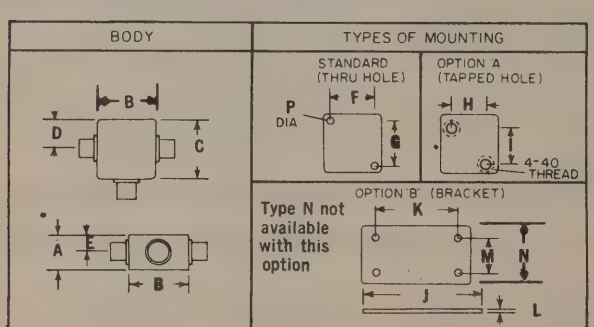
This series is housed in an extremely rugged 1¼ in. square metal case with one connector on each of three sides.

BNC connectors are standard. TNC connectors a no-cost option, must be specified. Either SMA (3mm) or Type N connectors can be specified at an added cost of $5.00 per unit. Unit weight with BNC connectors is 1.92 ounces (54.5 grams).

Case finish is grey epoxy paint.

Every unit is 100% tested and carries a one-year guarantee.

## DIMENSIONS AND CONNECTIONS



**MOUNTING OPTIONS:** Two .125″ (31.8mm) thruholes standard. Two 4-40 tapped holes optional at no cost. Add suffix A to part number. Mounting bracket on request. Add suffix B and $1.50 to unit price.

**CONNECTORS:** BNC standard. Specify TNC at no cost if required. Either SMA (3mm) or Type N can be specified at an added cost of $5.00 per unit.

**WEIGHT** 54.5 grams 1.92 ounces

## FEATURES

**Broadband:** 50 KHz to 1000 MHz
**Ultra-Low Distortion:** 1 dB compression at +15 dBm RF
**Low Conversion Loss:** Typically less than 6 dB
**High Isolation:** Typically greater than 55 dB
**Low Profile:** 1.25″ W, 1.25″ D, .75″ H
**Low Cost:** As low as $53.95 in small quantity

## APPLICATIONS

- Frequency mixing
- Pulse and amplitude modulation
- Phase detection
- Current controlled attenuation
- Fast switching
- Bi-phase modulation

## ABSOLUTE MAXIMUM RATINGS

- **Input Power:** 100 mW
- **Peak IF Input Current:** 20 mA
- **Operating and Storage Temp.:** −55°C to +100°C
- **Environmental Specifications:** See Index Page

## ZAD-SH SERIES

| MODEL | FREQUENCY | Z (Ohms) | COST |
|---|---|---|---|
| ZAD-1SH | 2 - 500 MHz | 50 | $40.95 (4-24) |
| ZAD-1WSH | 5 - 750 MHz | 50 | $44.95 (4-24) |
| ZAD-3SH | 50 KHz - 300 MHz | 50 | $42.95 (4-24) |

**DESCRIPTION** — The ZAD-SH series are state-of-the-art low distortion mixers. Economically priced they cover the very broad frequency range from 50 KHz to 750 MHz. They offer low conversion loss, 6 dB, high isolation 55 dB, and exceptional unit to unit matched performance.

Available with BNC or TNC connectors the ZAD-SH series is housed in a die cast aluminum case. These rugged units are double shielded to meet tough RFI requirements. The case is finished with a blue baked enamel per Federal Standard 595 #25109 over phosphoric etch per MIL-C-15328A.

Ruggedness and durability are built into the ZAD-SH series. Only well matched hot-carrier diodes and ruggedly constructed transmission line transformers are used. Internally, every component is bonded with silicone rubber to provide protection against shock, vibration, and acceleration.

Every unit is 100% tested and carries a one-year guarantee.

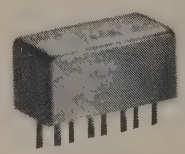
# Very High Level (+23 dBm LO) DOUBLE-BALANCED MIXERS

## RAY SERIES



| MODEL | FREQUENCY | Z (Ohms) | COST |
|---|---|---|---|
| RAY-1 | 5 MHz-500 MHz | 50 | $31.95 (4-9) |
| RAY-2 | 10 MHz-1000 MHz | 50 | $51.95 (4-9) |
| RAY-3 | 70 KHz -200 MHz | 50 | $31.95 (4-9) |

**DESCRIPTION** — Housed in a volume of only 0.1 cu. inches and requiring a PC board area of only .32 sq. inches the RAY series is the smallest packaged mixers for very high level operation. The RAY series covers a broad frequency range from 70 KHz to 1000 MHz.

Designed to solve very severe intermodulation distortion problems, the RAY series offers linear operation up to +15 dBm signal input at only 1 dB of compression. Reducing all higher order IMD, the RAY series provides a conversion loss of typically 6 dB and isolation of greater than 40 dB.

Packaged within an RFI shielded metal enclosure and hermetically sealed header this tiny unit has its 8 pins located on a 0.2 inch grid. Unit weight is .18 ounces (5.2 grams).

Internal components include well matched hot-carrier diodes and very broad band, low distortion transformers. Supported with silicone rubber, the RAY series withstands high shock vibration and acceleration environments.

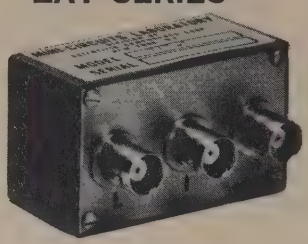
## ZAY SERIES



| MODEL | FREQUENCY | Z (Ohms) | COST |
|---|---|---|---|
| ZAY-1 | 5 MHz-500 MHz | 50 | $41.95 (4-9) |
| ZAY-2 | 10 MHz-1000 MHz | 50 | $61.95 (4-9) |
| ZAY-3 | 70 KHz -200 MHz | 50 | $41.95 (4-9) |

**DESCRIPTION** — The ZAY series of mixers cover a broad frequency range from 70 KHz to 1000 MHz. Solving very severe intermodulation distortion problems, this series offers linear operation up to +15 dBb signal input at only 1 dB of compression. Reducing all higher order IMD, these models provide a conversion loss of typically 6 dB and isolation of greater than 40 dB.

BNC connectors are standard. TNC connectors are a no-cost option.

The ZAY series is housed in a die cast aluminum case. These rugged units are double shielded to meet tough RFI requirements. The case is finished with a blue baked enamel per Federal Standard 595 #25109 over phosphoric etch per MIL-C-15328A. Unit weight is 2.6 ounces (74 grams).

Only well matched hot-carrier diodes and ruggedly constructed low distortion transformers are used. Internally, every component is bonded with silicone rubber to provide protection against shock, vibration and acceleration.

## DIMENSIONS AND CONNECTIONS

**Low Conversion Loss:** typically less than 6 dB
**High Isolation:** typically greater than 40 dB
**Compact:** 2.25″ W, 1.15″ D, 1.4″ H
**High Reliability:** 100% tested, 1 year guarantee
**Low Cost:** as low as $41.95 in small quantity

## APPLICATIONS

- Frequency mixing
- Pulse and amplitude modulation
- Phase detection
- Current controlled attenuation
- Bi-phase modulation

## ABSOLUTE MAXIMUM RATINGS

- **Input Power:** 1 mW
- **Peak IF Input Current:** 40 mA
- **Operating and Storage Temp.:** −55°C to +100°C
- **Environmental Specifications:** See Index Page

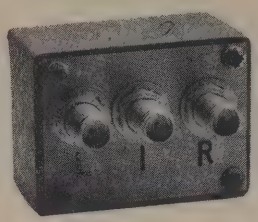
# Very High Level (+23 dBm LO) DOUBLE-BALANCED MIXERS

## ZMY SERIES



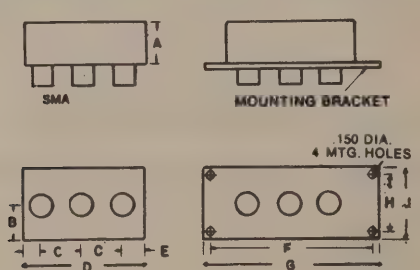
| MODEL | FREQUENCY | Z (Ohms) | COST |
|---|---|---|---|
| ZMY-1 | 5 MHz-500 MHz | 50 | $51.95 (4-9) |
| ZMY-2 | 10 MHz-1000 MHz | 50 | $71.95 (4-9) |
| ZMY-3 | 70 KHz -200 MHz | 50 | $51.95 (4-9) |

**DESCRIPTION** — The ZMY series of mixers cover a broad frequency range from 70 KHz to 1000 MHz. Solving very severe intermodulation distortion problems, the ZMY series offers linear operation up to +15 dBb signal input at only 1 dB of compression. Reducing all higher order IMD, the ZMY series provides a conversion loss of typically 6 dB and isolation of greater than 40 dB.

Available with SMA (3mm) connectors, the ZMY series is housed in a die cast aluminum case. These rugged units are double shielded to meet tough RFI requirements. The case is finished with a blue baked enamel per Federal Standard 595 #25109 over phosphoric etch per MIL-C-15328A. Unit weight is 1.02 ounces (34 grams).

Only well matched hot-carrier diodes and ruggedly constructed low distortion transformers are used. Internally, every component is bonded with silicone rubber to provide protection against shock, vibration and acceleration.

## DIMENSIONS AND CONNECTIONS



**MOUNTING BRACKET AVAILABLE ON REQUEST.** Add suffix B to part number and $1.50 to unit cost.
**CONNECTORS:** SMA (3mm) standard.

## MA SERIES

| MODEL | FREQUENCY | Z (Ohms) | COST |
|---|---|---|---|
| MA-1 | 1 MHz-2.5 GHz | 50 | $99.95 (1-9) |

**DESCRIPTION** — A price/performance breakthrough in microwave double balanced mixers has been achieved with the MA Series. A new 1 to 2500 MHz mixer, the MA Series offers 9.0 dB conversion loss and isolation of 40 dB.

Housed in a die cast aluminum case these rugged units are shielded to meet tough EMI requirements. The case is finished with a blue baked enamel per Federal Standard 596 #25109 over phosphoric etch per MIL-C-15328A. Unit weight is 2.6 ounces (74 grams).

Only well matched hot-carrier diodes and rugged coaxial transmission line transformers are used. Extra special care has been taken to enable these units to be used in environments in severe shock and vibration.

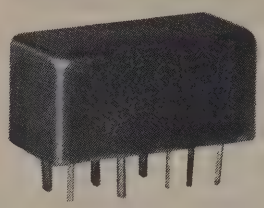
## PSC-2 SERIES



## FEATURES

- **Broadband,** 2 KHz to 650 MHz
- **Excellent Balance,** typically, phase balance within 1°, amplitude balance within 0.05 dB
- **Low Insertion Loss,** typically less than 0.6 dB
- **High Isolation,** typically better than 25 dB
- **Hermetically Sealed & RFI Shielded**
- **Miniature,** 0.128 in.$^3$, 0.4" x 0.8" PC area 0.4" high
- **High Reliability,** 100% tested, one year guarantee
- **Low Cost,** as little as $9.95 in small quantity

## APPLICATIONS

- **Split an input signal into two equal in-phase outputs**
- **Combine signals from two different sources**
- **Add signals vectorially**
- **Provide RF logic capability**

## ABSOLUTE MAXIMUM RATINGS

- **Operating and Storage Temp.** −55°C to +100°C
- **Pin Temperature:** (10 sec.) 510°F
- **Environmental Specifications:** See Index Page

| MODEL | FREQUENCY | Z (Ohms) | Cost |

| NATIONAL STANDARD NUMBERS | | PSC-2-1 | NSN 5820-00-548-0739 |

**DESCRIPTION** — The Series PSC-2 2-way power splitter/combiner is a high performance broad band hybrid junction. Internally, terminations and transformers are provided to ensure a well matched 50 ohm impedance at all ports. Signals fed into the input S port are equally divided, in phase, to the two output (1 and 2) ports. Similarly, signals fed into ports 1 and 2 are vectorially summed at the output S port. Typically, over most of the frequency range, the phase balance is within 1 degree and the amplitude balance is within .05 dB.

High reliability is associated with every MCL unit. Every unit is 100% tested and carries a one year guarantee.

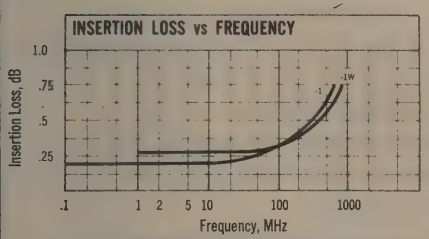
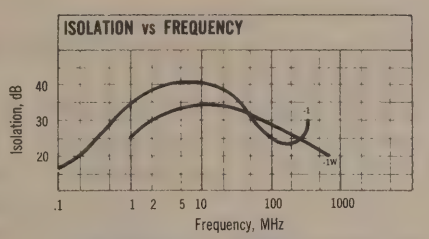
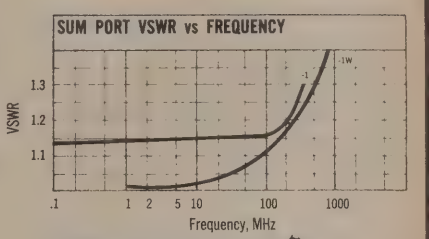
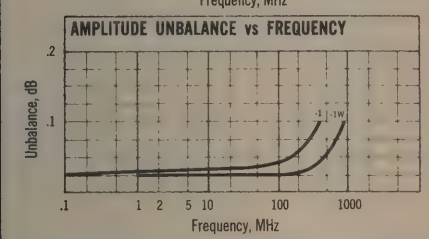
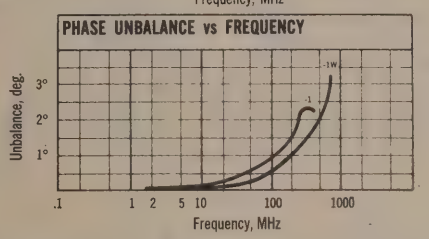
## MODELS PSC-2-1, PSC-2-1W

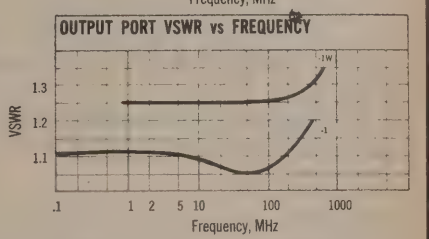




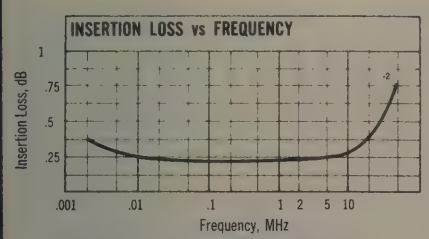


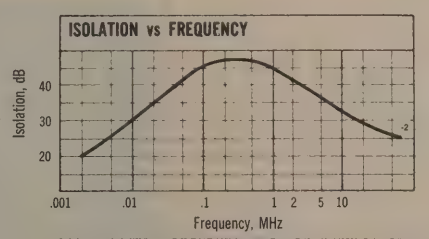


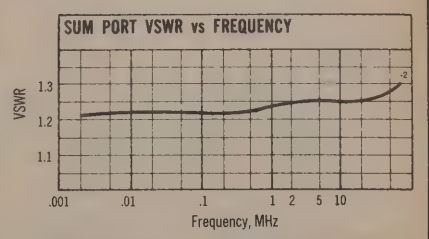


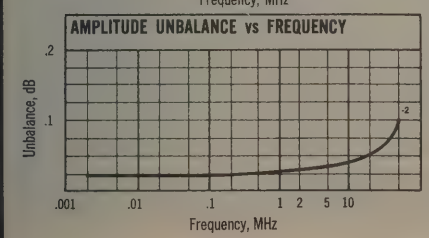


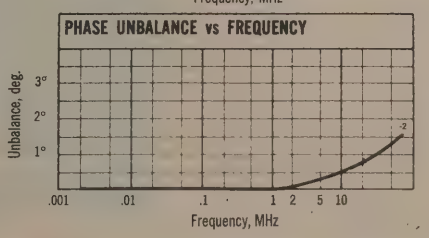
## MODEL PSC-2-2

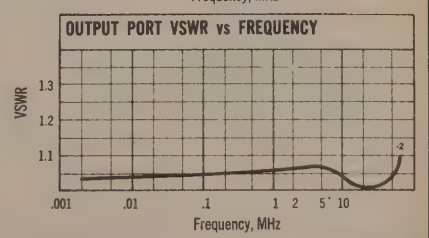








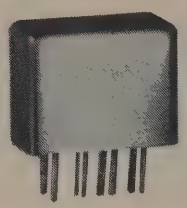




***PROMPT SERVICE / ONE WEEK DELIVERY*** **Mini-Circuits**

# 2-Way 0°
# POWER SPLITTER/COMBINERS

## MSC-2 SERIES



| MODEL | FREQUENCY | Z (Ohms) | COST |
|---|---|---|---|
| MSC-2-1 | 100 KHz - 450 MHz | 50 | $16.95 (5-24) |
| MSC-2-1W | 2 MHz - 650 MHz | 50 | $17.95 (5-24) |

## FEATURES

- **Broadband,** 100 KHz to 650 MHz
- **Excellent Balance,** typically, phase balance within 1°, amplitude within 0.05 dB
- **Low Insertion Loss,** typically less than 0.6 dB
- **High Isolation,** typically better than 25 dB
- **Hermetically Sealed & RFI Shielded**
- **Micro-Miniature,** 0.05 in.$^3$, 0.2" x 0.5" PC area, 0.4" high
- **High Reliability,** 100% tested, one year guarantee
- **Low Cost,** as little as $16.95 in small quantity

## APPLICATIONS

- **Split an input signal into two equal in-phase outputs**
- **Combine signals from two different sources**
- **Add signals vectorially**
- **Provide RF logic capability**

## ABSOLUTE MAXIMUM RATINGS

- **Operating and Storage Temp.** −55°C to +100°C
- **Pin Temperature:** (10 sec.) 510°F
- **Environmental Specifications:** See Index Page

**DESCRIPTION** — The Series MSC-2 2-way power splitter/combiner is a high performance broad band hybrid junction. Signals fed into the input S port are equally divided, in phase, to the two output ports. Similarly, signals fed into ports 1 and 2 are vectorially summed at the output S port. Typically, over most of the frequency range, the phase balance is within 1 degree and the amplitude balance is within .05 dB.

The MSC-2 is ruggedly constructed to provide reliable service under severe environmental conditions. This hermetically sealed unit performs well under high relative humidity conditions and over temperature extremes from −55°C to +100°C.

High reliability is associated with every MCL unit. Every unit is 100% tested and carries a one year guarantee.

**DESCRIPTION** — The Series ZSC 2-way power splitter/combiner is a high performance broad band hybrid junction. Signals fed into the input S port are equally divided, in phase, to the two output ports. Similarly, signals fed into ports 1 and 2 are vectorially summed at the output S port. Typically, over most of the frequency range, the phase balance is within 2 degree and the amplitude balance is within .05 dB.

Housed in a die cast aluminum case, these rugged units are double shielded to meet tough EMI requirements. The case is finished with a blue baked enamel per Federal Standard 595 +25109 over phosphoric etch per MIL-C-15328A.

High reliability is associated with every MCL unit. Every unit is 100% tested and carries a one year guarantee.

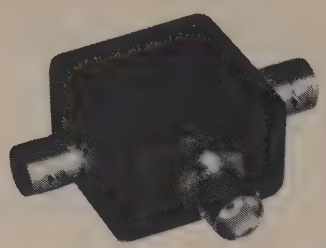
## ZFSC-2 SERIES



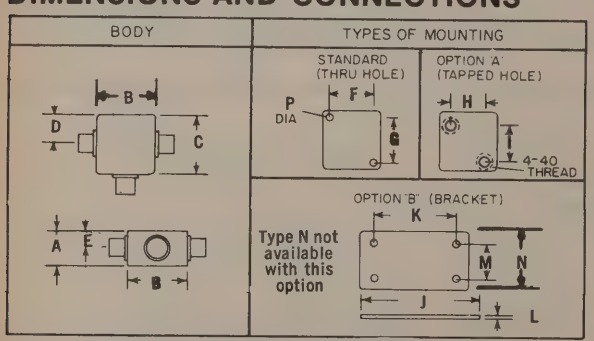
| MODEL | FREQUENCY | Z (Ohms) | Cost |
|---|---|---|---|
| ZFSC-2-1 | 5 MHz - 500 MHz | 50 | $31.95 (4-24) |
| ZFSC-2-1W | 1 MHz - 750 MHz | 50 | $35.95 (4-24) |
| ZFSC-2-2 | 10 MHz - 1000 MHz | 50 | $39.95 (4-24) |
| ZFSC-2-4 | 200 KHz - 1000 MHz | 50 | $44.95 (4-24) |
| ZFSC-2-5 | 10 MHz - 1500 MHz | 50 | $49.95 (4-24) |

**DESCRIPTION** — The Series ZFSC-2 2-way power splitter/combiner is a high performance broad band hybrid junction. Signals fed into the input S port are equally divided, in phase, to the two output ports. Similarly, signals fed into ports 1 and 2 are vectorially summed at the output S port. Typically, over most of the frequency range, the phase balance is within 1 degree and the amplitude balance is within .05 dB.

The ZFSC-2 series is housed in an extremely rugged 1¼ in. square metal case with one connector on each side. BNC, TNC, SMA and Type N connectors are available. Three convenient mounting options are included, (4-40 threaded inserts, 0.125 in. dia. through holes, and flange mounting). Each unit is supplied in a grey epoxy paint finish.

High reliability is associated with every MCL unit. Every unit is 100% tested and carries a one year guarantee.

## DIMENSIONS AND CONNECTIONS



**For mounting option A or B add Letter to P/N**

BNC (std), TNC (on request), SMA (3mm) and TYPE N on request, add $5 to unit cost.

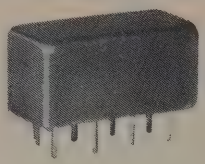
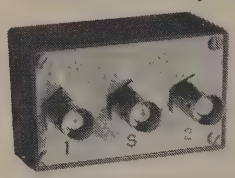
# 2-Way 0° 75Ω
# POWER SPLITTER/COMBINERS

**MODELS PSC-2-1-75, PSC-2375**



**MODELS ZSC-2-1-75, ZSC-2375**



| MODEL | FREQUENCY | Z (Ohms) | COST |
|---|---|---|---|
| PSC-2375 | 55 MHz- 88 MHz | 75 | $19.95 (6-49) |
| ZSC-2375 | 55 MHz- 88 MHz | 75 | $34.95 (4-24) |
| PSC-2-1-75 | 250 kHz -300 MHz | 75 | $11.95 (6-49) |
| ZSC-2-1-75 | 250 kHz -300 MHz | 75 | $26.95 (4-24) |

**DESCRIPTION** — Series PSC-2 and ZSC-2 2-way power splitter/combines are high performance hybrid junctions. Signals fed into the input S port are equally divided, in phase, to the two output ports. Similarly, signals fed into ports 1 and 2 are vectorially summed at the output S port. Typically, over most of the frequency range, the phase balance is within 2 degree and the amplitude balance is within .05 dB.

Models PSC-2375 and PSC-2-1-75 are hermetically sealed and RFI shielded. Model ZSC-2-1-75 and Model ZSC-2375 are housed in die cast aluminum cases and are double shielded to meet tough EMI requirements. The case is finished with a blue baked enamel per Federal Standard 595 +25109 over phosphoric etch per MIL-C-15328A.

High reliability is associated with every MCL unit. Every unit is 100% tested and carries a one year guarantee.

## FEATURES

- **Impedance,** 75 ohm
- **Excellent Balance,** typically, phase balance within 1°, amplitude balance within 0.05 dB
- **Low Insertion Loss,** typically less than 0.6 dB
- **High Isolation,** typically better than 25 dB

**PSC-2 Series**

- **Hermetically Sealed & RFI Shielded**
- **Miniature,** 0.128 in.³, 0.4″ x 0.8″ PC area 0.4″ high
- **High Reliability,** 100% tested, one year guarantee
- **Low Cost,** as little as $11.95 in small quantity

**ZSC-2 Series**

- **Connectors,** available with BNC or TNC
- **Mounting,** available with bracket as option
- **Compact,** 2.25″ width, 1.4″ height, 1.15″ depth
- **High Reliability,** 100% tested, one year guarantee
- **Low Cost,** as little as $26.95 in small quantity

## APPLICATIONS

- **Split an input signal into two equal in-phase outputs**
- **Combine signals from two different sources**
- **Add signals vectorially**
- **Provide RF logic capability**

## ABSOLUTE MAXIMUM RATINGS

- **Operating & Storage Temp.** −55°C to +100°C
- **Pin Temperature Series:** (10 sec.) 510°F
- **Environmental Specifications:** See Index Page

Mini-Circuits

# POWER DIVIDERS

**Broadband, 0.5 — 4.2 GHz • Only 0.2 dB insertion loss**
**Isolation over 30 dB midband, 25 dB at bandedges • Octave bandwidths**
**Two way • up to 10 W (matched output)**

- **High performance microstrip construction**
- **Housed in rugged RFI-shielded aluminum case**
- **Available with BNC, TNC, SMA and Type N connectors**
- **Meets MIL-202E standards**
- **Also useful as power combiners at signal levels up to +10 dBm**

*Now you can specify and purchase state-of-the-art power dividers at 1/3 to 1/2 the price of competitive units, with immediate off-the-shelf delivery. . . from Mini-Circuits, of course.*

*This breakthrough in price/performance is a natural extension of our extensive experience in high-volume manufacturing, exacting quality-control and thorough testing. This expertise assures you highly reliable power dividers with guaranteed repeatability of performance at lowest cost.*

*So, if you are among the thousands of companies now using Mini-Circuits' signal-processing units in your systems designs, add power dividers to the list of price/performance industry standards available from Mini-Circuits.*

| PSCQ-2-90 | 55 MHz - 95 MHz | 50 | $19.95 (5-49) |
| PSCQ-2-180 | 120 MHz - 180 MHz | 50 | $19.95 (5-49) |

## FEATURES

- **Broadband, 25 MHz to 180 MHz**
- **Excellent Balance,** typically, phase deviation from quadrature less than 1°, amplitude unbalance 0.6 dB
- **Low Insertion Loss,** typically average loss is less than 0.3 dB
- **High Isolation,** typically better than 25 dB
- **Hermetically Sealed & RFI Shielded**
- **Miniature,** 0.128 in.$^3$, 0.4" x 0.8" PC area 0.4" high
- **High Reliability,** 100% tested, one year guarantee
- **Low Cost,** as little as $19.95 in small quantity

## APPLICATIONS

- **Split an input signal into two equal phase quadrature outputs**
- **Add signals vectorially**
- **SSB modulators**
- **Image reject mixers**

## ABSOLUTE MAXIMUM RATINGS

- **Operating and Storage Temp.** −55° C to +100° C
- **Pin Temperature:** (10 sec.) 510° F
- **Environmental Specifications:** See Index Page

**DESCRIPTION** — The Series PSCQ-2 2-way power splitter/combiner is a high performance broad band hybrid junction. Signals fed into the input S port are equally divided, 90° out of phase to the two output ports. Similarly, signals fed into ports 1 and 2 are vectorially summed at the output S port. Typically, over most of the frequency range, the phase balance is within 1 degree and the amplitude balance is within 0.6 dB.

The PSCQ-2 is ruggedly constructed to provide reliable service under severe environmental conditions. This hermetically sealed unit performs well under high relative humidity conditions and over temperature extremes from −55° C to +100° C.

High reliability is associated with every MCL unit. Every unit is 100% tested and carries a one year guarantee.

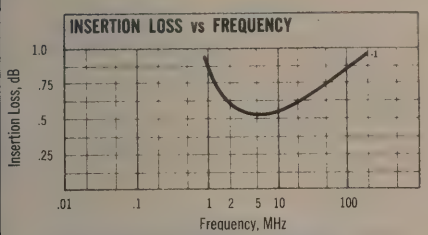
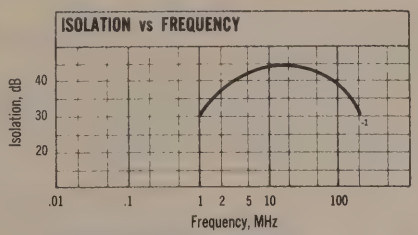
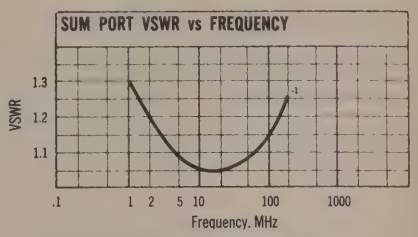
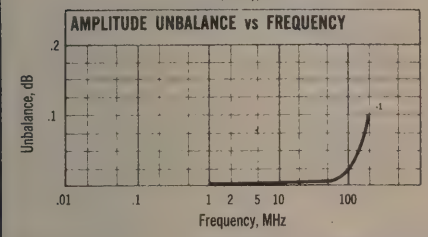
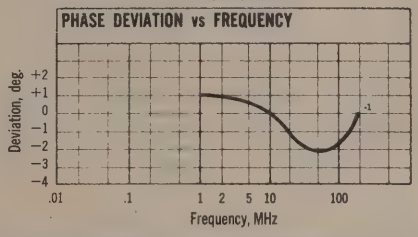
## MODEL PSCJ-2-1

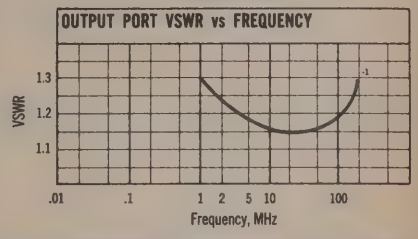




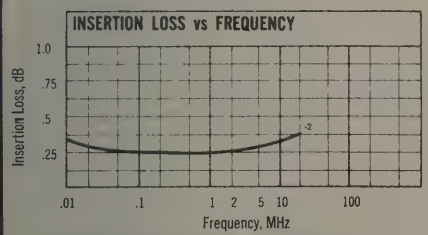


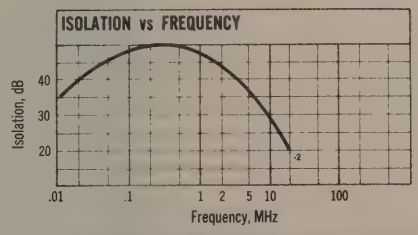


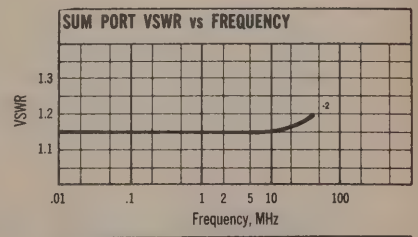


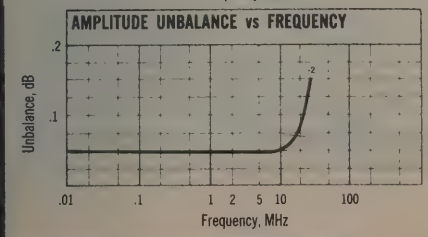


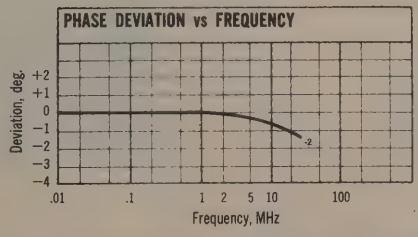
## MODEL PSCJ-2-2

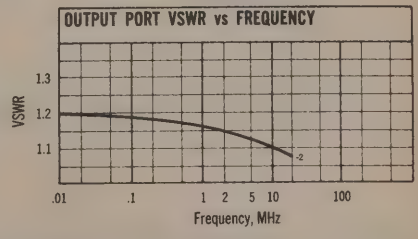








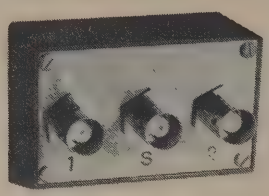




*PROMPT SERVICE / ONE WEEK DELIVERY* **Mini-Circuits**

# 2-Way 180°
# POWER SPLITTER/COMBINERS

## ZSCJ-2 SERIES



| MODEL | FREQUENCY | Z (Ohms) | Cost |
|---|---|---|---|
| ZSCJ-2-1 | 1 MHz - 200 MHz | 50 | $34.95 (4-24) |
| ZSCJ-2-2 | 10 KHz - 20 MHz | 50 | $44.95 (5-49) |

## FEATURES

- **Broadband,** 10 KHz to 200 MHz
- **Excellent Balance,** typically, phase balance within 2°, amplitude balance within 0.1 dB
- **Low Insertion Loss,** typically less than 0.9 dB
- **High Isolation,** typically better than 30 dB
- **Connectors,** available with BNC or TNC
- **Mounting,** option, available with bracket
- **Compact,** 2.25" width, 1.4" height, 1.15" depth
- **High Reliability,** 100% tested, one year guarantee
- **Low Cost,** as little as $34.95 in small quantity

## APPLICATIONS

- **Split an input signal into two equal 180° out-of-phase outputs**
- **Add signals vectorially**
- **Combine outputs of push-pull amplifiers**
- **Provide RF logic capability**

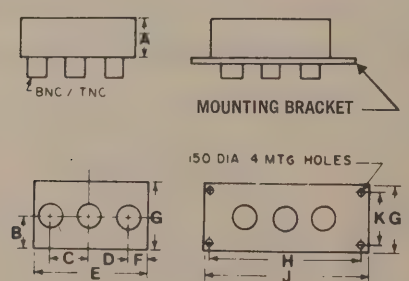
## ABSOLUTE MAXIMUM RATINGS

- **Operating and Storage Temp.** −55°C to +100°C
- **Environmental Specifications:** See Index Page

**DESCRIPTION** — The Series ZSCJ-2 2-way power splitter/combiner is a high performance broad band hybrid junction. Signals fed into the input S port are equally divided, 180° out of phase to the two output ports. Similarly, signals fed into ports 1 and 2 are vectorially summed at the output S port. Typically, over most of the frequency range, the phase balance is within 1 degree and the amplitude balance is within 0.1 dB.

High reliability is associated with every MCL unit. Every unit is 100% tested and carries a one year guarantee.

## DIMENSIONS AND CONNECTIONS



MOUNTING BRACKET AVAILABLE ON REQUEST. Add suffix B to part number and add $1.50 to unit cost.

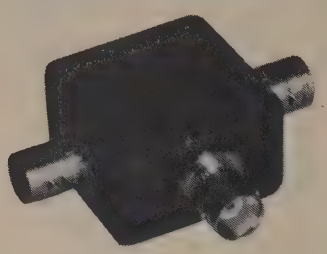
## ZFSCJ-2 SERIES



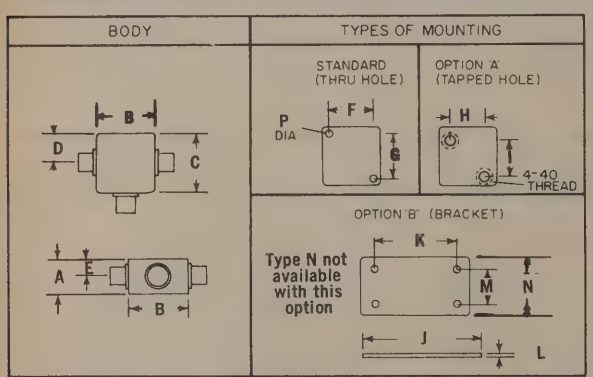
| MODEL | FREQUENCY | Z (Ohms) | COST |
|---|---|---|---|
| ZFSCJ-2-1 | 1 MHz - 500 MHz | 50 | $49.95 (5-49) |
| ZFSCJ-2-3 | 5 MHz - 300 MHz | 50 | $39.95 (4-24) |

**DESCRIPTION —** The ZFSCJ-2 Series 2-way power splitter/combiner is a high performance broad band hybrid junction. Signals fed into the input S port are equally divided, 180° out of phase, to the two output ports. Similarly, signals fed into ports 1 and 2 are vectorially summed at the output S port. Typically, over most of the frequency range, the phase balance is within 1 degree and the amplitude balance is within 0.1 dB.

The ZFSCJ-2 Series is housed in an extremely rugged 1¼ in. square metal case with one connector on each side. BNC, TNC, SMA and Type N connectors are available. Three convenient mounting options are included, (4-40 threaded inserts, 0.125 in. dia. through holes, and flange mounting. Each unit is supplied in a grey epoxy paint finish.

High reliability is associated with every MCL unit. Every unit is 100% tested and carries a one year guarantee.

## DIMENSIONS AND CONNECTIONS



**For mounting option A or B add Letter to P/N**

BNC (std). TNC (on request). SMA (3mm) and TYPE N on request, add $5 to unit cost.

| PSC-3-1-75 | 1 MHz - 200 MHz | 75 | $20.95 (6-49) |

## FEATURES

- **Broadband,** 10 KHz to 200 MHz
- **Excellent Balance,** typically, phase balance less than 1.5°, amplitude unbalance within 0.1 dB
- **Low Insertion Loss,** typically less than 0.6 dB
- **High Isolation,** typically better than 35 dB
- **Hermetically Sealed & RFI Shielded**
- **Miniature,** 0.128 in.$^3$, 0.4" x 0.8" PC area 0.4" high
- **High Reliability,** 100% tested, one year guarantee
- **Low Cost,** as little as $19.95 in small quantity

## APPLICATIONS

- **Split an input signal into three equal in-phase outputs**
- **Combine signals from three different sources**
- **Add signals vectorially**
- **Provide RF logic capability**

## ABSOLUTE MAXIMUM RATINGS

- **Operating and Storage Temp.** −55°C to +100°C
- **Pin Temperature:** (10 sec.) 510°F
- **Environmental Specifications:** See Index Page

**DESCRIPTION** — The PSC-3 Series 3-way power splitter/combiner is a high performance broad band hybrid junction. Signals fed into the input S port are equally divided, in phase, to the three output ports. Similarly, signals fed into ports 1, 2 and 3 are vectorially summed at the output S port. Typically, over most of the frequency range, the phase balance is within 1 degree and the amplitude balance is within 0.1 dB.

The PSC-3 Series is ruggedly constructed to provide reliable service under severe environmental conditions. This hermetically sealed unit performs well under high relative humidity conditions and over temperature extremes from −55°C to +100°C.

High reliability is associated with every MCL unit. Every unit is 100% tested and carries a one year guarantee.

**DESCRIPTION** — The ZSC-3 Series 3-way power splitter/combiner is a high performance broad band hybrid junction. Signals fed into the input S port are equally divided, in phase, to the three output ports. Similarly, signals fed into ports 1, 2, and 3 are vectorially summed at the output S port. Typically over most of the frequency range, the phase balance is within 2 degree and the amplitude balance is within 0.1 dB.

Ruggedness and durability are built into the ZSC-3 Series. Available with BNC or TNC connectors, the ZSC-3 Series is housed in a die cast aluminum case. The case finish is a blue baked enamel per Federal Standard 595 #25109 over phosphoric etch per MIL-C-15329A.

High reliability is associated with every MCL unit. Every unit is 100% tested and carries a one year guarantee.

## DESCRIPTION

— The ZMSC-3 Series 3-way power splitter/combiner is a high performance broad band hybrid junction. Signals fed into the input S port are equally divided, in phase, to the three output ports. Similarly, signals fed into ports 1, 2, and 3 are vectorially summed at the output S port. Typically, over most of the frequency range, the phase balance is within 1 degree and the amplitude balance is within 0.1 dB.

Ruggedness and durability are built into the ZMSC-3 Series. Every component is bonded with silicone. Available with SMA (3mm) connectors, the ZMSC-3 Series is housed in a die cast aluminum case. The case finish is a blue baked enamel per Federal Standard 595 #25109 over phosphoric etch per MIL-C15329A.

High reliability is associated with every MCL unit. Every unit is 100% tested and carries a one year guarantee.

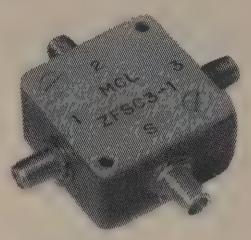
## ZFSC-3 SERIES



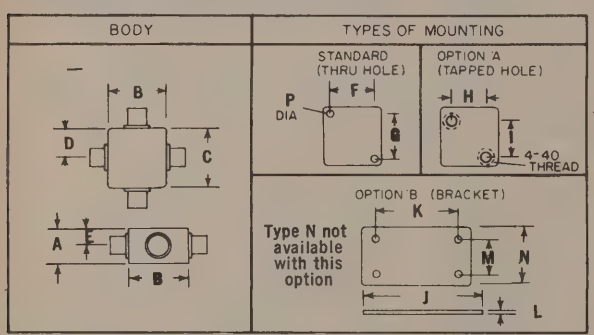
| MODEL | FREQUENCY | Z (Ohms) | COST |
|---|---|---|---|
| ZFSC-3-1 | 1 MHz - 500 MHz | 50 | $39.95 (4-24) |
| ZFSC-3-1W | 2 MHz - 750 MHz | 50 | $41.95 (4-24) |

**DESCRIPTION** — The Series ZFSC-3 3-way power splitter/combiner is a high performance broad band hybrid junction. Signals fed into the input S port are equally divided, in phase, to the three output ports. Similarly, signals fed into ports 1, 2, and 3 are vectorially summed at the output S port. Typically, over most of the frequency range, the phase balance is within 1 degree and the amplitude balance is within 0.2 dB.

The ZFSC-3 series is housed in an extremely rugged 1¼ in. square metal case with one connector on each side. BNC, TNC, SMA and Type N connectors are available. Three convenient mounting options are included. (4-40 threaded inserts, 0.125 in. dia. through holes, and flange mounting.) Each unit is supplied in a gray epoxy paint finish.

High reliability is associated with every MCL unit. Every unit is 100% tested and carries a one year guarantee.

## DIMENSIONS AND CONNECTIONS



**For mounting option A or B add Letter to P/N**

BNC (std), TNC (on request), SMA (3mm) and TYPE N on request, add $5 to unit cost.

| PSC-4-1 | 100 KHz - 200 MHz | 50 | $28.95 (6-49) |
| PSC-4-1-75 | 1 MHz - 200 MHz | 75 | $24.95 (6-49) |
| PSC-4-3 | 250 KHz - 250 MHz | 50 | $23.95 (6-49) |
| PSC-4-6 | 10 KHz - 40 MHz | 50 | $29.95 (6-49) |

**DESCRIPTION** — The Series PSC-4 4-way power divider/combiner is a high performance broad band hybrid junction. Signals fed into the input S port are equally divided, in power, to the four output prots. Similarly, signals fed into ports 1, 2, 3 and 4 are vectorially summed at the output S port. Typically, over most of the frequency range, the phase balance is within 1 degree and the amplitude balance is within 0.2 dB.

The PSC—4 is ruggedly constructed to provide reliable service under severe environmental conditions. This hermetically sealed unit performs well under high relative humidity conditions and over temperature extremes from −55° C to +100° C.

High reliability is associated with every MCL unit. Every unit is 100% tested and carries a one year guarantee.

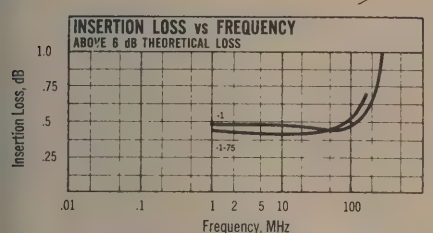
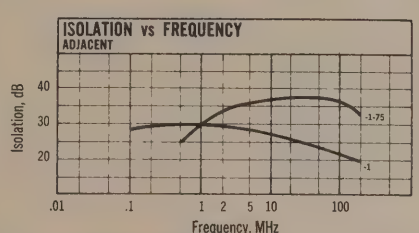
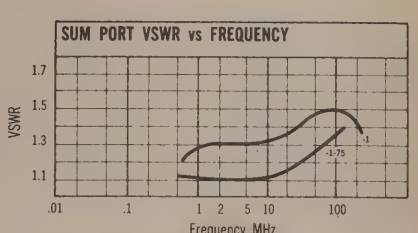
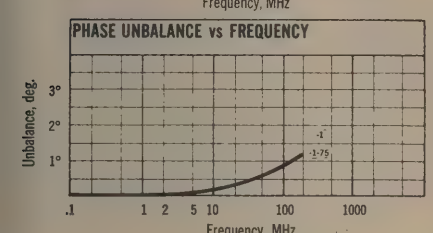
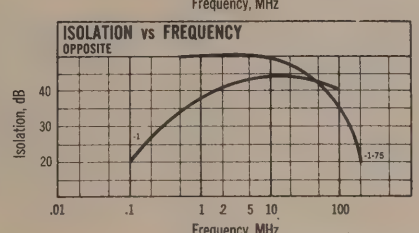
## MODELS ZSC-4-1, ZSC-4-1-75

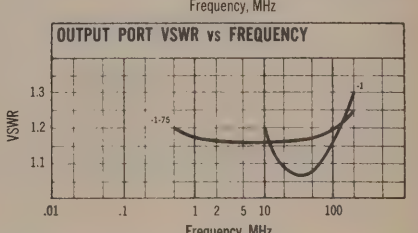




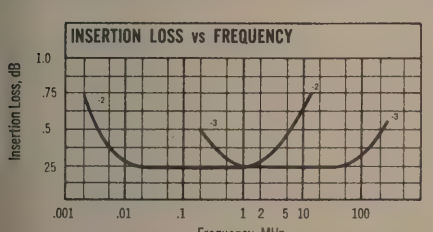


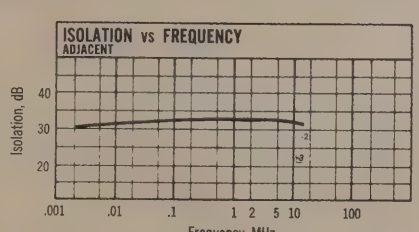


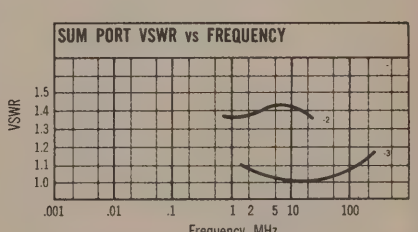


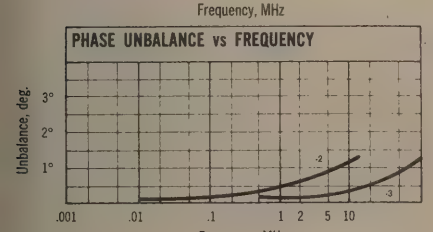


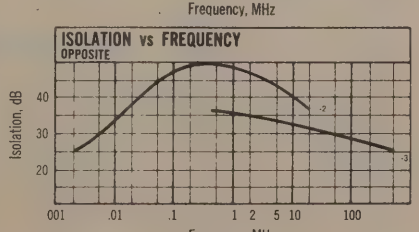
## MODELS ZSC-4-2, ZSC-4-3

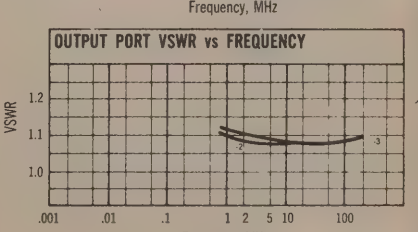






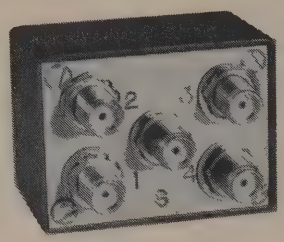






# 4-Way 0°
# POWER SPLITTER/COMBINERS

## ZMSC-4 SERIES



## FEATURES

- **Broadband,** 2 KHz to 250 MHz
- **Excellent Balance,** typically, phase balance within 2°, amplitude balance within 0.2 dB
- **Low Insertion Loss,** typically less than 0.5 dB
- **High Isolation,** typically better than 25 dB
- **Connectors,** available with SMA
- **Mounting,** option, available with bracket
- **Miniature,** 1.5″ width, 1.15″ height, 0.88″ depth
- **High Reliability,** 100% tested, one year guarantee
- **Low Cost,** as little as $48.95 in small quantity

## APPLICATIONS

- **Split an input signal into four equal in-phase outputs**
- **Combine signals from four different sources**
- **Add signals vectorially**
- **Provide RF logic capability**

## ABSOLUTE MAXIMUM RATINGS

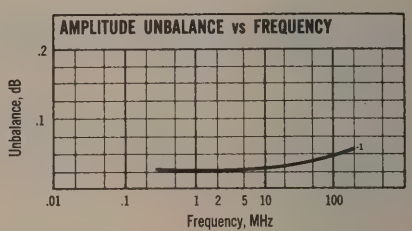
- **Operating and Storage Temp.** −55° C to +100° C
- **Environmental Specifications:** See Index Page

| MODEL | FREQUENCY | Z (Ohms) | Cost |
|---|---|---|---|
| ZMSC-4-1 | 100 KHz - 200 MHz | 50 | $51.95 (4-24) |
| ZMSC-4-2 | 2 KHz - 20 MHz | 50 | $64.95 (4-24) |
| ZMSC-4-3 | 250 KHz - 250 MHz | 50 | $38.95 (4-24) |

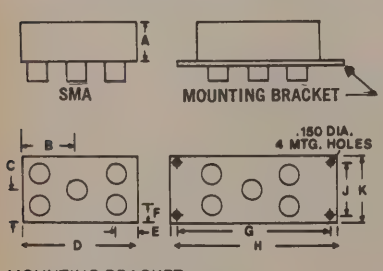
**DESCRIPTION** — The Series ZMSC-4 4-way power splitter/combiner is a high performance broad band hybrid junction. Signals fed into the input S port are equally divided, in phase, to the four output ports. Similarly, signals fed into ports 1, 2, 3 and 4 are vectorially summed at the S port. Typically, over most of the frequency range, the phase balance is within 1 degree and the amplitude balance s within 0.2 dB.

Housed in a die cast aluminum case, these rugged units are double shielded to meet your tough EMI requirements. The case is finished with a blue baked enamel per Federal Standard 595 #25109 over phosphoric etch per MIL-C-15328A.

High reliability is associated with every MCL unit. Every unit is 100% tested and carries a one year guarantee.



## DIMENSIONS AND CONNECTIONS



MOUNTING BRACKET AVAILABLE ON REQUEST. Add suffix B to part number and add $1.50 to unit cost. CONNECTORS SMA only.

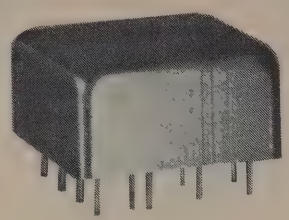
## PSC-6 SERIES



| MODEL | FREQUENCY | Z (Ohms) | Cost |
|---|---|---|---|
| PSC-6-1 | 1 MHz - 175 MHz | 50 | $59.95 (1-5) |

## FEATURES

- **Broadband,** 1 MHz to 175 MHz
- **Excellent Balance,** typically, phase balance less than 4°, amplitude unbalance within 0.4 dB
- **Low Insertion Loss,** typically less than 0.75 dB
- **High Isolation,** typically better than 20 dB
- **Hermetically Sealed & RFI Shielded**
- **Miniature,** 0.256 in.$^3$, 0.8" x 0.8" PC area, 0.4" high
- **High Reliability,** 100% tested, one year guarantee
- **Low Cost,** as little as $59.95 in small quantity

## APPLICATIONS

- **Split an input signal into six equal in-phase outputs**
- **Combine signals from six different sources**
- **Add signals vectorially**
- **Provide RF logic capability**

## ABSOLUTE MAXIMUM RATINGS

- **Operating and Storage Temp.** −55°C to +100°C
- **Pin Temperature:** (10 sec.) 510°F
- **Environmental Specifications:** See Index Page

**DESCRIPTION** — The PSC-6 Series 6-way power splitter/combiner is a high performance broad band hybrid junction. Signals fed into the input S port are equally divided, in phase, to the six output ports. Similarly, signals fed into ports 1, 2 thru 6 are vectorially summed at the output S port. Typically, over most of the frequency range, the phase balance is within 1 degree and the amplitude balance is within 0.4 dB.

The PSC-6 Series is ruggedly constructed to provide reliable service under severe environmental conditions. This hermetically sealed unit performs well under high relative humidity conditions and over temperature extremes from −55°C to +100°C.

High reliability is associated with every MCL unit. Every unit is 100% tested and carries a one year guarantee.

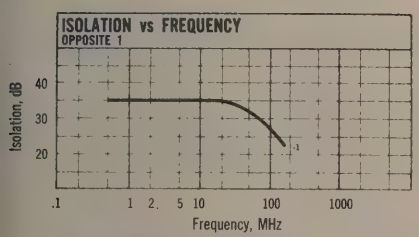
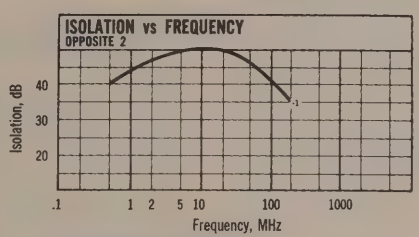
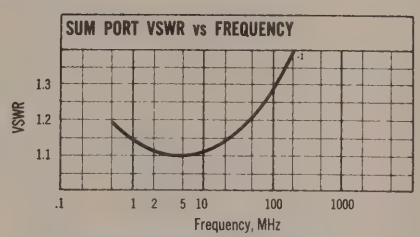
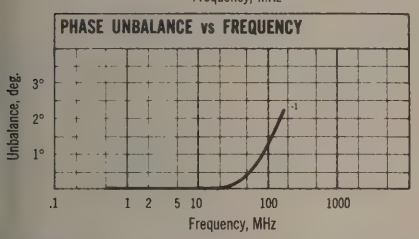
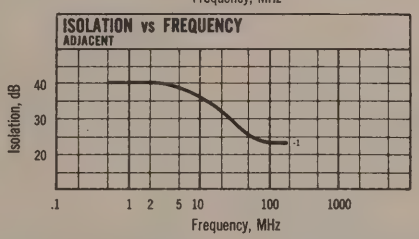
## MODEL ZFSC-8-1

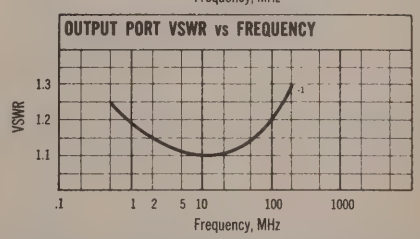




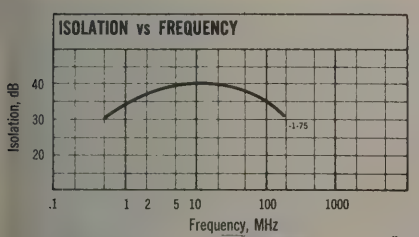


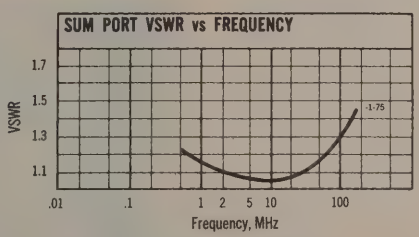


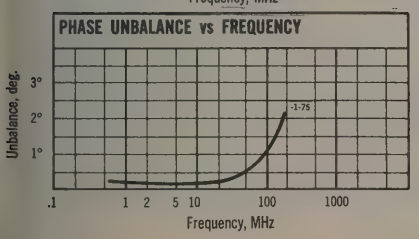


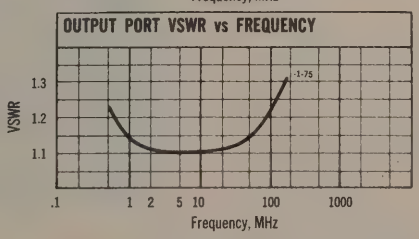


## MODEL ZFSC-8-1-75





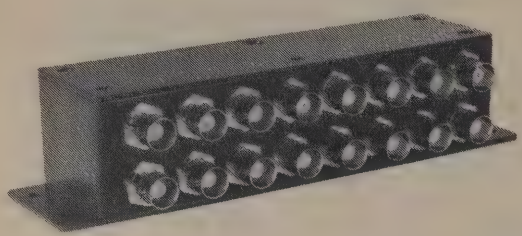




*PROMPT SERVICE / ONE WEEK DELIVERY* **Mini-Circuits**

# 16-Way 0°
# POWER SPLITTER/COMBINERS

## ZFSC-16 SERIES



| MODEL | FREQUENCY | Z (Ohms) | Cost |
|---|---|---|---|
| ZFSC-16-1 | 500 KHz - 125 MHz | 50 | $174.95 (1-4) |

## FEATURES

- **Broadband,** 500 KHz to 125 MHz
- **Excellent Balance,** typically, phase balance within 3°, amplitude balance within 0.1 dB
- **Low Insertion Loss,** typically less than 1.0 dB
- **High Isolation,** typically better than 18 dB
- **Connectors,** available with BNC, TNC, or SMA
- **Mounting,** flanges with 4 thru holes
- **Compact,** 6.7" wide, 1.5" high, 1.6" deep
- **High Reliability,** 100% tested, one year guarantee
- **Low Cost,** as little as $174.95 in small quantity

## APPLICATIONS

- **Split an input signal into sixteen equal in-phase outputs**
- **Combine signals from sixteen different sources**
- **Add signals vectorially**
- **Provide RF logic capability**

## ABSOLUTE MAXIMUM RATINGS

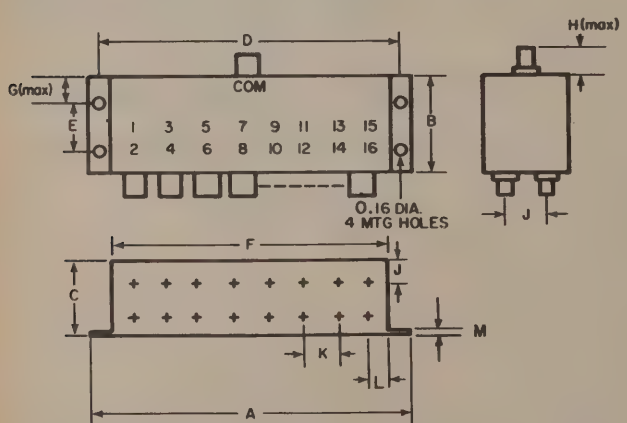
- **Operating and Storage Temp.** −55°C to +100°C
- **Environmental Specifications:** See Index Page

**DESCRIPTION —** The ZFSC-16 Series 16-way power splitter/combiner is a high performance broad-band hybrid junction. Signals fed into the input S port are equally divided in phase, to the sixteen output ports. Similarly, signals fed into ports 1 through 16 are vectorially summed at the output S port. Typically, over most of the frequency range, the phase balance is within 1 degree and the amplitude balance is within 0.1 dB.

The ZFSC-16 Series is housed in an extremely rugged metal case to withstand severe mechanical stress. BNC, TNC and SMA connectors are available. Mounting is simple and convenient with the flange design. Each unit is supplied in a grey epoxy paint finish.

High reliability is associated with every MCL unit. Every unit is 100% tested and carries a one year guarantee.

## DIMENSIONS AND CONNECTIONS



BNC (std), TNC (on request), SMA (3mm) on request, add $25 to unit cost.

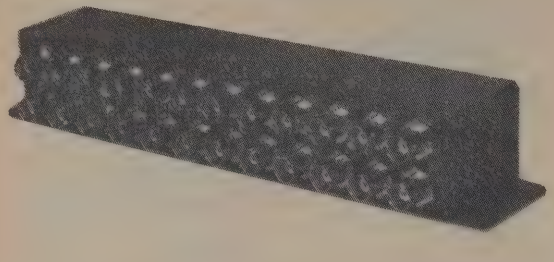
## ZFSC-24 SERIES



| MODEL | FREQUENCY | Z (Ohms) | Cost |
|---|---|---|---|
| ZFSC-24-1 | 200 KHz - 100 MHz | 50 | $264.95 (1-4) |

**DESCRIPTION —** The ZFSC-24 Series 24-way power splitter/combiner is a high performance broad band hybrid junction. Signals fed into the input S port are equally divided, in phase, to the 24 output ports. Similarly, signals fed into ports 1 through 24 are vectorially summed at the output S port. Typically, over most of the frequency range, the phase balance is within 1 degree and the amplitude balance is within 0.5 dB.

The ZFSC-24 Series, with BNC, TNC or SMA connectors, is housed in an extremely rugged metal case to withstand severe mechanical stress. Mounting is simple and convenient with the flange design. Each unit is supplied in a gray epoxy paint finish.

High reliability is associated with every MCL unit. Every unit is 100% tested and carries a one year guarantee.

# Surprise!

# 2 KHz-1500 MHz Power Splitter/Combiners

## OFF-THE-SHELF FOR IMMEDIATE DELIVERY...

FROM **$31.95** (4-24)

**Satisfy just about any two-way power-splitter/combiner need with Mini-Circuits ZFSC-2 series. . . covering 2 kHz —1500 MHz, with a choice of BNC, TNC, SMA or Type N connectors. Also, three convenient mounting options are available; threaded inserts, through holes, and flange mounting. Units are available from stock for immediate delivery and prices start at only $31.95. Mini-Circuits extensive experience in high volume manufacturing, coupled with exacting quality control and thorough testing makes this price/performance breakthrough possible.**

**Examine your power splitter/combiner specifications and select a highly reliable, low-cost ZFSC-2 model to meet your systems requirements.**

| Model | Freq. Range (MHz) | Minimum Isolation (Mid-band) | Maximum Insertion Loss (Mid-band) | Price (Quantity) |

# Directional Coupler Application and Operation

Mini-Circuits

Mini-Circuits directional couplers are reactive devices featuring very low insertion loss. The basic operation of the directional coupler is to operate on an input so that two output signals are available. However, when the input is applied to an opposite port, only one output signal is available. The directional coupler has the following theoretical characteristics.

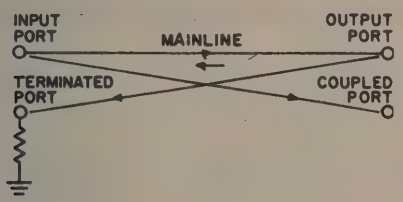
**1)** The output signals are unequal in amplitude. The larger signal is at the main line. The smaller signal is at the coupled line.

**2)** The main line insertion loss depends on the signal level at the coupled line. The relationship is as follows:

| Theoretical Minimum | |
|---|---|
| **Main Line Insertion Loss** | **Coupling** |
| 3 dB | 3 dB |
| 1.2 dB | 6 dB |
| .46 dB | 10 dB |
| .14 dB | 15 dB |
| .04 dB | 20 dB |

**3)** There is high isolation between the coupled line and the ouput of the main line.

A schematic representation of the coupler is as follows:



Key characteristics of a directional coupler include coupling coefficient, coupling flatness, insertion loss, directivity and isolation, defined as follows:

**Coupling coefficient** expresses the ratio, in dB, of the input port power to the coupled port power with all ports properly terminated. Mini-Circuits offers a variety of directional couplers with coupling values ranging from 10 to 21 dB.

**Coupling flatness** indicates the maximum peak-to-peak variation in coupling coefficient over the frequency range covered by the directional coupler.

**Insertion loss** relates to the change in output port power due to the insertion of the directional coupler into a system, considering all ports properly terminated.

**Isolation** reveals the unbalance due to slight variations in device symmetry. If the coupler is perfectly symmetrical, the signal applied to the output port will split between the input port and the terminated port. Any unbalance will allow a leakage signal to develop at the coupled port. The ratio, in dB, of this leakage signal to the output port signal is termed the device's isolation.

**Directivity** is a significant factor in coupler selection. The output power at the coupled port is measured when input power is transmitted in the desired direction; then output power at the coupled port is measured with the same amount of input power transmitted in the opposite direction. The ratio, in dB, of the two powers at the coupled port expresses the directivity. All ports are considered properly terminated. Directivity is equal to the isolation in dB, minus coupling in dB, and is a measure of the dynamic range at the coupled port.

Mini-Circuit's full line of directional couplers provide excellent performance. They feature 1) **broad bandwidth** 2) **low insertion loss,** as low as 0.1 dB 3) **directivity** as high as 45 dB and 4) **a wide range of coupling values,** from 10 dB to 21 dB.

The high performance characteristics of these units enable the following signal processing functions to be accomplished:

- **Measure Incident and Reflected Power to Determine VSWR**
- **Signal Sampling**
- **Signal Injection**
- **Signal Generator/Oscillator Leveling**
- **Power Flow Monitoring**

| PDC-20-3-75 | 1 - 150 | 19.5 | 75 | $12.95 (5-49) |

**DESCRIPTION** — The PDC series directional couplers are economically priced while covering the frequency range from 10 KHz to 1000 MHz. They offer main-line loss as low as 0.1 dB and high directivity of up to 35 dB. A wide selection of coupling ratios is available and exceptional unit to unit matched performance is standard.

Only well matched and ruggedly constructed transmission line transformers ar used. Internally, every component is bonded to the header and case with silicone rubber to provide wuper reliable protection against shock vibration and acceleration.

High reliability is associated witn every PDC series directional coupler. Every production run is 100% tested and every unit must pass our rigid inspection and high quality standards. Naturally, our one year guarantee applies to these units.

## ZMDC SERIES

| MODEL | Freq. Range (MHz) | Coupling (dB) | Z (Ω) | COST |
|---|---|---|---|---|
| ZMDC-10-1 | 0.5 - 500 | 11.5 | 50 | $36.95 (4-24) |
| ZMDC-10-2 | 250 - 1000 | 10.5 | 50 | $44.95 (4-24) |
| ZMDC-15-6 | 0.01 - 35 | 15.0 | 50 | $44.95 (4-24) |
| ZMDC-20-1 | 25 - 400 | 21.0 | 50 | $44.95 (4-24) |
| ZMDC-20-3 | 0.2 - 250 | 19.5 | 50 | $36.95 (4-24) |

**DESCRIPTION** — The ZMDC series directional couplers are economically priced while covering the frequency range from 10 kHz to 1000 MHz. They offer main-line loss as low as 0.1 dB and high directivity of up to 35 dB. A wide selection of coupling rations are available and exceptional unit to unit matched performance is standard.

Available with SMA connectors, the ZMDC series is housed in a die-cast aluminum case. The case is finished with a blue-baked enamel per Federal Standard 595 #25109 over phosphoric etch per MIL-C-15328A.

High reliability is associated with every MCL unit. Every production run is 100% tested and every unit must pass our rigid inspection and high quality standards. Naturally, our one year guarantee applies to these units.

## DIMENSIONS AND CONNECTIONS

|---|---|---|---|---|---|---|---|---|---|
| IN. | 0.88 | 0.66 | .438 | 1.50 | .312 | 2.19 | 2.56 | 0.84 | 1.15 |
| MM | 22. | 17. | 11. | 38. | 79. | 55.6 | 63.5 | 21. | 29. |

MOUNTING BRACKET AVAILABLE ON REQUEST. Add suffix B to part number and add $1 50 to unit cost.
CONNECTORS SMA only.

**WEIGHT** 34.0 grams 1.20 ounces

## FEATURES

- **Broadband,** 10 KHz to 1 GHz
- **Low Insertion Loss,** typically less than 0.5 dB
- **High Directivity,** typically better than 30 dB
- **Connectors,** available with SMA
- **Mounting,** option, available with bracket
- **Miniature,** 1.5" width, 1.15" height, 0.88" depth
- **High Reliability,** 100% tested, one year guarante
- **Low Cost,** as little as $36.95 in small quantity

## APPLICATIONS

- **Measure incident and reflected power to determi VSWR**
- **Signal sampling**
- **S parameter measurement**
- **Signal injection**
- **Signal generator/oscillator leveling**
- **Power flow monitoring**

## ABSOLUTE MAXIMUM RATINGS

- **Operating and Storage Temp.** −55°C to +100
- **Environmental Specifications:** See Index P

| ZFDC-15-6-75 | 0.02 - 35 | 14.5 | 75 | $35.95 (4-24) |

**DESCRIPTION** — The ZFDC series directional couplers are economically priced while covering the frequency range from 0.01-2000 MHz. They offer main-line loss as low as 0.1 dB and high directivity of up to 35 dB. A wide selection of coupling ratios are available and exceptional unit to unit matched performance is standard.

The ZFDC series is housed in an extremely rugged 1¼ in. square metal case with one connector on each side. Each unit is supplied in a grey baked enamel paint finish.

Every unit is 100% tested and inspected under strict MCL quality-control standards to insure superior electrical performance and reliability and carries a one-year guarantee.

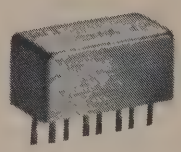
# ELECTRONIC ATTENUATOR/SWITCH

## PAS SERIES



| MODEL | FREQUENCY | Z (Ohms) | COST |
|---|---|---|---|
| PAS-1 | 5 MHz - 450 MHz | 50 | $27.95 (5-24) |
| PAS-3 | 1 MHz - 200 MHz | 50 | $28.95 (5-24) |

**DESCRIPTION** — The PAS series of electronic attenuator/switches enable attenuation control of RF signals with a maximum of only 20 mA of control current. Due to the specific properties of these attenuators, for a single frequency input all harmonics even and odd order, are virtually eliminated at the output. As a consequence the intercept point is greater than +45 dBm.

The attenuator/switches are economically priced while covering the very broad frequency range from 1 to 450 MHz. They offer low insertion loss, 1.5 dB, high isolation 50 dB, and exceptional unit to unit matched performance.

Having a volume of only .128 cu. inches, the PAS series is packaged within an RFI shielded metal enclosure and hermetically sealed header. These high performance units have their pins oriented on a 0.2 inch grid.

High reliability is associated with every MCL unit. Every production run is 100% tested and every unit must pass our rigid inspection and high quality standards.

Naturally, our one year guarantee applies to these units.

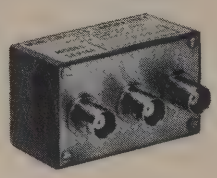
## ZAS SERIES



| MODEL | FREQUENCY | Z (Ohms) | COST |
|---|---|---|---|
| ZAS-1 | 5 MHz - 450 MHz | 50 | $42.95 (4-24) |
| ZAS-3 | 1 MHz - 200 MHz | 50 | $43.95 (4-24) |

**DESCRIPTION**—The ZAS series of electronic attenuator/switches enable attenuation control of RF signals with a maximum of only 20 mA of control current. Due to the specific properties of these attenuators, for a single frequency input all harmonics even and odd order, are virtually eliminated at the output. As a consequence the intercept point is greater than +45 dBm.

The attenuator/switches are economically priced while covering the very broad frequency range from 1 to 450 MHz. They offer low insertion loss, 1.5 dB, high isolation 50 dB, and exceptional unit to unit matched performance.

Having BNC connectors as a standard, the ZAS series has as an option TNC connectors at no cost.

The ZAS series is housed in a die cast aluminum case. These rugged units are double shielded to meet tough RFI requirements. The case is finished with a blue baked-enamel per Federal Standard 595 #25109 over phosphoric etch per MIL-C-15328A.

High reliability is associated with every MCL unit. Every production run is 100% tested and every unit must pass our rigid inspection and high quality standards.

Naturally, our one year guarantee applies to these units.

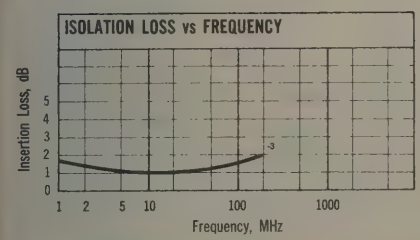
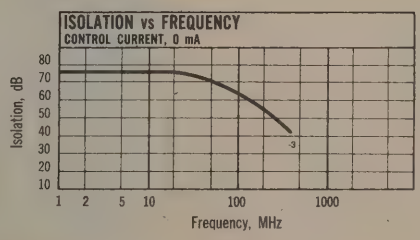
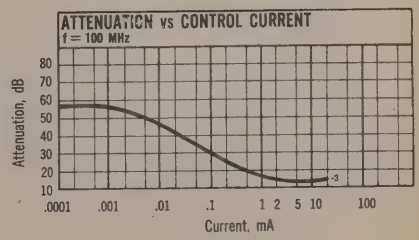
## MODEL ZAS-3

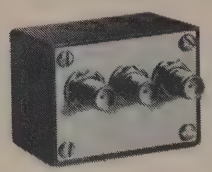






# ELECTRONIC ATTENUATOR/SWITCH

## ZMAS SERIES



| MODEL | FREQUENCY | Z (Ohms) | COST |
|---|---|---|---|
| ZMAS-1 | 5 MHz - 450 MHz | 50 | $52.95 (4-24) |
| ZMAS-3 | 1 MHz - 200 MHz | 50 | $53.95 (4-24) |

**DESCRIPTION** —The ZMAS series of electronic attenuator/switches enable attenuation control of RF signals with a maximum of only 20 mA of control current. Due to the specific properties of these attenuators, for a single frequency input all harmonics even and odd order, are virtually eliminated at the output. As a consequence the intercept point is greater than +45 dBm.

The attenuator/switches are economically priced while covering the very broad frequency range from 1 to 450 MHz. They offer low insertion loss, 1.5 dB, high isolation 50 dB, and exceptional unit to unit matched performance.

SMA (3mm) connectors are supplied with the Series ZMAS.

The ZMAS series is housed in a die cast aluminum case. These rugged units are double shielded to meet tough RFI requirements. The case is finished with a blue baked-enamel per Federal Standard 595 #25109 over phosphoric etch per MIL-C-15328A.

High reliability is associated with every MCL unit. Every production run is 100% tested and every unit must pass our rigid inspection and high quality standards.

Naturally, our one year guarantee applies to these units.

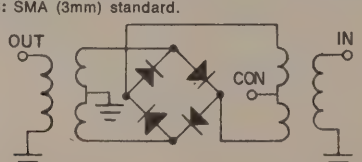
**MOUNTING BRACKET AVAILABLE ON REQUEST.** Add suffix B to part number and $1.50 to unit cost.
**CONNECTORS:** SMA (3mm) standard.



**WEIGHT** 34 grams 1.02 ounces

## FEATURES

**Broadband:** 1 MHz to 450 MHz
**High On/Off Ratio:** Typically greater than 50 dB
**Low Insertion Loss:** Typically less than 1.5 dB
**Miniature:** 1.5″ W, .88″ D, 1.15″ H
**High Reliability:** 100% tested, 1 year guarantee
**Low Cost:** As low as $52.95 in small quantity

## APPLICATIONS

- Electronic Switching
- Current controlled attenuation
- Bi-phase modulation
- Power leveling

## ABSOLUTE MAXIMUM RATINGS

- **Total Input Power:** 1 Watt
- **Total Input Current Peak:** 40 mA
- **Operating and Storage Temp.:** −55°C to +100°C

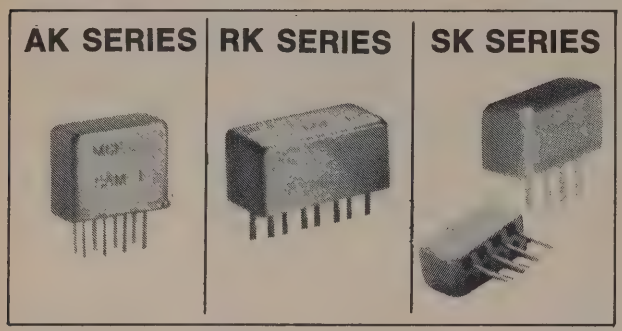
PROMPT SERVICE / ONE WEEK DELIVERY Mini-Circuits

# 0 dBm to +20 dBm
# FREQUENCY DOUBLERS



| MODEL | FREQUENCY | Z (Ohms) | COST |
|---|---|---|---|
| AK-2 | 1 MHz - 500 MHz | 50 | $19.95 (5-24) |
| RK-2 | 1 MHz - 500 MHz | 50 | $15.95 (5-24) |
| SK-2 | 1 MHz - 500 MHz | 50 | $19.95 (5-24) |
| RK-3 | 50 KHz - 150 MHz | 50 | $14.95 (5-24) |

**DESCRIPTION** — The Mini-Circuits' frequency doublers are economically priced while covering the very broad frequency range from 50 KHz to 1000 MHz. They offer a very low conversion loss, 12.5 dB, and high spurious rejection 40 dB. These doublers give exceptional unit to unit matched performance.

They offer a new degree of freedom in designing frequency multiplier chains. Their many octave band width, and excellent rejection of fundamental and third harmonics enable a significant reduction in filter requirements. In addition, they operate with 50 ohm impedances at input and output ports and are very sensitive to input power. They perform well from 0 dBm to +20 dBm input.

Only well matched hot-carrier diodes and ruggedly constructed transmission line transformers are used. Internally, every component is bonded with silicone rubber to provide protection against shock, vibration and acceleration. Three case styles are available.

## FEATURES

**Broadband:** 50 KHz to 1000 MHz
**Low Conversion Loss:** Typically less than 12.5 dB
**High Spurious Rejection:** Typically greater than 40 dB
**Hermetically Sealed and RFI Shielded**
**High Reliability:** 100% tested, one year guarantee

**AK Series**
**Microminiature:** 0.04 in.³, 0.5″ x 0.23″ PC area, 0.4″ high
**Low Cost:** As low as $19.95 in small quantity

**Micro-min Flatpack:** 0.025 in.³, 0.5″ x 0.23″ PC area, 0.25″ high
**Low Cost:** As low as $19.95 in small quantity

## APPLICATIONS

- Wideband frequency multiplier chains
- Low spurious frequency multiplier chains
- FM, PM modulation chains
- Double frequency range of signal generators

## ABSOLUTE MAXIMUM RATINGS

- **Input Power:** 100 mW
- **Operating and Storage Temperature:** −55°C to +85°C
- **Pin Temperature:** (10 sec.) 510°F
- **Environmental Specifications:** See Index Page

## DIMENSIONS AND CONNECTIONS

### AK Series

The AK units are packaged within an EMI shielded metal enclosure and hermetically sealed header (enclosure is 0.5 by 0.2 by 0.4 in.) Its pins are oriented on a 0.1 inch grid for printed circuit board mounting. The AK units require less PC area than a flat-pack or TO-5 can.

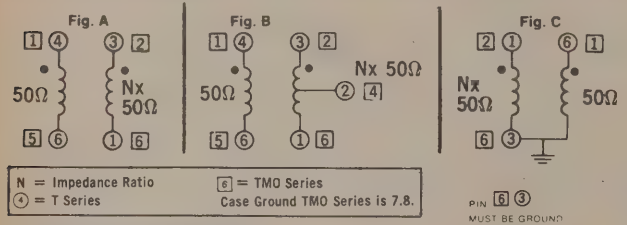
# Wideband (10 KHz to 800 MHz)
# RF TRANSFORMERS

| SERIES T | SERIES TMO |
|---|---|
| | |

**DESCRIPTION** — These microminiature wideband RF Transformers cover the frequency range from 10 KHz to 800 MHz. They operate with impedance levels from 12.5 ohms to 800 ohms and provide very low insertion loss, typically less than 0.5 dB.

These microminiature series are available in three basic configurations: (1) the primary and secondary windings are DC isolated (2) the primary and secondary windings are DC isolated and the secondary is center-tapped and (3) the primary and secondary windings are unbalanced (i.e. they both have one end grounded).
Although specified for a 50 ohm primary impedance they may be operated with a primary impedance as low as 12.5 ohms. The impedance matching ratio is essentially constant over the primary impedance range. The frequency response may change somewhat.



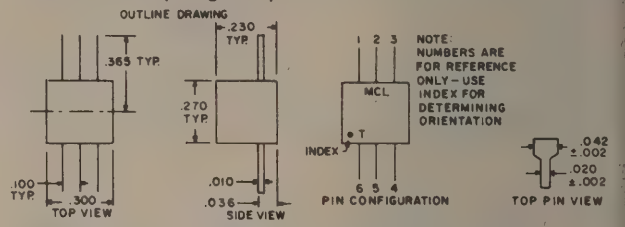
N = Impedance Ratio
④ = T Series
⑥ = TMO Series
Case Ground TMO Series is 7.8.

## DESIGNER'S KITS

(TK-1)—2 transformers of each type T1-1, T2-1, T4-1, T9-1, T16-1 **$32.00**
(TMK-2) — 2 transformers of each type TM01-1, TM02-1, TM04-1, TM09-1, TM016-1 **$49.50**

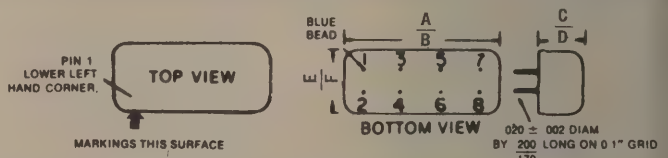
## SERIES T PLASTIC CASE from $2.95

Having a volume of less than .02 cu. inches, these tiny units have their adjacent pins spaced 0.1 inches. Between rows the pin spacing is 0.3 inches. The T-series transformers can be inserted into a standard DIP socket. Unit weight is .01 ounces (.04 grams).



## SERIES TMO METAL CASE from $4.95

The TMO units require less PC area than a flat-pack or TO-5 can. Packaged within an EMI shielded metal enclosure and hermetically sealed header (enclosure is 0.5 by 0.2 by 0.25 in.). Its pins are oriented on a 0.1 inch grid for printed circuit board mounting. Unit weight is 0.7 ounces (1.0 grams).



Note
Numbers are for reference only, use blue bead for determining orientation.

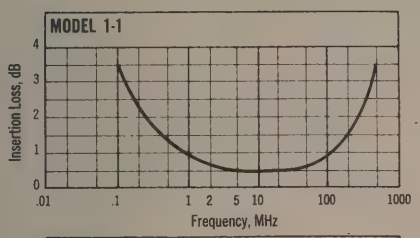
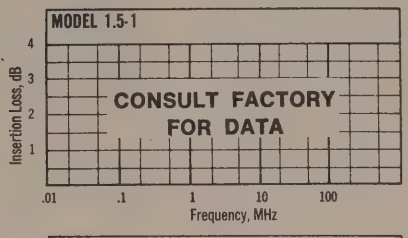
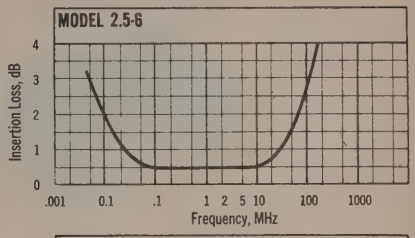
**COMMON SPECIFICATIONS**—Operating and Storage Temperature: T Series −20°C to +85°C, TMO Series −55°C, to +100°C. Total Input Power ¼ watt.

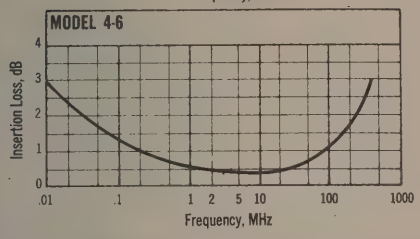
**Mini-Circuits** 2625 E. 14th St., Brooklyn, NY 11235 (212) 769-0200/Dom. Telex 125460/Int'l. Telex 620156

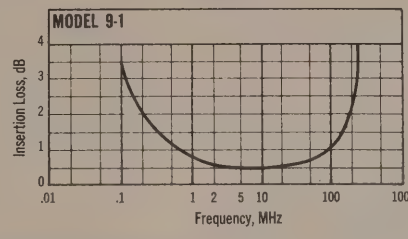
## FIG. A INSERTION LOSS VS FREQUENCY

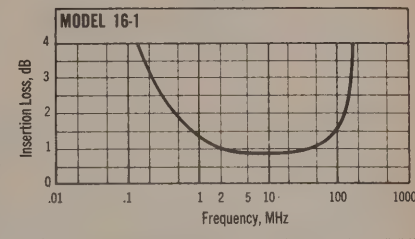




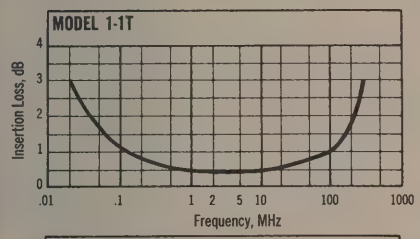


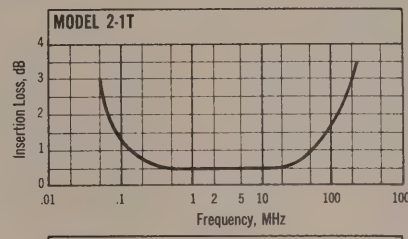


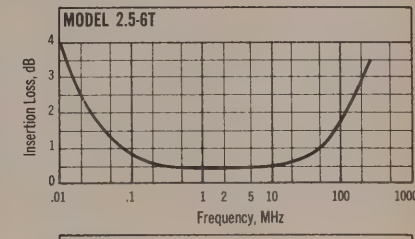


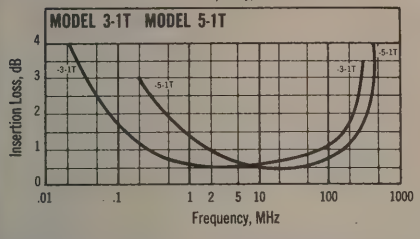


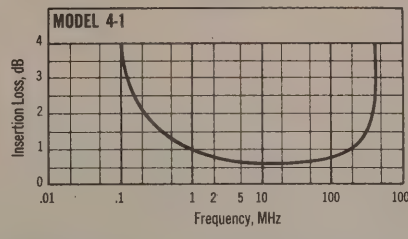
## FIG. B INSERTION LOSS VS FREQUENCY

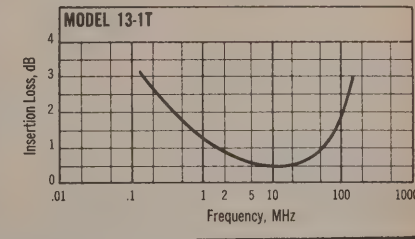




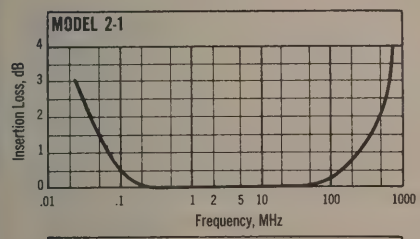


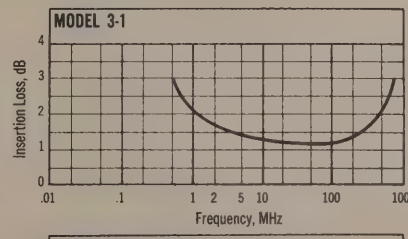


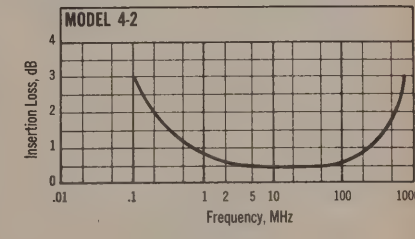


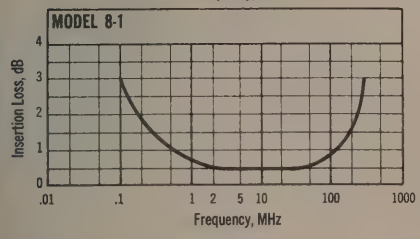


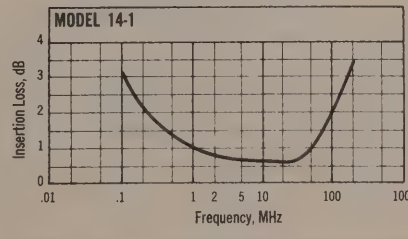
## FIG. C INSERTION LOSS VS FREQUENCY





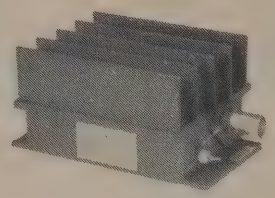






# High Power (+28dBm)
# AMPLIFIERS, BROADBAND

## ZHL SERIES



**FEATURES**

**Frequency Range:** 2 MHz to 500 MHz
**Compact:** 4.13″ x 2.69″ x 2.63″
**Connectors:** BNC
**Price:** $199 (1-9)

**DESCRIPTION** — The ZHL-1A RF power amplifier is capable of providing approximately 1 watt of power output over a broad frequency range from 2 MHz to 500 MHz. Using an ultra linear Class A design, the ZHL-1A provides a minimum of 16 dB gain over the full frequency range. Gain flatness is typically within ±0.5 dB.

The ZHL-1A is unconditionally stable and can be connected to any load impedance without amplifier damage or oscillation. Having a two stage design, and incorporating a highly reliable power output transistor enables the ZHL-1A to be designed for reliability of performance.

BNC connectors are supplied. Housed in a 3/16 inch aluminum case, the ZHL-1A is constructed to withstand tough environments. This rugged case includes a hefty heat sink as an integral part of the case construction.

The high performance ZHL-1A is offered at a remarkable price of ½ to ⅓ the cost of competitive units.

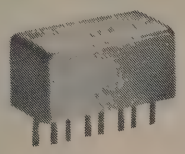
# Broadband LIMITERS

Mini-Circuits

## PLS SERIES



**FEATURES**

**Frequency Range:** 100 KHz to 150 MHz
**Miniature:** .8″ x .4″ .4″
**PC Mount:** .2″ Grid
**Price:** $15.95 (5-49)

**DESCRIPTION** —Having a volume of only .128 cu. inches, the PLS series covers a very broad frequency range from 100 KHz to 150 MHz. They have a dynamic range from +6 to +20 dBm and provide exceptionally hard limiting of a .05 dB output change per dB input change.

The PLS series has been designed to provide very small phase variations as the input level is changed. A bias current of about 3 mA from a 50 Ω source is required to excite the PLS limiter.

When the PLS series limiter is used with Mini-Circuits ZHL series amplifiers, a constant +15 dBm output can be obtained from 1 to 150 MHz.

Packaged within an RFI shielded metal enclosure and hermetically sealed header, these high performance units have their pins oriented on a 0.2 inch grid.

Only well matched hot-carrier diodes and ruggedly constructed transmission line transformers are used. Internally, every component is bonded to the header and case with silicone rubber to provide super reliable protection against shock, vibration and acceleration.

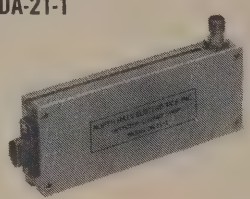
## DETECTOR-LOGAMP STRIP — MODEL DA-21-1

0.5 to 18 GHz



**Model DA-21-1 Detector-Logamp Strip** is a unique product for signal processing in pulse-modulated RF receiving systems. In its miniature package, the strip incorporates a highly accurate logarithmic video amplifier, a detector, a limiter and a test oscillator.

The unit accepts RF signals from 0.5 to 18 GHz and provides excellent tangential sensitivity at wide bandwidth without pulse stretching. An internal pulsed RF oscillator enables channel and detector testing by the application of a negative logic pulse to the Test Input pin. It meets the environmental specifications of **MIL-E-5400, Class 2** for airborne electronic equipment.

**SPECIFICATIONS**

**Input**

| | |
|---|---|
| Dynamic Range: | 50 dB |
| Log Accuracy: (referred to input) | ±1.5 dB |
| TSS (2-18 GHz): Pulse of 1 μsec Width & Repetition Rate of 1000 pps: | −43 dBm |
| Maximum Out-of-Band Level: | +10 dBm |

**Output**

| | |
|---|---|
| Dynamic Range: | 27 dB approx. |
| Voltage: | 2V at 0 dBm input |
| Noise Level: | 100 mV p.t.p. |
| Polarity: | Pos. or neg. |
| Rise & Fall Time: (over dynamic range) | Less than 50 ns |
| stretching: (1 μsec pulse at 50% of amplitude, referred to input) | Less than 50 ns |

| AS21-3170 | 500-1000 | 38 | +8 | +18 | 15/60 |

# MULTICOUPLERS

## 8 OR 12 CHANNELS — 1.5-4000 MHz

| Model (X = No. of Output Channels 8 or 12) | Frequency Range (MHz) | Gain (dB) Min. | Noise Figure (dB) Max. | Power* Input (dBm) Min. | Intermodulation** Products (dB) Typ. 2nd Order | Intermodulation** Products (dB) Typ. 3rd Order | VSWR*** In/Out Max. |
|---|---|---|---|---|---|---|---|
| AD-X-101 | 1.5-30 | 3.0 | 6.5 | +13 | 80 (a) | 80 (a) | 1.5:1 |
| AD-X-102 | 20-90 | 3.0 | 6.5 | +13 | 80 (a) | 80 (a) | 1.5:1 |
| AD-X-103 | 100-160 | 3.0 | 6.5 | +10 | | 75 (a) | 1.7:1 |
| AD-X-104 | 220-400 | 3.0 | 6.5 | + 4 | | 60 (b) | 1.7:1 |
| AD-X-105 | 220-470 | 3.0 | 6.0 | + 5 | 55 (b) | 65 (b) | 1.7:1 |
| AD-X-106 | 220-470 | 3.0 | 7.5 | + 8 | 65 (b) | 75 (b) | 1.7:1 |
| AD-X-107 | 500-1000 | 10.0 | 8.0 | − 8 | | 45 (c) | 2.0:1 |
| AD-X-108 | 10-1000 | 3.0 | 8.0 | − 8 | 25 (c) | 45 (c) | 2.0:1 |
| AD-X-109 | 1000-2000 | 5.0 | 7.5 | − 8 | 25 (d) | 55 (d) | 2.5:1 |
| AD-X-110 | 2000-4000 | 5.0 | 7.0 | −14 | 20 (d) | 45 (d) | 2.5:1 |

*At 1 dB gain compression point
**2nd Order: $f_1 \pm f_2$
3rd Order: $2f_1 \pm f_2$
***For 50 ohm loads

Letter in brackets indicates the level of the two interfering signals, $f_1$ and $f_2$, at which test was performed: (a) = −5 dBm (b) = −10 dBm (c) = −20 dBm (d) = −20 dBm

Series AD-X is a complete line of VHF and UHF Multicouplers covering a wide frequency range between 1.5 to 4000 MHz.

North Hills multicouplers are used in broadband systems where signals from a single antenna are distributed to as many as 12 receivers.

Specs of the multicoupler such as number of output channels, filter characteristics, and AC/DC power source can be changed in response to customer requirements. A combination of active solid state amplifier stages and passive dividers results in a wide dynamic range and good noise figure. The multicoupler is mechanically designed for mounting in standard 19″ racks.

# FILTERS

## FLAT TIME DELAY BAND-PASS

Wide variety of passive and active filter designs with controlled amplitude, group delay, and return loss characteristics.

## MONOTONIC LOW-PASS

Cut-off Frequencies (Fc): 1 to 100 MHz
Return Loss: >20 dB over pass-band
Group Delay: Flat over pass-band
Stop Band Attenuation: >40 dB at 2.5 Fc
Unit Step Response: <2% overshoot

## COMB AND INTERDIGITAL BAND-PASS FILTERS

# UNITED PRICING REPORTS

## the single source that speeds up invoicing, pricing, quoting, purchasing and estimating

Electronic component prices change so fast, you'd need a team of people just to keep up.

United Pricing Reports is the better way. When you subscribe to Pricing Reports you receive 1500 pricing sheets (3000 pages) of the latest prices, as of the date we ship them to you.

This gives you, in a single source, up-to-the minute selling prices on more than 500,000 electronic components.

United Pricing Reports gives you accurate resale prices at the exact moment you need them. Not hours or days later. So it helps you eliminate frantic phone calls, letter writing and catalog scanning to check on prices when you write an invoice or type a purchase order.

## Twice weekly price updates.

One week after you receive your Pricing Reports source book (1500 pricing sheets) you begin receiving twice weekly price updates. You simply take these new price pages and replace the now obsolete pages with them.

The whole process is simple. All information is organized alphabetically by manufacturer. And each manufacturer's price schedule is listed by part number in numerical/alphabetical sequence.

One more thing. When we promise twice weekly updates, we deliver. 52 weeks a year, consistently. Not monthly or every other month. We have a tradition of delivery on our promises, and we're certainly not going to stop now.

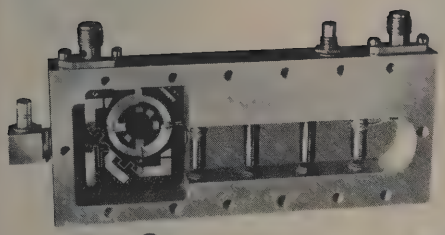
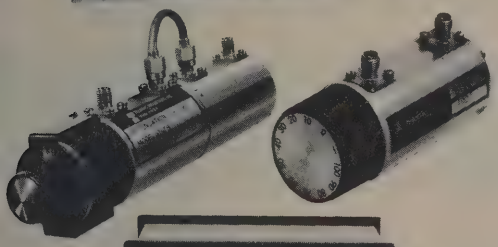
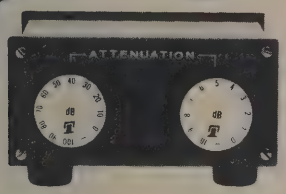
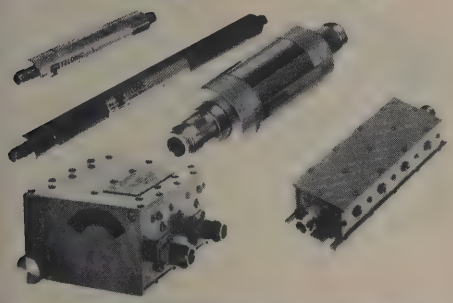
# TELONIC

## Specialists in the world of RF and Microwave









### MICROWAVE SUBASSEMBLIES

Telonic can custom design, manufacture, and integrate microwave components for specific packages and subassemblies. Our in-house capabilities for stripline and microstrip production permit quick turn around and attractive pricing structures.

The following list is representative of the type of components we can design and integrate into subassemblies to meet your requirements.

Preamplifiers • Power Amplifiers • Frequency Multipliers • Comb Generators • Oscillators • PIN Switches • Digital Phase Shifters • Phase & Amplitude Modulators • Detectors • Mixers • Discriminators • Limiters • Voltage Controlled Attenuators • Receiver Front Ends • Filters • Couplers • Multiplexers • Multicouplers • Hybrids • Power Dividers & Combiners • Attenuators • Baluns

### ATTENUATORS

Incorporating thick film, solid state construction, Telonic attenuators can guarantee precise operating parameters, high power handling capabilities and dependable service. Rotary type models may be specified with attenuation steps as low as .1 dB up to 10 dB in ranges from 1 dB to 110 dB, 50 or 75 ohms. Power rating for all units is 3 watts average, 1000 watts peak. Various combinations of rotary types permit tandem and parallel configurations for panel mounting and bench top units. A variety of connectors are also available.

### FILTERS

Telonic produces a range of RF and microwave filters so extensive that most requirements can be filled from standard catalog series. The product line covers 20 MHz to 12 GHz in low pass tubular types and bandpass in tubular, cavity, interdigital, and combline. Several series of tunable bandpass and band reject are also available. Our latest Filter Catalog provides complete specifications, performance curves, and simplified ordering procedures for all models. Special requirements should be directed to our marketing department.

### TEST INSTRUMENTS AND DISPLAYS

Telonic has long been recognized as a leader and innovator in the development of sweep/signal generation equipment. The 1200 series sweep generators encompass 8 instruments with frequency coverage from DC to 1.5 GHz.

Our display oscilloscopes are large screen types (11-inch) in single and dual trace. Both models, 121 and 122, have built-in marker adders for Y and Z pulse markers, are highly stable, and will operate with a wide variety of input instruments and devices.

Telonic's Rho-Tector line of VSWR instrumentation permits low cost, reliable test systems for VSWR determination over a 1.02:1 to 3:1 range. Various detectors, terminations, mismatches, meters, and kits are available.

Inquiries on Telonic equipment in the continental U.S. should be directed to the main office in Laguna Beach, California. Our TOLL FREE no. is 800-854-3813 (except in California). Overseas, Telonic is represented by distributors in 33 countries.

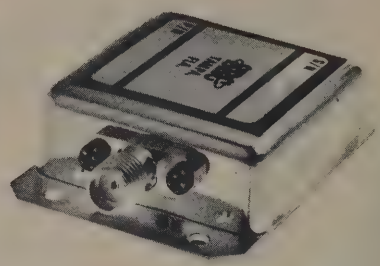
TRAK MICROWAVE CORPORATION

# A Sampling of Microwave Component Capabilities from TRAK Microwave Corporation

## 10 mW to 1 W Crystal Controlled Oscillators



Base plate-mount configuration

PC board-mount configuration

This family of oscillators from Scientific Research Corp. (SRC), Subsidiary of TRAK Microwave Corp., has three power levels; 10 mW, 100 mW and 1 W to provide maximum flexibility for the system designer. These oscillators utilize thin-film hybrid technology to provide the ultimate in miniaturization with proved reliability and top performance, for military or space applications. They are housed in completely shielded enclosures and are available to 1200 MHz with pins for PC board mounting and to 2300 MHz with baseplate mount and coaxial connector output.

### General Specifications
(subject to change without notice)

Frequency Set Accuracy at Room Temp.: ±0.001%
Stability: ±0.003% Power Variation with Temperature: ±2dB
Temperature Range: −54°C to +85°C
(to +125°C with degradation)
Non-harmonically Related Spurious (1MHz BW): ≥60 dBc

| | | 60-1200 MHz | Above 1200 MHz |

[3]Power supply: +15 VDC @ 250 mA max.
[4]Model numbers and dimensions for base plate configuration. Consult factory for comparable data on PCB-mountable models to 1200 MHz. Other models available to 18 GHz.

## Broadband Comb Generators

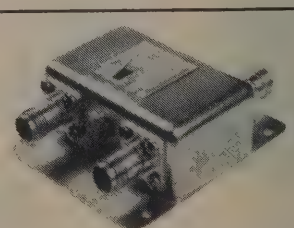
Comb generators from TRAK's SRC Subsidiary are available in any frequency value to 18 GHz, with a wide variety of comb spacings. Typical RF power output is −20 dBm, and typical package size is 1.9" x 1.3" x 0.5".

### General Specifications

| Comb Spacing | Frequency Range | Frequency Stability | RF Power Output (min.) | Power Flatness (Fixed Temp) | Load VSWR (max.) | Part Number |
|---|---|---|---|---|---|---|
| 5 MHz | 5 to 100 MHz | ±0.003% | −20 dBm | ±2 dB typ. | 2:1 | 3901 - 1000 |
| 20 MHz | 20 to 500 MHz | ±0.003% | −20 dBm | ±7.5 dB | 2:1 | 3901 - 1001 |
| 100 MHz | 2.0 to 3.5 GHz | ±0.003% | −20 dBm | ±6 dB | 1.25:1 | 3900 - 1300 |
| 500 MHz | 0.5 to 12 GHz | ±0.003% | +6 dBm, max. −22 dBm, min. | ±10 dB typ. | 1.5:1 | 3900 - 1900 |
| 100 MHz | 0.1 to 18 GHz | ±0.003% | 0 dBm, max. −40 dBm, min. | ±20 dB typ. | 1.25:1 | 3900 - 1200 |

Contact your TRAK representative or call the factory for specific information and quotations.

## IF Amplifier with Linear AGC



SRC's Model 8410-1010 exhibits exceptionally linear AGC characteristics and very low distortion. Operating at a center frequency of 60 MHz with a 3 dB bandwidth of 18-22 MHz, the device is particularly suited for radar applications.

Gain is 75 ±1.5 dB; AGC accuracy is ±1 dB at any AGC voltage and AGC slope is 11.3-16.3 dB/V. The device offers IF output at +7 dBm nominal and video output at 0.5 V minimum across 500 ohms. Ask TRAK for additional information about the Model 8410-1010 and other advanced IF amplifiers.

Standard octave bandwidth and narrow bandwidth amplifiers are also available.
*Under development

## Ferrite Circulators and Isolators

### Coaxial and drop-in types

Miniature circulators and isolators with coaxial connections or tabs for drop-in use, are available with the following specifications: **Frequency range** — 0.5 to 18 GHz. **Bandwidth** — 5% to greater than octave. **Isolation** — 20 dB minimum, narrow band; 17 dB minimum, octave. **Insertion loss** — 0.3 dB typical, 0.5 to 0.8 dB maximum. **VSWR** — 1.17 typical, 1.25 maximum (narrow band). **Operating temperature** — −54 to +95°C (most models). **Size range** — 0.5 x 0.5 x 0.5 inches to 1 x 1 x 0.5 inches (narrow band). **Weight range** — 0.2 to 1.8 ounces (narrow band). **Connectors** — SMA female or solderable tabs. **Isolator termination** — 1 W standard, others optional.

### Waveguide types

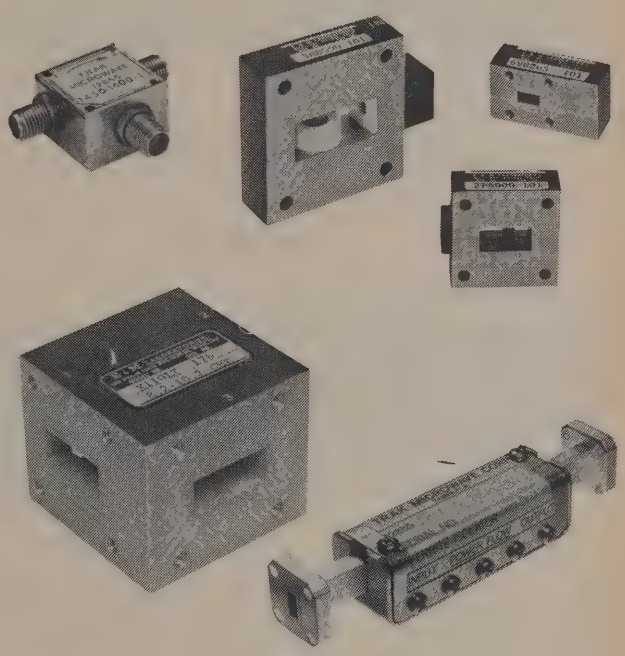
E&M Laboratories Division of TRAK offers a complete line of waveguide devices. General information is below; specific details are available upon request or from local representatives.

**Flange Waveguide Isolators** — Frequency range: 7.05 to 40 GHz. Bandwidth: 1 to 5%. Isolation: 20 dB nominal. Insertion loss: 0.3 to 0.5 dB maximum. VSWR (bilateral): 1.20 typical.

**3-port Waveguide Circulators, full waveguide bandwidth wye type** — Frequency range: 8.2 to 26.5 GHz. Isolation: 17 dB nominal. Insertion loss: 0.5 dB maximum. VSWR: 1.3 maximum.

**Broad bandwidth tee type** — Frequency range: 3.7 to 40 GHz. Isolation: 20 dB nominal. Insertion loss: 1.0 to 1.5 dB maximum. VSWR: 1.3 maximum.

**Full Bandwidth Waveguide Isolators** — Frequency range: 2.6 to 40 GHz. Isolation: 25 dB nominal. Insertion loss: 1.5 dB maximum. VSWR: 1.3 maximum.



# 96-Page Catalog — FREE

Send today for your TRAK Microwave and RF Components Handbook. This comprehensive free catalog gives complete details on the entire TRAK line, including products of the Company's SRC Subsidiary and E&M Laboratories Division. While you're at it, ask about TRAK's growing capability in supercomponents — it's the coming thing in the microwave industry.

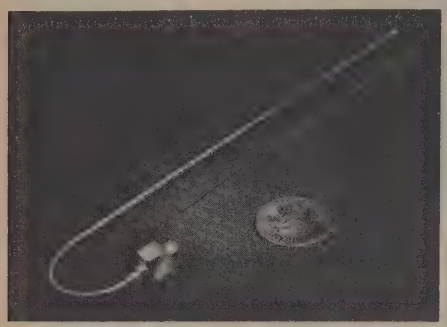
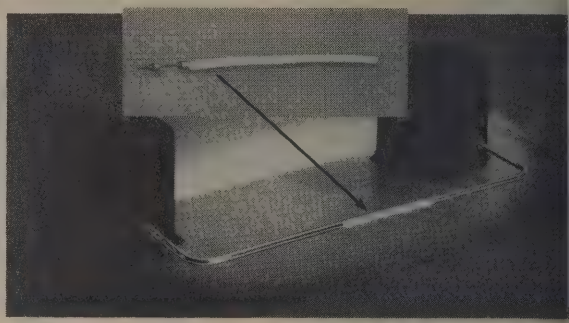
# MICRO-COAX The RELIABLE Semi-



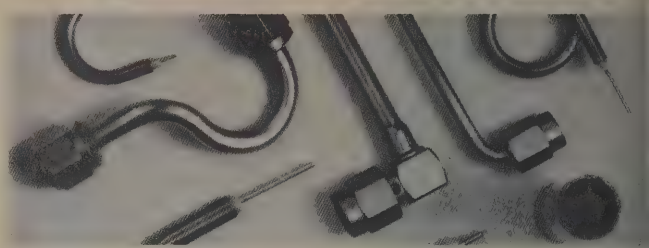
**IMPEDANCE TRANSFORMER IN-A-CABLE** adds reliability and eliminates up to 4 connectors. Designed for use between low impedance solid state sources and standard 50 and 75 ohm interconnections.



**MICROWAVE LOW-PASS FILTER IN-A-CABLE** gives reliability of a monolithic seal and can eliminate up to 4 connectors. Use wherever rigid tubular designs are employed.

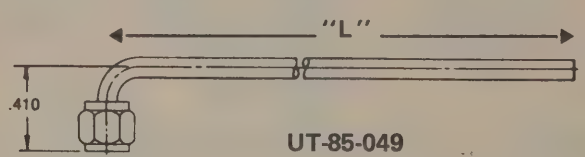
## MICRO-COAX CABLE ASSEMBLIES

**The usefulness of Micro-Coax semi-rigid coaxial cable is increased by its ability to be formed or fabricated into simple or complex geometric assemblies. Coiling, bending, stripping, and soldering, attaching connectors and other secondary operations result in delivery of maximum power in minimum space. The fabrication potential of Micro-Coax Cable is practically limitless, meeting mechanical and environmental requirements in phase matching, attenuation and VSWR optimization, assembly, encapsulating and insulating, and delay calibration. UTI provides finished assemblies, pretested and ready for installation.**

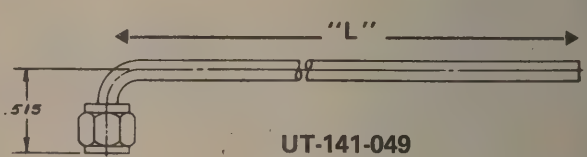


## LOW-PROFILE RIGHT-ANGLE MICRO-COAX CONNECTOR ASSEMBLIES

Reduce space requirements • Economical • Lengths from 2" to 48" • Silver plate is standard • Tin plate on special order



UT-85-049



UT-141-049

## STANDARD GENERAL PURPOSE 50 OHM MICRO-COAX CABLES

Typical applications include: Microwave transmission lines • Amplifier shielding or isolation • Totally shielded interconnections • Microwave delay lines

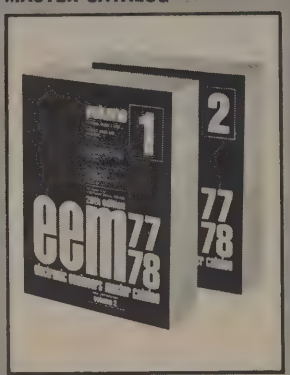
# WE KNOW OUR STUFF

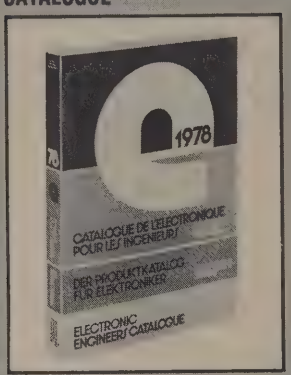
## 41 YEARS OF EXPERIENCE IN CATALOGING, 21 EDITIONS OF eem

### eem/ELECTRONIC ENGINEERS MASTER CATALOG —



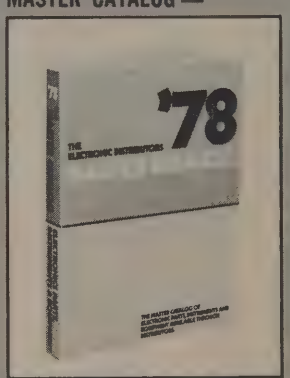
The "blue-ribbon" catalog/directory that has become "the standard of the industry" for electronic engineers, buyers and specifiers.

### ELECTRONIC ENGINEERS CATALOGUE



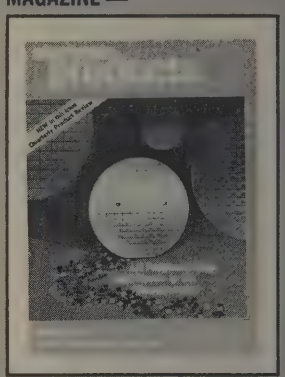
The new catalogue/directory of electronic products available to and from Western Europe and the United Kingdom. Designed especially for the European electronics engineer.

### ELECTRONIC DISTRIBUTORS MASTER CATALOG —



The only national catalog designed exclusively for distributors and their customers featuring electronic parts, instruments and equipment.

### ELECTRONIC PRODUCTS MAGAZINE —



The products magazine . . . A 100% product-oriented magazine including hundreds of new products and special features every month.

### IC MASTER AND THE UPDATES —

The only complete single-source directory including all IC devices manufactured in the United States. Updated three times yearly with accumulative supplements.

### eem FILE SYSTEM —

The only filing system designed especially for the electronics engineer. Instant retrieval and organization of data sheets and catalogs.

### UTP CUSTOM CATALOGS —

The Cadillac of individualized catalogs for the electronic parts distributor, featuring solely his lines and services.

### UNITED COST AND PRICING SERVICES —

The electronic distributors' proven method of being up to the minute on his cost and selling prices.

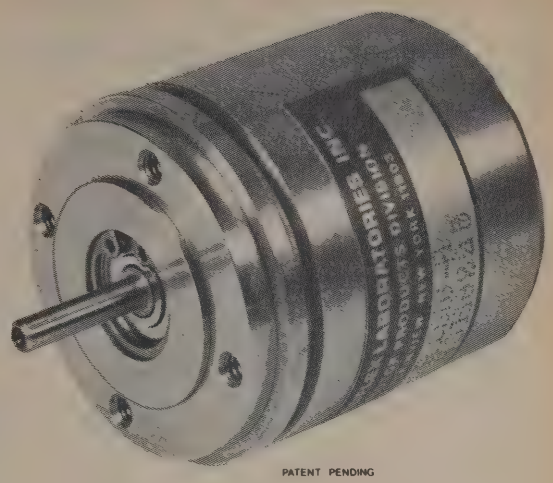
# AEROFLEX

## *brushless DC motors— featuring:*

- **A complete package with fully integrated electronics.**
- **Solid state switching techniques and patented solid state sensing.**
- **High power to weight/size ratio.**
- **Speed independent non-contacting rotor position sensors.**



PATENT PENDING

You no longer have to endure the penalties of brush wear and high power loss. You can have the high starting torque and linear/speed characteristics of conventional, permanent magnet DC motors — plus the brushless advantages of greater reliability, higher efficiency, lower operating temperatures, and a service life limited principally by bearing wear. Also, being brushless, they run without fear of sparking so they can be used in explosive, corrosive and other hostile environments.

The motor's inherent rotor-stator inside-out design provides for easier heat flow and cooler operation. In conventional motors, heat generated in the rotor windings must pass through an airgap to the housing. In the Aeroflex design, heat generated in the stator windings passes directly to the housing (a low resistance thermal path).

The motor can be supplied for operation from a fixed polarity voltage and rotation in either direction, or with the direction of rotation reversing with reverse polarity voltage. The solid-state commutation circuitry is available with integral speed regulation, to meet custom requirements.

High performance fan and blower motor applications can benefit by the higher capability of the Aeroflex brushless DC motors. Greater outputs (pressure and airflow) are achieved since these motors are able to run at much higher RPM than AC motors. This makes their use much more effective in AC blower applications.

In instrumentation and control applications, their reliability and long life can significantly enhance total system performance. Their very high starting torques and shaft power capabilities allow use of smaller motor sizes. They are compatible with pulse modulation and pulsed variable rep-rate types of servo control techniques.

Contact Aeroflex Motor Applications Engineering for assistance.

## TYPICAL PERFORMANCE DATA

| FRAME SIZE | 8 | 11 | 15 | 25 | 33 |
|---|---|---|---|---|---|
| Stall Torque (oz-in) | .2-.8 | 1-1.5 | 1.5-8 | 3-13 | 5-40 |
| Stall Power (watts) | 6 | 8 | 14-22 | 23-35 | 50-110 |
| Rotor Moment of Inertia (gm cm²) | .5 | 1.0 | 5.0 | 140 | 750 |
| Rated Torque (oz-in) | .1-.4 | .5-.75 | 1-5 | 1.75-8 | 3.5-25 |
| Speed at Rated Load (rpm) | 2,500/5,000 | 2,500/5,000 | 150/5,000 | 150/5,000 | 150/5,000 |
| No Load Speed (rpm) | 5,000/10,000 | 5,000/10,000 | 3,000/10,000 | 3,000/10,000 | 3,000/10,000 |
| Weight (oz) | 2.5 | 5.0 | 10 | 25 | 65 |
| Dim. Length | 1.25 | 1.75 | 2.00 | 4.00 | 5.00 |
| Dim. Diameter | .750 | 1.062 | 1.437 | 2.75 | 3.31 |
| Dim. Pilot Diameter | .500 | .825 | .875 | N/A | N/A |
| Dim. Pilot Length | .040 | .062 | .040 | N/A | N/A |

**"MADE TO ORDER" MOTORS— SIZES RANGING UP TO 2 HP**

**NOTES:**

1. Designed to meet military and industrial specifications.
2. Available with speed regulation to ±1% for variations in load torque and supply voltage.
3. Shaft details as requested.
4. Synchro type mounting optional.
5. Excitation voltage - standard ratings available.
6. Peak torque ratings approx. 40% above continuous value.
7. Efficiency up to 75%.
8. Consult our engineering staff for other ratings.

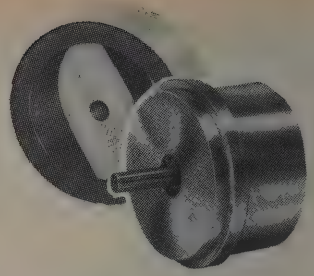
# AEROFLEX *brushless* D.C. Torquers



**FEATURES:**

- No commutator brush or contact friction
- Unlimited life
- Infinite resolution
- Direct Drive
- No radio noise or explosion hazard
- No motor ripple or "slot lock"

## Wide Angle *brushless* D.C. Torquers (Partial Listing)

## Full Rotation *brushless* D.C. Torque Motors

A torque delivery system designed to achieve maximum power efficiency within a minimum of space, weight and power. It consists of a permanent magnet brushless DC torquer mechanically coupled with a brushless resolver.

### (Partial Listing)

| Characteristics | TFR47-5P | TFR47-3P | TFR47-4P | TFR90-1P | TFR120-2P |
|---|---|---|---|---|---|
| Peak Torque | 1.2 lb. ft. | 4.1 lb. ft. | 7.8 lb. ft. | 16 lb. ft. | 45 lb. ft. |
| Power | 180 watts | 240 watts | 350 watts | 180 watts | 450 watts |
| Resistance | 16 ohms | 13 ohms | 13 ohms | 0.3 ohms | 5.6 ohms |
| Size | 4.625 in. O.D. x .62 in. Thick | 4.625 in. O.D. x 1.75 in. Thick | 4.625 in. O.D. x 2.25 in. Thick | 9.00 in. O.D. x 2.50 in. Thick | 12.00 in. O.D. x 3.25 in. Thick |

## Wide Angle *brushless* Tachometers

| Basic Part Number | Output Sensitivity (v/rad/sec) | Resistance at 25°C (Ohms) | Rotor Inertia (oz. in. sec²) | Pancake Dimensions O.D. (inch) | Pancake Dimensions Thick. (inch) | Pancake Dimensions I.D. (inch) |
|---|---|---|---|---|---|---|
| TG10Y-58 | .03 | 210 | $1.6 \times 10^{-5}$ | 1.000 | .350 | .125 |

## For Commercial/Industrial Applications

Ask Aeroflex about the **Valueline**-Brushless, Wide Angle, Direct Drive, Low Cost, DC Torque Motors.

Available in a great variety of sizes and outputs, Valueline offers these designer benefits: • No gear trains required • System simplification • Precise positioning • Smooth, quiet output • Unlimited life

MOTOR PRODUCTS DIVISION

DEPT. EM TEL. (516) 694-6700

SPECIAL DESIGN FEATURES AVAILABLE . . .
- CHOICE OF OPERATING VOLTAGES
- POLY-PHASE DESIGN
- VARIABLE FREQUENCIES

ROTATING COMPONENTS DIVISION
**AEROFLEX LABORATORIES INC.**
SOUTH SERVICE ROAD • PLAINVIEW, LONG ISLAND, NY 11803
DEPT. EM TEL. (516) 694-6700

**THE SOURCE FOR THE BROADEST VARIETY OF ROTATING COMPONENTS FOR THE MILITARY AND INDUSTRIAL ELECTRONICS INDUSTRY**

- SYNCHRONOUS MOTORS
- INDUCTION MOTORS
- PM GENERATORS
- BRUSHLESS DC MOTORS
- SERVO MOTORS
- GEAR MOTORS
- TACHOMETER GENERATORS
- DRAG CUP MOTORS
- INDUCTION GENERATORS
- FANS
- BLOWERS

## GEAR MOTORS

R.C. offers a wide range of integral motor-gearhead combinations with synchronous and induction motors as well as Servo motors in all R.C.I. frame sizes including 8, 10, 11, 15, 18, on up to 3⅞ O.D.

- Precision engineered for long life.
- Torque up to 4000 in oz.
- All Ratios.
- Backlash: 30 minutes maximum.
- Temperature Range: −55°C to + 150°C.
- Lubrication: MIL-L-6085, MIL-G-3278.
- Environmental Testing: MIL-E-5272.
- Mechanical slip clutch available on request.
- Ball bearings are stainless steel ABEC 5 or better as reqd.
- All gears precision class 2 or better per AGMA 236.04

## INDUCTION DRIVE MOTORS

Powerful • Rugged • Extremely Reliable • Versatile in Application

**Frequencies:** 50-60-400 cps • Variable Frequency • Dual Frequency
**Speeds:** 450 thru 22,000 rpm • 1-2-3 Speeds
**Horsepower:** 1/2000 to ¼ H.P.
**Voltages:** To 440V AC • Single or Dual Voltages
**Phases:** 1-2-3 • Reversible or Unidirectional
**Bearings:** Precision Life Lubricated Ball Bearings
**Mounting:** Face, Base, Flange, Servo
**MIL SPECS:** Exceed MIL-M-7969, MIL-M-17059, MIL-M-13787, MIL-E-16400, MIL-E-5400, MIL-E-5272, MIL-STD-202 Also for quality commercial applications
**Life:** In excess of 10,000 hours in many designs
**Gearheads:** Available with all models Hundreds of models available

## BRUSHLESS DC MOTORS

• **IMPROVE YOUR PRODUCT** • **REPLACE BRUSH TYPE MOTORS, FANS, BLOWERS.**

**OPERATE FROM DC POWER SOURCES • SOLAR CELLS.**

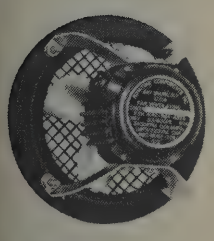
**LIFE** — extremely long — no brushes to replace — no brush dust.

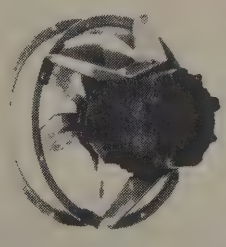
**SAFER** — no sparking in explosive atmosphere.

**RFI** — minimal.

**MIL SPEC APPROVED** for severe environments.
**SPEEDS** — wide selection as required.
**QUIET** — no brush noise.
**EFFICIENT** — low input power.
**SUPERIOR** at high altitudes.
**USES** — Aircraft — Submarines — Spacecraft — Ground Equipment — Any Electronic Equipment.

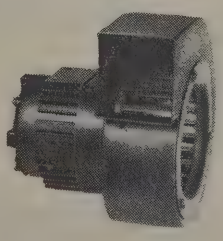
## FANS





- 50/60 Hz
- 400 Hz
- 1 or 3 Phase
- 115-208 Volts
- 3300-11,000 RPM
- 40-1000 CFM

## BLOWERS



- Single
- Double
- 115-208 Volts
- 50-60 Hz
- 400 Hz
- 1 or 3 Phase

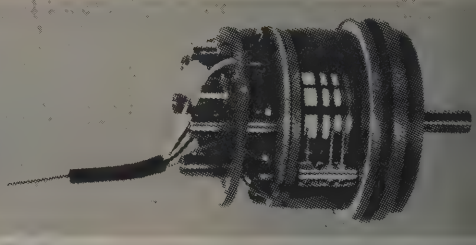
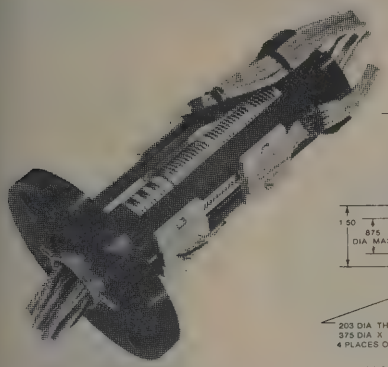
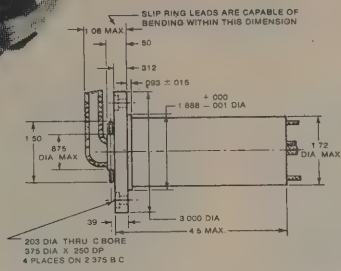
# ENCODERS & SWITCHES

Airflyte encoders and rotary switches feature drum construction with solid gold alloy conducting segments embedded in epoxy and machined flush. Brushes are multi-strand, spring-temper gold-alloy. As small as Size 5.



Airflyte ELECTRONICS CO.



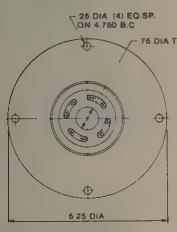


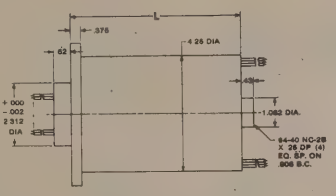
## CAY-150

**NOTES:**
**MECHANICAL**
1. **Rings:** Gold alloy
2. **Brushes:** Gold alloy wire, spring temper
3. **Ball Bearings:** Stainless steel
4. **Shaft:** Stainless steel, type 303
5. **Housing:** Anodized aluminum
6. **Torque:** 48 ring assembly 6.0 in-oz. maximum
7. **Speed:** 600 r.p.m. maximum-intermittent
8. **Life:** 2000 hours'@100 r.p.m.

**ORDERING INFORMATION:**
**CAY-150-**
No. of Rings (48 maximum)

**ELECTRICAL**
1. **Current:** Signal level to 2 amps.
2. **Voltage:** 400 vdc maximum
3. **Dielectric Strength:** 1000 Volts rms (all combinations).
4. **Contact Resistance:** A. Less than 8 milliohms @200 rpm
5. **No. of Rings:** 48 maximum
6. **Leadwire:** #28 awg 18" long





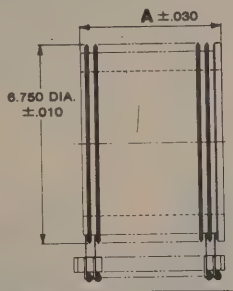
## DAY-705

**NOTES:**
**MECHANICAL**
1. **Rings:** Coin silver
2. **Brushes:** Silver graphite
3. **Ball Bearings:** Shielded
4. **Shaft:** Anodized aluminum
5. **Housing:** Anodized aluminum
6. **Torque:** ½ in.oz. per circuit
7. **Speed:** 500 rpm maximum
8. **Life:** 3000 hours at 100 rpm

**ORDERING INFORMATION:**
**DAY-705-☐**
No.of Rings (160 maximum)

**ELECTRICAL**
1. **Current:** 5 amps maximum per circuit
2. **Voltage:** 0 to 150 volts, AC or DC
3. **Dielectric Strength:** 500 Volts rms (all combinations).
4. **Contact Resistance Variation:** 8 milliohms peak at maximum speed
5. **No. of Rings:** 160 maximum
6. **Leadwire:** #24 awg, teflon insulated.

| No. of Rings | "L" ±.025" |
|---|---|
| 1-20 | 5.375 |
| 21-40 | 8.187 |
| 41-60 | 11.000 |
| 61-80 | 13.812 |
| 81-100 | 16.625 |
| 101-120 | 19.437 |
| 121-140 | 22.250 |
| 141-160 | 25.062 |



## CAY-94

1. **Rings:** Coin silver
2. **Brushes:** Silver graphite (two per ring)
3. **Brush Leafs:** Beryllium copper
4. **Insulation:** Phenolic
5. **Leadwire:** Available upon request
6. **Speed:** 750 r.p.m.
7. **Life:** 1000 hours
8. **Current:** 5 amps per ring: 10 amps per ring when 4 brushes are used
9. **Voltage:** 300 V.R.M.S.
10. **Dielectric Strength:** 500 Volts rms (all combinations).
11. **Insulation Resistance:** 10 megohms minimum at 500 VDC
12. **Noise:** The Contact Resistance Change in Each Circuit Shall be Less Than .005 Ohms At Maximum Speed

| Part No. | A | B | No. of Rings |

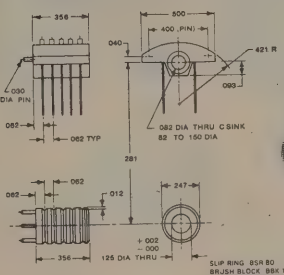
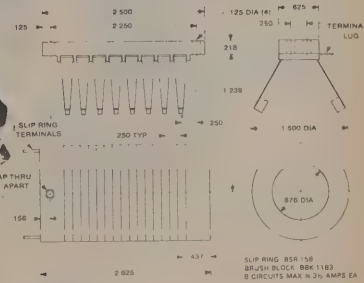
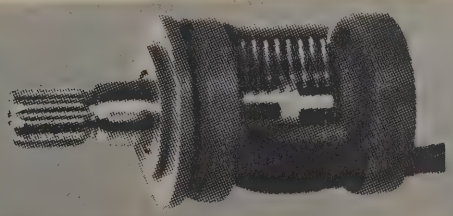
## BSR-80 / BBK-164



## BSR-158 / BBK-1183



**ENCODERS** A wide variety of encoders is available: T / B, BCD, Gray, etc. Special encoders may require nominal tooling charges. Encoders can be supplied with built-in logic circuitry. Sizes: 8-33.



**SWITCHES** When close accuracy, repeatability and size are important, specify Airflyte rotary switches for timing and positioning applications. Successfully replaces snap action switches and cams. Pre-set to eliminate installation time. Zero hysteresis.

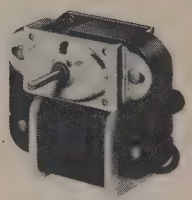
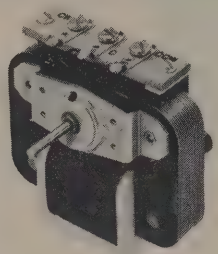
# BARBER-COLMAN MOTORS

## SHADED-POLE MOTORS • 2 POLE, 24/240 VOLTS, 50/60 Hz

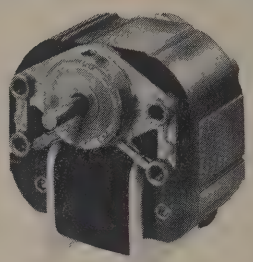
**YAA**
Rated HP to .005. Small and compact.



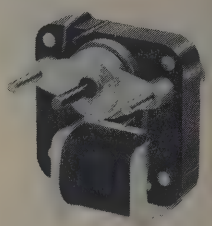
***YAB**
Rated HP to .012. 2.031″ mtg. centers. Most versatile.
*Synchronous models available.



**YAE**
Rated HP to .006. Reversible shading coils. Mechanical or electronic switching.



**YAR**
Rated HP to .042. Our highest powered motor.

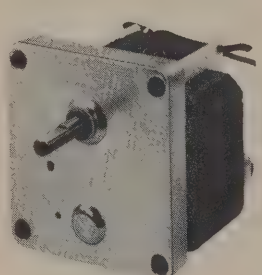


**YAX**
Rated HP to .0085. 1.875″ mtg. centers. Lowest cost in volume.

## SHADED-POLE GEARMOTORS • 2 POLE, 6/240 VOLTS, 50/60 Hz

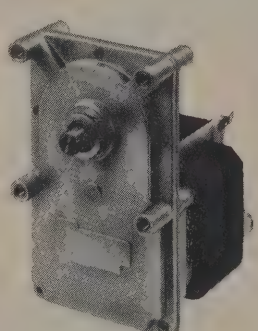
Type "A" gearmotors equipped with 2-pole shaded-pole motor, 6 to 240 volts, 50 or 60 Hz. Seven stack sizes available, ranging from .425″ to 2.0″. Output shaft diameters: 3/16, 1/4, 5/16, 3/8. Motors are designed to meet U.L. listing requirements.

Optional Features: thermal protection; stainless or plated shafts; cooling fan; solder terminals, leads or quick disconnect spades; brakes or clutch; low cost upper limit thermal protector; pinions; ball bearings.

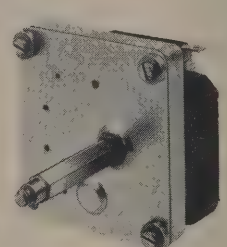


**A1**
Torque to 60 lb-in. Speed 11-800 RPM.

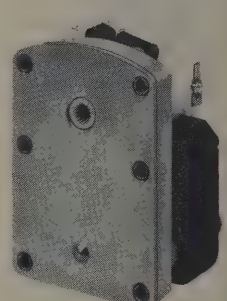
**A2**
Torque to 60 lb-in. Speed 8.7-800 RPM.



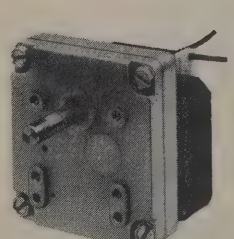
**A3**
Torque to 160 lb-in. Speed 1-200 RPM. Also available for 300 lb-in. Model A19.



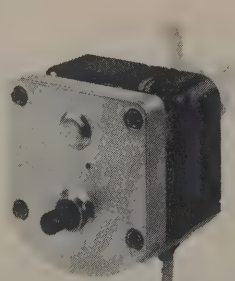
**A4**
Torque to 60 lb-in. Speed 1-800 RPM.



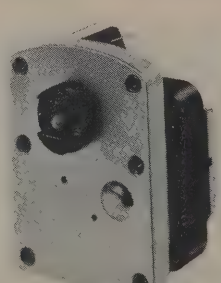
**A5**
Torque to 60 lb-in. Speed 3.7-800 RPM.



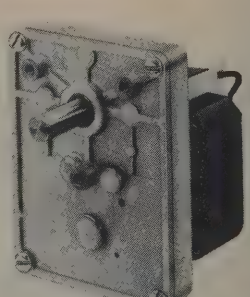
**A8**
Torque to 60 lb-in. Speed 1-800 RPM.



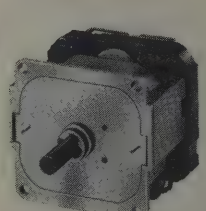
**A12**
Torque to 60 lb-in. Speed 24-800 RPM.



**A15**
Torque to 60 lb-in. Speed 1.6-800 RPM.



**A21**
Torque to 100 lb-in. Speed 1.2-800 RPM.

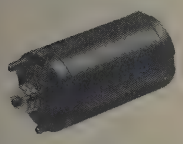


**MZ**
Torque to 15 lb-in. Speed 1-1000 RPM. On-center output shaft.

# D-C PERMANENT MAGNET MOTORS

Barber-Colman D-C motors have oil-impregnated sintered-bronze bearings and hardened steel shafts. Shaft configuration, magnetization and skew can be altered to closely adapt any basic motor or gearhead to the individual application. Various combinations of gear material are available. When required, noise filters are designed for specific frequency bands and internally mounted at the brushes for maximum noise reduction. Integral brushless tachometers for precise voltage/speed control are available for type FYQM, CYQM and GYQM motors.

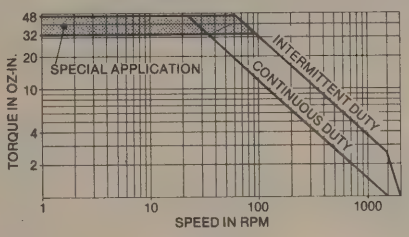
Barber-Colman's engineering depth and manufacturing capabilities combine to offer a broad line of motors and gearheads to meet the most demanding applications in the subfractional HP field.



## FYQM

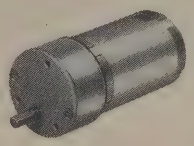
1.26″ Dia.
6–40V D-C.
Typical S/T 3000 RPM
at 1.5 oz-in.

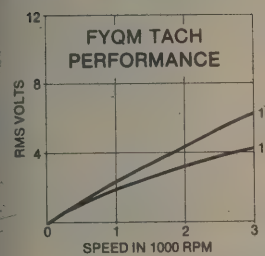
TYPICAL SPEED/TORQUE CURVES



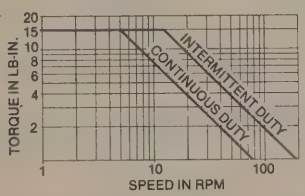
## FYQM-FYQH

1.38″
Max. Dia.

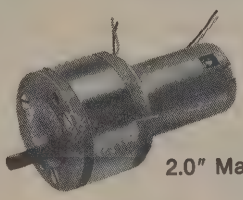




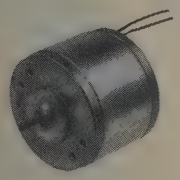
## FYQM Tach



## FYQM-CYQH

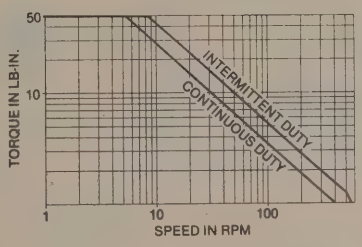


2.0″ Max. Dia.

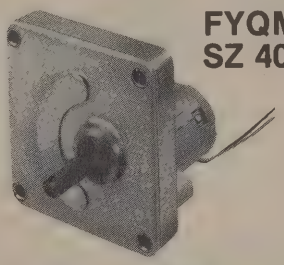


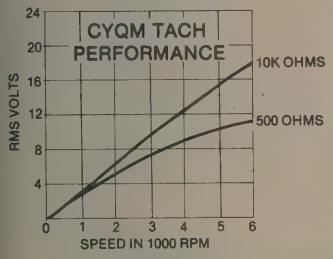
## CYQM

2.0″ Dia.
6–32V D-C.
Typical S/T 2700 RPM
at 4 oz-in.

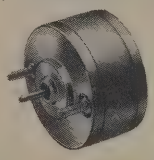


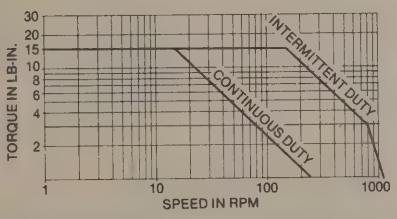
## FYQM-SZ 400





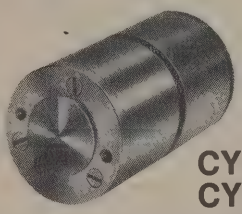
## CYQM Tach





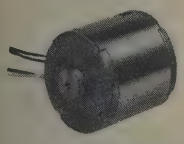
## CYQM-CYQH

2.0″ Max. Dia.



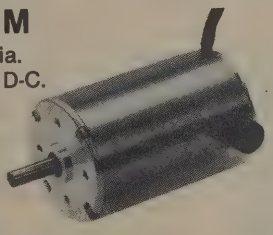
## GYQM

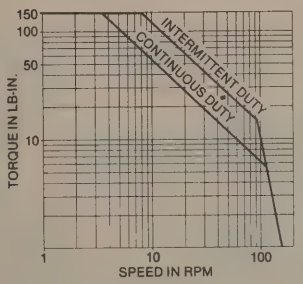
1.57″ Dia (40 mm).
6–40 Volts D-C.



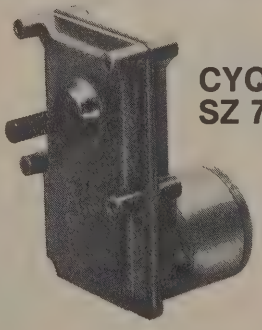
## KYQM

2.0″ Dia.
6–75V D-C.





## CYQM-SZ 700



The GYQM offers a package size different from the FYQM suitable for audio, computer peripheral and business machine applications. Typical S/T—See FYQM.

The KYQM is designed for high power/high current capability. Voltage range 6 to 75 VDC up to 100 mHP. Usable as a low-cost torquer and as a servo motor. Available with sintered-bronze or ball bearings and high-strength ceramic magnets.

# BERGER LAHR

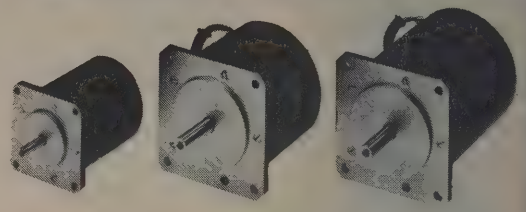
## 5-Phase PM Stepping Motors & Drives

**Step Angle** — .72° full and .36° half
**Steps per Revolution** — 500 and 1,000
**Accuracy** — ±3 min of arc
**Start/Stop Speed** — up to 2,500 full steps/sec (5,000 half)
**Slew Speed** — up to 100,000 steps/sec (6,000 rpm)

**Features** — Smallest step angle. Highest start/stop rates and slew frequencies. Finest resolution without gearing. No torque degradation at half step. Minimal resonance — will not lose synchronization (even unloaded) in resonant and harmonic regions. Inherently better damped, for fastest response and accel/decel times. Quiet operation.

**Constant Voltage Drives**
Model D100: Full .72° step only. 24 to 48V at 1.4A max.
Model D200: Selectable full/half step. 24 to 48V at 2.5A max or 70V at 1.5A max.

**Constant Current Drives**
Selectable full/half step. 90V dc. Current ranges fully adjustable. 19″ rack or OEM modules available.



| Model No. | Running Torque, oz in. | Holding Torque, oz in. | Phase Current, amps | Phase Resistance, ohms | Wgt, kg | Motor OD, in.(mm) | Shaft dia, in.(mm) |
|---|---|---|---|---|---|---|---|
| RDM 564/50 | 31 | 35 | 0.75 | 2.5 | 0.5 | 2.36(60) | .236(6) |

| RDM 599/50 | 300 | 310 | 1.15 | 3.3 | 2.5 | 3.34(85) | .374(9.5) |
| RDM 5913/50 | 460 | 500 | 2.80 | 1.0 | 3.5 | 3.34(85) | .374(9.5) |
| RDM 51117/50 | 1,000 | 1,100 | 5.00 | 0.3 | 7.2 | 4.33(110) | .625(16) |

## 2-Phase PM Stepping Motors & Drives

**Step Angles** — 3.6°, 7.5°, 9°, 11.25°, 15°, 18°
**Steps per Revolution** — 20 to 100
**Start/Stop Speed** — up to 750 steps/sec
**Slew Speed** — up to 3,500 steps/sec

**Features** — Exclusive dual self-aligning sleeve or ball bearings. Unequaled reliability. Largest selection of angles per model. Wide choice of winding resistances. Performance unaffected by extremes in duty cycle and temperature (−20°C to +80°C). Exceptionally high shock immunity.

**3.6° Step Angle**
Model RDM253/25 features the only 3.6° step angle in the industry. Highest efficiency — rare earth magnet design results in optimum torque/inertia/power/size ratios.

**2-Phase Drives**
Inexpensive unipolar single chip translator driver (.35A/phase) with optional output drive chip (1.5A/phase). Bipolar constant current driver 90V dc (12.5A/phase).

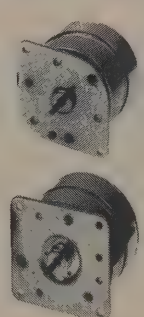
## PM Synchronous Motors

**Speeds** — 300, 360, 450, 600, 900 rpm at 60 Hz
**Torques** — from 1 to 25 oz in.

**Features** — Exclusive dual self-aligning sleeve or ball bearings, permanently lubricated. Broadest speed selection in industry. PM rotor gives high unenergized holding torque. Fast start/stop response — without accidental reversing. Fully reversible. Speed independent of voltage and load. Widest operating temperature range. Impedance protection. Can be stalled indefinitely without overheating. Available for 24 to 220V ac, 50/60 Hz.



## Gearheads

**Torque** — from 10 to 1,500 oz in.

Compatible with synchronous and 2-phase stepping motors. Wide choice of gear ratios (6.25:1 to 3,000:1).

## Engineering

With 40 years of manufacturing experience in electric motors, Berger-Lahr can help you. Our application engineering staff can give you expert assistance on our standard products as well as custom designs.

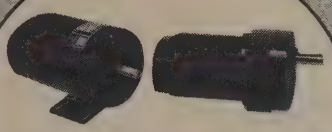
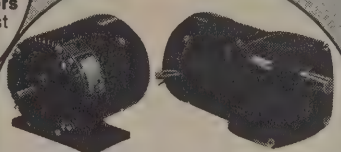
BODINE MOTORS
GEARMOTORS
SPEED CONTROLS



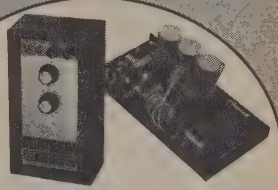
**42A Permanent Magnet D-C Motors and Parallel Shaft Gearmotors.** Just 4.30″ in diameter. Motors TENV 1/8, 1/6, 1/4 Hp. Gearmotors have helical steel gearing.

**New 32A Permanent Magnet D-C Motors and Right Angle Gearmotors.** Only 3.55″ in diameter. TENV Hp 1/12 thru 1/8 at 2500 Rpm. Many gear ratios available.

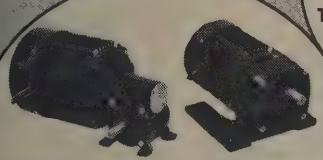


**42R Induction Motors and Parallel Shaft Gearmotors.** Motors 1/20 thru 1/4 Hp. All A-C winding types. Gearmotor ratios to 300:1. Helical steel gearing.

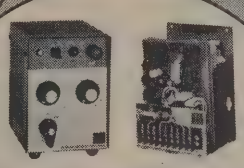
**Torque Motors.** Selected K-2, N-line and 48R motors for holding, positioning and winding applications. Intermittent and continuous duty. Standard ratings 7 thru 92 Oz-in.



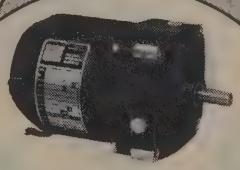
**Encased and Chassis-type Speed Controls for Permanent Magnet Drives.** Provides not only speed adjustment, but also adjustment of torque output. Available from stock.



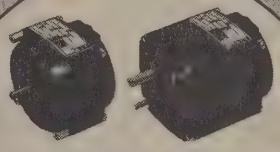
**48R Induction Motors . . . Right Angle and Parallel Shaft Gearmotors.** Motors thru 1/2 Hp. Available 115/230V in 50 or 60 Hz. Gearmotor ratios thru 30:1.



**Encased and Chassis-type D-C Motor Speed Controls for Shunt Wound D-C Control Motors and Gearmotors.** Nine encased models and four chassis models stocked.



**N-1S Gearmotors.** Special purpose gearmotors for applications not requiring the ruggedness of the N-1D. In-line shaft. Only 3.41″ square. 100 lot minimum order.



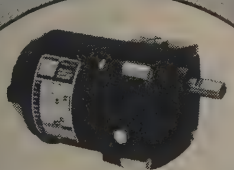
**K-2 Line A-C Motors and Gearmotors.** Instrument quality. Normal slip, high slip, and synchronous windings. Gearmotor torques thru 120 Oz-in. Only 2.405″ square. Stocked.

**N-Line Motors.** Three basic sizes; 3.36″, 4.50″ and 5.68″ in diameter. Stock ratings from 1/125 thru 1/4 Hp. All popular windings are available.

**K-4 Motors.** Special purpose motors for high volume applications. Standard ratings from 1/60 thru 1/20 Hp. Only 2.88″ square. 500 lot minimum order.

**Single Reduction Right Angle Worm Gearmotors.** 6 frame sizes with stock ratings to over 200 Lb-in. Ratios thru 60:1. Ample reserves for overloads.

**N-1R Gearmotors.** Single and double reduction right angle worm gearmotors. Stock ratings thru 5 Lb-in. Many ratios available for a wide range of speed selection.



**N-1D Gearmotors.** Parallel shaft helical and spur gearing. Ratings thru 40 Lb-in. Ratios thru 900:1. Only 3.41″ square.

**Double Reduction Right Angle Worm Gearmotors.** Provide high torques at low speeds. Stock ratings over 200 Lb-in. Ample reserves for overloads.

Canon®

# D.C. MOTORS for OEMS

## subfractional h.p.

Canon offers OEM users one of the world's broadest selections of subfractional h.p. d.c. motors at very competitive prices. Choose from literally hundreds of existing models, or, if you are a large quantity user, we'll supply units to your precise specs. Stall Torques range from 1/2 to 35 oz.-in., speeds to nearly 10,000 rpm ungeared. Most are available for broad voltage ranges, typically: 3-12, 3.3-16, 6-24, 24-70.

Mountings: Most are tapped for front mount. Others available.
Shafts: Length, flats, pinions, pulleys, etc. to customer specs.

## IRON CORE TYPE

**to 35 oz.-in. torque**

Ungoverned and Mechanically Governed. Line includes low cogging models and models with extra long life brushes

## BRUSHLESS TYPE

**0.14 to 4.17 oz.-in. torque**

with or without electronics

## MOTOR TACHOMETERS

**to 20 oz.-in. torque**

a.c. or d.c. output

## MOTOR GEARHEADS and GEARHEADS

**to 140 oz.-in. output torque**

Reductions from 1/5 to 1/3000 offset or concentric shafts. Mate with most Canon Iron Core and Brushless Motors.

*Short Form Specifications Catalog and Data Sheets on individual motors available.*

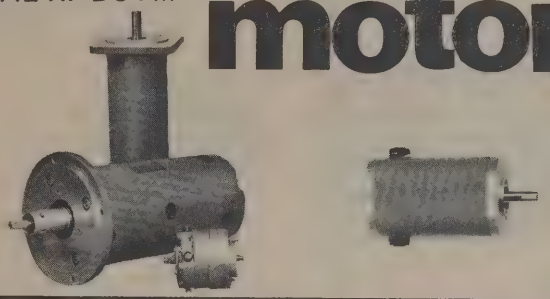
# CLIFTON PRECISION

More and more O.E.M.'s are changing to Clifton. They know that Clifton offers the finest motor technology, versatility and a responsiveness to customer's needs that is unmatched in the industry. Clifton designers have demonstrated an ability to solve seemingly impossible problems. Why not put Clifton technology to work for you?

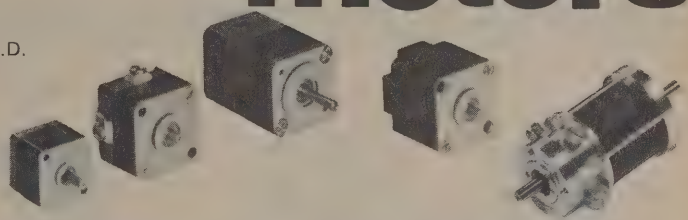
## FRACTIONAL HP DC PM motors

| APPLICATIONS | FEATURES |
|---|---|
| TAPE TRANSPORT DRIVES | Torques from 10 to 120 lb-ft |
| DISK MEMORY DRIVES | 2 inch to 5.5 inch O.D. |
| PRINTER CARRIAGE DRIVES | Advanced magnetic materials |
| MACHINE TOOL DRIVES | Cartridge brushes |
| CONVEYOR DRIVES | |



## MINIATURE DC PM INSTRUMENT motors

| APPLICATIONS | FEATURES |
|---|---|
| DAISY WHEEL DRIVES | Torques from 2 to 50 oz-in. |
| PRINT HEAD DRIVES | .75 inch cube to 1.25 inch O.D. |
| INSTRUMENT RECORDERS | Cartridge brushes |
| LABORATORY INSTRUMENTS | Alnico or rare earth magnets |

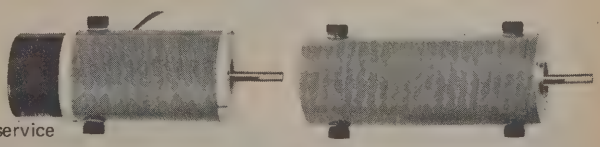


## PM STEPPER motors

| APPLICATIONS | FEATURES |
|---|---|
| PRINTER RIBBON DRIVES | Step angles 7.5°, 15°, 30°, 45°, 90° |
| PRINTER PLATTEN DRIVES | 1.1 inch to 2.8 inch O.D. |
| CARD SORTERS | Ceramic or rare earth magnets |
| OFFICE COPIERS | |

## INTEGRAL ENCODER AND motors MOTOR-TACHOMETER ASSEMBLIES

| APPLICATIONS | FEATURES |
|---|---|
| PRINTER CARRIAGE DRIVES | Optical encoder resolution to 1000 cycles |
| COPYING MACHINES | Solid state gallium arsenide light source |
| SPEED CONTROLS | Integral assemblies — no assembly or alignment necessary |
| MACHINE TOOL CONTROLS | Single source for motor/encoders eliminates costly assembly & simplifies service |



## DC PM HOLLOW SHAFT TORQUE motors

| APPLICATIONS | FEATURES |
|---|---|
| INERTIAL NAVIGATION PLATFORMS | Torques from 6 to 500 oz-in. |
| AIRCRAFT INSTRUMENTS | 1.1 inch to 5.2 inch O.D. |
| AIRCRAFT CONTROLS | Precision tolerances |
| | Gold commutators |
| | High reliability |

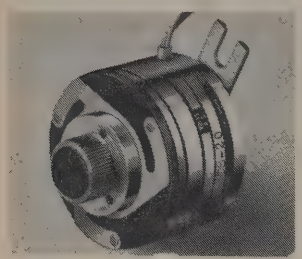
# CLUTCHES & BRAKES ELECTRO MAGNETIC

## SERIES 11 AND SERIES 20 . . . Two complete series of small clutches, brakes and clutch couplings for industrial and business machine applications.



### FEATURES

- High torque in compact package
- Fast response
- Ease of maintenance
- Available as stock items
- Standardized design at competitive price
- Flange or shaft mounting
- Long life
- Zero backlash armature with spring release
- **NO BURNISHING REQUIRED**

| CHARACTERISTICS | SERIES 11 | SERIES 20 |
|---|---|---|
| Diameter | 1.25" | 1.78" |
| Length (approx.) | 1.25" | 1.65" |
| Static Torque without burnishing | 5 lb. in. min. | 12 lb. in min. |
| Dynamic or slip torque | 5 lb. in. at 1800 RPM<br>4 lb. in. at 3600 RPM | 12 lb. in. at 1800 RPM<br>8 lb. in. at 3600 RPM |
| Mechanical response time | | |
| 65% rated torque | 20 MS* | 27 MS* |
| 100% rated torque | 40 MS* | 45 MS* |
| Electrical response time | 5 MS* | 12 MS* |
| Power requirement | 5 watts | 6 watts |
| Coil voltages available | 6,12,24,90 VDC | 12,24,90 VDC |
| Standard bore sizes | 3/16", 1/4", 5/16" | 1/4", 5/16", 3/8" |
| Standard lead wires | .26 AWG 12" L | 22 AWG 12" L |

*With forcing voltage the response time can be reduced and torque increased.

**For further information ask for Bulletin #11/20**

## HYSTERESIS CLUTCHES/BRAKES

A continuous slip device capable of providing precise, infinitely adjustable torque control. Units are basically direct current sensitive, having excellent reliability, repeatability and linearity. Described below are some of the infinite variations of Hysteresis Brakes manufactured. Also available are a similar wide variety of clutches.

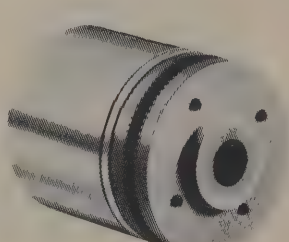
## OTHER AVAILABLE UNITS

### SUBMINIATURE CLUTCHES/ BRAKES

Fast response, low drag torque, high torque-to-inertia ratio, zero backlash. Torque from 3.5 to 240 oz in. and response time from 4 to 50 mili sec. Variety of designs for use as clutches, brakes, or clutch/brake combinations

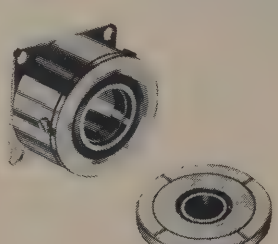
**For further information ask for Bulletin #SCB**



### TOOTH TYPE CLUTCHES

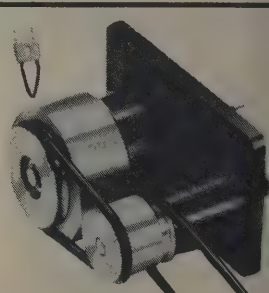
Positive engagement and high torque to weight ratio make them ideal for airborne and space applications. Clutches and brakes available to 700 lb. in Unit shown rated at 250 lb. in. in a 2-1/8" diameter x 2" long package

**For further information ask for Bulletin # TTC**



### APILON® FACED CLUTCHES and BRAKES

For severe service over extended periods of time. Special APILON ceramic friction facing has exceptionally high wear resistance and heat dissipation properties. Life expectancy of APILON faced units is in the area of 100 million operating cycles. The mechanical life of the unit matches the extraordinary life of the facings



### CUSTOM-DESIGNED UNITS

Delevan can provide units to meet the highly specialized requirements of virtually any commercial, industrial or military application. Here is a clutch/brake used to incrementally move recording type. The molded frame not only supports the clutch and brake, but also includes an idler pulley for a secondary speed output

**For further info ask for Bulletin #AFC**

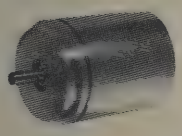
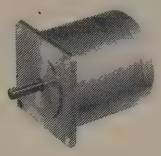
## STEPPING MOTORS



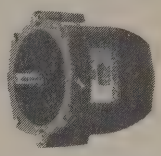
Sizes 8 through 20 VR and PM stepping motors, 7.5, 10, 15, 22.5, 30, 45, and 90 degree step angles with a wide range of voltage and torque ratings. Heat sinks and mechanical dampers available.



Size 23 (2 7/32" dia.) and size 34 (3⅜" dia.) permanent magnet stepping motors with 1.8, 1.875, 2, 2.5, 5, and 7.5 degree step angles. Torque ratings from 50 to 150 oz. in. for size 23, and 150 to 450 oz. in. for size 34.

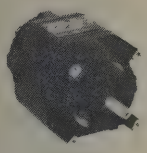
Size 42 (4 3/16" dia.) permanent magnet stepping motors with 1.8 degree step angles. Torque ratings from 150 to 400 oz. in.

## TACHOMETER ALTERNATOR



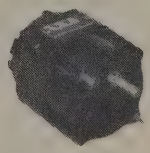
Model J15. Rugged PM design for maintenance free industrial applications. Output 5 volts/1000 RPM. 2.5% max. distortion, 0.1% linearity.

## INSTRUMENT MOTORS AND GEAR MOTORS

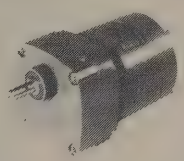


Holtzer Cabot Model M instrument motors with ratings up to 1/20 HP. Available as induction, torque, and synchronous motors in either face or foot mount. Only 2⅞" sq. Popular for floppy disk drive applications.

Holtzer Cabot Model L & S instrument motors with ratings up to 1/100 HP. Available as servo, polarized synchronous, synchronous, torque, induction, and DC motors. Only 2 5/16" square.



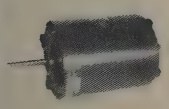
Holtzer Cabot Model L & S instrument gear motors with ratings through 150 oz. in. Available with gear reductions from 3:1 to 3600:1 in either spur or in helical gearing. Only 2 5/16" square.



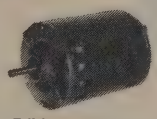
Size 34 (3⅜" dia.) synchronous and non-synchronous gear motors. Speeds from 2 RPM to 150 RPM. Torque output up to 40 lb. in. For applications that require quiet operation and long life.

Holtzer Cabot right angle gear motors. Up to ⅛ HP in a variety of voltages, either AC or DC. Gear ratios from 6:1 to 1140:1 in either single or double reduction gear reducers.

## SYNCHRONOUS AND INDUCTION MOTORS

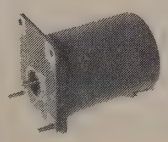


Size 34 (3⅜" dia.) and 44 (4⅜" dia.) synchronous and induction motors. 1/300 through ½ HP. 600 to 12,000 RPM. Single or dual speeds, single or dual voltage. 50/60 or 400 Hz.



Size 39 (3⅞" dia.) synchronous and induction motors. 1/200 through ½ HP. 600 to 3600 RPM. Single or dual speeds. 50/60 Hz.

## BRUSHLESS DC MOTORS

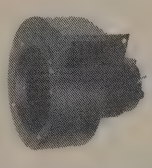


Size 15 brushless DC motors. Various voltage and torque ranges. Typical are 24 VDC, 0.6 oz. in. @ 3000 RPM and @ 45% efficiency.

## FANS AND BLOWERS

Propeller and Tubeaxial fans. Up to 12" dia. up to 1500 CFM. The EAD line of axial fans for cooling application is manufactured for continuous duty and efficient air circulation.

Vaneaxial fans. Available in 1½", 2", and 4¾" dia. from 3 to 500 CFM at high static pressures. EAD V-Line fans are small and powerful air moving devices particularly suited to high-density electronic packages.



Centrifugal blowers. From 3 to 2000 CFM, static pressures up to 5" of water. These centrifugal squirrel cage blowers have general-purpose performance characteristics for systems with medium back pressures.

EAD Motors

Holtzer Cabot Instrument Motors

Janette Gear Motors and Reducers

***It's Faster With the Master***

# When you build with Electro-Craft, the whole is greater than the sum of the parts.

When you're looking for motion control components, you want products that will give your design an extra dimension of performance and capability. Products that will put life into your concepts. Vitality into your ideas. More than the sum of the parts.

That's what you get when you come to Electro-Craft—manufacturers of the broadest line of motion control components and systems in the industry. Iron core, moving coil and brushless DC motors, tachometers, optical encoders, servo amplifiers, speed control systems and full closed loop digital position control systems. Products that are designed and manufactured to work together to give you the maximum in accuracy and performance.

And, there's more. Electro-Craft engineers draw on nearly two decades of experience and expertise in thousands of motion control applications. That means you get in-depth design assistance, problems solved and overall performance enhanced.

And, if there is not a standard Electro-Craft product that fits your specific application, our engineers can likely design a system or component that will.

To find out how Electro-Craft products can make your design more than the sum, give us a call at 612/935-8226, or write Dept. 1009 for our free catalog. The fourth edition of our 500-page engineering handbook, DC MOTORS, SPEED CONTROLS, SERVO SYSTEMS AND ENCODERS, is available for $1.00 ($5.00 overseas).

### CHARACTERISTICS

**RPM:** Rigid one piece housing eliminates bearing alignment problems.

**RINGS:** Coin Silver 5 amp rings.
Copper 50 amp rings.

**BRUSHES:** Silver Graphite
Fabricast Grade FAG 180 (80% AG – 20% C)
Two brushes per ring.
Brushes individually removable and replaceable.

**NOISE:** 10 Milliohms dynamic resistance max
5 Milliohms max with 4 brushes per ckt.

**CURRENT:** Noted in tabulated block.
Rating may be doubled with 4 brushes per ckt.

**HI-POT:** 1200 VAC 60 cycle for 15 seconds.

**ROTOR:** One piece steel sleeve.
Ring complement vacuum cast on sleeve as unit with epoxy dielectric.

**ROTOR LEADS:** 5 amp Leads – 20 ga per MIL-W-16878 type "E"
50 amp Leads – 8 ga per MIL-W-16878 type "B"

**HOUSING:** One piece steel tubing construction.

**COVER:** Easily removable for brush and ring inspection.

**BEARINGS:** Shielded or sealed ball bearings.

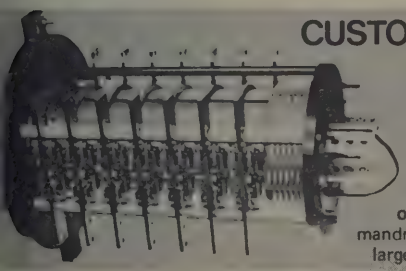
# CUSTOM DESIGNED SLIP RING ASSEMBLIES



### CUSTOM 7000 AMP SLIP RING ASSEMBLY

This slip ring assembly, as designed and manufactured by Fabricast, Inc., is used to supply 7000 amperes of current to the rotating mandrel of the world's second largest spin forging machine.

### CUSTOM 222 TRACK SLIP RING ASSEMBLY

This slip ring assembly as designed and manufactured by Fabricast, Inc. was used to complete the electrical circuits to the rotating arm of an astronaut carrying centrifuge.

The unit consists of 50 amp. power, 5 amp. instrumentation and 50 megacycle coaxial modules.

## BRUSH MATERIAL

- Fabricast grade Fag 180, the universal low noise level grade used for all standard brush assembles.
- Fabricast grade FAG 193, the lowest noise level grade, however, the ring surface speed is limited to 250 SFM.
- Fabricast grade FAG 150, the highest surface speed grade, however, noise levels are compromised.

| Grade No. | Composition | Recommended Surface Speed | Carrying Capacity |
|---|---|---|---|
| FAG150 | 50% silver, 50% graphite | Over 3500 ft. per min. | 100 Amps per sq. in. |
| FAG180 | 80% silver, 20% graphite | Up to 3500 ft. per min. | 250 Amps per sq. in. |
| FAG193 | 93% silver, 7% graphite | Up to 250 ft. per min. | 300 Amps per sq. in. |

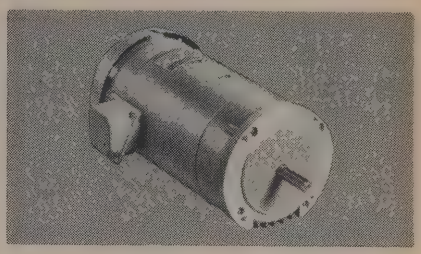
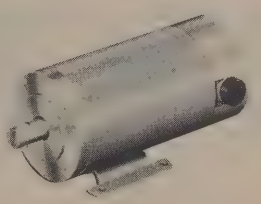
# AC and DC MOTORS

## DC Motors



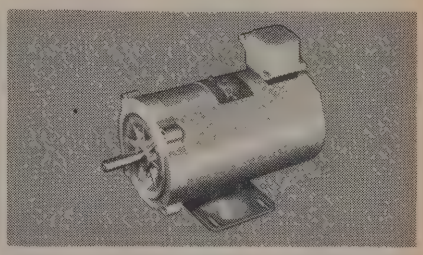
For general duty on variable- or constant-speed applications where the power supply is d-c or where a-c/d-c conversion is used for controlled speeds. Also ideal for reversing applications. Type BC direct-current motors will start, accelerate, and run fractional-horsepower devices smoothly and easily. They are available in open, totally enclosed, explosion-proof, and severe-duty enclosures with solid base, round frame, or end mounting in most ratings. Special-purpose type motors are also available for full- and half-wave rectified power drives. For complete information, write for Bulletins GEA-9956 and GEA-9965.

### Reel-Drive Motors



GE's 6⅝ inch diameter fhp direct-current motors are widely used for reel drives. Special end mountings and shaft extensions meet exacting application requirements. Series, split-series, compound, shunt, and compensated-shunt winding designs offer a broad design choice. Stall torque ratings from 3 to 120 ounce-feet and higher span various application needs, and motor voltage requirements are normally matched to your system design. Write for Bulletins GEA-9956 and GEA-9965.

### New Permanent Magnet Motors



GE's BPA-34 permanent-magnet motors are smaller and lighter than comparable wound-field motors of the same rating. Permanent magnets replace field windings, eliminating the need for field power supply and the chance of field-winding failure or burnout; and with battery power efficiency is increased, battery drain decreased. Two leads from power supply reduce connect and disconnect time. The motor features double shielded ball bearings.

In 3.4 inch-diameter totally enclosed frame, the BPA-34 is available in face, flange, or welded-base design for conventional d-c voltages, producing a d-c rating of about ⅓ hp at 3450 rpm, ⅕ hp at 1725 rpm, and 1/7 hp at 1140 rpm on a continuous basis.

New NEMA 56 frame 5⅝ inch diameter, permanent magnet motors at 1725 rpm, ⅛ thru 1 hp, are available in C-face and bolt-on base for rectified and d-c power supplies for conventional d-c voltages.

These motors are ideally suited for such applications as copy machines, tape reel drives, printers, and filing equipment, and for any other equipment, including heavier drive applications, utilizing variable-speed drives or battery power. Write for Bulletin GEA-10087.

## NEMA 48- and 56-Frame Ac Induction Motors

### Dependable Form G Motors in Thousands of Variations

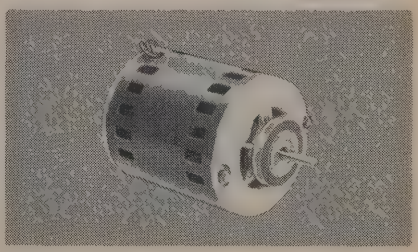
Form G a-c induction motors are available in most any electrical type, enclosure, and mounting in a variety of ratings from 1/20 to 5 hp for a complete range of commercial/industrial applications. For complete information write for Bulletins GEC-5000 and GEA-9964. New Form G5 motors (shown) also available in ⅛ through ¾ hp open split-phase and capacitor-start designs. Write for Bulletin GEA-10117.

## Small Induction and Synchronous Motors

Versatility is synonymous with General Electric Small Induction and Synchronous motors. With this complete line, GE offers the design engineer the widest possible application freedom, plus the traditional fine quality of General Electric motors.

These small diameter motors are designed to provide dependable power for a wide variety of applications, including data communication printers, cash registers, telecopiers, typewriters, audio recording equipment, air compressors, projectors, computer card readers, disc file drives, as well as various machine tool applications. And many other jobs as well.

**Such versatility is made possible by the choice of mounting styles, electrical types, bearing and insulation systems available.**



### M-49 FRAME MOTOR

The 3½ inch diameter M-49 motor is specifically built for applications requiring AC power in a limited space. This reversible motor can be mounted at any angle because it is available with either steel-backed babbit sleeve or ball bearings. The M-49 is offered in reluctance synchronous, permanent split-capacitor, split-phase and capacitor-start models. Shaft diameter is 5/16 or ⅜ inches.

### 19-FRAME MOTOR

The 3⅞ inch diameter 19-frame motor is designed to meet most small induction motor needs. Available with bolted cast-aluminum endshields, the 19-frame comes in synchronous, polyphase, permanent split-capacitor, split-phase and capacitor-start electrical types. This motor also features all-angle mounting, with the choice of either steel-backed babbit sleeve or ball bearings. On open models, a standard NEMA 42-frame mount is offered. Standard shaft diameters are 5/16 or ⅜ inches.

**Write for Bulletin GEA-9964**

For complete information contact your nearby GE Sales Office or write to General Electric Co., Section 998-52. Dept. EM, Schenectady, N.Y. 12345.

†Shunts are provided. **Mounting hole diameter for brush holder dimension D.

*Request and fill in Brush Inquiry Sheet, Form 109, so that we can supply the proper grade of brush material.*

### *SLIP RINGS Solid Coin Silver*

Standard Coin Silver Slip Rings, both *cylindrical* and *flat* types, are illustrated at right. We recommend the cylindrical type rings with three brushes per ring . . . spaced at 120°. The cylindrical type are designed for press fitting over standard steel shafting. The flat type rings are designed for nesting either on an insulated plate or for molding into insulation. Insulated slip rings of either type or slip-ring assemblies can be furnished with leads attached.

**No. 168 Series** flat type to 20" O.D.

Standard "Flat" rings have ¼" r dial contact surface and ⅛" radi spacing between adjacent rings.

**No. 116 Series** cylindrical ty to 36" O.D.

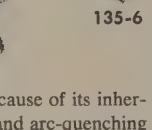
Copper Slip Rings, flat or cylindrical, are available.

***BRUSH ASSEMBLIES***

### *CONTACTS*

GRAPHALLOY, because of its inherent non-welding and arc-quenching characteristics, is used widely for contacts. Ask for Data Sheet 950.

### *BUSHINGS,* Oil-free



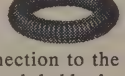
Replace oil-lubricated bushings in synchros, instruments, timers and missiles.

*Advantages:* 1) Lower friction at room temperatures. 2) No oil to solidify at low temperatures. 3) No oil to carbonize at prolonged elevated temperatures.

*Ask for Data Sheets 270 and 277 on Miniature Bronze-*GRAPHALLOY *Bushings.*

### *CONNECTORS*

(garter springs)



These silver-plated coil spring Connectors make for positive electrical connection to the brass body of the brush holder by snapping into the groove on the holder. The connecting lead can be pre-soldered to the Connector.

| GARTER SPRING CONNECTORS | BRUSH SIZE | BRUSH HOLDER NO. |

BRONZE and COPPER Slip Rings, cylindrical or flat, are available in the above sizes.

Cylindrical coin-silver rings, stacked with insulating rings between them, are press-fitted over insulation on the shaft. The insulation should be kept concentric on the shaft to avoid losing the high degree of concentricity already built into the slip rings and to maintain the effectiveness of the highly finished ring surface.

## Model 409 Flat Slip-Ring Assembly

Where cylindrical-type slip rings cannot be used because of axial space limitations, standard flat (or disc type) coin-silver slip rings will solve the problem. A series of these rings has been designed so that the rings will nest with a standard 1/8"-spacing between successive rings. Each ring provides a radial contact surface of 1/4" width. Our 3/16"-square brush in Brush Holder 11570 should be used with these rings. We strongly recommend three brushes per ring to reduce noise level to a minimum.

# BINDING POSTS

Binding Posts (normally spring-type 19185 or 22978) insure simple, low resistance, positive electrical connections between brush shunts (which have been threaded through brush-holder caps) and the external circuits. Binding posts are used also with brush and slip-ring assemblies and with brush-holder assemblies to make connection between the assembly and the external circuit.

**Miniature (Spring-type)** Miniature binding posts are valuable where space is at a premium, particularly for some rotary strain-gage and rotary thermocouple applications. These miniature binding posts are not insulated.

30624 30625

Metal Binding Post (Spring-type) 30624
*Not Insulated*

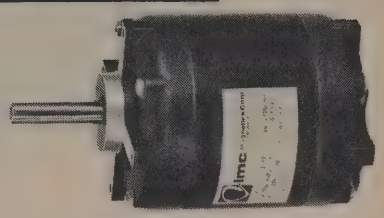
# CUSTOM DESIGNED MODELS

# FHP motors... precision, power, performance



Whatever your motor requirements, chances are IMC Eastern Division has a pre-engineered design to meet them. If not, we will custom engineer to your exact specifications.

IMC offers a complete range of motor types, sizes and performance characteristics.

Hysteresis synchronous, polarized and reluctance synchronous, induction, torque, and servo motors. 50, 60 400, 800 and 1000 Hz, multi-Hz and variable frequency types. Standard voltages from 13 to 230 V, single, 2 and 3-phase. Models include totally enclosed and open frame designs with or without internal cooling. Base, face, flange and servo mountings. Shafts offset, double-ended, with slots, keyways, tapers, etc. at customer option.

The tables below provide a few typical examples of IMC Eastern Division motor capability. For additional data on these designs, information on your individual requirements, or application engineering assistance, contact us at

## SERVO MOTORS

**Motor-generators, motor-tachometers in BuOrd sizes 5-18. All available with precision gearheads.**

## BRUSHLESS DC MOTORS

**Newly developed IMCom Brushless DC Motor meets maximum power output requirements — up to two horsepower.**

## DC MOTORS

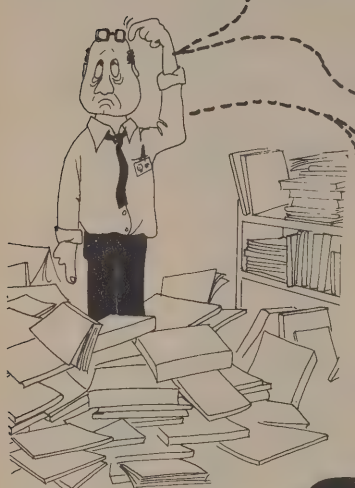
**IMC has introduced a new line of DC Motors for aerospace, military and high performance applications.**

## FREE

Our Driver Manual. It's your license to control all driving situations, free for the asking. 100 pages of detailed motor specifications, comprehensive theory and applications information (ref. cat. #EM2.). From IMC Eastern Division.

***What can I use to keep all the manufacturers' product data I receive in order?***

***What system makes filing or retrieving manufacturers' catalogs fast and easy?***



***Which file system have thousands of engineers purchased because they know it works?***

# eem FILE SYSTEM

## THE ONLY FILE SYSTEM DESIGNED SPECIALLY FOR THE ELECTRONIC ENGINEER

The publishers of **eem** have put together a unique filing system for electronic product information. The complete system includes: a product index booklet which classifies electronic products into 3,000 listings both alphabetically and by product group, and 45 file folders imprinted with the **eem** product sections (extra gummed labels included for expanding the system.)

As you receive manufacturers' catalog data sheets, technical bulletins, or clip magazine articles, jot down the proper Product Section Numbers from the **eem** PRODUCT-TO-SECTION INDEX. Then simply file in order. When you require information on a specific product, refer to PRODUCT-TO-SECTION INDEX again to locate the correct file folder. It's simple, and you'll always have the necessary data to compare, specify and buy, right at your fingertips.

**Here's how to order your eem FILE SYSTEM:**

For the complete system send $10 (plus tax; N.Y., 8%, CA, 6½%) in check or money order to:

United Technical Publications, Inc.,
645 Stewart Avenue, Garden City, N.Y. 11530
Att: Circulation dept.

For an **eem FILE SYSTEM** without file folders send $7.50 (plus tax; N.Y. 8%; CA, 6½%).

*UNITED TECHNICAL PUBLICATIONS, INC., DIV. OF COX BROADCASTING CORP., 645 STEWART AVE., GARDEN CITY, N.Y. 11530 (516) 222-25*

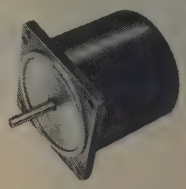
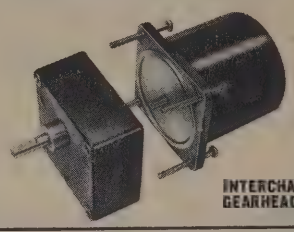
# "M" SERIES MOTORS AND INTERCHANGEABLE GEARHEADS

- 3 Frame Sizes — Rated 1/750 to 1/18 hp
- Torque Ratings from 0.7 to 1500 oz.-in.
- More than 600 Models Available from Stock
- Built by JAPAN SERVO COMPANY, Subsidiary of Hitachi, Ltd., Japan's Leading Maker of Precision Motors
- Instantly Reversible
- Totally Enclosed
- Permanently Lubricated
- Ball Bearing Construction



DIRECT DRIVE MOTORS



INTERCHANGEABLE GEARHEAD MOTORS

"M" Series motors are precision machined to highest quality standards; utilize permanently lubricated, electronically selected ball bearings. Rabbeted joints and brushed lead-wire openings form a totally enclosed, protected motor housing. All insulation materials are rated Class A or better. Modular concept, using interchangeable gearheads with pinion shaft motors, reduces costly tooling changes and permits a greater number of different models to be manufactured using common parts. Motors and gearheads never need re-oiling, insuring long service without maintenance. Designed for smooth, silent power; geartrains use high precision, accurately hobbed gears housed in a rigid diecast enclosure which combines great structural strength with efficient heat dissipation. Each motor is individually tested and run for six hours.

## INDUCTION MOTORS

Most popular type, with low starting current. May be started, stopped and reversed continuously with low-inertia loads. May be stalled at full voltage for short periods without damage. Continuous duty rated. Smooth, quiet and relatively efficient. Speed changes slightly with change in torque load.

### 1/250 hp MOTORS

Induction motors listed above are also available with the following additional output speeds: 1, 2.1, 3.1, 4.1, 6.2, 8.3, 10, 16, 21, 31, 62, 124 rpm. Also available with dual output speeds.

## INDUCTION MOTORS WITH BUILT-IN BRAKING

Induction motor with built-in braking device has same advantages as Type IM, but will stop and reverse direction more rapidly without "coasting." Intended for duty cycles of 30 minutes or less requiring precise positioning or rapid direction reversal with holding brake action.

### 1/200 hp MOTORS WITH BRAKING

## SYNCHRONOUS MOTORS

Synchronous motors have same advantages as Type IM induction motors, but with constant speed and lower efficiency. Designed for use where precise speeds and/or timekeeping properties are required.

### 1/375 hp SYNCHRONOUS MOTORS

| Model Number | Speed, rpm | Torque, Oz.-In. | Frame Dimensions, Reference | Net Each |
|---|---|---|---|---|
| SM6P2-1800 | 1 | 140 | 6G | $53.50 |

| HM10S15D7 | 1800/3600 | 5.6 | 10 | 110.00 |

Synchronous motors listed above are also available with the following additional output speeds: 12, 18, 24, 36, 72, 144 rpm. Also available with dual output speeds.

## VARIABLE SPEED AC MOTORS

Variable speed AC motors feature 15:1 speed ratio with constant torque, tachometer-generator, feed-back regulated solid state control unit, instantly reversible, extremely smooth and quiet operation. AC design eliminates brush replacement and increases life expectancy more than tenfold.

### 1/250 hp VARIABLE SPEED AC MOTORS

| Model Number | Constant Torque Speed Range, rpm | Torque, Oz.-In. | Frame Dimensions, Reference | Net Each |
|---|---|---|---|---|
| IMT6P3-1800 | .06-.83 | 140 | 6G | $115.50 |

ACCEPTANCE

The ELECTRONIC ENGINEERS CATALOGUE is the only comprehensive, trilingual catalogue/source-directory of electronic products available to—and from—Western Europe.

It is divided into three distinct sections: 1. **The Product Index and Directory,** which lists more than 3,000 product headings & cross-references alphabetically in English with their French and German equivalents. 2. **The Manufacturers' Catalogue Section,** which is a compilation of Manufacturers' Catalogues in alphabetical order. 3. **The Manufacturers' Sales Offices and Trade Marks Directory,** which alphabetically includes country, address, telex or TWX numbers of the Manufacturers' main and local sales offices and/or agents.

The ELECTRONIC ENGINEERS CATALOGUE offers U.S. manufacturers the most cost-efficient method of distributing their catalogue data to **25,000** electronic engineers and buyers throughout Western Europe. It represents the carefully conceived application of the time-proven **eem** "cataloging" concept to the elusive European marketplace.

## High Performance DC Torque Motors

### Brush type and Brushless, More than 500 standard models

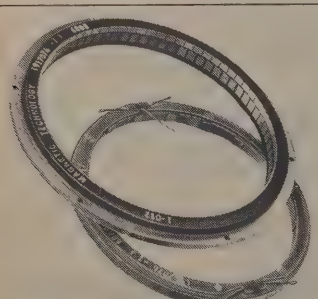
Magnetic Technology® offers designers the broadest standard line of high performance DC torque motors, as well as exotic one-of-a-kind units. These motors are produced to the most exacting reliability and performance standards, and have been proven in aerospace, ground-based and undersea applications.

Magnetic Technology® has paced the industry with developments such as 40 million oz-in/sec² power rate motors, ultra light-weight units for deep space use, 500°F temperature rated motors and compact units for implanted cardiac assist systems.

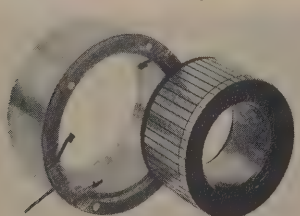
MAGTECH® DC torque motors combine high ratios of torque to power, speed and size with other desirable characteristics such as low electrical time constant and low ripple torque.

### Example Specifications

| Mag. Tech. Part No. | 1500G-050 | 1937G-050 | 2340-077 | 2813-100 | 3680-185 | 6960-195 | 14000E-300 |
|---|---|---|---|---|---|---|---|
| Peak Torque | 15 OZ.IN. | 20 OZ.IN. | 60 OZ.IN. | 90 OZ.IN. | 500 OZ.IN. | 10 LB.FT. | 120 LB.FT. |
| Power @ Tp (watts) | 40 | 56 | 60 | 42 | 110 | 112 | 695 |
| No Load Speed (rad/sec) | 340 | 375 | 134 | 60 | 29 | 7.5 | 4.0 |
| I.D. | .455 | .625 | 1.250 | 1.000 | 1.500 | 4.500 | 9.308 |
| O.D. (inches) | 1.500 | 1.937 | 2.343 | 2.813 | 3.680 | 6.960 | 14.000 |
| Length (inches) | 0.50 | 0.50 | 0.77 | 1.00 | 1.85 | 1.95 | 3.00 |
| Weight (oz.) | 2.5 | 4.2 | 7.6 | 18 | 49 | 145 | 850 |



Typical high performance units



These permanent magnet, armature excited motors are furnished frameless for direct mounting to the driven load without gears. Large bore, minimum width and thin-ring configurations make possible compact system packaging.

Peak torque ratings of standard models range from 7 oz-in. to more than 120 lb-ft., OD's from 1.5 inches to more than 19 inches, and armature bores to more than 10 inches. Special designs may be furnished to meet specific customer requirements.

Brushless motors are continuous rotation type that have advantages over conventional brush-type DC torque motors in some applications.

### Example Brushless Specifications

| Mag Tech Part No. | 1600B-035 | 2375D-050 | 3625B-050 | 3350B 125 | 11500-082 | 19300-150 |

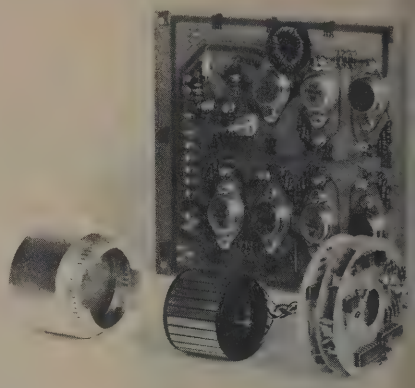
## Special Products

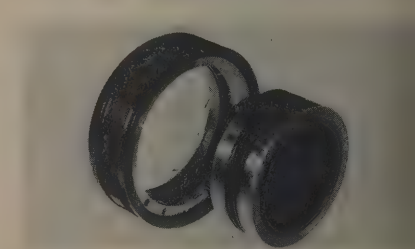
Magnetic Technology® also produces linear actuators, and a wide variety of custom devices including the examples below.



High Efficiency Brushless Motor System. The model 2250-150 operates at 1100 rpm with a 20 oz-in load. The overall system efficiency is above 70% for all input voltages between 18 and 32 volts and at temperatures between −55°C and 85°C.

Rare Earth Brushless DC motor. Special motor developed for use as cardiac assist incorporating rare earth magnets to prevent alteration of motor characteristics in case of over current. Motor designed for maximum efficiency, i.e. lowest temperature rise under continuous load conditions.

Limited Angle Brushless DC Torquers



Precision Motor Tachometer

Magnetic Technology®

# Magnetic Technology®

## Tachometers

Any of the more than 500 standard MAGTECH® torque motors may be operated as a tachometer generator. In addition, separate product lines of precision tachometers and industrial tachometers are available. These range from .05% ripple voltage units usable at rates less than one revolution per day and units with 50,000:1 dynamic range, to popular industrial units.

These tachometers feature open, frameless configuration for direct drive mounting. The direct mounting without gears eliminates dead zones and inaccuracies that can result from gearing backlash and gear imperfections. Typical characteristics include high voltage gradient, low time constant, high coupling stiffness and resolution, and accuracy at low speeds.

### EXAMPLE TACHOMETER SPECIFICATIONS INCLUDING INDUSTRIAL TYPES*

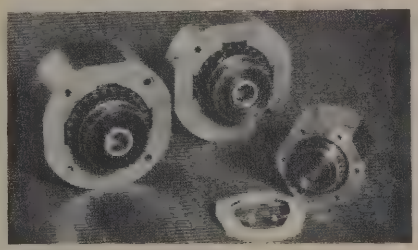
## Industrial DC Servo Motors

### Brushless and Brush-type, Frameless or Housed, Motor-Tach Combinations

Only subtle design, performance and materials variations distinguish these quality, direct drive motors from Magnetic Technology's® established military grade motors. Yet, through volume production they are priced for industrial applications.

Features include fast response, high torque, precise positioning, high tracking accuracy, quiet operation, and relatively low ripple. These DC servo motors utilize a permanent magnetic field for higher efficiency plus a moving iron armature for maximum thermal inertia.

The motors are available in frameless configuration to allow compact packaging and mounting of the armature directly on the driven load. Housed units, with shaft and bearings also are available. Direct coupling to the driven load eliminates the disadvantages of gears and couplings in servo systems. System simplification is possible and excellent system stability results.



Carriage drive motors for printers.

Send for your free copy of our new 162 page product and application guide. Magnetic Technology,® a division of Vernitron Corporation, 21001 Kittridge Street, Canoga Park, California 91303. TWX 910-494-1217. Telephone (213) 887-7700.

Applications for these units include disc memory systems, card sorters, tape transports and printers, N.C. machine table drives and feedback tachometers.

Continuous rotation brushless units, for constant or variable speed operation, also are available. Electronic drive and control systems can be supplied with these units.

In addition to MAGTECH® industrial servo motors and tachometers, motor-tach combinations can be supplied. A number of standard combinations are available, but virtually any motor and tachometer can be combined to meet drive and tachometer sensitivity requirements. The combination unit is smaller, lighter, easier to mount and generally lower in cost than separate units. These units aid reduction of system resonances.

### Example Specifications

| Mag Tech Part No. | 1310-150 | 1837D-150 | 3069-175 | 3068-237 | H5500-550 | 6002-325 |

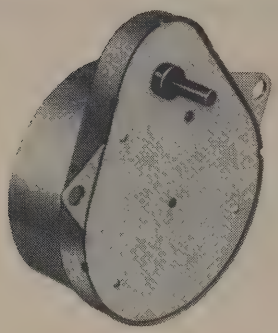
# AC & DC MOTORS

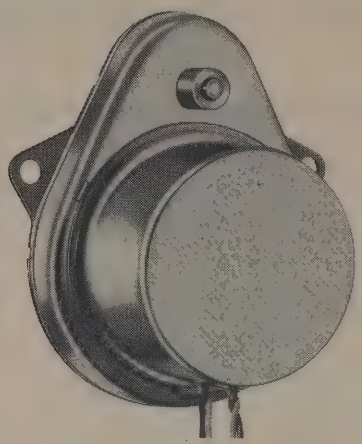


### Shaded Pole Synchronous Motors

Military or industrial. Available for 50 or 60 Hz operation. Five standard voltage ratings; 150 output speeds, clockwise or counterclockwise. Rotor speed 300 rpm at 60 Hz. Running torque 30 oz-in at 1 rpm.

| | |
|---|---|
| 22100 Series | Military Motor Unidirectional |
| 42100 Series | Industrial Motor Unidirectional U/L recognized |

Ask for Reference Sheet CM801

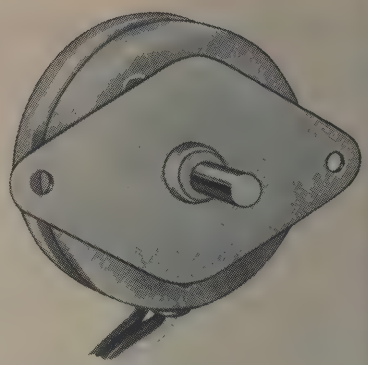


### Reversible Synchronous Motors

For commercial/industrial use. 50 or 60 Hz operation; voltages from 12 to 230. PM rotor, 2-coil windings. Electrically reversible. Rotor speeds 300 rpm at 60 Hz or 720 rpm at 60 Hz. Torque 0.75 oz-in and 1.1 oz-in respectively. Output speeds from 300 rpm to 1/1000 rpm.

| | |
|---|---|
| 81300 Series | 300 rpm rotor |
| S7100 Series | 720 rpm rotor |

Ask for Reference Sheets CM803 and S7100

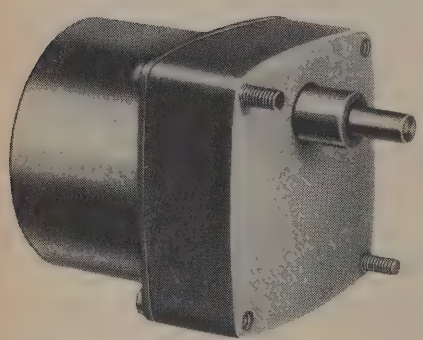


### Lightweight Reversible Synchronous Motors

High torque-to-frame size ratio. Produces 6.0 oz-in torque at 300 rpm or 4.0 oz-in at 600 rpm rotor speed. Electrically reversible. Fast start/stop characteristics. Low cost. Permanently lubricated bearing prolongs life, minimizes maintenance.

| | |
|---|---|
| 81700 Series | 300 rpm U/L recognized |
| 81800 Series | 600 rpm |

Ask for Reference Sheet CM821

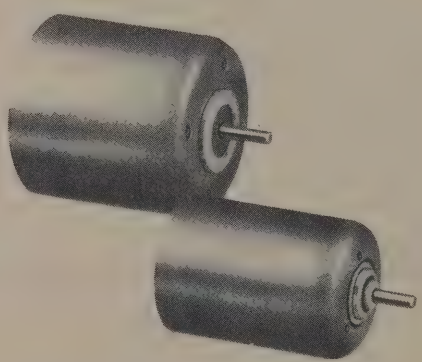


### Single and Dual Speed Instrument Drive Motors

Single speed reversible and dual speed unidirectional motors. Two rotor speeds 300 or 600 rpm. 24, 120 or 240 V ac, 60 Hz or 50 Hz. NEMA 2-11 gear box or square gear box available. U/L recognized.

| | |
|---|---|
| 86100 Series | Single speed reversible (300 rpm) |
| 86600 Series | Single speed reversible (600 rpm) |
| 86500 Series | Dual speed unidirectional (300 rpm) |
| 86700 Series | Dual speed unidirectional (600 rpm) |
| A86100 Series | Dual speed unidirectional (300 rpm) |
| 86800 Series | Dual speed unidirectional (600 rpm) |

Ask for Reference Sheet CM860

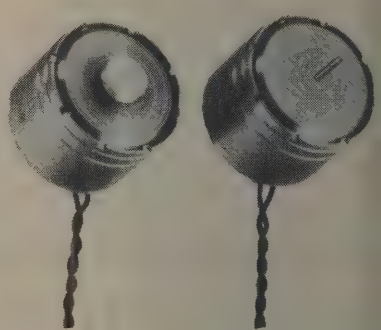


### Ironless Rotor DC Motors

Standard and miniature sizes. Low inertia, rapid response. Reversible. 12V dc and 24V dc models available. Time constants 11.5 ms or 19.6 ms. Available with integral tachometer for use in closed loop system.

| | |
|---|---|
| 4322 010 75110 | Motor 12V dc |
| 4322 010 75060 | Motor 24V dc |
| 4322 010 75140 | With Tachometer 24V dc |
| 4322 010 76050 | Miniature Motor 12V dc |
| 4322 010 76130 | With Tachometer 12V dc |

Ask for Reference Sheet CM823



### Coin Size Ironless DC Motor

This motor has approximately the same diameter as a penny. Can be furnished with or without a pulley. 9V dc. Rotor speed 5320 ± 950 rpm nominal. Torque 3 gcm (.04 oz-in) Motor constant 50 mA-typical. Applications include portable dictating equipment, mini digital cassette or cartridge drives and paper drives for printers.

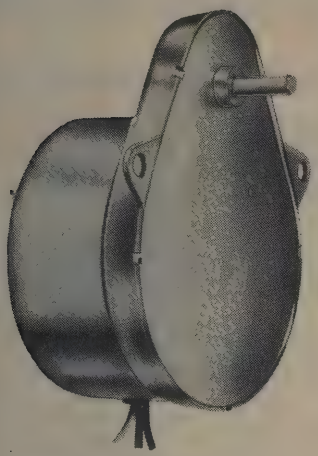
# STEPPER MOTORS

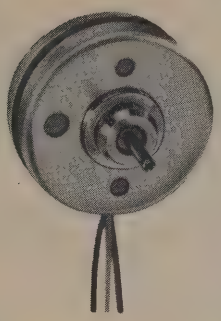


### Pulse Stepper Motors

Industrial, unidirectional or bidirectional. Step rate 0-80 steps/sec. Rotor torque 0.2 oz-in. Double-torque-version also available in unidirectional model. SPDT switching of input provides stepping pulses (no logic required). Rotor steps 15° with each pulse applied; can be supplied with gearing to increase torque or reduce step angle. Standard voltages are 6, 12 or 27V dc; other windings are available.

45100 Series Industrial, Unidirectional
44100 Series Industrial, Bidirectional
44600 Series Industrial, Unidirectional, Double Torque

Ask for Reference Sheets CM802, PI-107, PI-122

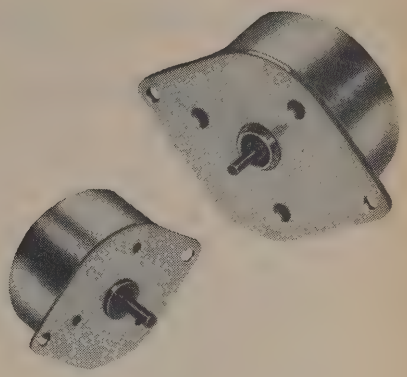


### Micro Miniature Logic Stepper Motor

Extremely small—1" diameter (approximately the same diameter as a 25¢ piece). Operating voltage 12V dc-15° step angle. Can be driven up to 500 PPS with torque up to 0.2 oz-in. Ideal for battery driven applications—automotive digital clocks, portable digital cassettes or cartridge drives and similar instruments where space and weight are at a premium.

82100 Series Logic Stepper Motor

Ask for Reference Sheet CM818

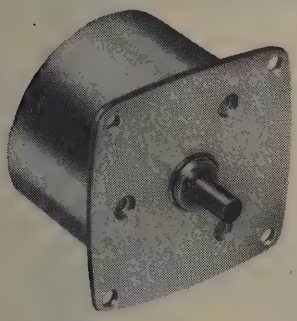


### Low-Cost Light Duty 4-phase Stepper Motors

7° 30′ step angle. Bidirectional. 5 or 12V dc models available. Excellent pull-in rates and good stepping accuracy. 82200 Series furnishes .750 oz-in pull-in/out torque and a pull-in rate to 440 steps/sec. 82400 Series furnishes 2.4 oz-in pull-in/out torque and a pull-in rate to 350 steps/sec. Gear box can be furnished to reduce step angle and increase torque on either series.

82200 Series 7° 30′ Step angle
82400 Series 7° 30′ Step angle

Ask for Reference Sheet CM814

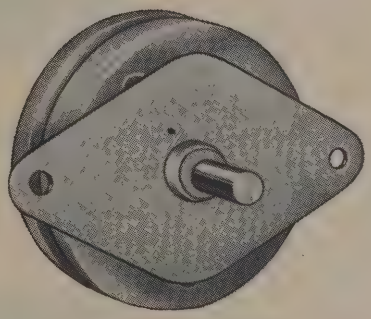


### Low-Cost Medium Duty 4-phase Stepper Motor

Available in either 5V dc or 12V dc models. 82600 Series offers 6.50 oz-in max. pull-in/out torque and 210 steps/sec. max. pull-in rate with 15° step angle .82800 Series offers 7.50 oz-in max. pull-in/out torque and 235 steps/sec. max. pull-in rate with 7° 30′ step angle. Can be fitted with gear box if desired.

82600 Series 15° Step Angle
82800 Series 7° 30′ Step Angle

Ask for Reference Sheet CM814

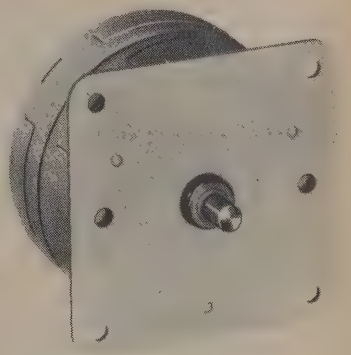


### Industrial-Type Stepper Motor

4-phase stator and permanent magnet rotor. Pull-in/out torque 7.5 oz-in—holding torque 13 oz-in. Pull-in/out rates to 120 steps/sec. Bidirectional. 5V or 12V dc. 7° 30′ step angle. Suitable for use in instrumentation and computer peripherals.

82700 Series 7° 30′ Step Angle

Ask for Reference Sheet CM819



### Low-Cost, High Torque Stepper Motor

A bidirectional permanent magnet stepper motor. Standard construction provides 2 or 4 phase operation, a 7° 30′ or 15° step angle and roller or sleeve bearings. Max. pull-in/out torque 23 oz-in. Max. pull-in rate 500 steps/sec. Operating voltages from 5V dc to 33V dc. Highly effective with long life and efficient utilization of power.

82900 Series 7° 30′ Step Angle

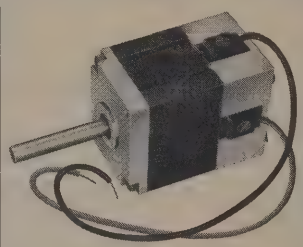
# The PITTMAN® Line of miniature D-C Motors..

## your answer to high performance, yet reasonable cost

### SERVO MOTORS

Our LO-COG® line of permanent-magnet field motors features 7-slot skewed armatures which minimize magnetic cogging at low speeds. Diameters of the three series are 1.2″, 1.6″ and 2″. Each is built in several lengths from 2″ upwards, exclusive of bearing bosses and shaft extensions. Inputs range from 6 to 30 VDC, with no load speeds up to 10,000 rpm. Stall torques range from about one oz.-in. to more than 100 oz.-in. Available with your choice of self-aligning sintered bronze bushings or double-shielded ball bearings. Custom modifications possible in production quantities.

### New High Acceleration Model



A new series of rare earth field motors with theoretical accelerations in excess of 75,000 radians/second². Cross-section size of only 1.00″ x 1.25″ and three lengths from 1.58″ to 1.80″. Stall torques range from 12 to 20 oz.-in. for no load speeds of about 4,000 rpm.

### GEARMOTORS

PITMO® units incorporating LO-COG servo motor sections with integral, totally-enclosed gearboxes. Two series with nominal gearbox diameters of 1.37″ and 2.00″. Overall lengths from 2.93″ to 3.69″, depending on motor selection, exclusive of bearing bosses and shaft extensions. Output shaft speeds from 2 to 650 rpm based on selection of armature winding and gear ratio. Torque output with standard gearing limited to 100 oz.-in. and 175 oz.-in. respectively for the two series. Any PITMO gearmotor can be ordered with integral tachometer noted below.

### MOTOR-TACHOMETERS

PITMO® motor-tachs supplied in two standard series having nominal diameters of 1.2″ and 1.6″. Separate motor and tachometer-generator armatures mounted on a single shaft operate with two different field magnet systems. Overall lengths from 3.72″ to 4.09″ depending on motor selection, exclusive of bearing bosses and shaft extensions. Standard gradient of 2 volts/1,000 rpm with typical ripple of 6% peak-to-peak with no filtering. Broad range of windings available for both motors and tachs.

# escap® DC MICROMOTORS

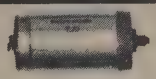
The Unique design and construction of escap® skew-wound ironless rotors provide low rotor inertia, rapid response (time constant down to less than 9 ms.), low starting voltage, high power to volume ratio, low torque ripple, and efficiencies of 80% and better. The escap® line reflects the highest level of engineering skills, Swiss precision manufacturing and the best performance-to-cost ratio available.

## escap® 15 Series

High efficiency — long life — low inertia — in a case size of 15 mm.

| | | | | |
|---|---|---|---|---|
| Output power (watts) | — | 0.24 | to | 0.4 |
| Operating voltage | — | 1.5 | to | 12 |
| Stall torques (oz-in) | — | 0.07 | to | 0.13 |
| No-load speed (rpm) | — | 15,000 | to | 20,600 |
| Moment of rotor inertia (gcm²) | — | 0.2 | to | 0.32 |
| Torque constants (oz-in/A) | — | 0.12 | to | 0.9 |

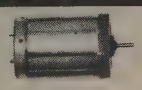
## escap® 16 Series



High efficiency — long life — torque practically pulse-free — in a case size of 16 mm. (Available as a tachometer).

| | | | | |
|---|---|---|---|---|
| Output power (watts) | — | 0.3 | to | 0.7 |
| Operating voltage | — | 4 | to | 12 |
| Stall torques (oz-in) | — | 0.14 | to | 0.41 |
| No-load speed (rpm) | — | 9,000 | to | 17,000 |
| Moment of rotor inertia (gcm²) | — | 0.32 | to | 0.7 |
| Torque constants (oz-in/A) | — | 0.31 | to | 1.3 |

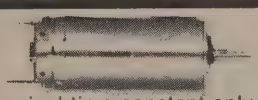
## escap® 22 Series



High starting torque — fast acceleration — in a case size of 22 mm.

| | | | | |
|---|---|---|---|---|
| Output power (watts) | — | 1.4 | to | 2.4 |
| Operating voltage | — | 3.5 | to | 36 |
| Stall torques (oz-in) | — | 1.0 | to | 1.7 |
| No-load speed (rpm) | — | 7,300 | to | 8,500 |
| Moment of rotor inertia (gcm²) | — | 1.5 | to | 3.5 |
| Torque constants (oz-in/A) | — | 0.6 | to | 6.0 |

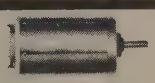
## escap® 23 D Series



Low inertia — mechanical time constant only 10 ms — in a case size of 23 mm.

| | | | | |
|---|---|---|---|---|
| Output power (watts) | — | 3.4 | to | 3.8 |
| Operating voltage | — | 6 | to | 15 |
| Stall torques (oz-in) | — | 3.5 | to | 4.2 |
| No-load speed (rpm) | — | 4,900 | to | 5,250 |
| Moment of rotor inertia (gcm²) | — | 4.7 | to | 5.9 |
| Torque constants (oz-in/A) | — | 1.6 | to | 3.8 |

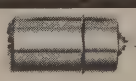
## escap® 26 P Series



High efficiency — long life — low inertia — in a case size of 26 mm. (Available as a tachometer).

| | | | | |
|---|---|---|---|---|
| Output power (watts) | — | 1.0 | to | 3.9 |
| Operating voltage | — | 3 | to | 24 |
| Stall torques (oz-in) | — | 0.72 | to | 4.0 |
| No-load speed (rpm) | — | 5,200 | to | 8,300 |
| Moment of rotor inertia (gcm²) | — | 3.8 | to | 8.5 |
| Torque constants (oz-in/A) | — | 0.5 | to | 4.6 |

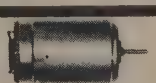
## escap® 28 D Series



Fastest response — mechanical time constant of only 9 ms — high efficiency.

| | | | | |
|---|---|---|---|---|
| Output power (watts) | — | 6.1 | to | 15 |
| Operating voltage | — | 6 | to | 24 |
| Stall torques (oz-in) | — | 10.4 | to | 15.6 |
| No-load speed (rpm) | — | 3,200 | to | 5,400 |
| Moment of rotor inertia (gcm²) | — | 16.9 | to | 19.2 |
| Torque constants (oz-in/A) | — | 2.5 | to | 6 |

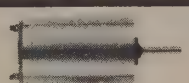
## escap® 28 PL Series



Good regulation — low inertia — high temperature rotor — in a case size of 28mm. (Available as motor-generator sets).

| | | | | |
|---|---|---|---|---|
| Output power (watts) | — | 4.5 | to | 7.6 |
| Operating voltage | — | 9 | to | 36 |
| Stall torques (oz-in) | — | 5.0 | to | 7.9 |
| No-load speed (rpm) | — | 4,700 | to | 5,250 |
| Moment of rotor inertia (gcm²) | — | 10.0 | to | 17.5 |
| Torque constants (oz-in/A) | — | 2.6 | to | 9.9 |

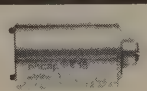
## escap® 34 L Series



High efficiency — large power output — in a case size of 34 mm.

| | | | | |
|---|---|---|---|---|
| Output power (watts) | — | 4.5 | to | 14.8 |
| Operating voltage | — | 4.5 | to | 36 |
| Stall torques (oz-in) | — | 4.6 | to | 16.0 |
| No-load speed (rpm) | — | 2,500 | to | 5,900 |
| Moment of rotor inertia (gcm²) | — | 16 | to | 32.2 |
| Torque constants (oz-in/A) | — | 2.4 | to | 8.1 |

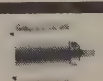
## escap® Reduction Gearboxes



Interface with 15 & 16 Series.

| Model | Running Torque | Ratios to: |
|---|---|---|
| E16 | 2.8 oz-in | 2090 |
| E26 | 8.0 oz-in | 560 |

## escap® Reduction Gearboxes



Interface with 22, 23, 26, 28 & 34 Series Motors.

| Model | Running Torque | Ratios to: |
|---|---|---|
| B26/K26 | 13 oz-in/21 oz-in | 2050 |
| A42/P42 | 70 oz-in/70 lb-in | 3840/2178 |

*Note: All values nominal for operational at 25°C ambient temperature. Specifications subject to change without notice.*

# RAPID/SYN DRIVERS

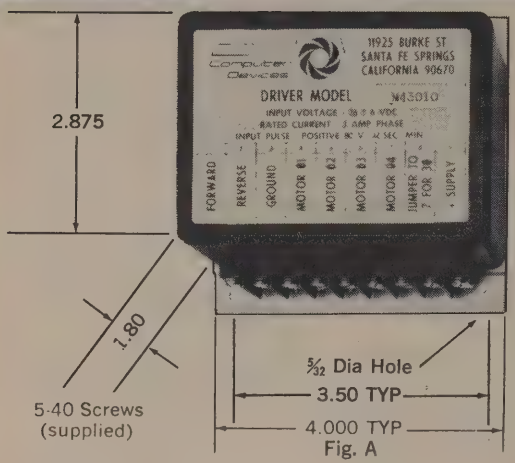

Fig. A

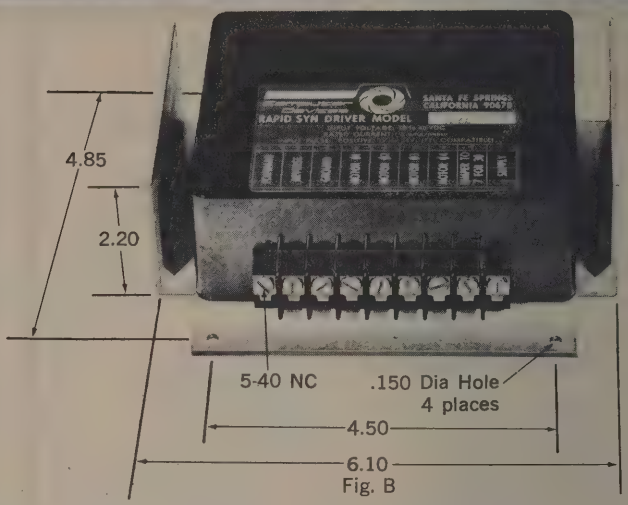

Fig. B

## DESCRIPTION

Rapid-Syn Drivers are solid state pulse-to-step converters capable of providing bi-directional operation of the stepping motor.

All Rapid-Syn Drivers listed, except Model M2301F, are designed to drive 3 Phase and 4 Phase motors regardless of type or step angle of the motor. Model M2301F is a bi-polar driver designed for 4 Phase PM motors.

All models require 2.4 to 30 volts positive going pulse with a minimum pulse width of 20 micro-seconds (TTL compatable). For rated input voltage and maximum current rating of various models, refer to table.

## GENERAL SPECIFICATIONS

Operating Temperature Range: 0°C to 60°C
Input Impedance: 3KΩ Minimum
Switching Capability: 10K PPS Minimum

# stay up to date

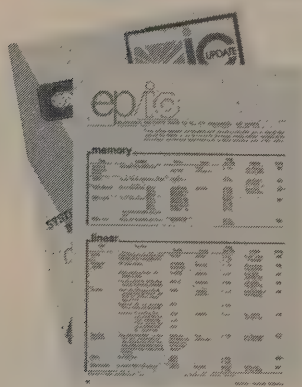
**SUBSCRIBE TO ELECTRONIC PRODUCTS MAGAZINE. IT'S YOUR *COMPLETE* GUIDE TO EVERYTHING THAT'S NEW IN THE FAST-CHANGING WORLD OF ELECTRONIC PRODUCTS AND SYSTEMS.**

**FEATURE STORIES** every month on electronic products, applications and availability.

**FORUMS**—Reports on meetings of manufacturers, users and distributors. Get the very latest news on a wide variety of products.

**NEW PRODUCT NEWS**—Hundreds of new products are introduced each month. You'll get the facts on not only what the new product is, but also where to get it, basic prices and current delivery.

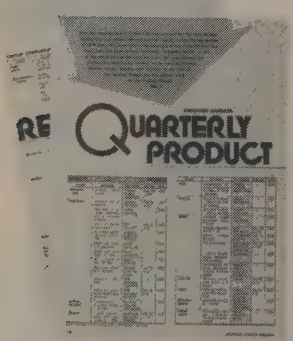
**EP/IC UPDATE**—Exclusive in ELECTRONIC PRODUCTS. A monthly report on *everything* that's new in the fast-moving world of integrated circuits.



**QUARTERLY PRODUCT REVIEW**—Another exclusive in ELECTRONIC PRODUCTS. A complete report of *every* new electronic product introduced in the previous quarter. This feature is in the January, April, July and October issues.

**QUARTERLY PRODUCT PLANNING DIRECTORY**—A compilation of the latest catalogs of a wide variety of electronic products and systems.

**OUTLOOK**—Important industry news affecting electronic products and systems.



**COMPONENT CAPERS**—A humorous look at the strange and wonderful world of electronics.

**MINI-GLOSSARIES,** Quizzes and more—Each and every month for over twenty years the readers of ELECTRONIC PRODUCTS learn something new about the products they work with and specify.

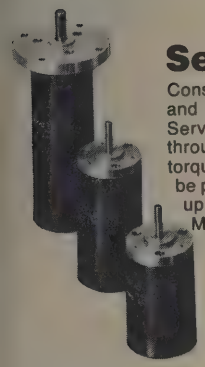
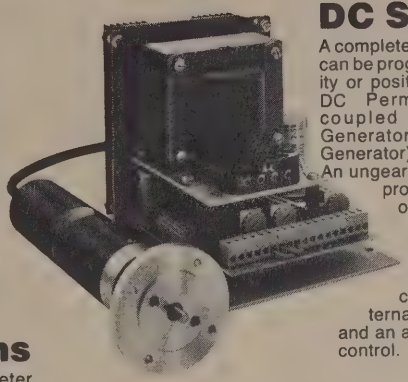
# Be selective, turn to SERVO-TEK

## FOREMOST IN SPEED MEASUREMENT AND CONTROL



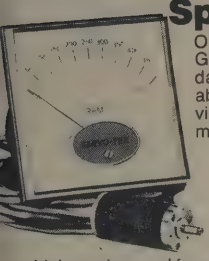
### Servo Motors

Constructed with permanently lubricated ball bearings and a unique Permanent Magnet field structure, our Servo Motors provide smooth cog-free operation throughout a speed range exceeding 10000:1. Output torques up to 2.0 oz.-in. at speeds of 10000 RPM can be provided in ungeared versions and output torques up to 300 oz.-in. with integral gearing. The Servo Motors can be combined on a single shaft with our DC Tachometer Generators (Motor-Generator) providing uncompromised performance in feedback control systems. A wide range of operating voltage and mechanical modifications are available to suit your particular application requirements.



### DC Servo Control

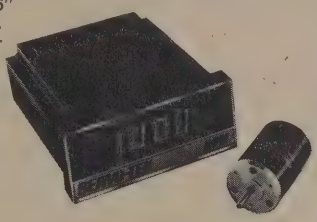
A complete DC Servo control package that can be programmed to operate in the velocity or positioning mode. It consists of our DC Permanent Magnet Servo Motor coupled with our DC Tachometer Generator on a common shaft (Motor-Generator) and modular control chassis. An ungeared output torque of 2.0 oz.-in. is provided throughout a speed range of 2000:1 with a base speed of 3600 RPM. Integral gearing is available for output torques up to 300 oz.-in. Features include remote programming capability, torque limiting, an internal highly stable reference supply and an auxiliary supply for isolated input control.



### Speed Indicating Systems

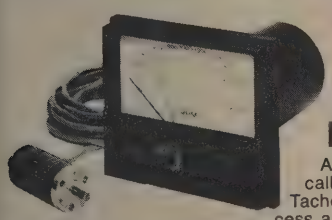
Our analog system consists of our DC Tachometer Generator and a 4½" d'Arsonval taut band meter. Standard ranges from 0-10 RPM up to 0-12000 RPM are available from stock. Special calibration or scales can be provided to satisfy customer's specific application requirements.

Our digital system also uses our DC Tachometer Generator in conjunction with a 3½ digit panel meter having a 0.6" LED display. Parallel BCD output is standard which can be used for record keeping or control purposes. A 4½ digit display is also available when greater resolution is required or wider speed ranges are to be monitored.



### Digital Comparator

A panel mounted instrument that compares 3½ digit (+ 1-2-4-8) BCD input data to preselected limits set by thumbwheel switches. The comparison is made algebraically (signed BCD) and when the set point is reached an output is provided as a logic level change or optionally as a relay contact closure. Available in both single and double independent set points with options including 115V AC or +5V DC operation and TTL or CMOS input compatibility.



### Control Meter Relay Systems

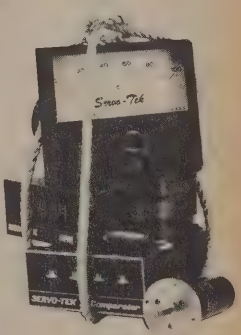
A speed monitoring system using an optically controlled meter relay and our DC Tachometer Generator. Ideal for use in process and control applications requiring under and over speed limit control while continuously monitoring speed settings and changes. Also can be used to directly control power to motors, alarms, solenoids, etc., without the use of power controls. Both single and double set point systems are available from 10 to 12000 RPM full scale. Output relay contacts are rated at 10 Amps @ 115V AC or 28V DC.

### DC Tachometer Generators

Our DC Tachometer Generators have been an industry standard for over 30 years. During that time we have pioneered improvements in brush life, stability, and temperature compensation. We can provide tachometers with output voltages up to 45V/1000 RPM and offer the flexibility of designing the mechanical configuration to meet with specific application needs.

The DC Tachometer still remains the most cost effective approach to rate feedback and velocity measurement applications.

## SERVO-TEK



### No Order Too Small Or Too Large

From our wide selection of off-the-shelf products we can select the right combination to promptly meet your exact requirements whether it is 1 or 1000 pieces.

# SLO-SYN® Synchronous/Stepping

**M SERIES STEPPING MOTORS** Shown in chart with M prefix. Represent the most advanced permanent magnet stepping motor design available and the most complete range in both torque ratings and size. Provide the highest torque per pound and torque to inertia ratios. Can be driven at rates above 20,000 steps per second with minimum of power input. Have Class B insulation and may be operated at ambients from −40°C to +65°C. Stepping increment is 1.8° using a 4-step input sequence; 8-step input sequence gives an 0.9° stepping increment. Step accuracy choice of either ±3% or ±5%. Chart shown gives off-the-shelf SLO-SYN drives for motors listed but custom drives can be designed by Superior Electric or built by the user if desired. For torque vs speed characteristics and complete ratings and specifications, request Superior Electric Catalog MSM1171.

**PRECISION STEPPING MOTORS** Shown in chart with HS prefix. Designed for phase-switched d-c stepping. Make 200 steps of 1.8° per shaft revolution. Each step is accurate within ±3% nonaccumulative. Can be used with SLO-SYN controls and drives or with user-designed and built drives. With proper circuitry, may be operated at speeds greater than 1000 steps per second witho missing steps.

**BIFILAR MOTORS** Shown in chart wi 4-number suffixes. Contain twice the win ings of a 3-lead motor for better L/R tim constant, better performance. Use simp drive circuitry or recommended SLO-SY drives. Make 200 steps of 1.8° per sha revolution except LS prefixed types whic have a 0.72° step angle and TS prefixe types which have a 5° step angle. X prefixe are explosion proof. Step accuracy is ±5 nonaccumulative.

## AC SYNCHRONOUS MOTORS

**PERMANENT MAGNET A-C CONTROL MOTORS** have no brushes, ratchets or detents feature extremely rapid starting, stopping and reversing characteristics. Need only a single-pole, 3-position switch for complete forward, reverse and "off" control. No excessive inrush current when energized because starting and operating currents are nearly identical. Can be completely stalled or overdriven without overheating and without harmful effects on components. Start or stop in less than 5° of shaft rotation; no need for electrical or mechanical braking. Phase-shifting resistor and capacitor must be used when operating from a single-phase source. Speeds available are 28.8, 72 or 200 rpm at 60 hertz.

| TYPE | MAXIMUM AMPERES | TORQUE (Oz-In) | MAXIMUM MOMENT OF INERTIA OF A RIGIDLY ATTACHED LOAD (Lb-In²) |

• Available off-the-shelf from distributor stock

## CONTROLS AND DRIVES

**TRANSLATOR ST1800B** For pulse-to-step conversion of data to bifilar motors. Converts low-level signal pulses or square waves into the correct switching sequence needed to drive a SLO-SYN motor at the desired stepping rate. Input is 105-125 volts a-c, 1.5 amps. Signal input impedance is 500 ohms. Input may be triggered by pulse or square wave or by an external switch. Operates in ambients from 0°C to +40°C. Ideal for a wide range of programmed positioning and indexing functions. Approx. shipping weight 12 lbs.

**ADJUSTABLE SPEED DRIVE ST1800BV** Essentially a translator with a built-in oscillator to supply triggering signals. The oscillator frequency can be adjusted to vary the speed from 4 steps per second up to the maximum permissible with the motor used. Have same other characteristics as SLO-SYN Translator ST1800B.

**TRANSLATOR MODULES** Plug-in printed circuit boards with logic capabilities for stepping SLO-SYN motors. STM1800 and STM1800C are basic translators capable of bidirectional operation of motors. Those suffixed V, i.e. STM1800V and STM1800CV, are similar but have built-in oscillators to provide triggering signals. Potentiometers are supplied with V-suffixed models for adjusting the oscillator speed. STM1800 and STM1800V have speeds to 500 steps/sec and are used with HS and bifilar motors. STM1800C and STM1800CV have speeds to 2000 steps/sec and are used with M Series motors. Types STM1800 and STM1800V require 8 amps power supply transformer T5934-G2. Types STM1800C and STM1800CV require 10 amp power supply transformer T6382.

**HIGH SPEED TRANSLATORS** Used with precision (HS prefix) and M series (M prefix) motors to provide high stepping speeds. High speed translator HTR400 has 50 to 2000 step/sec speed; HTR103RT has 100 to 3000 step/sec speed; and HTR105RT has 100 to 5000 step/sec speed. Acceleration and deceleration is adjustable. Each pulse received from a built-in oscillator or from an external source will cause the translator to advance the motor one step. Triggering pulses ca be supplied by tape readers, computers oscillators, etc. Ambient temperature: 0°C to 40°C operating; −55°C to 85°C storage Rack mounted design with plug-in solid-stat circuitry.

**BUFFERED TRANSLATOR** Drives M Series (M prefix) motors in response to com mands from computer, digital control o other device which operates at a fixed pulse rate. Acceleration and deceleration not re quired from pulse source. Translator stores incoming pulses and feeds them to the motor, automatically accelerating and decelerating at a rate compatible with the response characteristics of the motor. Acceleration and deceleration rates are approximately 6000 steps/sec² for BTR103RT and 15,000 steps/sec² for BTR105RT. Motor is driven one step for each pulse received from control unit. BTR103RT has speed of 100 to 3000 steps/sec, BTR105RT has speed of 100 to 5000 steps/sec. Rack mounted only.

**PRESET INDEXER SP1800B-5** Controls indexing operations where bifilar motors are used for positioning. Automatically provides the correct switching sequence needed to drive motors the required number of steps. Has provision for actuating external equipment needed to perform related operations. Dials on control panel can be set to provide desired number of steps up to 99,999 counting range. Operates in ambients from 0°C to +40°C. Input current 1.25 amps. Approx. shipping weight 19 lbs.

**HIGH SPEED PRESET INDEXERS** Used with precision (HS prefix) and M Series (M prefix) motors in indexing and other positioning operations. HPR400R-5 has 50 to 2000 steps/sec speed; HPI 153RT has 100 to 3000 step/sec speed; and HPI 155RT has 100 to 5000 step/sec speed. Decade counter controls on front panel permit selecting positioning increments up to 99,999 counting range. On index command, unit drives the motor the prescribed number of steps and then actuates a relay which controls external equipment. Count can also be set by computer or external decade switches. Ambients: 0°C to 40°C operating; −55°C to 85°C storage. Rack mounted only.

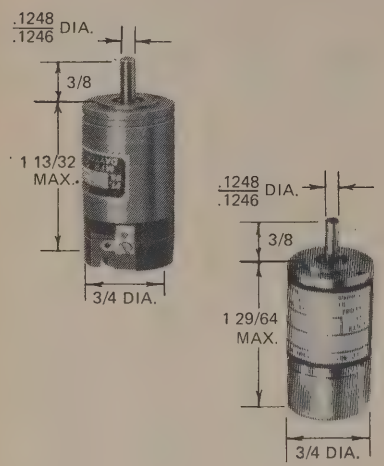
*LS50-1005 and LS50-1006 have 0.72° stepping increment.
**TS25-1008 and TS50-1001 have 5° stepping increment.
†Cabinet available at additional cost.
††Also requires T6382 power supply transformer.
‡Also requires series dropping resistor.
§Also requires T5934-G2 power supply transformer.
§§Require modified drives. Consult factory.

● **Available off-the-shelf from distributor stock.**

# TRW GLOBE MOTORS

## D.C. 3/4" DIA. PERMANENT MAGNET MOTORS AND PLANETARY GEARMOTORS

## TYPE SD — BASIC MOTOR



Type SD d.c. motors are designed to meet the requirements of MIL-M-8609; however, designs exceeding this specification to meet customer controlled applications are common. A variety of standard windings are available to provide a wide range of speed and torque characteristics.

### STANDARD PART NUMBERS AND DATA

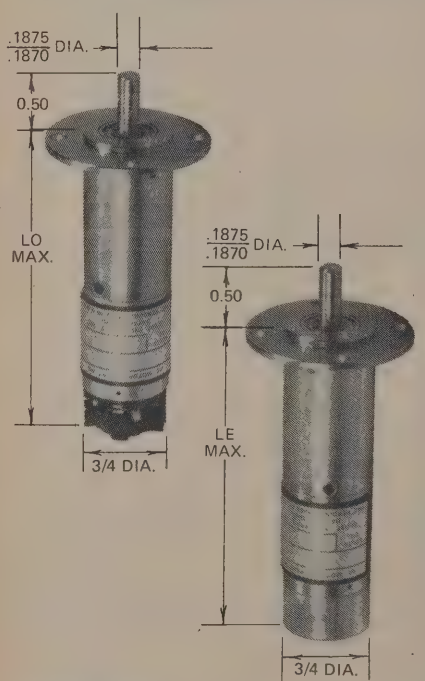
## TYPE SD PLANETARY GEARMOTORS



This small size, lightweight gearmotor is comprised of a ¾" Type SD motor coupled with a precision planetary geartrain. The combination provides smooth, dependable performance and maximum output torque in the smallest possible space. It is designed to provide a military quality gearmotor of exceptionally compact size.

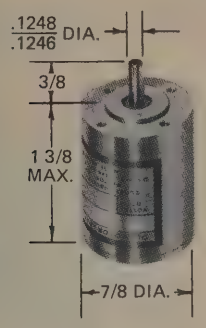
Max. Cont. Torque: The values in this column are based upon geartrain strength and capability for 1000 hrs. minimum life. Max. rated torque of motor selected x torque multiplier ratio must not exceed these values.
Max. Intermittent Torque = 2 x Max. Cont. Torque.
Momentary Stall Torque = 5 x Max. Cont. Torque.
Minimum Efficiency = Torque Multiplier Ratio divided by Speed Reduction Ratio x 100.

***HOW TO ORDER:**
The complete motor part number consists of the standard part number prefix, shown on the standard part number and data tables, plus the armature dash number. For gearmotors, each of the basic motor windings (dash no.), in the same type basic motor part number table, must be used, with the selected speed reduction ratio.

# TRW GLOBE MOTORS

## D.C. 7/8" DIA. PERMANENT MAGNET MOTORS AND PLANETARY GEARMOTORS

## TYPE SS—BASIC MOTOR



The Globe Types SS d.c. motor are specifically designed as a component for precision airborne accessory equipment, but may be applied to a variety of other applications where size and weight are important considerations. Type SS motors can be made with different windings to produce a variety of characteristics. Weight 2 oz.

***HOW TO ORDER:**
The complete motor part number consists of the standard part number prefix, shown on the standard part number and data tables, plus the armature dash number. For gearmotors, each of the basic motor windings (dash no.), in the same type basic motor part number table, must be used, with the selected speed reduction ratio.

# TRW GLOBE MOTORS

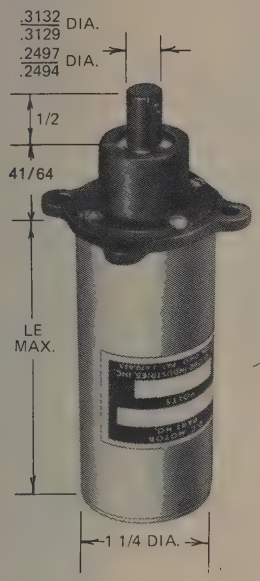
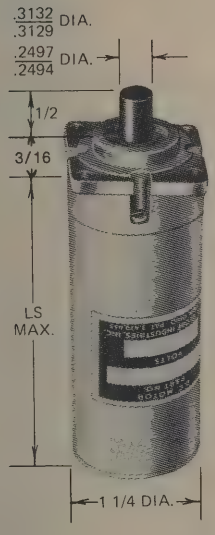
## D.C. 1-1/4" DIA. PLANETARY GEARMOTORS
## TYPE MM, LL, JM PLANETARY GEARMOTORS





These Globe planetary gearmotors provide torques to 1,250 oz. in. and are designed for use in airborne equipment, missiles and other applications where reliability and miniature size are governing factors.

Max. Cont. Torque: The values in this column are based upon geartrain strength and capability for 1000 hrs. minimum life. Max. rated torque of motor selected x torque multiplier ratio must not exceed these values.

Max. Intermittent Torque = 2 x Max. Cont. Torque.

Momentary Stall Torque = 5 x Max. Cont. Torque.

Minimum Efficiency = Torque Multiplier Ratio divided by Speed Reduction Ratio x 100.

***HOW TO ORDER:**
The complete motor part number consists of the standard part number prefix, shown on the standard part number and data tables, plus the armature dash number. For gearmotors, each of the basic motor windings (dash no.), in the same type basic motor part number table, must be used, with the selected speed reduction ratio.

***HOW TO ORDER:**

The complete motor part number consists of the standard part number prefix, shown on the standard part number and data tables, plus the armature dash number. For gearmotors, each of the basic motor windings (dash no.), in the same type basic motor part number table, must be used, with the selected speed reduction ratio.

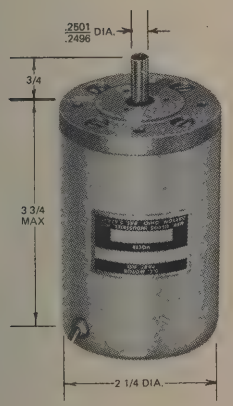
NOTE: Shaft spline details available from factory. For prototype use, TRW/Globe will broach holes in customer's parts.

Max. Cont. Torque: The values in this column are based upon geartrain strength and capability for 1000 hrs. minimum life. Max. rated torque of motor selected x torque multiplier ratio must not exceed these values.
Max. Intermittent Torque = 2 x Max. Cont. Torque.
Momentary Stall Torque = 5 x Max. Cont. Torque.
Minimum Efficiency = Torque Multiplier Ratio divided by Speed Reduction Ratio x 100.

## TYPE GRP — BASIC MOTOR



Type GRP precision permanent magnet d.c. motors provide extremely high output and efficiency for their frame size. This unit is designed to meet the requirements of MIL-M-8609; however, designs exceeding this specification to meet customer controlled applications are common. Various standard armature windings make it possible to furnish a wide range of speed and torque characteristics.

# TRW GLOBE MOTORS

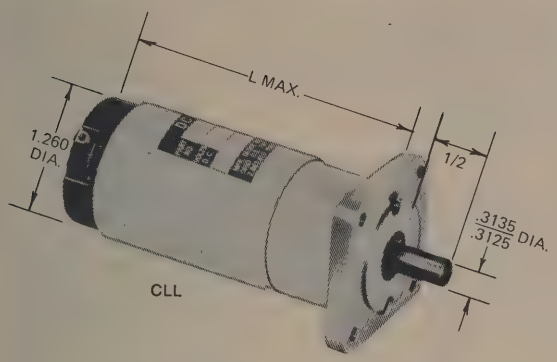
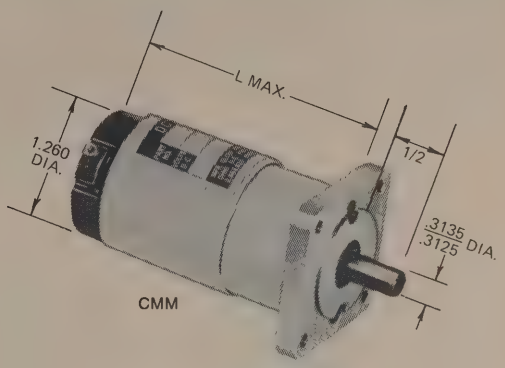
## D.C. 1-1/4" DIA. PERMANENT MAGNET PLANETARY GEARMOTORS

## TYPE CMM, CLL—PLANETARY GEARMOTORS





Type CLL and CMM gearmotors are of the same high quality construction as Globe MM and LL gearmotors and provide the same outstanding performance characteristics although NOT designed to meet MIL-specs for environmental protection. These gearmotors are specifically designed for application where small size, reliability and high torque are desired.

Globe Type CMM and CLL gearmotors are rugged, high-quality units combining Type CMM and CLL commercial motors with a proven planetary geartrain offering 83 standard speed reduction ratios from 4:1 to 46,656:1 with maximum continuous torque from 3.0 to 1250 oz. in. Since the geartrain is of modular design, literally thousands of special ratios can be furnished.

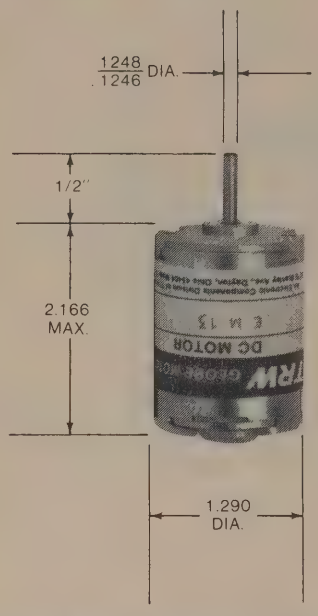
***HOW TO ORDER:**
The complete motor part number consists of the standard part number prefix, shown on the standard part number and data tables, plus the armature dash number. For gearmotors, each of the basic motor windings (dash no.), in the same type basic motor part number table, must be used, with the selected speed reduction ratio.

# TRW GLOBE MOTORS

## D.C. ECONO-MITE PERMANENT MAGNET MOTORS
## TYPE EM-13 — BASIC 1¼" DIA. MOTOR



The EM-13 and EM-15 motors are the first of a new line designed for high-volume, low-cost production. Typical applications include tape decks, business machines, computer peripherals, audio-visual, automotive, medical, recreational, and other industrial equipment.

*Winding temp rise measured when mounted to 8" x 8" x ¼" Alum plate. Multiply by 1.4 when mounted to a heat insulator.

****HOW TO ORDER:**

Units shown above are standard and may be ordered by part number. Consult TRW Globe for variations in mechanical or electrical performance to suit specific applications.

Ask for Bulletin E-2109 and E-2404 for complete details.

# TRW GLOBE MOTORS

## D.C. ECONO-MITE PERMANENT MAGNET

### TYPE EM-13 — (1¼" DIA.) PLANETARY GEARMOTORS

Type EM-13 gearmotors are of the same high quality construction as Globe military gearmotors and provide the same outstanding performance characteristics although **not** designed to meet MIL-Specs for environmental protection. These gearmotors are specifically designed for application where small size reliability and high torque are desired.

Globe EM-13 gearmotors are rugged, high-quality units combining EM-13 commercial motors (see Bulletin E-2109) with a proven planetary geartrain offering 30 standard speed reduction ratios from 4:1 to 46,656:1 with maximum continuous torque from 1.5 to 1250 oz. in. Since the geartrain is of modular design, literally thousands of special ratios can be furnished. Send complete application information to receive a prompt recommendation from Globe. Ask for Bulletin E-2129 for complete details.

### TYPE EM-15 — (1½" DIA.) PLANETARY GEARMOTORS

Type EM-15 d.c. gearmotors are designed for high-volume, low-cost production. Typical applications include business machines, computer peripherals, audio-visual, automotive, medical, recreational, and other industrial equipment where high torque at lower speeds are needed. Request Bulletin E-2429 for complete details.

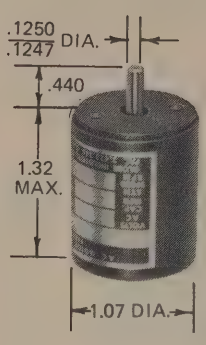
*Add dash number to part number for voltage: —1 = 6V —2 = 12V —3 = 24V

**Special order options:**
- — Integral tachometer generators.
- — Stud mounting.
- — Rear terminals.
- — Other ratios.
- — Ball bearing motors.

# TRW GLOBE MOTORS

## A.C. 1" DIA. HYSTERESIS SYNCHRONOUS AND INDUCTION PLANETARY GEARMOTORS

### TYPE SC — BASIC MOTOR



Globe Type SC a.c. motors are available in many variations. Motors are wound a) three-phase, two or four pole or b) single-phase, two, four, or six pole. Type SC motors are designed to meet the requirements of MIL-M-7969.

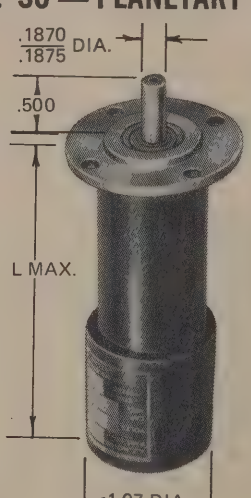
### TYPE SC — PLANETARY GEARMOTORS



This extremely small size and lightweight gearmotor consists of a Globe Type SC a.c. motor and a precision planetary geartrain. The combination provides smooth, dependable performance and maximum output torque in the smallest possible space.

Type SC gearmotors are designed to meet MIL-M-7969.

***HOW TO ORDER:**

To specify gearmotors, select the standard part number prefix from the standard part number and data table, plus the speed reduction ratios from page 3312, Type SD — Planetary Gearmotor chart.

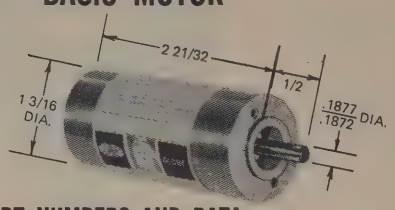
***HOW TO ORDER:**
The complete motor part number consists of the standard part number prefix, shown on the standard part number and data tables, plus the armature dash number. For gearmotors, each of the basic motor windings (dash no.), in the same type basic motor part number table, must be used, with the selected speed reduction ratio.

# TRW GLOBE MOTORS

## A.C. 1-3/16" & 1-1/4" DIA. HYSTERESIS SYNCHRONOUS AND INDUCTION PLANETARY GEARMOTORS

### TYPE CMC — BASIC MOTOR



Globe Type CMC motors are designed to meet requirements for extremely compact high-performance synchronous motors in high-quality industrial/commercial products. They are ideally suited to such applications as dictating machines, recorders, business machines, industrial timers, tools, and controls.

Thermosetting plastic encapsulation provides protection against shock and vibration and is impermeable to dirt and moisture.

Induction versions and units for operation at other voltages and frequencies can be provided. Single phase operation requires a phasing capacitor (not furnished by Globe).

#### STANDARD PART NUMBERS AND DATA

| Voltage (v.a.c.) | Frequency (Hz) | Phase | Speed (rpm) | Torque max. start (oz. in.) | Torque max. sync. (oz. in.) | Current max. (amps) | Power input max. (watts) | Capacitor (mfd) | Capacitor (w.v.d.c.) | Standard* Part No. |

### TYPE MC — PLANETARY GEARMOTORS

These small, lightweight gearmotors consist of Globe Type MC hysteresis synchronous or induction motors and a precision planetary geartrain. Type MC planetary gearmotors are designed to meet all applicable MIL-specs including high and low temperature and complete environmental protection requirements.

‡1/4 O.D. shafts are limited to 600 oz. in.

***HOW TO ORDER:**

To specify gearmotors, select the standard part number prefix from the standard part number and data table, plus the even or odd speed reduction ratio desired. See page 3119 for Torque Multiplier and Max. Continuous Torque. For higher ratios consult factory.

Max. Cont. Torque: The values in this column are based upon geartrain strength and capability for 1000 hrs. minimum life. Max. rated torque of motor selected x torque multiplier ratio must not exceed these values.

Max. Intermittent Torque = 2 x Max. Cont. Torque.

Momentary Stall Torque = 5 x Max. Cont. Torque.

Minimum Efficiency = Torque Multiplier Ratio divided by Speed Reduction Ratio x 100.

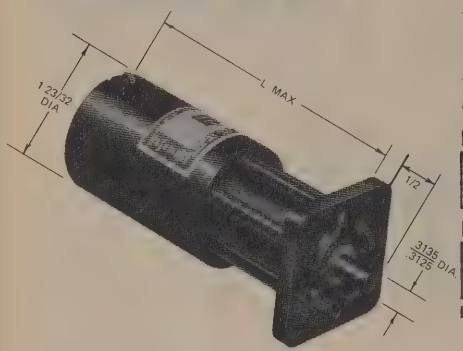
### TYPE CFC — PLANETARY GEARMOTORS
### COMMERCIAL MOTORS



Type CFC planetary gearmotors are lightweight a.c. commercial/industrial units designed to provide performance and size advantages of military gearmotors in lower cost package. Both hysteresis synchronous and induction versions can be provided with any of 83 standard planetary geartrains with speed reduction ratios (see shaded areas page 11) from 4:1 to 46,656:1, and torques to 1250 oz. in.

**HYSTERESIS SYNCHRONOUS — STANDARD PART NUMBERS AND DATA**

| | | | | | | | | | | |
|---|---|---|---|---|---|---|---|---|---|---|
| 115 | 60 | 1 | 1.0 | 200 | 3600 | 1.40 | 1.80 | 14 | 15 | K | 230A395 |
| 115 | 60 | 1 | 3.5 | 200 | 1800 | 2.00 | 2.25 | 16 | 16 | L | 230A396 |
| 115 | 60 | 1 | 1.5 | 200 | 1200 | 1.20 | 1.50 | 15 | 16 | M | 230A397 |

**Synchronous Motor. Output Torque = Torque Multiplier x Motor Torque.
Torque Multiplier = Reduction Ratio x Efficiency. Torque Max. Cont. Rating Refers to Max. Cont. Duty Rating of Geartrain.

***HOW TO ORDER:**

To specify gearmotors, select the standard part number prefix from the standard part number prefix from the standard part number and data table, plus speed reduction ratio desired. See page 3119 for Torque Multiplier and Max. Continuous Torque.

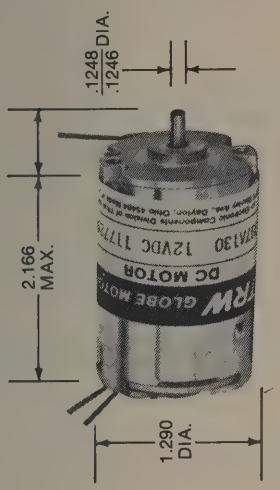
## D.C. PERMANENT MAGNET MOTOR/TACHS
## TYPE EM-13 MOTOR/TACHS



Type EM13 motor/tachs consist of a permanent magnet D.C. motor and an A.C. tachometer. They are designed for high-volume, low-cost production, and for use in tape decks, business machines, computer peripherals, audio-visual, automotive, medical, recreational, and other industrial equipment.

Special order options: • Geartrain • EMI filters • Stud mounting.

### HOW TO ORDER

**Part Number. Units shown above are standard and may be ordered by part number. Consult TRW Globe for variations in mechanical or electrical performance to suit specific applications.

## *Permanent Magnet*

# DC Servo Motors & Servo Control Systems

## *for Analog or High-speed Stepper Applications*

### Snapper Series Permanent Magnet DC Servo Motors

2212

5115

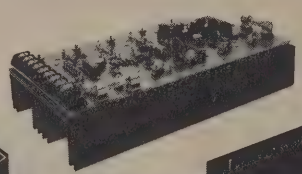
3323

*Optional for all motors

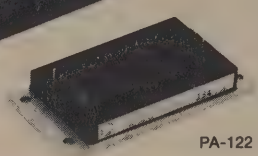
- 10 oz. - inches continuous to 100 ft. lbs. peak torque
- .01 to 15 HP
- 2" to 9.8" Frame Sizes
- Acceleration rates up to 50,000 radians/sec²
- Low Ripple Mating DC Tachometers*
- Integrally Mounted Optical Encoders*
- Double Shaft Extension on Motor/Tachometers*
- Low Cost for OEM use

### Wide Bandwidth DC Servo Amplifiers

PA-011



PA-601

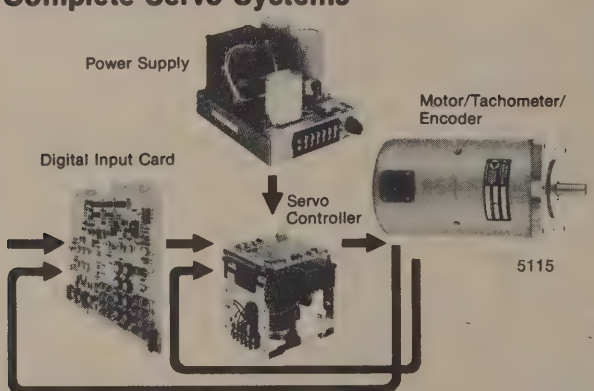


PA-122

*For Accurate Velocity or Position Control*

- Transistorized
- High Gain
- Short Circuit protected
- Priced for volume use
- Bi-directional

### Complete Servo Systems



*COMPLETE SYSTEMS include, as required, the following Torque Systems' hardware: Motor/Tachometer/Encoder Assembly; Rate Loop Controller Module; Line to DC Power Supply Module; Digital Input Card(s).*

*For Analog or Digital Velocity or Position – Input Commands can range from Manual to Computer*

- Horsepower Ratings 1/20 to over 1/2 HP
- Available as Modules of Pre-packaged
- Accelerations to over 300 rpm/millisecond
- Slew Rates to 50,000 steps per second (3,000 rpm)
- Overshoot Control
- **Microprocessor Based Systems with Programmable Velocity, Acceleration and Position**
- **Synchronized Dual Axis Systems for** smooth **Vector Generation**

NOTES: 1. Vernitorq motors have no friction or ripple torque.
2. Vernitorq brushless tachometer generators are also available in the various frame sizes.

## vernitorq® BRUSHLESS DC TORQUE MOTORS

• Limited rotation, wide angle • Infinite resolution for precise positioning • Direct drive for increased sensitivity, and response • Simplified design for economy, compact packaging.

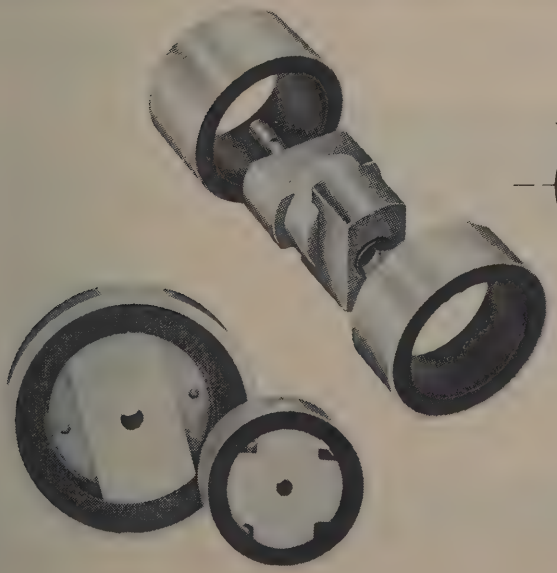
Elimination of brushes, use of toroidal field windings and permanent magnet rotors provides smooth operation without slot effect. Infinite resolution and high linearity result, allowing these motors to provide high accuracy in positioning, actuating, tensioning, measuring and indicating applications for both military and industrial use.

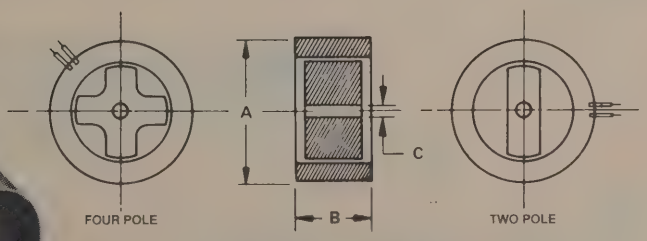
Vernitorq motors develop high torque with low input power and high acceleration rates which make it possible to couple them directly to the driven load without gears. The elimination of gearing aids response and eliminates backlash, gear tooth resilience, acceleration attenuation and other disadvantages of gearing.

Brushless and gearless operation eliminates electrical and mechanical noise, and explosion hazard. It also reduces the number of moving parts and associated friction wear.

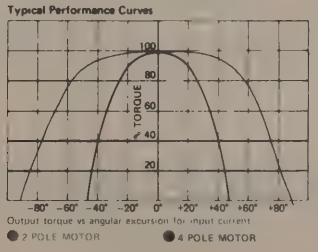
Vernitorq brushless DC torque motors are available in two and four-pole configurations, in a variety of sizes and outputs.

The motors are normally supplied "frameless" – without housing, shaft and bearings. Housed versions, with or without mounting flanges, are also available for all units.





Typical Performance Curves



Output torque vs angular excursion for input current

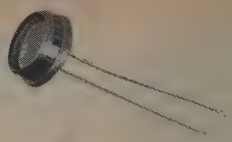
# Clairex Photoconductive Cells



| Part No. | Diam. X Length (inches) | Resistance @ 2 ftc ± 33-1/3% | Minimum resistance ratio from 2 ftc to Dark within 5 sec. | Maximum voltage | Power Dissipation @ 25°C (mw) |
|---|---|---|---|---|---|
| CL5M9M | .55 X .18 | 11K | 1:1000 | 170 | 2000 500[1] |
| CL709L | .36 X .18 | 28K | | 100 | 125 |
| CL909L | .21 X .15 | 100K | | 100 | 50 |

Type 9 CdS, peak spectral response 5500 angstroms combines high speed with extreme temperature stability and high linearity.

| | | | | | |
|---|---|---|---|---|---|
| CL5M3 | .55 X .18 | 7.2K | 1:10,000 | 250 | 2000 500[1] |
| CL603 | .25 X .5 | 133K | | 300 | 75 |
| CL603A | .25 X .5 | 75K | | 300 | 75 |
| CL603AL | .25 X .5 | 3.5K | | 170 | 75 |
| CL703 | .36 X .18 | 133K | | 300 | 125 |
| CL703A | .36 X .18 | 67K | | 300 | 125 |
| CL703L | .36 X .18 | 2.7K | | 100 | 125 |
| CL903 | .21 X .15 | 133K | | 250 | 50 |
| CL903A | .21 X .15 | 67K | | 250 | 50 |
| CL903L | .21 X .15 | 6.0K | | 100 | 50 |

Type 3 CdSe, peak spectral response 7350 angstroms, fast response, and very high light-to-dark resistance ratio. Can be used for high speed switching or counting. Sensitive to near infra red. For use with incandescent or neon lamps.

| | | | | | |
|---|---|---|---|---|---|
| CL5M4 | .55 X .18 | 1.5K | 1:400 | 250 | 2000 500[1] |
| CL5M4L | .55 X .18 | 0.25K | | 170 | 2000 500[1] |
| CL604 | .25 X .5 | 30K | | 300 | 75 |
| CL604L | .25 X .5 | 1.5K | | 170 | 75 |
| CL704 | .36 X .18 | 30K | | 300 | 125 |
| CL704L | .36 X .18 | 0.6K | | 100 | 125 |
| CL904 | .21 X .15 | 30K | | 250 | 50 |
| CL904L | .21 X .15 | 2K | | 100 | 50 |

Type 4 CdSe, peak spectral response 6900 angstroms, lowest resistance photocells available. Can be used for "on-off" applications when low resistance is desired. For use with incandescent or neon lamps.

| | | | | | |
|---|---|---|---|---|---|
| CL5M5 | .55 X .18 | 9K | 1:100 | 250 | 2000 500[1] |
| CL5M5L | .55 X .18 | 1.5K | | 170 | 2000 500[1] |
| CL605 | .25 X .5 | 166K | | 300 | 75 |
| CL605L | .25 X .5 | 7.5K | | 170 | 75 |
| CL705 | .36 X .18 | 166K | | 300 | 125 |
| CL705L | .36 X .18 | 3.3K | | 100 | 125 |
| CL905 | .21 X .15 | 166K | | 250 | 50 |
| CL905L | .21 X .15 | 10K | | 100 | 50 |

Type 5 CdS, peak spectral response 5500 angstroms (closely matches the human eye), most stable, lowest memory photocell available. Can be used in light measuring applications and precision low speed switching. For use with incandescent, fluorescent or neon lamps.

| | | | | | |
|---|---|---|---|---|---|
| CL705HL | .36 X .18 | 28K | 1:1000 | 100 | 125 |
| CL905HLL | .21 X .15 | 15K | | 60 | 50 |
| CL905HL | .21 X .15 | 100K | | 100 | 50 |
| CL905HN | .21 X .15 | 700K | | 100 | 50 |

Type 5H CdS, peak spectral response 5500 angstroms (closely matches the human eye). Combines high speed, stability, linearity, and uniform color temperature response. Footnote 1. with and without heat sink.

| Part No. | Diam. X Length (inches) | Resistance @ 2 ftc ± 33-1/3% | Minimum resistance ratio from 2 ftc to Dark within 5 sec. | Maximum voltage | Power Dissipation @ 25°C (mw) |
|---|---|---|---|---|---|
| CL707H | .36 X .18 | 500K | 1:1000 | 300 | 125 |
| CL707HM | .36 X .18 | 100K | | 250 | 125 |
| CL907H | .21 X .15 | 600K | | 250 | 50 |
| CL907HN | .21 X .15 | 300K | | 100 | 50 |
| CL907HL | .21 X .15 | 24K | | 100 | 50 |

Type 7H CdS peak Spectral response 6200 angstroms. Very fast decay time coupled with low resistance and high linearity. Ideal for beam breaking applications.

| | | | | | |
|---|---|---|---|---|---|
| CL5M7 | .55 X .18 | 7.2K | 1:300 | 250 | 2000 500[1] |
| CL607 | .25 X .5 | 133K | | 300 | 75 |
| CL707 | .36 X .18 | 133K | | 300 | 125 |
| CL707L | .36 X .18 | 2.7K | | 100 | 125 |
| CL907 | .21 X .15 | 133K | | 250 | 50 |
| CL907N | .21 X .15 | 66K | | 100 | 50 |

Type 7 CdS, peak spectral response 6150 angstroms, moderate speed and ratio. Can be used in general beam breaking applications. For use with incandescent, neon or fluorescent lamps.

| Part No. | Diam. X Length (inches) | Resistance @ 2 fc ± 33-1/3% | Minimum resistance ratio from 2 ftc to Dark within 5 sec. | Maximum voltage | Power Dissipation @ 25°C (mw) | Type |

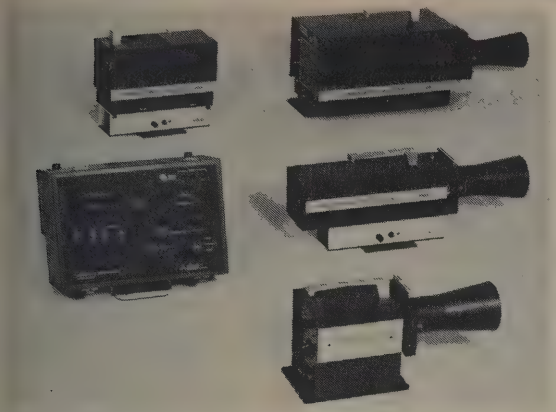
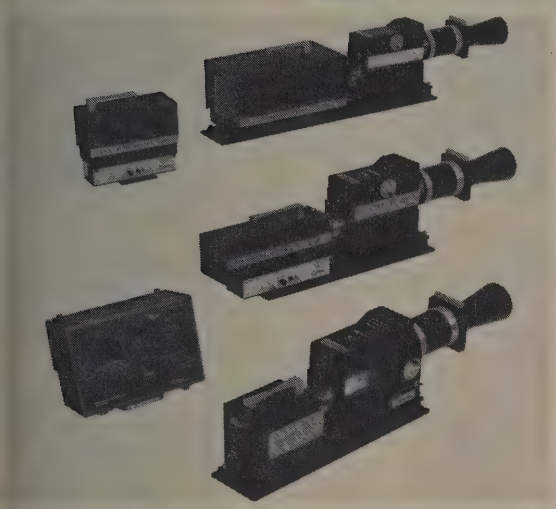
# LIGHT MEASUREMENT INSTRUMENTS



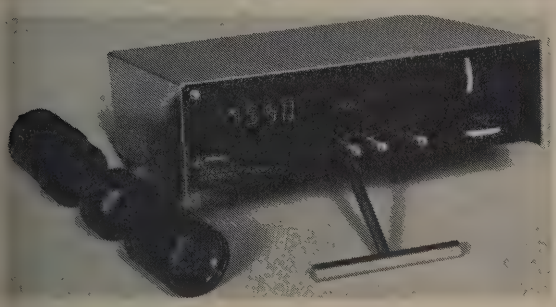
## MODEL 580 RADIOMETER/PHOTOMETER SYSTEMS

The Model 580 Systems provide fast, accurate measurements of optical radiation in radiometric and photometric terms. The systems are inherently capable of measuring both continuous (cw) sources as well as pulsed events as fast as one nanosecond in duration. An autoranging digital panel display provides readings of average power and integrated energy. The Detector Heads also have provision for oscilloscope display of pulsed light signals so that wave shape measurements can be made, i.e., peak power, pulse duration, and rise and fall times. The spectral range is from 0.2 $\mu$m (200 nm) in the ultraviolet to 3.2 $\mu$m (3200nm) in the near infrared. The overall dynamic range is over fifteen decades (full scale) of light intensities. The basic system concept can be used in a great variety of applications due to the designed modular approach of interchangeable Detector Heads and accessories. The Model 580 has become an industry standard for most laser output measurements.



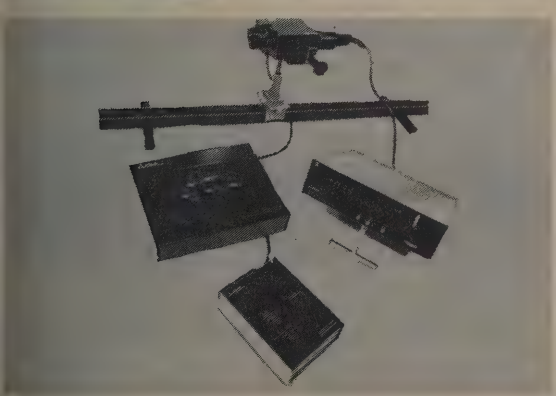
## MODEL 580/585 SPECTRORADIOMETER SYSTEMS

The Model 580/585 Systems add a digital grating monochromator and additional optics onto the Model 580 Radiometer Detector Head, thereby allowing absolute measurements of the power and energy of chromatic cw and pulsed light sources as a function of wavelength. A truly functional system with provision for recorder ouput and BCD computer interface, the 580/585 can measure over a 12-decade range of light levels. The system can also be used as a radiometer and photometer.



## MODEL 550 RADIOMETER/PHOTOMETER SYSTEM

The Model 550 Radiometer/Photometer provides fast, precise measurements with direct readings in 12 photometric and radiometric units. The direct readings, which are easily taken from a 3½ digit panel meter and digital decade indicator, eliminate the need for post measurement calculations. The system is both manual and autoranging over seven full scale decades. Measurements can be obtained of both pulsed and continuous sources with excellent accuracy, repeatability, and stability. Provision for ambient compensation permits its use outside of a dark room environment. High sensitivity is achieved through the use of a single, low noise silicon multiprobe detector.



## MODEL 550/555 SPECTRORADIOMETER SYSTEM

The Model 550/555 Spectroradiometer System integrates all the state-of-the-art features of the Model 550 Radiometer with the precision and accuracy of a holographic grating monochromator to yield a low cost, compact, light weight, high efficiency measurement system capable of providing radiometric measurements of both continuous and pulsed sources as a function of wavelength. The Model 550/555 covers a wide spectral region extending from 280 nm in the ultraviolet to 1100 nm in the near-infrared with an absolute system measurement accuracy of ±3%. Ancillary components expand the basic manual system into a completely automatic measurement system with programmable wavelength scan ranges and scan speeds, automatic order sorting filter sequencing, and interface compatibility for automatic data acquisition, conversion, and printout.

**Other standard light measurement instruments together with accessories and optical calibration standards are available.**
**E G & G also offers complete optical calibration services.**

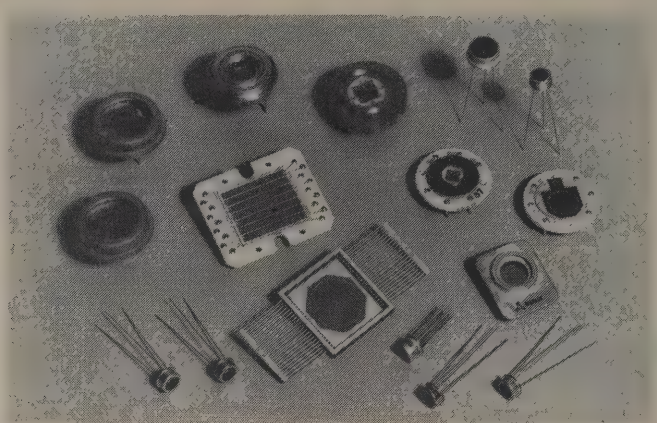
# SILICON PHOTODIODES



## SILICON PIN PHOTODIODES
## High Speed Photoconductive

- Spectral Range: 0.35 to 1.15 $\mu$m
- Responsivity: 0.5 A/W @ 0.9 $\mu$m; 0.42 A/W @ 1.06 $\mu$m (YAG Series)
- Linearity of Response: Within 5% over 7 Decades
- Operating Voltage: 0 to 180 Volts

| Type No. | Active Area ($mm^2$) | Package (JEDEC) | Dark Current (nA) | NEP ($\lambda$, 600, 1) (watts) | Rise Time (ns) | Capacitance (pf) | Test Voltage (V) |
|---|---|---|---|---|---|---|---|
| SGD-040A | 0.82 | TO-5 | 3 | $9.6 \times 10^{-14}$ @ 0.9 $\mu$m | 3 | 2 | 100 |
| SGD-040B | 0.82 | TO-46 | 3 | $9.6 \times 10^{-14}$ @ 0.9 $\mu$m | 3 | 2 | 100 |
| SGD-040L | 0.82 | TO-5/Lens | 3 | $9.6 \times 10^{-14}$ @ 0.9 $\mu$m | 3 | 2 | 100 |
| SGD-100A | 5.1 | TO-5 | 10 | $1.0 \times 10^{-13}$ @ 0.9 $\mu$m | 4 | 4 | 100 |
| SGD-160 | 13 | TO-8 | 50 | $3.0 \times 10^{-13}$ @ 0.9 $\mu$m | 7 | 8 | 100 |
| SGD-444 | 100 | TO-36 | 200 | $5.9 \times 10^{-13}$ @ 0.9 $\mu$m | 10 | 80 | 100 |
| SGD-444-2 | Same as SGD-444 but in bi-cell configuration | | | | | | |
| SGD-444-4 | Same as SGD-444 but in quad-cell configuration | | | | | | |
| YAG-100A | 5.1 | TO-5 | 20 | $2.2 \times 10^{-13}$ @ 1.06 $\mu$m | 8 | 3.5 | 180 |
| YAG-444 | 100 | TO-36 | 200 | $5.6 \times 10^{-13}$ @ 1.06 $\mu$m | 8 | 35 | 180 |
| YAG-444-4 | Same as YAG-444 but in quad-cell configuration | | | | | | |
| SND-130 | 0.82 | TO-46 | — | $1.5 \times 10^{-14}$ @ 0.9 $\mu$m | | | |
| SND-140 | 5.1 | TO-5 | — | $2.7 \times 10^{-14}$ @ 0.9 $\mu$m | | | |
| SND-680 | 23.6 | TO-8 | — | $5.5 \times 10^{-14}$ @ 0.9 $\mu$m | | | |
| DT-25 | 5.1 | TO-5 | 30 | $3.5 \times 10^{-13}$ @ 0.9 $\mu$m | 5 | 7 | 90 |
| DT-40 | 13 | TO-8 | 70 | $6.0 \times 10^{-13}$ @ 0.9 $\mu$m | 7 | 10 | 90 |
| DT-110 | 100 | TO-36 | 400 | $9.5 \times 10^{-13}$ @ 0.9 $\mu$m | 10 | 100 | 90 |
| SHS-100 | Similar to SGD-100A with 30% higher peak responsivity | | | | | | |

## FIBER OPTICS RECEIVER

| | | | | | | | |
|---|---|---|---|---|---|---|---|
| FND-100 | 5.1 | TO-5 | <100 | $2.9 \times 10^{-13}$ @ 0.9 $\mu$m | <1 | 8.5 | 90 |
| FOD-100 | 5.1 | AMP 530525-1 | <100 | $2.9 \times 10^{-13}$ @ 0.9 $\mu$m | <1 | 8.5 | 90 |

## SILICON PHOTOVOLTAIC DETECTORS — Low Noise

- Spectral Range: 0.35 to 1.15 $\mu$m (PV Series); 0.20 to 1.15 $\mu$m (UV Series)
- Responsivity: 0.47 A/W @ .95 $\mu$m; 0.09 A/W @ 0.2 $\mu$m (UV Series)
- Linearity of Response: Within 1% over 7 Decades
- Operating Mode: Photovoltaic — no bias

| Type No. | Active Area ($mm^2$) | Package (JEDEC) | Shunt Resistance (M$\Omega$) | NEP ($\lambda$, 600, 1) (watts) | Rise Time (ns) | Capacitance (pf) |
|---|---|---|---|---|---|---|
| PV-040 | 0.82 | TO-46 | 500 | $1.0 \times 10^{-14}$ @ 0.95 $\mu$m | 12 | 25 |
| PV-100A | 5.1 | TO-5 | 100 | $3.2 \times 10^{-14}$ @ 0.95 $\mu$m | 25 | 150 |
| PV-215 | 23.6 | TO-8 | 50 | $4.3 \times 10^{-14}$ @ 0.95 $\mu$m | 30 | 700 |
| PV-444A | 100 | TO-36 | 10 | $9.0 \times 10^{-14}$ @ 0.95 $\mu$m | 45 | 2800 |
| PV-800A | 314 | Special | 5 | $1.3 \times 10^{-13}$ @ 0.95 $\mu$m | 75 | 9000 |
| UV-100A | 5.1 | TO-5 | 100 | $2.3 \times 10^{-13}$ @ 0.23 $\mu$m | 25 | 150 |
| UV-215 | 23.6 | TO-8 | 50 | $2.5 \times 10^{-13}$ @ 0.23 $\mu$m | 30 | 700 |
| UV-444A | 100 | TO-36 | 10 | $5.0 \times 10^{-13}$ @ 0.23 $\mu$m | 45 | 2800 |
| UV-800A | 314 | Special | 5 | $7.5 \times 10^{-13}$ @ 0.23 $\mu$m | 75 | 9000 |

## SILICON DETECTOR/ AMPLIFIER COMBINATIONS

- Spectral Range: 0.35 to 1.15 $\mu$m (except HUV Series); 0.20 to 1.15 $\mu$m (HUV Series)
- Supply Voltage: $\pm$15 Volts

| Type No. | Active Area ($mm^2$) | Package (JEDEC) | Responsivity $R_f$ = 200 M$\Omega$ (V/W) | NEP ($\lambda$, f, 1) (watts) | Gain Bandwidth Product (MHz) | Slew Rate (V/$\mu$sec) |
|---|---|---|---|---|---|---|
| HAD-1000A | 5.1 | TO-5 | $10^8$ @ 0.9 $\mu$m | $1.5 \times 10^{-13}$ @ 0.95 $\mu$m @ 400Hz | 2.0 | 6 |
| HAV-1000 | 5.1 | TO-5 | $10^8$ @ 0.9 $\mu$m | $1.1 \times 10^{-13}$ @ 0.95 $\mu$m @ 400Hz | 1.0 | 6 |
| HAV-4000A | 100 | Modified DIP | $10^8$ @ 0.9 $\mu$m | $9.0 \times 10^{-14}$ @ 0.95 $\mu$m @ 400Hz | 0.1 | 5 |
| HUV-1000 | 5.1 | TO-5 | $10^7$ @ 0.23 $\mu$m | $7.0 \times 10^{-13}$ @ 0.23 $\mu$m @ 400Hz | 1.0 | 6 |
| HUV-4000A | 100 | Modified DIP | $10^7$ @ 0.23 $\mu$m | $6.0 \times 10^{-13}$ @ 0.23 $\mu$m @ 400Hz | 0.1 | 5 |
| MHZ-018 | 5.1 | Modified DIP | $10^8$ @ 0.9 $\mu$m | $4.7 \times 10^{-11}$ @ 0.95 $\mu$m @ 18MHz | 100 | |
| MHZ-018Y | 5.1 | Modified DIP | $5 \times 10^9$ @ 1.06 $\mu$m | $5.9 \times 10^{-11}$ @ 1.06 $\mu$m @ 18MHz | 100 | |
| MHZ-016 | 13 | Modified DIP | $10^8$ @ 0.9 $\mu$m | $6.8 \times 10^{-11}$ @ 0.95 $\mu$m @ 16MHz | 100 | |

## CUSTOM PHOTODIODES

In addition to these standard photodiode products, E G & G engineering and production capabilities permit the design and fabrication of custom photodiode devices. Special configurations such as larger and smaller areas, circular and rectangular active areas, arrays, matrices can b manufactured per specific customer requirements. Inquiries for bot small and OEM quantities are welcome.

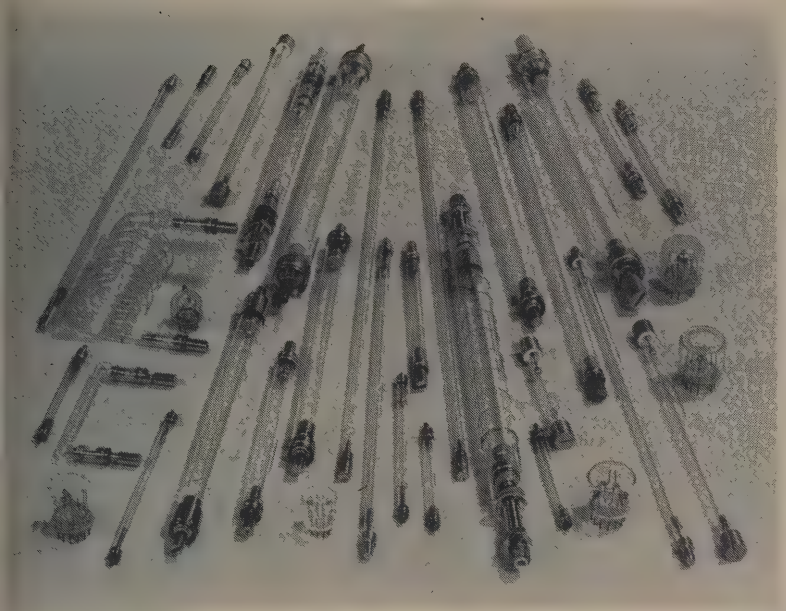
# XENON FLASHTUBES



Xenon flashtubes. dc krypton arc lamps, and long arc Xenon lamps are available from E G & G in a wide variety of configurations and envelope materials. Tubes are available in linear, bulb-type, helical, "U" shape, coaxial, and air or liquid cooled designs. Envelope materials include quartz, UV inhibiting quartz, and hard glass with a wide range of bore and arc length sizes. Custom configurations are available upon request.

Common applications involve the use of these lamps as the primary light source for:

Laser stimulation
Photocopy systems
Phototypesetting machines
Microfiche systems
Strobes
UV curing of polymers
Marine, aircraft and satellite beacons
Warning beacons
Photoresist exposure
Large area indoor lighting

## LINEAR XENON FLASHTUBES — QUARTZ

RAYTHEON

# OPTO-ISOLATORS—RAYSISTORS® PHOTOCONDUCTIVE CELLS

## RAYTHEON OPTOELECTRONICS

- **Standard and "State of the Art" Opto-Components**
- **Improved Cost/Performance Ratios**
- **Rugged Mechanical Construction with Certified Environmental Reliability**
- **Designed for Both Commercial and Military Opto-electronic Applications**

Raytheon is a specialist in the development and manufacture of quality, competitively priced photo-conductive cell/arrays and photo-optical isolators (Raysistors®). These components are designed with characteristics and features that meet the requirements of the various optical and/or isolation circuits in use today or in development for the future.

Raytheon standard photocells and arrays have been used effectively for more than a decade in a wide range of applications at all levels of industry. Raytheon is also prepared to comply with requests for special products to meet your specific application or required characteristics.

## OPTO-ISOLATORS RAYSISTORS®

Raysistor is a Raytheon trade mark for an optoelectronic circuit component (photo-optical isolator). The Raysistor combines a reliable energy emitter source (incandescent, neon, or light-emitting diode) and a bulk-effect photo-resistive element. A wide variety of package configurations, ratings, and electrical characteristics are available.

Raysistors perform a variety of switching and control functions where isolation between the controlling element and the controlled circuit is critical. The characteristics of these devices demonstrate their versatility, sensitive control property, circuit isolation, and lack of distortion in the signal. In addition to their suitability for general feedback systems, Raysistors are especially attractive for AGC, Logic Translation facsimile and photo multiplier systems, voltage or signal isolators, variable resistors, SCR and Triac firing circuits, signal modulators for audio effects, solid-state switches, etc. For dual function controls, the Raysistor is produced with multiple photo-cells and/or energy emitters to provide excellent tracking and matching characteristics.

## PHOTOCONDUCTIVE CELLS

Raytheon's extensive line of photo-conductive cells and arrays represents the "state of the art" in stability and uniformity of characteristics with aging. They are available in a wide range of sensitivities.

Standard Raytheon photocells are available in four different spectral response photosensitive materials, each of which exhibit its own individual optical characteristic. A variety of packages are available, including hermetically sealed, single or dual element, and plastic coated. Plastic coated devices are passivated for long term environmental protection.

## GENERAL NOTES

1. Energy emitter source: "N"-neon, "I"-incandescent, "L"-light emitting diode (LED). See tables.
2. Indicated control voltages or current will ensure long life. Constant operation at higher voltages will result in modified life expectancy. (Incandescent designs are derated to insure long life.)
3. "ON" Resistance: Measured after 16 hours of operation. All resistances measured with 1.5 volts applied to signal terminals.
4. Control to signal circuit isolation: Values indicated are maximum potentials (DC or peak AC) that can be applied between control and signal circuits. Tested per MIL STD 202D, Method 301.
5. "OFF" RESISTANCE: Measures 5 seconds after removal of control voltage or current. Ultimate dark resistance is many times greater.
6. Maximum Cell Voltage: Voltage applied to cell must not exceed specified maximum. Maximum voltage is normally present when cell is in dark condition.
7. Cell Power Dissipation: Ambient temperature directly effects maximum power dissipation of photoconductive cells. Rated power dissipation applies when device is operated at 30°C or below. Derating curves are specified on individual data sheets.
8. Response Speeds:
   - 8.1 "RISE TIME": Defined as time for voltage across photocell to fall to 10% of its initial value, measured from instant that maximum rated control voltage or current is applied to energy emitter source.
   - 8.2 "DECAY TIME": Defined as time for voltage across photocell to rise to either 50% or 90% of its final value from instant that maximum rated control voltage or current is removed from energy emitter source. Percentage values depend on specific component. Majority are 90%.
   - 8.3 Test Conditions:
     Control Voltage/Current—As Rated
     Signal Voltage—50 Volts DC
     Signal Circuit Load—100K Ohms
9. Capacitance: Measurements made in dark condition.

*Current limiting resistor must be used in series with neon light source. Typical value: 20 K ohms (100 K ohms for CK 1124). Control current is linear with voltage over stated range.
†Current limited source required for control input. Stable operation is best achieved with a constant current power supply, which may be approximated by stable voltage supply having a resistor in series with the LED. Control circuits of LED devices may also be driven by AC voltages by placing a rectifier diode in series of parallel with the LED.

*Current limiting resistor must be used in series with neon light source. Typical value: 20 K ohms (100 K ohms for CK 1124). Control current is linear with voltage over stated rang
†Current limited source required for control input. Stable operation is best achieved with a constant current power supply, which may be approximated by stable voltage supply having resistor in series with the LED. Control circuits of LED devices may also be driven by AC voltages by placing a rectifier diode in series of parallel with the LED.

[1]Current limiting resistor must be used in series with neon light source. Typical value: 20 K ohms (100 K ohms for CK 1124). Control current is linear with voltage over stated range.
†Current limited source required for control input. Stable operation is best achieved with a constant current power supply, which may be approximated by stable voltage supply having a resistor in series with the LED. Control circuits of LED devices may also be driven by AC voltages by placing a rectifier diode in series of parallel with the LED.
††Signal Circuit ratings are for each half of cell. Typical dual isolators Cell to Cell resistance balance 90%, resistance tracking 10%.

# UNITED PRICING REPORTS

## the single source that speeds up ıvoicing, pricing, quoting, purchasing and estimating

ectronic component prices change so fast, you'd ed a team of people just to keep up.

ited Pricing Reports is the better way. When you bscribe to Pricing Reports you receive 1500 cing sheets (3000 pages) of the latest prices, of the date we ship them to you.

is gives you, in a single source, up-to-the minute selling prices on more than 500,000 electronic components.

United Pricing Reports gives you accurate resale prices at the exact moment you need them. Not hours or days later. So it helps you eliminate frantic phone calls, letter writing and catalog scanning to check on prices when you write an invoice or type a purchase order.

## Twice weekly price updates.

One week after you receive your Pricing Reports source book (1500 pricing sheets) you begin receiving twice weekly price updates. You simply take these new price pages and replace the now obsolete pages with them.

The whole process is simple. All information is organized alphabetically by manufacturer. And each manufacturer's price schedule is listed by part number in numerical/alphabetical sequence.

One more thing. When we promise twice weekly updates, we deliver. 52 weeks a year, consistently. Not monthly or every other month. We have a tradition of delivery on our promises, and we're certainly not going to stop now.

ECHNICAL PUBLICATIONS, INC., DIV. OF COX BROADCASTING CORP., 645 STEWART AVE., GARDEN CITY, N.Y. 11530 (516) 222-2500 TWX-510/222-1673

# VACTEC

## INDUSTRY'S BROADEST LINE OF DETECTORS

- Photoconductive Cells
- Phototransistors and Photodarlingtons
- Standard Silicon and Blue-Enhanced Photovoltaic Cells, Blue-Enhanced Photodiodes, and PIN Photodiodes
- Selenium Photovoltaic Cells
- Vactrols (Opto-Isolators)
- Custom I-C's Design and Fabrication (Not detailed in this short form)

## PHOTOCONDUCTIVE CELLS

LIGHT DEPENDENT RESISTORS

Photoconductors are thin films of CdS or CdSe on a ceramic substrate.
The material is designated by the second digit (O, 1, 2, 3, 4 or 7) of the part number.

| Material | 0-CdS | 1-CdSe | 2-CdS | 3-CdS | 4-CdSe | 7-CdS |

# abbott Power Supply Modules

## The Next 12 Pages List 680 Regulated Modules with Specifications and Prices

The most complete line of small size MIL-Spec and OEM type power modules available in the industry is fully described in the following 12 pages. The Abbott line of power modules includes output voltages from 3 volts to 100 volts DC, output current from 2 milliamperes to 20 amperes and output power from 1 watt to 300 watts. Sizes, weights, regulations and environments are shown for the various input and output powers. Abbott is proud to continue its policy of introducing new products to meet the growing demands of our customers by listing a completely new line of power modules. The Model D Series is a high efficiency, industrial DC power supply. Inputs are 115 VAC, 220 VAC, 1$\phi$, 3$\phi$ and 48 VDC. Look through the next 12 pages and you may find the power module you want is a standard Abbott model.

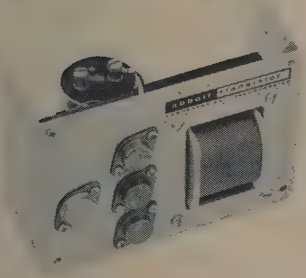
# abbott AC to DC Lowest Cost



## features

- 110/220 VAC Input
- Single, Dual, and Triple Outputs
- +71° Ambient Operation
- 47-440 Hz Input Frequency
- Hi-Reliability

## specifications

**INPUT VOLTAGE RANGE:** 105 to 125 VRMS, standard. 210 to 250 VRMS available at no additional charge. To specify this type range, add the prefix "E" to the Model No. (eg, ENLS5T3).
105 to 125/210 to 250 dual input available for an additional charge of $5.00. To specify this range, add the prefix "I" to the Model No. (eg. INLS5T3).

**INPUT FREQUENCY:** 47-440 Hz, single phase (derate current 10% for 50 Hz operation).

**LINE REGULATION:** 0.02% for 10% input change (single output).
0.1% for 10% input change (dual/triple output).

**LOAD REGULATION:** 0.1% for no load to full load change with line constant (single output).
0.2% for no load to full load change with line constant (dual/triple output).

**RIPPLE:** 1.0 mV RMS maximum; 1.5 mV peak-to-peak typical, 5 mV peak-to-peak maximum.

**LOAD TRANSIENT RECOVERY TIME:** 50 μSec typical after a 50% step change in load current.

**SHORT CIRCUIT PROTECTION:** Each unit is completely protected against a short circuit of any duration. The output voltage automatically restores to normal in approximately 5 mSec after removal of the short.

**REVERSE VOLTAGE PROTECTION:** Provided on output and on pass element.

**REMOTE ERROR SENSING:** Each unit contains a means by which the regulator circuit monitors the voltage directly at the load using extra sensing leads. The resulting circuit action compensates for a DC voltage drop of up to 0.5 Vdc in the load leads. Open sense lead protection is built-in.

**STABILITY:** Typically, ±.05% for 24 hours after warm-up (single output), and ±0.3% for 24 hours after warm-up (dual and triple output).

**TEMPERATURE:** Operating: 0°C to +50°C, derated to 40% at +71°C.
Storage: −40°C to +85°C.

**TEMPERATURE COEFFICIENT:** ±.04% per degree Celsius maximum, ±.002% per degree Celsius typical.

**EFFICIENCY:** Typically 45% to 60%.

**ENVIRONMENT:** Designed to meet vibration per MIL-STD-810B, Method 514, Procedure 1, and shock per MIL-STD-810B, Method 516, Procedure 5.

**OVERVOLTAGE PROTECTION:** Standard on 5V outputs. Available on all other outputs as an optional feature by adding "-1" to the Model No. Cost is $8 for single outputs and $16 for dual and triple output units.

**DELIVERY FROM STOCK**

| Output Voltage Range | Output Current (Amps) | Size | Weight (Lbs.) | Model Number | Price 1-24 Pcs. |

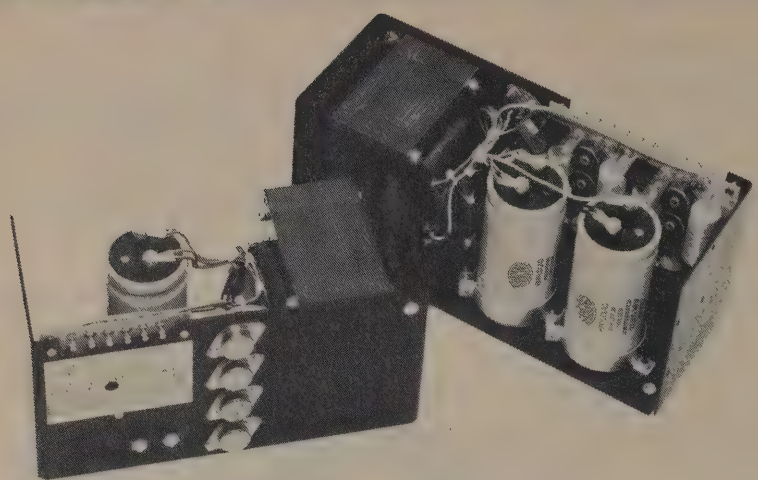
# abbott AC to DC Low Cost



## *features*

- 1 Day Stock Delivery
- Single and Dual Outputs
- 0.1% Regulation
- +60°C Ambient Operation
- 47-420 Hz Input Frequency

**DELIVERY FROM STOCK**

These reliable Abbott power modules are designed to meet the needs of OEM engineers. For their intended application, these units are not only rated high in overall quality, but also priced relatively low. Thus, they provide more quality per dollar compared to similar items on the market. Your best buy in OEM power modules is ABBOTT.

## *specifications*

**INPUT VOLTAGE RANGE:** 103 to 127 VRMS.

**INPUT FREQUENCY:** 47 to 420 Hertz, 1 Phase.

**LINE REGULATION:** 0.1% or 10 mV (whichever is greater), for input change of 103 to 127 VAC.

**LOAD REGULATION:** 0.1% or 10 mV, (whichever is greater), from no load to full load.

**RIPPLE:** 10 mV rms; 30 mV peak-to-peak.

**OUTPUT VOLTAGE ADJUSTMENT RANGE:** Voltage is continuously adjustable between the limits shown on the table by means of a screwdriver adjustment potentiometer.

**ISOLATION VOLTAGE:** 300 VDC between output terminals and chassis ground.

**INSULATION RESISTANCE:** 50 megohms between output terminals and chassis ground when measured at 50 VDC.

**POLARITY:** Inputs and outputs are isolated, either positive or negative side may be grounded.

**TEMPERATURE:** Operating: 0°C to +50°C ambient without derating, forced air or heat-sinking. Storage: −50°C to 85°C.

**TEMPERATURE COEFFICIENT:** 0.08% per degree Celsius.

**ALTITUDE:** 10,000 feet above sea level.

**SHORT CIRCUIT PROTECTION:** Each unit is completely protected against an overload or short circuit of any duration. The output voltage automatically restores to normal when the overload is removed within approx. 25 msec.

**LOAD TRANSIENT RECOVERY TIME:** Output voltag returns to regulation limits within 75 microsecon after a 50% step change in load current. Maximu overshoot/undershoot is 5% of nominal outp voltage.

**TURN ON/TURN OFF OVERSHOOT:** The output voltag overshoot during "turn on" or "turn off" will n exceed 1% of the output voltage.

**REMOTE ERROR SENSING:** Each unit contains a mea by which the regulator circuit monitors the voltag directly at the load using extra "sensing" lead The resulting circuit action compensates for a D voltage drop up to 0.5 volts in the load leads.

**OVERVOLTAGE PROTECTION:** Additional circuitry w reduce the output voltage to approximately 1 VD within 25 μsec typ., if the output voltage rises 10% or 2 VDC (whichever is greater) above nomina Available as an optional feature by adding "-1" the model number and $8 ($16 for dual outpu units) to the 1-24 piece price.

**OUTPUT IMPEDANCE:** DC to 1K Hz — .003 $R_L$ ohms .03 ohms, whichever is greater.
1K Hz to 10K Hz — .008 $R_L$ or .08 ohms, whichev is greater.
10K Hz to 100K Hz — .015 $R_L$ or .30 ohms, whic ever is greater.
$R_L$ = rated load resistance.

**RELIABILITY:** The Mean Time between failure (MTB per MIL-HDBK-217A under worst case operating co ditions is in excess of 100,000 hours per single ou put units and in excess of 70,000 hours per du output units. For example: LC12T10 - 114,268 hou (MTBF); LC28T1 - 158,290 hours (MTBF); LLC12T5 75,593.

**SINGLE OUTPUT**

| Output Voltage Range | Output Curr. (Amps) | Size (See Dwg) | Wt. (Lbs.) | Model Number | Price 1-24 Pieces |
|---|---|---|---|---|---|
| 4.5 - 5.5 | 6.0 | L1 | 5.5 | LC5T6 | $69.00 |
| | 10.0 | L3 | 12.5 | LC5T10 | 89.00 |
| 11.5 - 12.5 | 2.5 | L1 | 5.5 | LC12T2.5 | 69.00 |
| | 5.0 | L2 | 8.7 | LC12T5 | 79.00 |
| | 10.0 | L3 | 12.5 | LC12T10 | 99.00 |
| 14.5 - 15.5 | 2.0 | L1 | 5.5 | LC15T2 | 69.00 |
| | 4.0 | L2 | 8.7 | LC15T4 | 79.00 |
| | 8.0 | L3 | 12.5 | LC15T8 | 99.00 |
| 23 - 25 | 1.2 | L1 | 5.5 | LC24T1.2 | 69.00 |
| | 2.5 | L2 | 8.7 | LC24T2.5 | 79.00 |
| | 5.0 | L3 | 12.5 | LC24T5 | 99.00 |
| 27 - 29 | 1.0 | L1 | 5.5 | LC28T1 | 69.00 |
| | 2.1 | L2 | 8.7 | LC28T2.1 | 79.00 |
| | 4.3 | L3 | 12.5 | LC28T4.3 | 99.00 |

**DUAL OUTPUT**

| Output Voltage Range | Output Curr. (Amps) | Size (See Dwg) | Wt. (Lbs.) | Model Number | Price 1-24 Piece |
|---|---|---|---|---|---|
| ±11.5 - ±12.5 | 1.2 | L4 | 6.0 | LLC12T1.2 | $99.0 |
| | 2.5 | L5 | 9.2 | LLC12T2.5 | 104.0 |
| | 5.0 | L6 | 13.5 | LLC12T5 | 129.0 |
| ±14.5 - ±15.5 | 1.0 | L4 | 6.0 | LLC15T1 | 99.0 |
| | 2.0 | L5 | 9.2 | LLC15T2 | 104.0 |
| | 4.0 | L6 | 13.5 | LLC15T4 | 129.0 |

**Dual Output Units:**

1. Both outputs are isolated and non-tracking so each output can be used as a completely separate power supply.
2. The output current listed is for each output voltage.

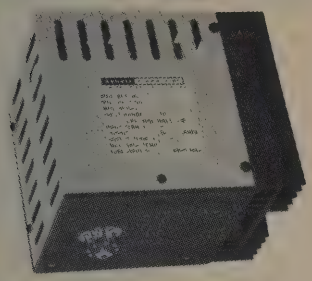
# abbott AC to DC Industrial



## *features*

- Single and Dual Outputs
- −4 to +160°F ambient
- 5 to 37 VDC
- 0.15 to 20 amps
- 0.1% regulation
- Stock delivery

## *specifications*

**INPUT VOLTAGE RANGE:** 105-125 VRMS

**INPUT FREQUENCY RANGE:** 50-420 Hertz, 1 phase

**LINE REGULATION:** 0.1% or 10 mv (whichever is greater) for input change of 105-125 VRMS

**LOAD REGULATION:** 0.1% or 10 mv (whichever is greater) for change from no load to full load

**RIPPLE:** 0.02% or 5 mv RMS (whichever is greater)

**OUTPUT VOLTAGE ADJUSTMENT:** Voltage is continuously adjustable between the limits shown in table by means of an externally accessible screwdriver adjustment potentiometer

**ADJUSTMENT RESOLUTION:** 30 mv max.

**POLARITY:** Inputs and outputs are isolated; either positive or negative side may be grounded

**TEMPERATURE:** Operating: −4°F (−20°C) to +160°F (+71°C) without derating, forced air, or heatsinking. Storage: −40°F (−40°C) to +185°F (+85°C)

**TEMPERATURE COEFFICIENT:** 0.03% per degree Celsius

**SHORT CIRCUIT PROTECTION:** Each unit is completely protected against an overload or short circuit of any duration. The output voltage automatically restores to normal when the overload is removed.

**LOAD TRANSIENT RECOVERY TIME:** Output voltage returns to regulation limits within 75 microseconds after a 50% step change in load current

**TURN ON/TURN OFF OVERSHOOT:** The output voltage overshoot during "turn on" or "turn off" will not exceed 0.1% of the output voltage, or 20 mv, whichever is greater

**REMOTE ERROR SENSING:** Each unit contains a means by which the regulator circuit monitors the voltage directly at the load using extra "sensing" leads. The resulting circuit action compensates for a DC voltage drop up to 0.5 volts in the load leads.

**OVERVOLTAGE PROTECTION, 230 VAC OPERATION, AND REMOTE VOLTAGE ADJUSTMENT:** Available as optional features.

### DUAL OUTPUT

| Output Voltage Range | Output Current (Each Side) | Size | Weight (Lbs.) | Model Number | Price 1-24 Pcs. |
|---|---|---|---|---|---|
| ±11-±13 | 1.2 | 3C | 8.0 | RRN12S1.2 | $149 |
| | 2.5 | 3D | 11.0 | RRN12S2.5 | 169 |
| | 5.0 | 3F | 21.0 | RRN12S5 | 269 |
| ±14-±15 | 1.2 | 3C | 8.0 | RRN15S1.2 | $149 |
| | 2.5 | 3D | 11.0 | RRN15S2.5 | 169 |
| | 5.0 | 3F | 21.0 | RRN15S5 | 269 |

Note: Both outputs are isolated and non-tracking, so each output can be used as a separate power supply.

* See Page 3154 for size charts Note: Other standard models are available. For complete information, please consult our nearest office.

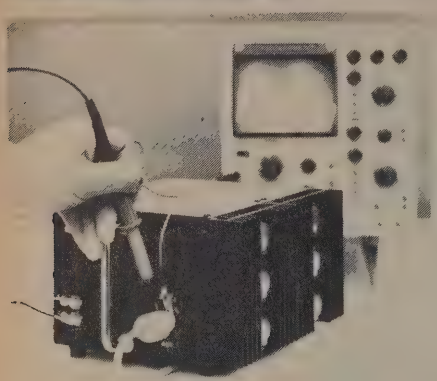
## DC TO 60 Hz INVERTERS



### *features*

- Sine Wave Output
- 12, 24, 28, 36 VDC Inputs
- Low Cost
- High Reliability
- −20°C to +55°C ambient operation
- Reverse Polarity Protection

### *specifications*

**INPUT VOLTAGE RANGE:** 11 to 15 VDC for KN's; 22 to 30 VDC for PN's; 29 to 38 VDC for LN's
**OUTPUT VOLTAGE:** 115 VAC ±2% 60 Hz or 220 VAC ±2% 50 Hz
**OUTPUT FREQUENCY STABILITY:** ±2 Hz
**LINE REGULATION:** 3% for specified input voltage range with load constant
**LOAD REGULATION:** 3% for load change of half load to full load with line constant: 6% for change of no load to full load
**WAVE FORM:** Sine wave with maximum 5% distortion
**LOAD POWER FACTOR:** Full rated output VA from unity to 0.7 PF lagging or leading
**EFFICIENCY:** At full load and nominal input voltage: 40% minimum on KN's; 50% minimum on PN's; 58% minimum on LN's
**OPERATING TEMPERATURE RANGE:** −4°F to +131°F (−20°C to +55°C) ambient air temperature
**INPUT TRANSIENT PROTECTION:** 45 VDC for 0.1 second
**ALTITUDE:** 10,000 feet above sea level
**OVERLOAD PROTECTION:** Magnetic type circuit breaker

**DELIVERY FROM STOCK**

Abbott has designed a new line of quality, low cost DC to 60 Hz Sine Wave inverters. These units will convert DC battery voltage to regulated 60 Hz power to drive any AC equipment, such as, lamps, compressors, motors, televisions, radios, power tools, appliances, test equipment, etc. Surge current capabilities of these units is up to 3 times rated output power.

| Input Voltage Range (VDC) | Output Power (VA) | Size (See Below) | Weight (Lbs.) | Model Number 115 VAC, 60 Hz Output | Model Number 220 VAC, 50 Hz Output | Unit Prices 1-4 pcs. |

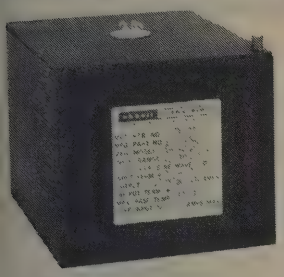
# abbott 60 ⌁ to DC Hermetically Sealed



## *features*

- Compact
- Hermetically Sealed
- Close Regulation
- High Reliability
- 5 to 740 Volts

## *specifications*

**INPUT VOLTAGE RANGE:** 105 to 125 volts AC

**INPUT FREQUENCY RANGE:** 55 to 65 Hertz, 1 phase

**INPUT TRANSIENT PROTECTION:** In accordance with MIL-STD-704A, Figure 3, Limit 1 (180 VAC for 0.1 sec.)

**LINE REGULATION:** ±0.2% for 105-125 VAC input, with constant load

**COMBINED LINE AND LOAD REGULATION:** ±0.5% for 105-125 VAC input and load variation of ½ to full load

**RIPPLE:** 0.2% RMS

**SHORT CIRCUIT PROTECTION:** Protected against short circuit conditions of any duration. Output automatically recovers upon removal of short.

**VOLTAGE ADJUSTMENT RANGE:** 12% by screwdriver adjustment

**TEMPERATURE:** +160°F (+71°C) maximum at mounting base using adequate heat sink
−4°F (−20°C) minimum at mounting base
Storage: −30°C to +85°C

**RELIABILITY:** 80,000 hours.

**ENVIRONMENT:** Encapsulated to meet the environmental requirements of MIL-STD-810B including: altitude, vibration, shock, acceleration, sand, dust, humidity, saltspray, fungus, explosion, etc.

**ISOLATION:** Inputs, outputs, and case are isolated so that either a plus or minus output voltage polarity can be obtained.

**OUTPUT VOLTAGE AND CURRENT:** See specific models listed

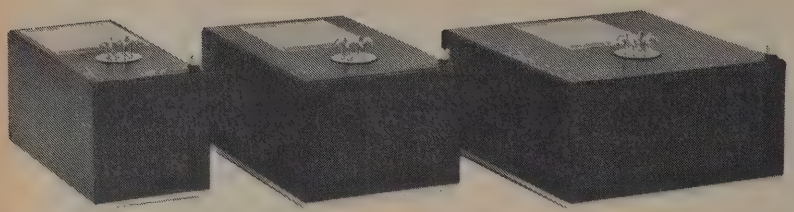
# abbott AC to DC Hi-Efficiency



## *features*

- Hi-Efficiency (64 to 77%)
- Low EMI
- Compact
- +160°F Operation
- Hi-Reliability
- Hermetically Sealed

## *specifications*

**INPUT VOLTAGE RANGE:** 115 VRMS, ±10%

**INPUT FREQUENCY RANGE:** 47 to 440 Hz, 1 Phase

**EFFICIENCY:** Typical efficiency ranges from 64 to 77%

**OUTPUT VOLTAGE AND CURRENT:** See specific models listed in tables

**LINE REGULATION:** 0.4% or 50 mv (whichever is greater) for input change of 103.5 to 126.5 VRMS with load constant

**LOAD REGULATION:** 0.4% or 50 mv (whichever is greater) from no load to full load with line constant

**RIPPLE AND NOISE (PARD):** 0.2% plus 125 mv peak-to-peak from +25°C to +71°C. At 0°C peak-to-peak ripple increases to 0.4% plus 200 mv maximum. Measurements made with a scope having a 25MHz bandwidth

**OUTPUT VOLTAGE ADJUSTMENT:** Voltage is continuously adjustable between the limits shown in the table by means of an externally accessible screwdriver adjustment potentiometer

**ADJUSTMENT RESOLUTION:**

| Nominal Output Voltage | Resolution |
|---|---|
| 3-16 VDC | 35 millivolts |
| 18-50 VDC | 60 millivolts |

**ISOLATION VOLTAGE:** 500 VDC input to output and input to case, 100 VDC output to case.

**INSULATION RESISTANCE:** 50 megohms minimum between input and output, input and case, and output and case when measured at 50 VDC

**POLARITY:** Inputs and outputs are isolated, either positive or negative side may be grounded

**TEMPERATURE RANGE:** Operating: 0°C (32°F) to +71°C (+160°F) baseplate temperature. Storage: −55°C (−65°F) to +85°C (+185°F)

**TEMPERATURE COEFFICIENT:** 0.03% per degree Celsius maximum

**ENVIRONMENT:** Hermetically sealed and encapsulated to meet severe environmental requirements, including:
Vibration: MIL-STD-810B, Method 514, Procedure I, Curve H (±10g's) and Procedure XII. Also MIL-STD-167B, Type I
Shock: MIL-STD-810B, Method 516, Procedure II (75g's crash safety)
Humidity: MIL-STD-810B, Method 507, Procedure I
Saltspray: MIL-STD-983E, Paragraph 4.4.12
Saltfog: MIL-STD-810B, Method 509, Procedure I.

**SHORT CIRCUIT PROTECTION:** Each unit is completely protected against an overload or short circuit of any duration

**INPUT TRANSIENT PROTECTION:** Unit will withstand 180 VAC for 0.1 second in accordance with MIL-STD-704A, Figure 3, Limit 1

**OVERVOLTAGE PROTECTION:** Available as separate modules.

**REMOTE ERROR SENSING:** Each unit contains a means by which the regulator circuit monitors the voltage directly at the load using extra "Sensing" leads. The resulting circuit action compensates for a DC voltage drop up to 0.3 volts in the load leads

**LOAD TRANSIENT RECOVERY TIME:** Output voltage returns to regulation limits within 7 msec. after a 50% step change in load current. Maximum over/undershoot is less than 0.8 VDC or 3% of the output voltage, whichever is greater

**OUTPUT IMPEDANCE:** DC to 1 KHz: .04 $R_L$ or 0.1 ohm, whichever is greater. 1 KHz to 10 KHz: .06 $R_L$ or 0.15 ohms, whichever is greater. 10 KHz to 100 KHz: .08 $R_L$ or 0.4 ohms, whichever is greater.
$R_L$ = Rated Load

**ELECTROMAGNETIC INTERFERENCE:** EMI filters are used in each unit for suppression of conducted interference

**RELIABILITY:** The Mean Time Betwen Failure (MTBF) per MIL-HDBK-217A under worst conditions of full rated output current, 126.5 VAC input voltage, and 40°C baseplate temperature was calculated to be 50,000 hours.

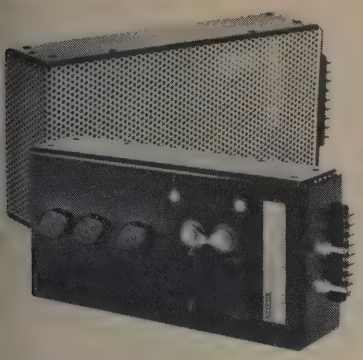
# abbott

# AC (1ø/3ø) or 48 Vdc to DC Hi-Efficiency



## *features*

- 1.3 watts/in³
- Universal 1ϕ & 3ϕ AC input
- 48 Vdc input
- Up to 80% efficient
- Operation to −20°C

| AC INPUT — MODEL DA'S | | | | |
|---|---|---|---|---|
| Output Voltage | Output Current* (Amps) | Size | Model Number | Price 1-9 pcs. |
| 5 | 10.0 | D1 | DA50-5 | $345 |

| | 3.3 | D3 | DC100-15 | 365 |
| | 5.0 | D5 | DC150-15 | 375 |

*For dual output units, output current listed is for each output.

| SIZE CHART | | | |
|---|---|---|---|
| Case Size | Width | Depth | Height |
| D1 | 5.5 | 9.4 | 2.0 |
| D2 | 5.5 | 10.2 | 2.0 |
| D3 | 5.5 | 10.5 | 2.5 |
| D4 | 5.5 | 11.0 | 2.5 |
| D5 | 5.5 | 11.2 | 2.5 |

## *specifications*

**INPUT: DA Models:** 103.5 to 126.5 Vrms, 1ϕ or 3ϕ"Y"; 207 to 253 Vrms, 1ϕ or 3ϕ"△"; 47 to 500 Hz

**DC Models:** 41 to 52 Vdc

**EFFICIENCY:** Minimum efficiency at full load is 60%. Efficiency typically ranges from 63% to 80%, depending on output voltage/power.

**AC INRUSH CURRENT:** Limited by series power thermistors.

**LINE EFFECT (REGULATION):** Less than 0.5% over full input range.

**LOAD EFFECT (REGULATION):** Less than 0.5% from no load to full load.

**PARD (RIPPLE & NOISE):** Less than 100 mV p-t-p, 0°C to +71°C, when measured with an oscilloscope with a 1 MHz bandwidth.

**OUTPUT VOLTAGE ADJUSTMENT:** Output is factory set to within 1% of nominal voltage. Units may be trimmed up to 6% above nominal voltage by means of external resistance. Remote voltage adjustment/programming is available as an optional feature. With this feature, output can be adjusted ±6% from nominal. This option can be specified by adding "-1" to the Model No. e.g., DA50-5-1 indicates inclusion of this feature. Charge is $10 additional for 1 to 9 pieces.

**ISOLATION:** Voltage — 500 Vdc input to case, input to output; 100 Vdc output to case. Resistance — 50 megohms @ 50 Vdc input to case, input to output, output to case.

**TEMPERATURE RANGE:** −20°C to +71°C ambient operating temperature. See load vs. temperature curve below.

**THERMAL PROTECTION:** Power shutdown if temperature exceeds safe operating limits.

**TEMPERATURE COEFFICIENT:** 0.01%/°C typical; 0.03%/°C maximum.

**SHORT CIRCUIT PROTECTION:** Complete protection from short circuits of any duration. Automatic recovery when short is removed.

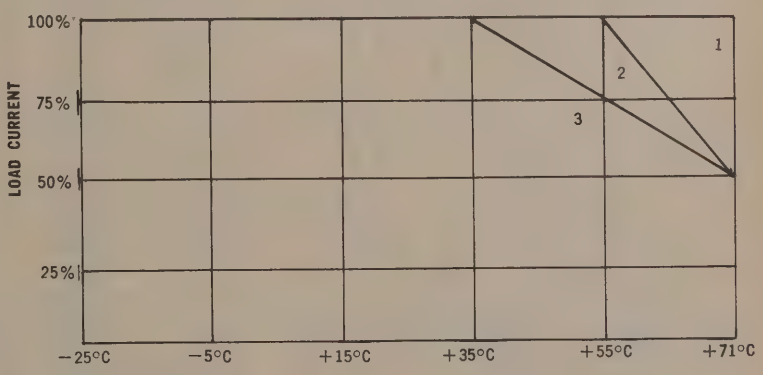
**OVERVOLTAGE PROTECTION:** Standard on all units. Set at 6.2 ±0.5 Vdc on 5V units, 14 ±1 Vdc on 12V units and 17 ±1 Vdc on 15V units.

**REMOTE ERROR SENSING:** Sensing terminals are provided to compensate for up to 0.5 Vdc drop in the load leads. Open sense lead protection is also provided.

**LOAD TRANSIENT RESPONSE:** Output returns to regulation band within 1.0 mS after a 50% step change in load current.

**TURN-ON/TRANSIENT OVERSHOOT:** Maximum output voltage overshoot is less than 0.8V under all conditions.

**HOLDUP TIME:** Typically 20 mS at full load and nominal line voltage.



1 All units, case temperature
2 All units except DA200-5 and DC150-5, ambient temperature
3 DA200-5 and DC150-5, ambient temperature

# abbott 400 ~ to DC Hi-Performance Single & Dual Output

## *features*

- Low Peak-to-Peak Ripple
- RFI/EMI to MIL-STD-461
- Small
- Hermetically Sealed
- +100°C Operation
- 0.1% Regulation

## *specifications*

**INPUT VOLTAGE RANGE:** 105 to 125 VRMS

**INPUT FREQUENCY RANGE:** 380 to 420 Hertz, 1 phase

**INPUT POWER:** Per MIL-STD-704A for category B equipment

**LINE REGULATION:** 0.1% (0.2% for duals) or 10 mv (whichever is greater) for input change of 105 to 125 VRM with load constant

**LOAD REGULATION:** 0.1% (0.2% for duals) or 20 mv (whichever is greater) for change from no load to full loa with line constant

**RIPPLE:** 0.02% or 5 mv (whichever is greater) 25 mv peak-to-peak maximum, each output, measured wi scope having 25 MHz bandwidth

**OUTPUT VOLTAGE ADJUSTMENT:** Voltage is continuously adjustable between the limits shown in the table means of an externally accesible screwdriver adjustment potentiometer

**TRACKING ACCURACY:** The negative output will track the positive output to within 1.0% or 100 mv (whichev is greater) for all rated conditions of input voltage, output current, operating temperature, and output volta adjustment

**ISOLATION VOLTAGE:** 750 vdc input to output and input to case • 200 vdc output to case

**INSULATION RESISTANCE:** 50 megohms minimum between input and output, input and case, and output a case when measured at 50 vdc

**POLARITY:** Inputs and outputs are isolated, either positive or negative side may be grounded

**TEMPERATURE RANGE:** Operating: −55° to +100°C maximum at center of mounting base
Storage: −65°C to +125°C

**TEMPERATURE COEFFICIENT:** 0.03% per degree Celsius maximum

**ENVIRONMENT:** Encapsulated to meet the environmental requirements of MIL-STD-810B and MIL-E-5400K, Cla 2, including: altitude (to a vacuum), vibration, shock, acceleration, sand, dust, humidity, salt spray, fungu explosion, etc.

**SHORT CIRCUIT PROTECTION:** Each unit is completely protected against an overload or short circuit of a duration. The output voltage automatically restores to normal when the overload is removed

**INPUT TRANSIENT PROTECTION:** MIL-STD-704A Figure 3, Limit 1 (180 VAC for 0.1 seconds)

**OVERVOLTAGE PROTECTION:** Overvoltage protection modules are available for these units.

**LOAD TRANSIENT RECOVERY TIME:** Output voltage returns to regulation limits within 100 microseconds (2 microseconds for duals) after 50% step change in load current

**ELECTROMAGNETIC INTERFERENCE:** Built to meet the requirements of MIL-STD-461 for generation of a susceptability to radiated and conducted interference

**RELIABILITY:** The Mean Time Between Failure (MTBF) per MIL-HDBK-217 under worst case operating conditio of full rated output current, 125 vac input voltage, and +100°C base plate temperature, has been calculate for typical units. Values are: W5D10 — 56,148 hrs; W95D0.3 — 47,393 hrs; WW3D0.3 — 67,385 hrs; WW30D4.0 — 48,618 hrs.

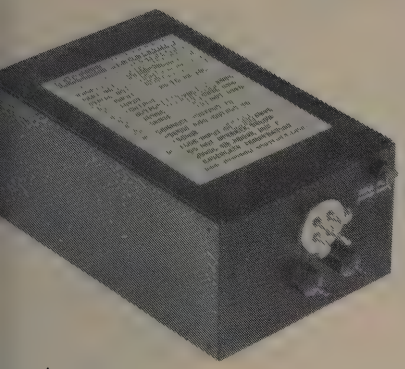
# abbott 400 ~ to DC Hi-Efficiency



## features

- Up to 70% Efficiency
- +100°C Operation
- EMI to MIL-STD-461
- Hermetically Sealed
- Environment to MIL-STD-810
- Single and Dual Outputs

n order to meet the high efficiency require-ents of many of today's airborne systems, bbott engineers have designed and developed new line of AC to DC power modules. Spe-ifically designed for 400 Hz operation, these ermetically sealed units achieve power con-ersion efficiencies of up to 70%. We have esignated this new line the Model UN series.

The UN's employ pulse width modulation at switching frequency of 18 to 20 KHz. Three ermetically sealed linear IC's are used to rovide stable and reliable control over the ull temperature range of −55°C to +100°C.

The performance features of the UN's make hem well suited for any application requiring eliable and rugged 400 Hz to DC conversion.

## specifications

**INPUT VOLTAGE RANGE:** 115 Vrms ±10%

**INPUT FREQUENCY RANGE:** 380 to 420 Hz, 1$\phi$

**EFFICIENCY:** Typical efficiency ranges from 53 to 70%

**INRUSH CURRENT:** Less than 8 times normal steady-state full load input current

**LINE EFFECT (REGULATION):** 0.3% for input change of 103.5 to 126.5 VAC RMS

**LOAD EFFECT (REGULATION):** 0.5% for load change of no load to full load

**PARD (RIPPLE & NOISE):** 100 mV peak-to-peak, 25 mV rms from +25°C to +100°C; 130 mV peak-to-peak, 40 mV rms from −55°C to +25°C. Measured at power module terminals with measurement system noise bandwidth of 25 MHz.

**OUTPUT VOLTAGE ADJUSTMENT:** Voltage is continuously adjustable between the limits shown by means of an externally accessible screwdriver adjustment potentiometer

**ADJUSTMENT RESOLUTION:**

| Nominal Output Voltage | Resolution |
|---|---|
| 5-10 VDC | 37 mV |
| 12-18 VDC | 49 mV |
| 24-31 VDC | 75 mV |

**ISOLATION VOLTAGE:** 250 VDC between input and output and input and case; 50 VDC between ouput and case

**INSULATION RESISTANCE:** 50 megohms minimum between input and output, input and case and output and case when measured at 50 VDC

**TEMPERATURE RANGE: Operating;** −55°C to +100°C baseplate temperature. Derate maximum output current linearly above 85°C baseplate temperature to 80% of full load rating at 100°C baseplate temperature. Storage; −65°C to +125°C

**TEMPERATURE EFFECT (COEFFICIENT):** 0.03% per degree Celsius

**ENVIRONMENT:** Hermetically sealed and encapsulated to meet the environmental requirements of MIL-STD-810 and MIL-E-5400, Class 2, including altitude (to a vacuum), vibration, shock, acceleration, sand, dust, humidity, salt spray, fungus, explosion, etc.

**SHORT CIRCUIT PROTECTION:** Each unit is completely protected against overloads (greater than 150% rated load) and short circuits of any duration. The output automatically restores to normal when the fault is removed

**INPUT TRANSIENT PROTECTION:** In accordance with MIL-STD-704A, Figure 3, Limit 1 (180 VAC for 0.1 sec)

**OVERVOLTAGE PROTECTION:** Internal OVP is available as an optional feature and is indicated by adding "-1" to the model number (i.e. UN25D-5A-1 indicates that OVP has been included). The price is $20.00 additional on 1-4 pieces. The overvoltage threshold is factory set to approximately 2V or 10% (whichever is greater) above the nominal output voltage. The OVP circuitry has a built-in delay of approximately 500 microseconds to minimize 'nuisance' tripping

**REMOTE ERROR SENSING:** Each unit contains a means by which the regulator circuit can monitor the voltage directly at the load by using extra "sense" leads. The resulting circuit action will compensate for a DC voltage drop of up to 0.3 volts in the load leads

**LOAD TRANSIENT RESPONSE:** Output voltage returns to regulation limits within 2 ms after a 50% step change in load current. Maximum overshoot is less than 0.8V

**TURN-ON/TURN-OFF OVERSHOOT:** No overshoot during turn-on into loads greater than half load. For loads less than half load, turn-on overshoot is less than 0.8V for 25 ms. No turn-off overshoot under any conditions

**OUTPUT IMPEDANCE:**
DC-500 Hz: 0.02$R_L$ or .04 ohm, whichever is greater
500-5 KHz: 0.10 $R_L$ or .35 ohm, whichever is greater
5K-100 KHz: 0.30 $R_L$ or .10 ohm, whichever is greater

**ELECTROMAGNETIC INTERFERENCE:** Designed to meet the requirements of MIL-STD-461A for generation of conducted and radiated interference. Test report on a typical model is available

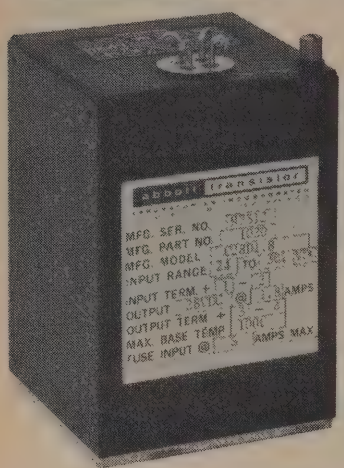
abbott transistor LABORATORIES, INCORPORATED

# abbott 28 VDC to DC Hi-Performance Single & Dual Output



## *features*

- Low Peak-to-Peak Ripple
- RFI/EMI to MIL-STD-461
- Small
- Hermetically Sealed
- +100°C Operation
- 0.1% Regulation

## *specifications*

**INPUT VOLTAGE RANGE:** 24 to 30 vdc. Other input ranges are available

**LINE REGULATION:** 0.1% (0.2% for duals) or 10 mv (whichever is greater) for input change of 24 to 30 vd with load constant

**LOAD REGULATION:** 0.1% (0.2% for duals) or 20 mv (whichever is greater) for load change of no load to fu load with line constant

**RIPPLE:** 0.02% or 5 mv RMS (whichever is greater) 50 mv peak-to-peak maximum, each output, measured wit scope having a bandwidth of 25 MHz

**OUTPUT VOLTAGE ADJUSTMENT:** Voltage is continuously adjustable between the limits shown in the table b means of an externally accessible screwdriver adjustment potentiometer.

**TRACKING ACCURACY:** The negative output will track the positive output to within 1.0% or 100 mv (whicheve is greater) for all rated conditions of input voltage, output current, operating temperature, and output voltag adjustment

**ISOLATION VOLTAGE:** 200 volts DC between input and output, input and case, and output and case.

**INSULATION RESISTANCE:** 50 megohms minimum at 50 volts DC between input and output, input and case and output and case.

**POLARITY:** Inputs and outputs are isolated; either positive or negative side may be grounded.

**TEMPERATURE RANGE:** Operating: −55°C to +100°C maximum at center of mounting base.
Storage: −65°C to +125°C..

**TEMPERATURE COEFFICIENT:** 0.03% per degree Celsius maximum

**ENVIRONMENT:** Encapsulated to meet the environmental requirements of MIL-STD-810B and MIL-E-5400K, Clas 2, including altitude (to a vacuum), vibration, shock, acceleration, sand, dust, humidity, salt spray, fungus explosion, etc.

**SHORT CIRCUIT PROTECTION**
Each unit is completely protected against an overload or short circuit of any duration. The output voltag automatically restores to normal when the overload is removed.

**INPUT TRANSIENT PROTECTION:** MIL-STD-704A, Limit 1, Category B (80 volts for 0.1 sec.).

**OVERVOLTAGE PROTECTION:** Overvoltage protection modules are available for use with these units.

**LOAD TRANSIENT RECOVERY TIME:** Output voltage returns to regulation limits within 100 microseconds (20 microseconds for duals) after 50% step change in load current

**ELECTROMAGNETIC INTERFERENCE:** Built to meet the requirements of MIL-STD-461 for generation of an susceptability to radiated and conducted interference.

**RELIABILITY:** The mean time between failure (MTFB) per MIL-HDBK-217 under worst case operating condi tions of full rated output current, 30 vdc input voltage, and +100°C base plate temperature has been calculate for typical units. Values are: C5D10 — 41,305 hrs; C95D0.25 — 55,463 hrs; CC3D3.5 — 34,710 hrs; CC30D3.5 — 20,105 hrs.

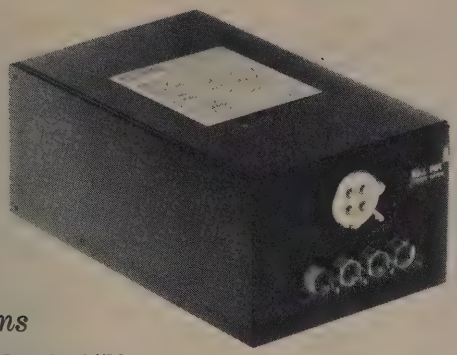
# abbott DC to DC Hi-Efficiency



## *features*

- Wide Range DC Input
- Up to 70% Efficiency
- EMI Filters
- Reverse Polarity Protection
- +100°C Operation
- Single & Dual Outputs

## *specifications*

**INPUT VOLTAGE RANGE:** 20 to 32 VDC

**EFFICIENCY:** Typical efficiency ranges from 50 to 70%.

**INRUSH CURRENT:** Less than 8 times normal steady-state full load input current

**LINE EFFECT (REGULATION):** 0.5% for input change of 20 to 32 VDC

**LOAD EFFECT (REGULATION):** 0.5% for load change of no load to full load

**CARD (RIPPLE & NOISE):** 100 mv peak-to-peak, 25 mv rms from 25°C to +100°C; 130 mv peak-to-peak, 40 mv rms from −55°C to +25°C. Measured at power module terminals with measurement system noise bandwidth of 25 MHz

**OUTPUT VOLTAGE ADJUSTMENT:** Voltage is continuously adjustable between the limits shown by means of an externally accessible screwdriver adjustment potentiometer. Wider output ranges are available by restricting the input voltage range. Consult the factory for further information

**ADJUSTMENT RESOLUTION:**

| Nominal Output Voltage | Resolution |
|---|---|
| 5-10 VDC | 37 mv |
| 12-18 VDC | 49 mv |
| 24-31 VDC | 75 mv |

**ISOLATION VOLTAGE:** 100 VDC between input & output and input & case; 50 VDC between output & case

**INSULATION RESISTANCE:** 50 megohms minimum between input & output, input & case and output & case when measured at 50 VDC

**POLARITY:** Inputs and outputs are isolated; either positive or negative side may be grounded.

**TEMPERATURE RANGE:** Operating; −55°C to +100°C baseplate temperature. Derate maximum output current linearly above 85°C baseplate temperature to 30% of full load rating at 100°C baseplate temperature. Storage; −65°C to +125°C

**TEMPERATURE EFFECT (COEFFICIENT):** 0.03% per degree Celsius

**ENVIRONMENT:** Hermetically sealed and encapsulated to meet the environmental requirements of MIL-STD-810 and MIL-E-5400, Class 2, including altitude (to a vacuum), vibration, shock, acceleration, sand, dust, humidity, salt spray, fungus, explosion, etc.

**SHORT CIRCUIT PROTECTION:** Each unit is completely protected against overloads (greater than 150% rated load) and short circuits of any duration. The output automatically restores to normal when the fault is removed

**INPUT TRANSIENT PROTECTION:** Each unit is completely protected against the transients of MIL-STD-704, Category B, (80 VDC for 0.1 sec) having rise times greater than 100 microseconds. Unit will turn off and resume operation when the input returns to normal

**OVERVOLTAGE PROTECTION:** Internal OVP is available as an optional feature and is indicated by adding "—1" to the model number (i.e.: BN25D-5A-1 indicates that OVP has been included.) The price is $20.00 additional on 1-4 pieces. The overvoltage threshold is factory set to approximately 2 V or 10% (whichever is greater) above the nominal output voltage. The OVP circuitry has a built-in delay of approximately 500 microseconds to minimize 'nuisance' tripping

**REMOTE ERROR SENSING:** Each unit contains a means by which the regulator circuit can monitor the voltage directly at the load by using extra "sense" leads. The resulting circuit action will compensate for a DC voltage drop of up to 0.3 volts in the load leads

**LOAD TRANSIENT RESPONSE:** Output voltage returns to regulation limits within 2 ms after a 50% step change in load current. Maximum overshoot is less than 0.8 V

**TURN-ON/TURN-OFF OVERSHOOT:** No overshoot during turn-on into loads greater than half load. For loads less than half load, turn-on overshoot is less than 0.8 V for 25 ms. No turn-off overshoot under any conditions

**OUTPUT IMPEDANCE:**

| | |
|---|---|
| DC-500 Hz | 0.02 $R_L$ or 0.04 ohms |
| 500-5K Hz | 0.10 $R_L$ or 0.35 ohms |
| 5K-100K Hz | 0.30 $R_L$ or 0.10 ohms |

**ELECTROMAGNETIC INTERFERENCE:** Designed to meet the requirements of MIL-STD-461 for generation of conducted and radiated interference. Test report on a typical model is available

**RELIABILITY:** The Mean Time Between Failures (MTBF) per MIL-HDBK-217A under worst case operating conditions of 32 VDC input, full load output, and 100°C baseplate temperature was calculated to be 13,950 hours for Model BN100D-5A. At 71°C baseplate temperature, the MTBF increases to 23,000 hours

| | 3.33 | 12F | 4.4 | BBN100D-15A | 522 |

Dual Output Units: 1) The output current listed is for each output.

2) The negative output is "semiregulated" and will meet regulation specifications only when operated into a balanced load.

3) The negative output will typically be within 4% of the positive output voltage for load imbalances up to 4:1 in magnitude.

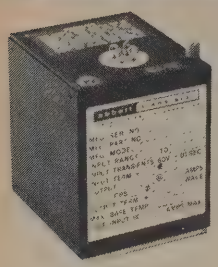
# abbott DC to Sine Wave 1 ∅



DC to 400 Hz

## POWER MODULES

### *features*

- Close regulation
- 400 or 1600 Hertz
- Hermetically sealed
- No moving parts
- Compact

### *specifications*

**Input Voltage Range:** 24 to 30 volts DC. Other input ranges are available.
**Load Regulation:** ±0.5% from ½ to full load.
**Frequency Stability:** ±0.5%
**Voltage Adjustment Range:** 12% by screwdriver adjustment.
**Reliability:** 55,000 hours MTBF typical per MIL-HDBK-217 under worst case operatio conditions.
**Input Transient Protection:** In accordance with MIL-STD-704A, Limit 1, Category (80 volts for 0.1 seconds).
**Environment:** +212°F max. at mtg. base using adequate heat sink. −65°F min. a mtg. surface. Altitude: To vacuum (true hermetic seal). Vibration, shock, sand, dust humidity, salt spray, fungus, sunshine, rain, and explosion to MIL-STD-810B an MIL-E-5400K.
**Output Voltage, Current, and Frequency:** See specific models listed (Outputs an inputs are isolated).
Output frequencies up to 1600 Hz are listed in our catalog as standard models Contact our nearest office for your free copy.

# More bore than ever before.

ACDC makes virtually every power supply product you'll ever need. And every one is guaranteed to be just as boring as possible. Boring because they're so dependable. Boring because they just keep working—and never give you any reason to get excited. And boring because they're just sitting in our warehouse—ready for off-the-shelf delivery to you. Name it, we've got it.

**EC Low Cost Power Supplies.** 42 single output models from 2V @ 3A to 24V @ 10A. Double and triple output models also available. Electrically and mechanically interchangeable in form, fit and function with other standard open frame power supplies. 2-year guarantee. Optional overvoltage protection. UL recognized. **OEM Value Engineered Series.** Features low price, excellent stability, overload protection, and built-in convection cooling. Single, dual, and triple outputs. 5-year guarantee. **HCM High Current Power Supplies.** 10 models with ratings from 25A @ 28V to 100A @ 5V. Two case sizes and two current ratings at 5, 12, 15, 24, and 28 volts. Overvoltage protection available. Excellent for multi-input, applications. **Modular Switchers.™** Designed for reliability, flexibility, and serviceability. Modular, plug-together construction. From 50-300 watts. UL recognition pending. Single and triple output. **JF & JT High Efficiency/High Current Switchers.** Designed to fit tight spaces—with heat sinks replaced by integral, but replaceable, fans. Available with single or dual outputs. **CPS Custom Power Supplies.** Features include auto-progression, margining, sequencing, transistor switching, phase control and series regulation, as well as special packaging configuration. **III Rack Systems.** Power supply systems can now be packaged in a single compact unit. Five basic models for standard 19" racks. Available in kit form, factory assembled, and/or factory wired. **EL750 Electronic Load Instrument.** A precision programmable instrument for static and dynamic testing of DC power sources. Dissipates up to 750 watts of DC power. Selectable constant current or constant resistance operating modes.

Find out more about our entire boring line of products. Send for our catalog. It's free. And that may be its only exciting feature. Write or call: 401 Jones Road, Oceanside, California 92054, (714) 757-1880, 509 South Avenue East, Cranford, New Jersey 07016, (201) 272-3377.

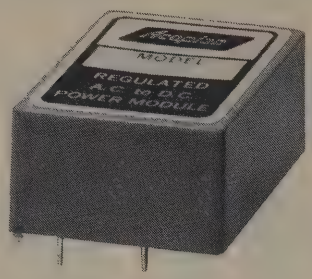
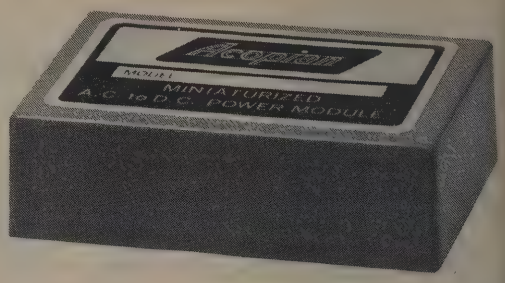
# MINIATURIZED REGULATED SINGLE OUTPUT





**ALL MODELS U.L. RECOGNIZED**

Conserve space with mini-modules as small as 2.3" x 1.8" x 1.0". Models with outputs ranging from 1 to 75 volts, and from 30 ma to 2.5 amps are available. All feature excellent regulation and ripple parameters, and are short circuit protected.

Rugged encapsulated construction and generously derated components insure years of reliable operation. Mini-modules are also available with multiple outputs—see pages 4 and 5.

## STANDARD FEATURES

- May be used in series
- No derating or heat sinking required
- Short circuit protected
- Small, lightweight

## SPECIFICATIONS

**Input Voltage:** 105–125 VAC, 47 to 420 Hz, single phase.

**Output Specifications:** See table.

**Output Voltage Trim Adjustment:** Output is factory preset to ±2% (1 to 9 volt models) or ±1% (10 to 75 volt models) of nominal output voltage. Output may be trimmed to the nominal voltage rating with an external trim resistor.

**Polarity:** Output is floating. Either positive or negative terminal may be grounded.

**Ambient Operating Temperature:** −20 to +71°C. (Model 5E150, 0 to +71°C.) No derating required.

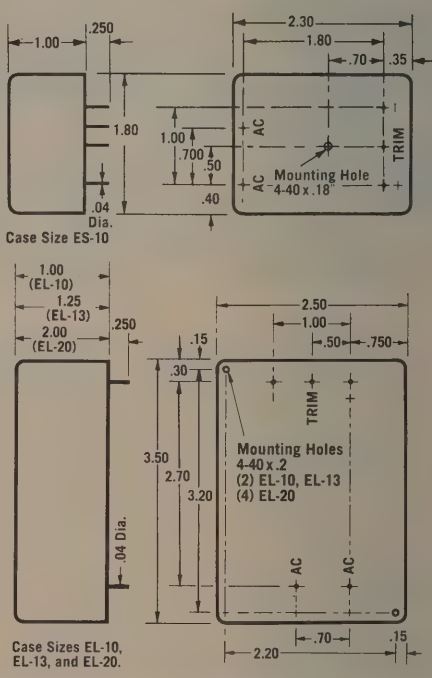
**Storage Temperature:** −55 to +85°C.

**Temperature Coefficient:** From 9 to 75 volts, approximate TC is .015%/°C; 1 to 8 volts, .03%/°C.

**Impedance:** 0.07 ohms at 1 kHz and 0.2 ohms at 10 kHz (approx.).

**Weight:** 7 oz. (Case size ES-10.)
1 lb. (Case size EL-10.)
1 lb. 3 oz. (Case size EL-13.)
2 lb. (Case size EL-20.)

**Optional 230 Volt Input:** All models can be alternately furnished for operation on an input of 210 to 250 VAC, 47-420 Hz. To order, add suffix "–230" to model number and $10.00 to price.



**High voltage displays** such as NIXIE* indicators may be powered with the Model NX-25A or NX-50. With an input of 115 VAC 47-420 Hz, they provide nominal (unregulated) outputs of 185 VDC.

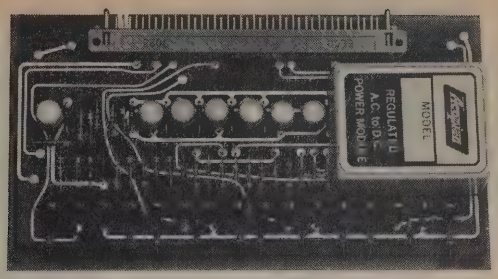
ACOPIAN CORP., EASTON, PA. 18042 • TEL: (215) 258-5441 • TWX: 510-651-4919 • 3-DAY SHIPMENT GUARANTEED



**Placement of a mini-module** on a printed circuit assembly eliminates the need for an outboard power supply, as well as all the associated wiring, connectors and hardware. Layout and construction are simplified, equipment size can be reduced, and system reliability is improved.

# MINIATURIZED REGULATED MULTIPLE OUTPUT

**ALL MODELS U.L. RECOGNIZED**

**These dual and triple output** mini-modules are compact and convenient sources of the voltages required to power operational amplifiers and related circuits. They may be mounted directly on printed circuit board assemblies, simplifying system layout and minimizing the connectors and wiring required.

## STANDARD FEATURES

- May be used in series
- No derating or heat sinking required
- Short circuit protected
- Compact, lightweight

## SPECIFICATIONS

**Input Voltage:** 105–125 VAC, 47 to 420 Hz, single phase.

**Output Specifications:** See table.

**Output Voltage Setting:** Each output is factory preset to ±2% (1 to 9 volt outputs) or ±1% (10 to 28 volt outputs) of the nominal output voltage. Outputs of Case Size END modules, except those marked (*), may be trimmed to the nominal voltage rating with an external trim resistor.

**Polarity:** Single output sections may be used in either polarity. Dual output sections, marked (*), are provided with a plus/common/minus output connection configuration.

**Ambient Operating Temperature:** −20 to +71°C. No derating required.

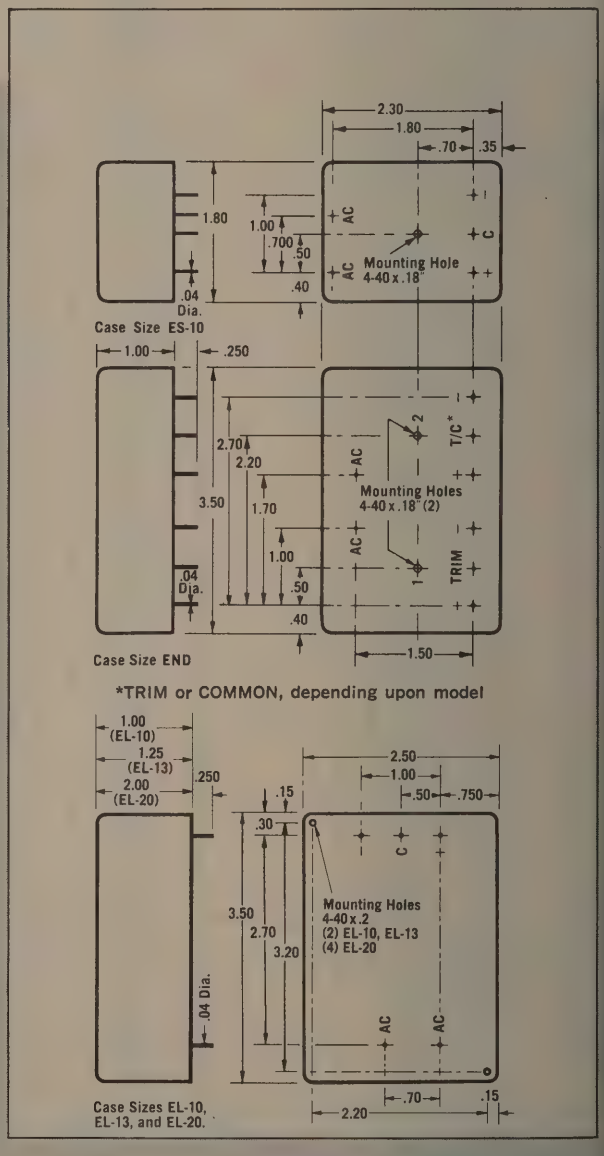
**Storage Temperature:** −55 to +85°C.

**Temperature Coefficient:** From 9 to 28 volts, approximate TC is .015%/°C; 1 to 8 volts, .03%/°C.

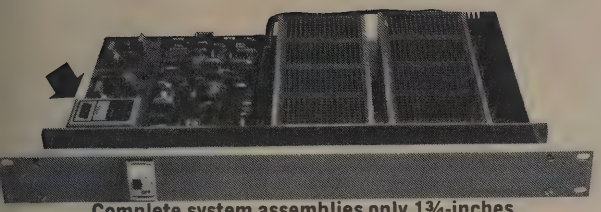
**Impedance:** 0.07 ohms at 1 kHz and 0.2 ohms at 10 kHz (approx.).

**Weight:** 7 oz. (Case size ES-10.)
13 oz. (Case size END.)
1 lb. (Case size EL-10.)
1 lb. 3 oz. (Case size EL-13.)
2 lb. (Case size EL-20.)

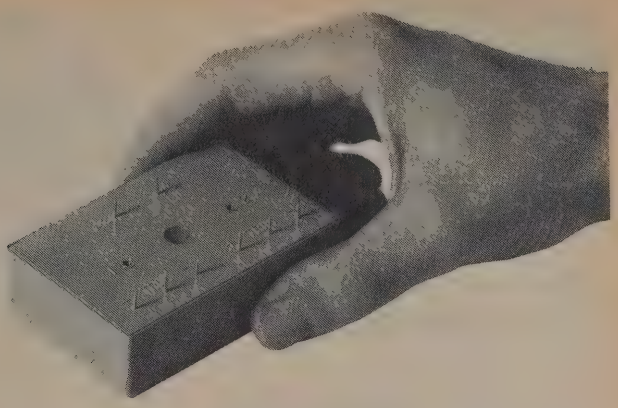
**Optional 230 Volt Input:** All models can be alternately furnished for operation on an input of 210 to 250 VAC, 47-420 Hz. To order, add suffix "–230" to model number and $10.00 to price.



ACOPIAN CORP., EASTON, PA. 18042 • TEL: (215) 258-5441 • TWX: 510-651-4919 • 3-DAY SHIPMENT GUARANTEED



**Complete system assemblies only 1¾-inches high.** Mini-modules permit exceptional flexibility in the design of rack-mounting assemblies built on standard 19-inch panels as small as 1¾-inches high.



**Dual output modules** have isolated outputs; triples provide two balanced and tracking voltages in a three-terminal configuration, plus an isolated third output for logic, control circuits, etc.

## HOW TO ORDER:

Any two of the sections listed below, or two of the same section, can be combined into a multiple-output module. The complete model number is the combination of the two section numbers selected. Note that some sections provide two outputs; combination with a single output section results in a triple-output module.

Example: The combination of sections 6E20D and 15E10D is the Model 6E20D-15E10D. Always assign the lower voltage section first. For pricing purposes, add the costs of the sections selected. Example: The price of the Model 6E20D-15E10D is $39.00 plus $29.00, or $68.00 total.

# MINIATURIZED REGULATED

## Terminal Strip Connections

**ALL MODELS U.L. RECOGNIZED**

**Although small in size,** these mini-modules offer high performance at modest prices. All models, with series regulated outputs ranging from 1 to 75 volts and as high as 2.5 amps, may be mounted in an area only 3.5" x 2.5". Dual output models are available with the ratings commonly required for driving op amps and other balanced loads. Terminal strip input/output connections eliminate all need for sockets or soldering. Short circuit protection, encapsulated construction, and conservative design assure long term reliability.

### STANDARD FEATURES

- May be used in series
- No derating or heat sinking required
- Short circuit protected
- Small, lightweight

### SPECIFICATIONS

**Input Voltage:** 105–125 VAC, 47 to 420 Hz, single phase.

**Output Specifications:** See tables.

**Output Voltage Trim Adjustment:** Outputs factory preset to ±2% (1 to 9 volt models) or ±1% (10 to 75 volt models) of nominal output voltage. Single output models may be trimmed to the nominal voltage rating with an external trim resistor.

**Polarity:** Either positive or negative terminal of a single output module may be grounded. Dual output modules have a positive/common/negative output terminal configuration.

**Ambient Operating Temperature:** −20 to +71°C. (Model 5EB150, 0 to +71°C.) No derating required.

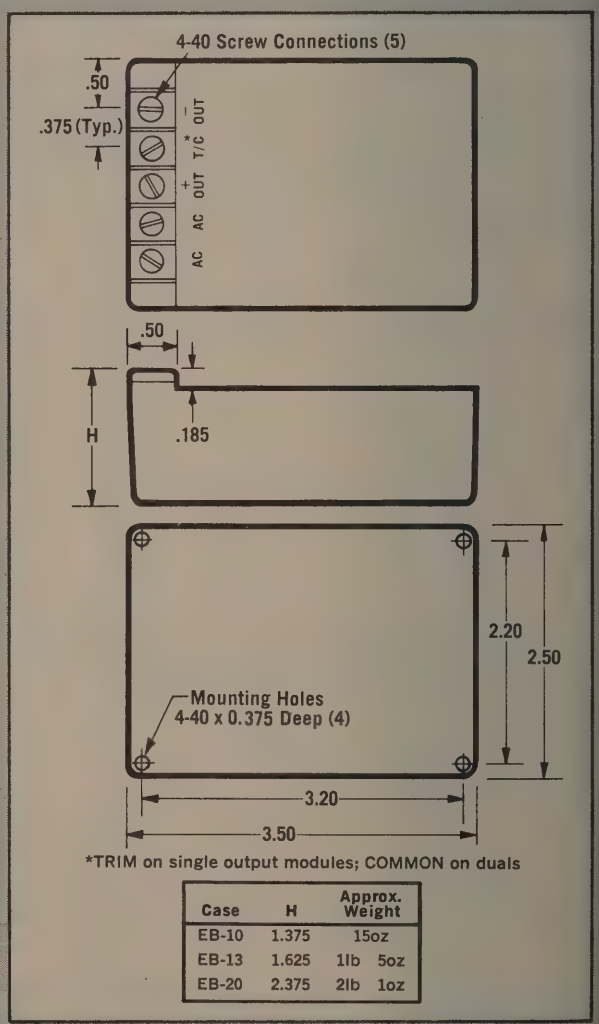
**Storage Temperature:** −55 to +85°C.

**Temperature Coefficient:** From 9 to 75 volts, approximate TC is .015%/°C; 1 to 8 volts, .03%/°C.

**Impedance:** 0.07 ohms at 1 kHz and 0.2 ohms at 10 kHz (approx.).

**Optional 230 Volt Input:** All models can be alternately furnished for operation on an input of 210 to 250 VAC, 47-420 Hz. To order, add suffix "–230" to model number and $10.00 to price.

**High voltage displays** such as NIXIE* indicators may be powered with the Model NX-25B or NX-50B. With an input of 115 VAC 47-420 Hz, they provide nominal (unregulated) outputs of 185 VDC.
*Registered trademark of Burroughs Corp.



*TRIM on single output modules; COMMON on duals

**An Acopian miniaturized power module** is used in the Valitron credit validation system manufactured by Video Systems Corporation. A Valitron terminal is capable of retrieving and displaying credit information for any of 100,000 accounts on a six inch video screen, in response to an account number being entered via its keyboard.

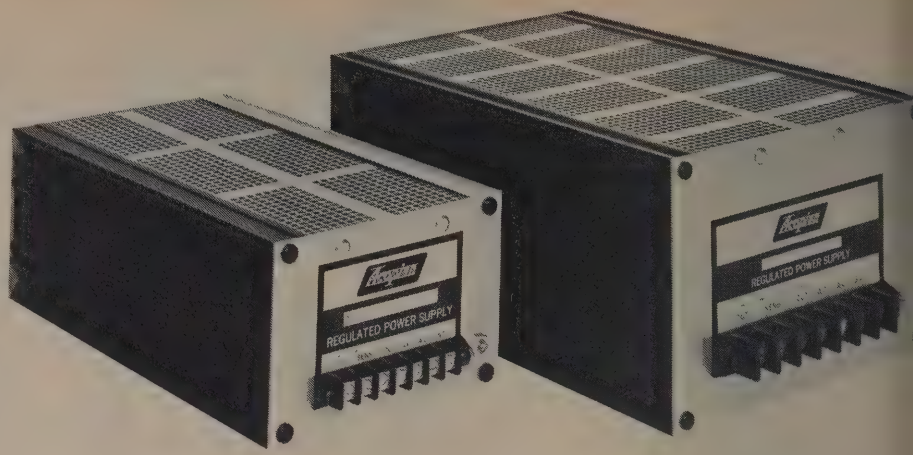
# SERIES A REGULATED PREMIUM PERFORMANCE

# SERIES B REGULATED LOWEST COST

**U.L. RECOGNIZED**



**A broad selection of power supplies** offering unusually high performance — many models have regulation of ±0.005%. Electronic current limiting and provision for remote voltage sensing are standard features; overvoltage protection is available as a built-in option. Rugged extruded aluminum cases include threaded mounting holes on bottom, back, and side, permitting mounting in any position.

## SERIES A PREMIUM PERFORMANCE POWER SUPPLIES

### STANDARD FEATURES

- Provision for remote sensing and/or external output adjustment
- Short circuit proof with automatic recovery (electronic current limiting)
- Can be mounted on any of three surfaces (case sizes H8, H11 and H16, two surfaces)
- Convection cooled — no heat sinking or forced-air ventilation is necessary
- Silicon semiconductors
- Completely serviceable

### SPECIFICATIONS

**Input Voltage:** 105–125 VAC, 50–400 Hz, single phase.

**Output Specifications:** See pages 10 and 11. Series A supplies have model numbers beginning with the letter A.

**Remote Voltage Sensing:** Provision for sensing the output voltage across the load, so that drops in the load line are compensated, is a standard feature.

**Polarity:** Output is floating; either positive or negative terminal may be grounded or floated up to 300 V above ground.

**Ambient Operating Temperature:** −20 to +71°C.

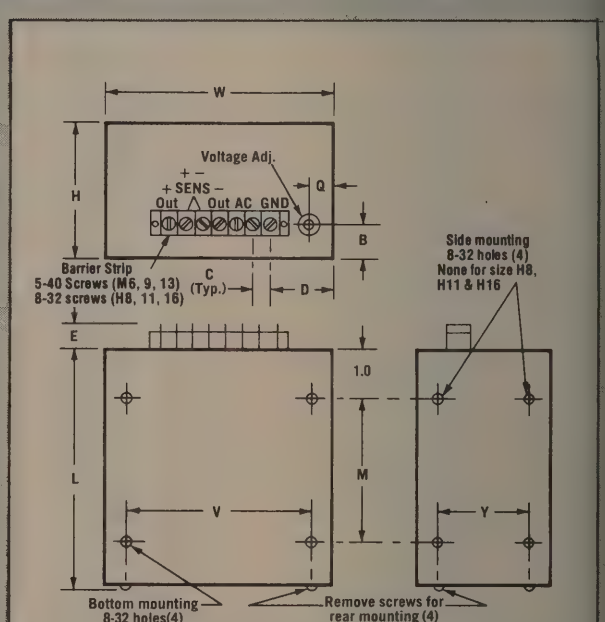
**Storage Temperature:** −55 to +85°C.

**Response Time:** Less than 20 microseconds.

### OPTIONS

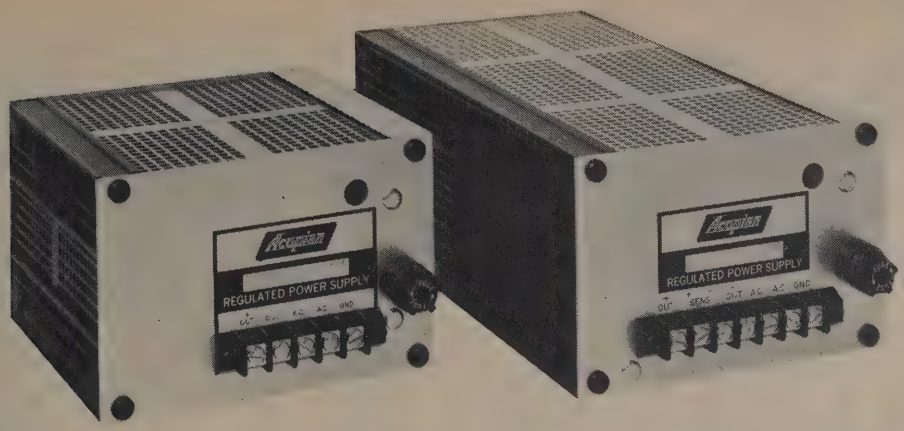
**Overvoltage Protection:** An internal preset overvoltage protector is available on all models with outputs of 3 to 70 volts. To order, add prefix "V" to the model number, and increase standard price as follows:

For all case sizes except H16:
Nominal output voltages from 3 to 28 V. $25.00
30 to 70 V. 35.00
Case size H16 (all voltages) . . . . . 75.00



| Size | L | W | H | M | V | Y | E | Q | B | C | D | Approx. Weight |
|---|---|---|---|---|---|---|---|---|---|---|---|---|
| M6 | 6.59 | 5.12 | 3.44 | 4.0 | 4.5 | 3.0 | .38 | .5 | .75 | .375 | 1.44 | 4lb 4oz |
| M9 | 9.25 | 5.12 | 3.44 | 6.0 | 4.5 | 3.0 | .38 | .5 | .75 | .375 | 1.44 | 7lb 4oz |
| M13 | 13.25 | 5.12 | 3.44 | 10.0 | 4.5 | 3.0 | .38 | .5 | .75 | .375 | 1.44 | 11lb |
| H8 | 8.75 | 7.37 | 5.12 | 6.0 | 6.75 | 4.56 | .75 | 1.12 | 1.25 | .562 | 2.25 | 15lb 8oz |
| H11 | 11.25 | 7.37 | 5.12 | 8.0 | 6.75 | 4.56 | .75 | 1.12 | 1.25 | .562 | 2.25 | 18lb 4oz |
| H16 | 16.00 | 7.37 | 5.12 | 11.0 | 6.75 | 4.56 | .75 | 1.12 | 1.25 | .562 | 2.25 | 23lb |

**230 Volt Input:** All models can be alternately furnished for operation on inputs of 210–250 VAC, 50–400 Hz. To order, add suffix "-230" to model number and $10.00 to price.



**These low-cost supplies** provide the same high reliability as the Series A, and without sacrificing the basic features necessary for most applications. Many models have regulation of ±0.1% or better. All components are generously derated to insure a long and trouble-free life. And they use the same rugged construction as the Series A line. Overvoltage protection and other options are available.

## SERIES B LOW-COST POWER SUPPLIES

### STANDARD FEATURES

- Delivers current surges without damage—built-in fuse protects supply against prolonged overloads and shorts
- May be mounted on any of three surfaces
- Convection cooled—no heat sinking or forced-air ventilation is necessary
- Silicon semiconductors
- Completely serviceable

### SPECIFICATIONS

**Input Voltage:** 105–125 VAC, 50–400 Hz, single phase.

**Output Specifications:** See pages 10 and 11. Series B supplies have model numbers beginning with the letter B.

**Remote Voltage Adjustment/Sensing:** Available as an option. See below.

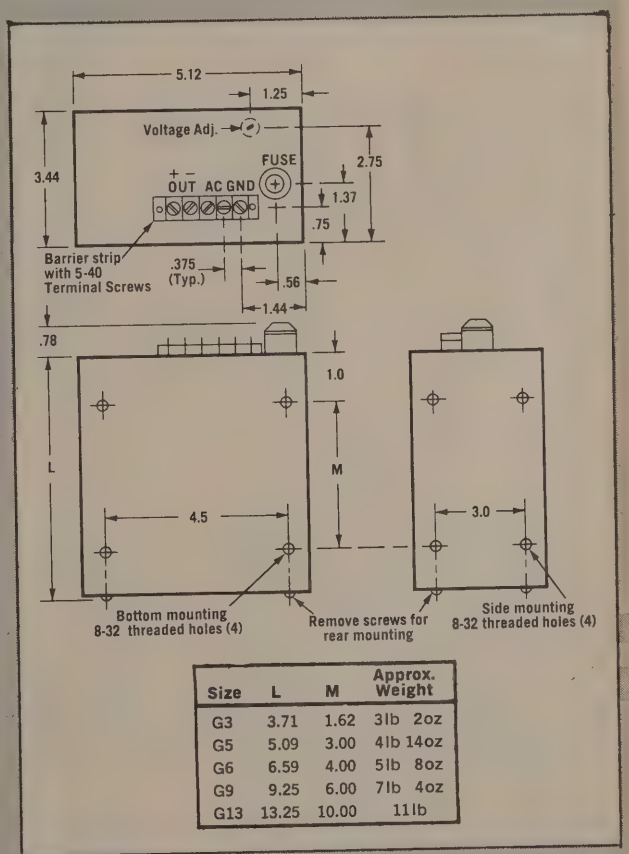
**Polarity:** Output is floating; either positive or negative terminal may be grounded or floated up to 300 V above ground.

**Ambient Operating Temperature:** 0 to +71°C.
**Storage Temperature:** −55 to +85°C.

### OPTIONS

**Overvoltage Protection:** An internal preset overvoltage protector is available on all models with outputs of 3 to 70 volts. To order, add prefix "V" to the model number and add $25.00 to the standard price of models with output voltages of 3 to 28 V, $35.00 to the price of models with output voltages from 30 to 70 V.

**Remote Voltage Sensing:** Provision for sensing the output voltage across the load, so that drops in the load lines are compensated, is available on all models. (This option also permits the use of an externally located potentiometer to adjust output voltage.) To order, add prefix "R" to the model number. No increase in price.



| Size | L | M | Approx. Weight |
|---|---|---|---|
| G3 | 3.71 | 1.62 | 3lb 2oz |
| G5 | 5.09 | 3.00 | 4lb 14oz |
| G6 | 6.59 | 4.00 | 5lb 8oz |
| G9 | 9.25 | 6.00 | 7lb 4oz |
| G13 | 13.25 | 10.00 | 11lb |

**230 Volt Input:** All models can be alternately furnished for operation on inputs of 210–250 VAC, 50–400 Hz. To order, add suffix "-230" to model number and $10.00 to price.

## MODELS WITH WIDE ADJUSTMENT RANGES

**Load Regulation:** ±0.005%*

**Line Regulation:** ±0.005%*

**Ripple:** 0.250 mv RMS

**Other Specifications:** Same as Series A

Contact factory for information on other models with wide adjustment ranges.

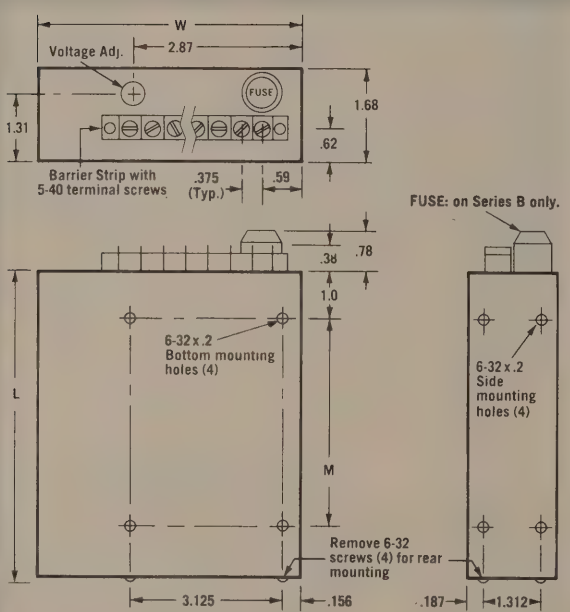
Acopian

# NARROW PROFILE REGULATED

## ALL MODELS U.L. RECOGNIZED

**Where only a narrow mounting space** is available, Acopian narrow profile power supplies fit when many others cannot. Choose from Series A (high performance) and Series B (lower priced) models with output ratings up to 150 volts, up to 4 amps.



| Size | L | W | M | Approx. Weight |
|---|---|---|---|---|
| F6 | 6.59 | 3.44 | 4.0 | 2lb 4oz |
| F6T | 6.59 | 3.81 | 4.0 | 2lb 4oz |
| N8 | 8.47 | 3.44 | 5.0 | 3lb |
| F8T | 8.47 | 3.81 | 5.0 | 3lb 2oz |
| N8T | 8.47 | 3.81 | 5.0 | 3lb 2oz |
| N8H | 8.47 | 4.68 | 5.0 | 3lb 14oz |

## SPECIFICATIONS

**Input Voltage:** 105–125 VAC, 50–400 Hz, single phase.

**Output Specifications:** See table. Series A supplies have model numbers beginning with the letter A; Series B, with the letter B.

**Remote Voltage Adjustment/Sensing:** Standard in Series A, not available in Series B.

**Polarity:** Output is floating; either positive or negative terminal may be grounded or floated up to 300 V above ground.

**Ambient Operating Temperature:** Series A, −20 to +71°C; Series B, 0 to 71°C.

**Storage Temperature:** −55 to +85°C.

**Short Circuit and Overload Protection:** Series A, electronic current limiting with automatic recovery; Series B, fused – delivers current surges without damage.

## OPTIONS

**Overvoltage Protection:** An internal preset overvoltage protector is available on all models up to 70 V. To order, add prefix "V" to the model number and add $25.00 to the standard price of models with output voltages of 3 to 28 V, $35.00 to the price of models with output voltages from 30 to 70 V.

**230 Volt Input:** Available on some models. Contact factory for information.

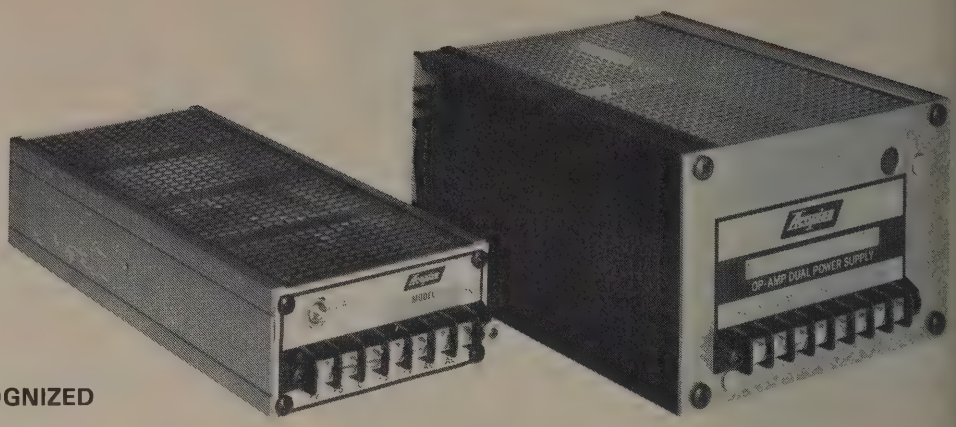
# DUAL OUTPUT For Op Amps.



**ALL MODELS U.L. RECOGNIZED**

**Series D dual output power supplies** are a convenient source of the tracking voltages required for powering operational amplifiers and related circuits. Their positive/common/negative output terminal configuration minimizes system wiring. Provision for remote sensing permits compensation of load line effects. Although moderately priced, they are sturdily constructed and conservatively rated.

## SPECIFICATIONS

**Input Voltage:** 105–125 VAC, 50–400 Hz, single phase.
**Output Voltages:** Tracking within 1%.
**Output Currents:**
**Output Voltage Adjustment Ranges:**
(See tables. Outputs are short circuit protected.)
**Load Regulation:** ±0.1%.
**Line Regulation:** ±0.1%.
**Ripple:** 1.5 mv RMS.
**Polarity:** Positive output, common, and negative output.
**Remote Voltage Sensing:** Standard.
**Ambient Operating Temperature:** −10 to +71°C.
**Storage Temperature:** −55 to +85°C.

## OPTIONS

**Overvoltage Protection:** A built-in preset overvoltage protection circuit is available on all models. If either output fails, both outputs are "crowbarred." To order, add prefix "V" to the model number, and increase standard price by $30.00.

**230 Volt Input:** All models can be alternately furnished for operation on inputs of 210–250 VAC, 50–400 Hz. To order, add suffix "-230" to model number and $10.00 to price.

***Connections:**
(Supplies for Op Amps)

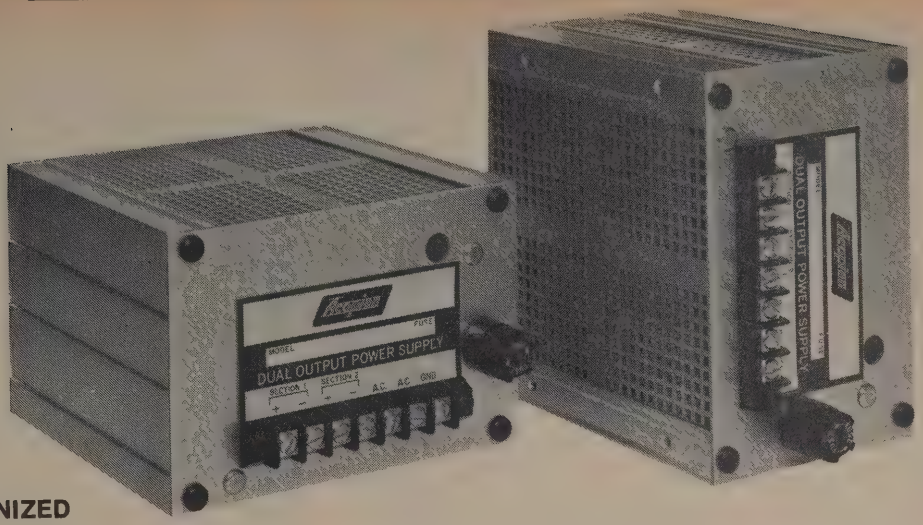
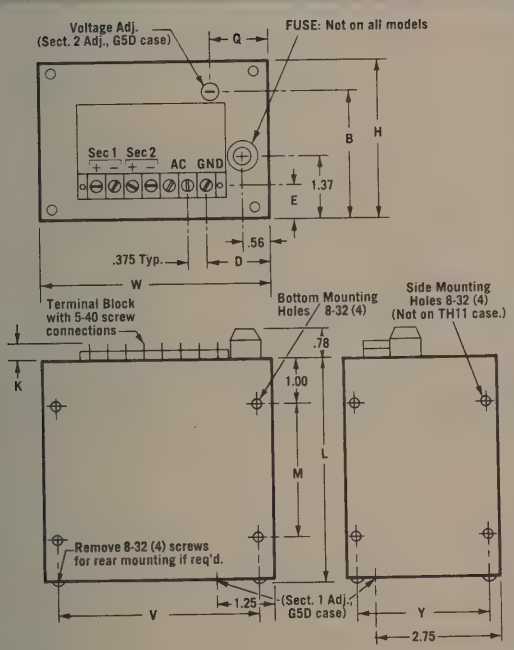
# DUAL OUTPUT General Purpose



**ALL MODELS U.L. RECOGNIZED**

**Acopian general purpose duals** furnish two completely independent outputs, either identical or different, in less space and at less cost than two equivalent single output supplies. Thousands of output voltage/current rating combinations are available. Mounting and system wiring are simplified. Quality components, generously derated, insure long-term reliability.



| Size | L | W | H | M | V | Y | E | Q | B | K | D | Approx. Weight |

| TN8H | 8.47 | 4.68 | 1.68 | 5.00 | 3.12 | 1.31 | .62 | 2.87 | 1.31 | .53 | .59 | 3 lb 14 oz |

## STANDARD FEATURES

- A broad selection of output combinations
- May be mounted on any of three surfaces
- Delivers current surges without damage—built-in fuse protects supply against prolonged overloads and shorts
- Silicon semiconductors
- Rugged construction

**HOW TO ORDER:** Select the two sections desired. The complete model number is the combination of the two sections selected. Example: The combination of section 5GT20D and section 8GT50D is Model 5GT20D-8GT50D. Always assign the lower voltage section first. For pricing purposes, add the cost of the individual sections selected. Example: The price of Model 5GT20D-8GT50D is $60.00 plus $65.00, or $125.00 total.

## SPECIFICATIONS

**Input Voltage:** 105–125 VAC, 50–400 Hz, single phase.

**Output Specifications:** See pages 16 and 17. No derating required through ambient temperature range of −10 to +71°C.

**Polarity:** Outputs are floating. Each output may be independently connected to provide any combination of positive and negative voltages. Outputs may be floated up to 300 V above ground.

**Ambient Operating Temperature:** −10 to +71°C.

**Storage Temperature:** −55 to +85°C.

**Dimensions and Weight:** Case size G5D.

**Optional 230 Volt Input:** All models can be alternately furnished for operation on inputs of 210–250 VAC, 50–400 Hz. To order, add suffix "-230" to the model number, and $10.00 to the standard price.

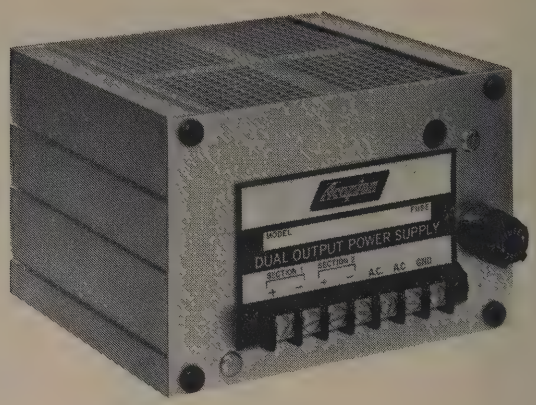
# DUAL OUTPUT

## For Microprocessors

## Isolated Outputs



**Dual isolated output** power supplies may be connected to provide any desired arrangement of positive and negative output voltages. Each voltage is independently adjustable. No derating is required up to +60°C. A separate overvoltage protector on each output is available as a built-in option.

### SPECIFICATIONS

**Input Voltage:** 105-125 VAC, 50-400 Hz, single phase.

**Output Specifications:** No derating required through ambient temperature range.

**Polarity:** Outputs are floating. Each may be independently connected to provide any combination of positive and negative voltages. Outputs may be floated up to 300 V above ground.

**Ambient Operating Temperature:** −10 to +60°C.

**Storage Temperature:** −55 to +85°C.

### OPTIONS

**Overvoltage Protection:** Two separate, preset overvoltage protection circuits, one for each output. To order, add prefix "V" to model number and add $20.00 to the standard price.

**230 Volt Input:** All models can be alternately furnished for operation on inputs of 210-250 VAC, 50-400 Hz. To order, add suffix "-230" to the model number and $10.00 to the standard price.

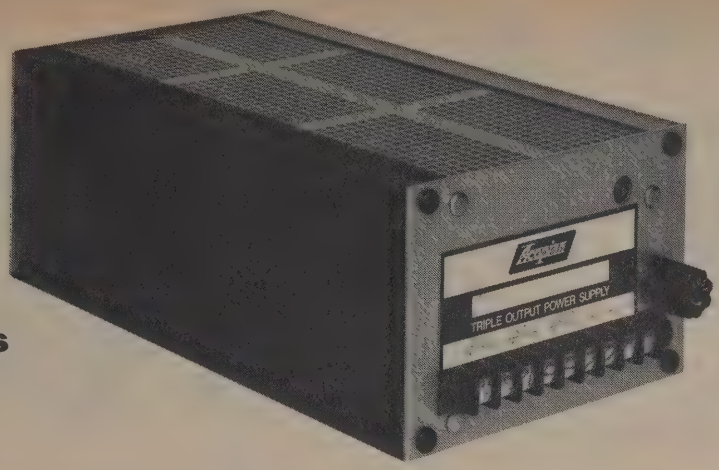
# TRIPLE OUTPUT

## For Microprocessors

## Isolated Outputs



**Triple isolated output** power supplies provide the features and characteristics of three supplies in one compact, easy-to-use package. They are available in the voltage combinations most frequently required for driving microprocessors and associated circuitry.

### SPECIFICATIONS

**Input Voltage:** 105-125 VAC, 50-400 Hz, single phase.

**Output Specifications:** No derating required through ambient temperature range of −10 to +60°C.

**Polarity:** Outputs are floating. Each output may be independently connected to provide any combination of positive and negative voltages. Outputs may be floated up to 300 V above ground.

**Ambient Operating Temperature:** −10 to +60°C.

**Storage Temperature:** −55 to +85°C.

### OPTIONS

**Overvoltage Protection:**

On Output 1 only: Add prefix "V" to model number and add $10.00 to the standard price.

Separate overvoltage protection circuit on each output: Add prefix "3V" to model number and add $25.00 to the standard price.

**230 Volt Input:** All models can be alternately furnished for operation on inputs of 210-250 VAC, 50-400 Hz. To order, add suffix "-230" to the model number and $10.00 to the standard price.

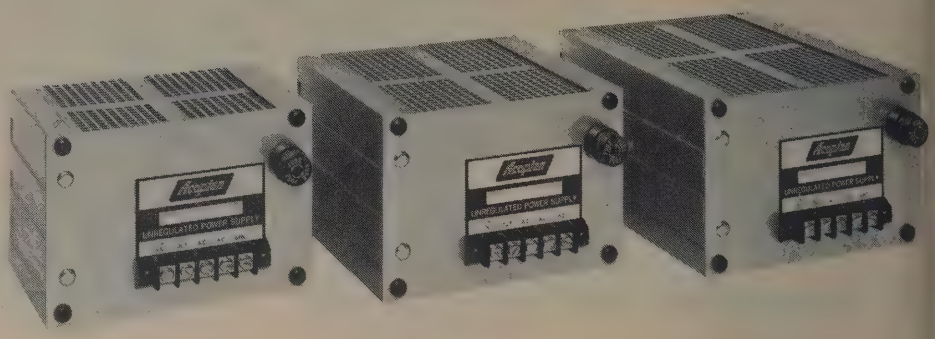
Acopian

# SERIES U UNREGULATED



**U.L. RECOGNIZED**

**Low-cost DC power** suitable for driving loads such as lamps, relays, and small motors is provided by Series U unregulated power supplies. All components are generously derated, insuring a long and trouble-free life; built-in fusing prevents damage due to prolonged overloading or short circuits. Mechanically similar to the regulated supplies shown on pages 8 and 9, they are housed in extruded aluminum cases which can be mounted in any position.

## STANDARD FEATURES

- Silicon rectifiers
- Capacitive filtering
- Fused input
- May be used in series or parallel
- No derating or heat sinking required
- Completely serviceable

## SPECIFICATIONS

**Input Voltage:** 0–125 VAC, 50–400 Hz, single phase.

**Output Voltage:**
**Output Current:** } See table
**Ripple:**

**Load Regulation:** Nominal output voltage is based on 115 VAC input, with approximately 50% of rated output current being drawn.

**Line Regulation:** With fixed load, output voltage change is proportional to input voltage change.

**Output Voltage Adjustment:** An adjustable autotransformer (not included) may be used to adjust output voltage by varying the AC input voltage to the supply.

**Polarity:** Output is floating; either positive or negative terminal may be grounded or floated up to 300 V above ground.

**Ambient Operating Temperature:** −10 to +65°C. No derating required.

**Storage Temperature:** −55 to +85°C.

**Optional 230 Volt Input**
Provision for inputs of 210–250 VAC, 50–400 Hz, replacing the standard 105–125 VAC input voltage range, is available on all models except those having an output current rating of 20 ma. To order, add the suffix "-230" to the model number, and $10.00 to the standard price.

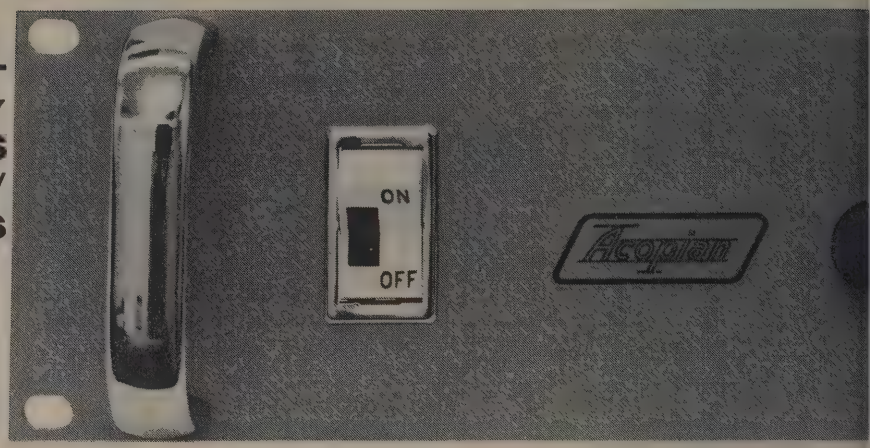
# MULTIPLE-OUTPUT POWER SUPPLY SYSTEMS

shipped in only

**9 days**



Now you can fill your requirements for completely wired multiple-output rack-mounting power supply systems, without any need to search through a catalog and prepare time-consuming mechanical layouts, item-by-item pricing and detailed purchase requisitions. Instead, simply call the Acopian "hotline" and specify the output voltages and currents that you require.

Acopian power systems offer the features that are most often required, and at reasonable cost. Each system is designed and constructed to provide an optimum mechanical and wiring configuration for the complement of power modules necessary to deliver the outputs specified. Acopian production expertise assures shipment of each system, completely wired and 100% tested, within 9 days after your order is received.

**Ordering an Acopian power system is this easy:**

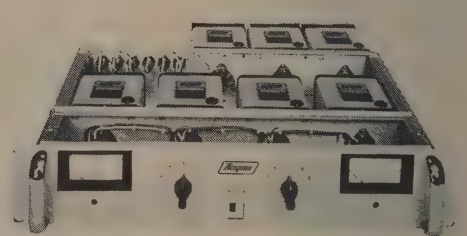
List the DC outputs that you require. (Or, select the power modules that you wish to be included.) Note the system features which you consider necessary. Then, call the "Power Systems Hotline" collect at (215) 258-5441 and ask for the POWER SYSTEM DEPARTMENT.

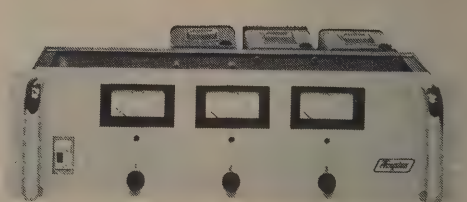
An Acopian Applications Engineer will answer—on the phone—any questions which you may have. A distinctive system model number will be assigned, and a firm price will be quoted. Your completely-wired power supply system will be shipped within 9 days.

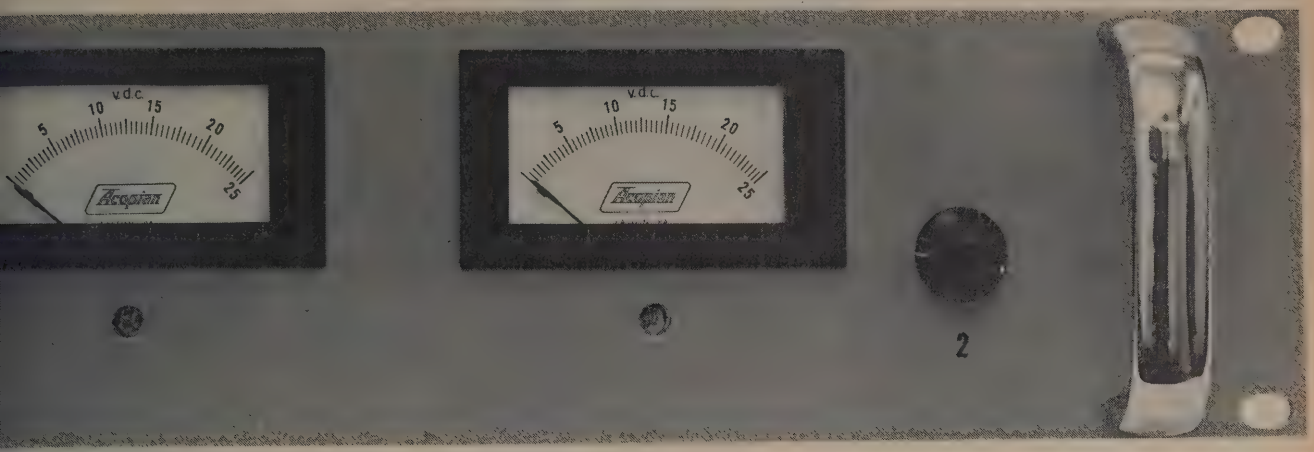
**System Description**

Any of the power modules listed in this catalog can be included in a power system. The rack assembly will be designed and wired in a manner optimum for the complement of modules included.

**TYPICAL BUILT-TO-ORDER POWER SUPPLY SYSTEMS**







**Now you can design your power system on the phone . . . just call Acopian.**

Pricing of assemblies equipped with plug-in type power modules is calculated as indicated below, and includes wiring, all necessary fuses, power switch/indicator on front panel, and all input and output connections via terminal strip(s) at the rear. When rear panel space is insufficient for terminal strips, a connector may alternately be furnished. Minimum price, $150.00.

To obtain pricing information for assemblies containing other than plug-in type modules, contact factory.

| Panel height (19" wide) | Price (not including plug-in power modules) |
|---|---|
| 3½" | $20.00 plus $5.00 per output |
| 5¼" | $25.00 plus $5.00 per output |
| 7" | $30.00 plus $5.00 per output |
| 8¾" | $35.00 plus $5.00 per output |
| 10½" | $40.00 plus $5.00 per output |

**Description**

The standard front panel is ⅛-inch aluminum finished in light gray baked enamel. Also available, at no additional cost, are Emcor or Amco gray formed steel panels. (The panel can also be supplied in any other color conventional type enamel supplied by customer, at an additional charge of $10 per purchase order.)

The rear portion of the assembly is normally constructed from extruded aluminum panels, alodyne finished.

**Redundant outputs**—For applications where extreme reliability is a critical consideration, as in data communications and process controls, the use of redundant output power systems is recommended. Two power modules are included for each output and interwired in a manner permitting one to continue furnishing the required output should the other fail. See pages 24-25 for further information, or call the "Power Systems Hotline," (215) 258-5441.

**Delivery**—Shipment of your completely-wired power supply system will be made nine days after receipt of order. Of course, the famous Acopian three-day shipping guarantee on any of 82,000 different individual power modules remains unchanged.

**Guarantee**—Acopian Corp. warrants each power supply system to be free from defects in material and workmanship for a period of five years from date of delivery.

## Accessories and Options

**Voltmeters and/or ammeters**– $15.00 each.

**Front panel voltage adjustments**– $5.00 each.

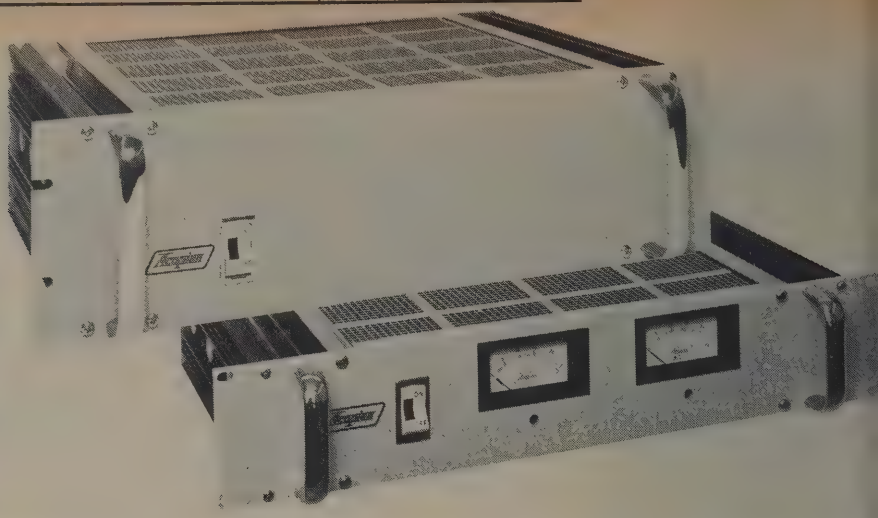
**Front panel handles**– $10.00/pair.

**Chassis slides**– $50.00/pair.

**Other features and accessories**

Should you require any non-standard features, call the Acopian "hotline" at Area Code 215, 258-5441 and discuss your needs with an Acopian Application Engineer. A procurement charge of $25.00 minimum (exclusive of material) will apply if components not stocked by Acopian are specified. Engineering charges to cover special layout and wiring may also apply. Extra charges are minimized and delivery accelerated when the customer provides any special components which he wishes to be incorporated into a power system.

Acopian



# RACK MOUNTING

## Up to 60 Volts
## Up to 60 Amps

**Shipped in 9 Days**

**U.L. RECOGNIZED**

**Acopian rack-mounting power supplies** feature excellent regulation and ripple specifications in 80 models with outputs up to 60 volts and 60 amps. Metering and overvoltage protection are available as options. These power supplies are constructed in sturdy extruded aluminum assemblies designed expressly for mounting in standard 19″ wide RETMA cabinet racks. The front panels are finished in light gray enamel; sides are black; the remaining casework is finished in gold alodyne.

### SPECIFICATIONS

**Input Voltage:** 105-125 VAC, 50-400 Hz, single phase.

**Remote Voltage Sensing:** Provision for sensing the output voltage across the load is a standard feature.

**Output Voltage/Current:**
**Line Regulation:**
**Load Regulation:**
**Ripple:**
**Output Voltage Adjustment Range:**
} See tables

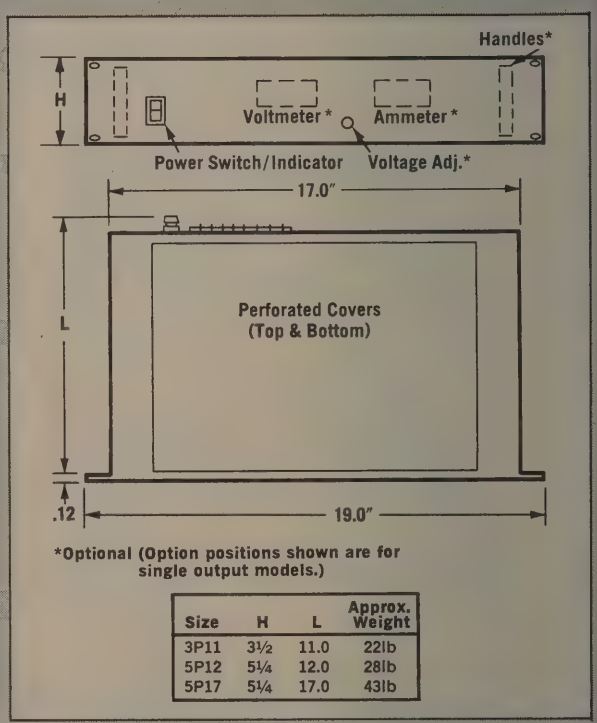
**Polarity—Single Output Models:** Output is floating; either positive or negative terminal may be grounded or floated up to 300V above ground.

**Polarity—Dual Output Models:** Positive output, common, negative output.

**Storage Temperature:** −55 to +85°C.

**Ambient Operating Temperature—**
**Single Output Models:** −20 to +55°C.
**Dual Output Models:** −10 to +55°C.

**Short Circuit and Overload Protection:** Electronic current limiting with automatic recovery.



*Optional (Option positions shown are for single output models.)

*or 2 mv, whichever is greater.

### OPTIONS

**Overvoltage Protection:** An internally installed and preset overvoltage protector is available for all models. To order, add the prefix "V" to the model number and $25.00 to the price of models with an output current rating of 20 amps or less (at 40°C); add $75.00 to the price of higher current models.

**Front Panel Voltage Adjustment:** Standard models have a voltage adjustment located at the rear. A voltage control mounted on the front panel is available as an option. To order, add suffix "P" to the model number and $5.00 to price.

**Voltmeter:** Add suffix "F" to model number and $15.00 to price.

**Ammeter:** Add suffix "A" to model number and $15.00 to price.

**230 Volt Input:** Add suffix "-230" to model number and $10.00 to price.

**Handles:** Add suffix "H" to model number and $10.00 to price.

**EXAMPLE:** The Model 5PT20 equipped with all options is designated as the Model V5PT20AFHP-230. (List suffix letters in alphabetical sequence.)

## DUAL OUTPUT

| Nominal Output Voltages | Adjust. Range ±V | Output Current Amps. 40°C | 55°C | Regulation Load ±% | Line ±% | Ripple mv RMS | Price | Model | Size |

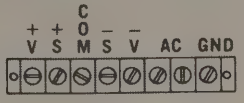
| ±15 † | .5 | 7 | 5.6 | .1 | .1 | 1.5 | 370 | PD15-700 | 3P11 |
| ±15 † | .5 | 9 | 7.2 | .1 | .1 | 1.5 | 430 | PD15-900 | 5P12 |

### CONNECTIONS: Dual Output Models



### OPTIONS

**Overvoltage Protection:** An internally installed and preset overvoltage protector is available for all models. If either output fails, both outputs are "crowbarred." To order, add prefix "V" to the model number, and increase standard price by $30.00.

**Ammeters:** One for each output. Add suffix "A" to model number and $30.00 to price. "A" and "F" options cannot be combined in one power supply.

**Voltmeters:** One for each output. Add suffix "F" to model number and $30.00 to price. "A" and "F" options cannot be combined in one power supply.

†New model which was not U.L. recognized when this catalog was published.

**Voltmeter and Ammeter:** Each with switch for selecting output to be monitored. Add suffix "G" to model number and $60.00 to price.

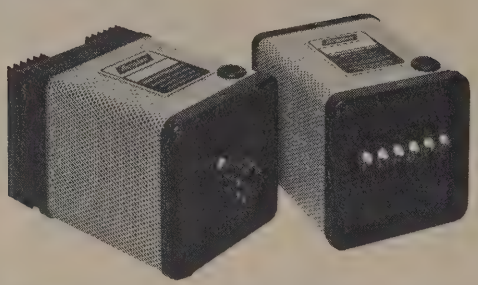
**Handles:** Add suffix "H" to model number and $10.00 to price.

**Front Panel Voltage Adjustment:** Standard models have a voltage adjustment located at the rear. A voltage control mounted on the front panel is available as an option. To order, add suffix "P" to the model number and $5.00 to price.

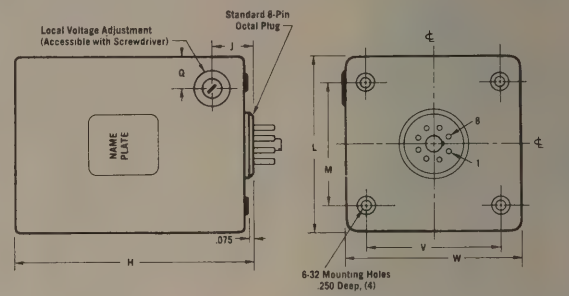
**230 Volt Input:** Add suffix "-230" to model number and $10.00 to price.

Acopian

# SINGLE OUTPUT REGULATED PLUG-IN



**An Acopian plug-in power module** can be installed in a matter of seconds. Simply plug it into an octal socket. You don't even have to screw it down (although threaded holes are provided) unless it is to be mounted in other than a vertical position, or will be subjected to shock or vibration.



| Size | L | W | H | M | V | J | Q | Approx. Weight |
|---|---|---|---|---|---|---|---|---|
| AS | 3.40 | 3.28 | 4.67 | 2.625 | 2.625 | 1.00 | 0.66 | 2lb 8oz |
| BS | 3.40 | 3.28 | 5.25 | 2.625 | 2.625 | 1.00 | 0.66 | 2lb 14oz |
| TS | 3.33 | 4.15 | 4.85 | 2.562 | 2.750 | 1.12 | 0.62 | 3lb 6oz |
| US | 3.33 | 4.15 | 5.43 | 2.562 | 2.750 | 1.12 | 0.62 | 3lb 8oz |
| WS | 3.40 | 5.02 | 5.43 | 2.562 | 3.562 | 1.12 | 0.62 | 4lb 14oz |
| HS | 3.40 | 5.02 | 6.57 | 2.562 | 3.562 | 1.12 | 0.62 | 5lb |

Standard models are available for any voltage from 1 to 200. For information on those not listed, contact factory.

## SPECIFICATIONS

**Input Voltage:** 105-125 VAC, 50-400 Hz, single phase.

**Polarity:** Output floating; either positive or negative terminal may be grounded or floated up to 300 V above ground.

**Ambient operating temperature:** −10 to +65°C. No derating required.

**MIL Tested/Increased Temperature Range:** Contact factory for specific information.

**Storage Temperature:** −55 to +85°C.

**Installation:** Plugs into standard octal socket. Mounting holes (6-32) provided at each corner for installation in any position.

### OPTIONS

**Solder Terminals:** All models can be furnished with solder terminals instead of the octal-type plug. To order, add suffix "L" to model number and $5.00 to price.

**Remote Output Adjustment:** All models have a local voltage adjustment. When provision for remote (external) adjustment is also desired, add prefix "E" to model number. No increase in price.

**Remote Sensing:** Provision for remote sensing of the output voltage to compensate for drops in the load lines can be furnished at an additional charge of $10.00 per unit. Add prefix "R" to model number when ordering. "R" power supplies have a local voltage adjustment and provision for remote (external) output adjustment.

**230 Volt Input:** All models can be alternately furnished for operation on inputs of 210 to 250 VAC, 50-400 Hz. Add suffix "–230" to model number and $10.00 to price.

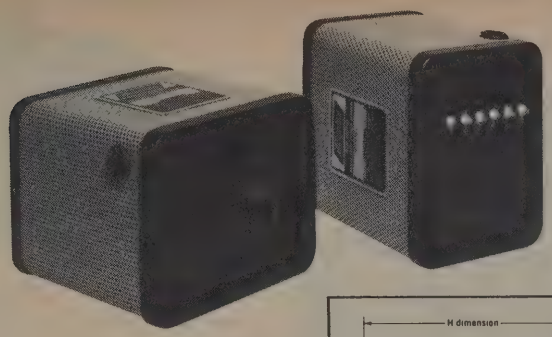
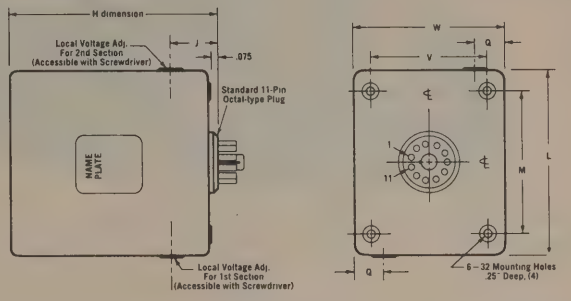
# DUAL OUTPUT REGULATED PLUG-IN





| Size | L | W | H | M | V | J | Q | Approx. Weight |
|---|---|---|---|---|---|---|---|---|
| ADJ | 3.28 | 3.40 | 4.60 | 2.625 | 2.625 | 1.0 | .66 | 1lb 8oz |
| TDJ | 4.15 | 3.33 | 4.85 | 2.750 | 2.562 | 1.12 | .62 | 3lbs |
| UDJ | 4.15 | 3.33 | 5.43 | 2.750 | 2.562 | 1.12 | .62 | 3lbs |
| WDJ | 5.02 | 3.40 | 5.43 | 3.562 | 2.562 | 1.12 | .62 | 4lb 12oz |

**Space-saving Acopian duals** combine two electrically independent DC outputs in a single case. Either identical or different outputs may be selected. And with a choice of more than 300 output ratings, over 10,000 combinations can be supplied . . . each with Acopian's usual 3-day shipment guarantee.

## SPECIFICATIONS

**Input Voltage:** 105-125 VAC, 50-400 Hz, single phase.

**Output Adjustment Range:** ±1 volt.

**Polarity:** Outputs are floating. Each section may be independently connected to provide any combination of positive and negative outputs.

**Short Circuit Protection:** Delivers current surges without damage—to protect against prolonged overloads and shorts, use of an input fuse is recommended.

**Ambient operating temperature:** −10 to +65°C. No derating required.

**MIL Tested/Increased Temperature Range:** Contact factory for specific information.

**Storage Temperature:** −55 to +85°C.

## HOW TO ORDER

Select the two sections desired. The complete model number is the combination of the two sections selected. Example: The combination of section 6J20D and section 12L40D is Model 6J20D-12L40D. Always assign the lower voltage section first. Where the indicated case sizes for the two sections differ, the larger case size applies.

For pricing purposes, add the cost of the individual sections selected.

## OPTIONS

**Solder Terminals:** All models can be furnished with solder terminals instead of the 11-pin plug. To order, add suffix "L" to model number and $5.00 to price.

**Remote Output Adjustment:** All models have local voltage adjustments. When provision for remote (external) adjustments is also desired, add prefix "E" to model number.

**Remote Sensing:** Provision for remote sensing of the output voltages, to compensate for drops in the load lines, can be furnished at an additional charge of $20.00 per unit. Add prefix "R" to model number when ordering.

**230 Volt Input:** All models can be alternately furnished for operation on inputs of 210 to 250 VAC, 50-400 Hz. Add suffix "–230" to model number and $10.00 to price.

Standard models are available for any voltages from 1 to 150, and with current ratings to 1 amp. For information on those not listed, contact factory.

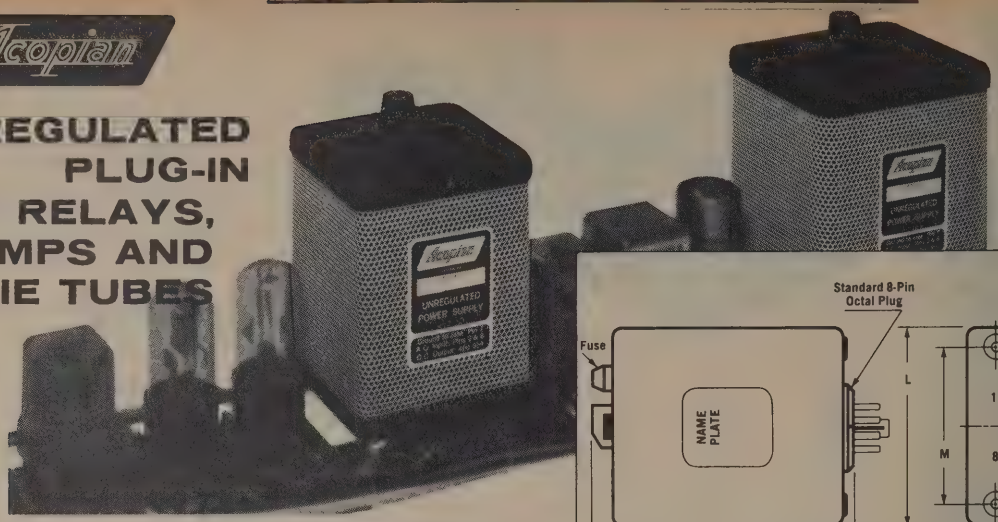
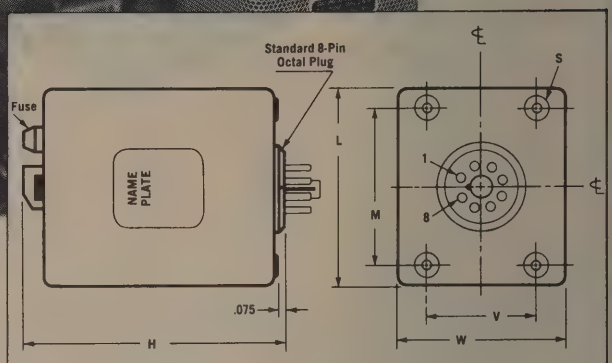
# UNREGULATED PLUG-IN FOR RELAYS, LAMPS AND NIXIE TUBES





| Size | L | W | H | M | V | S | Approx. Weight |
|---|---|---|---|---|---|---|---|
| G | 3.40 | 3.28 | 5.0 | 2.625 | 2.625 | Four 6–32 x ¼" deep mounting holes | 2lb 8oz |
| K | 4.15 | 3.33 | 5.2 | 2.750 | 2.562 | Four 6–32 x ¼" deep mounting holes | 2lb 14oz |
| Q | 4.15 | 3.33 | 7.0 | 2.750 | 2.562 | Four 10–32 x ½" long mounting studs | 7lb |

**These low-cost, yet highly reliable** unregulated power supplies have been specially designed to power DC relays, lamps and NIXIE tubes. Each has husky silicon rectifiers and a fused input to insure long and trouble-free operation. Installation consists of simply plugging the unit into a standard octal socket.

## SPECIFICATIONS

**Input Voltage:** 0-125 VAC, 50-400 Hz, single phase.

**Output Voltage:**
**Output Current:**
**Ripple:**
} See table.

**Load Regulation:** Nominal voltage is based on 115 VAC input with approximately one-half load. At no load, the output voltage will increase by approximately 10%. At full load, the output voltage will be reduced by approximately 10%.

**Line Regulation:** Output voltage change due to input voltage change is directly proportional to the change in input.

**Polarity:** Output is floating; either positive or negative terminal may be grounded or floated up to 300 V above ground.

**Ambient Operating Temperature:** −10 to +65°C. No derating required.

**Storage Temperature:** −55 to 85°+.

**Installation:** Plugs into standard octal socket.

### OPTIONS

**Solder Terminals:** All models can be furnished with solder terminals instead of the octal plug. To order, add suffix "L" to model number and add $10.00 to price. Example: Model 24U100 becomes 24U100L.

**230 Volt Input:** All models can be alternately furnished for operation on inputs of 210 to 250 VAC, 50-400 Hz. Add suffix "-230" to model number and $10.00 to price.

| Nominal Output Voltage | Output Current Amps. | Ripple Volts RMS | Model | Price | Size |

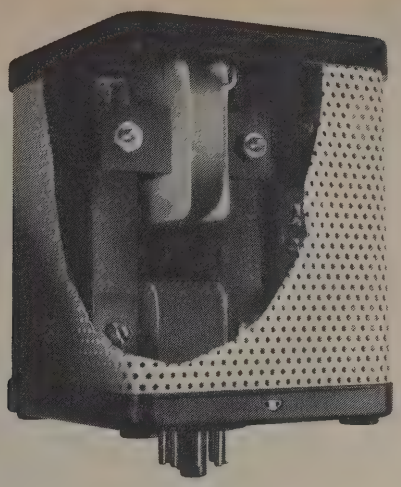
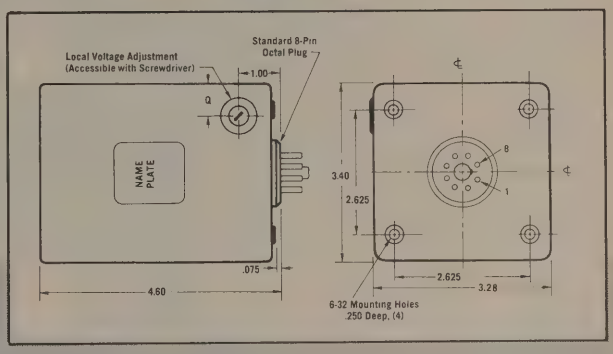
# HIGH ISOLATION REGULATED PLUG-IN



**For applications where high isolation** in a regulated power supply is required, such as in powering strain gage and other transducer bridge circuits, Acopian offers models with ratings from 5 to 36 volts and 0.050 to 0.200 amperes. All models feature input-output isolation of 10,000 megohms minimum to ground in parallel with 10 pF maximum. To install, simply plug into a standard octal socket. No other mounting is normally required, but threaded holes are provided in the base for fastening the module in other than a vertical position, or to secure it against shock or vibration. Both slot (narrow adjustment about a nominal voltage) and wide voltage adjustment models are available.



## SPECIFICATIONS

**Isolation:** 10,000 megohms to ground (min) in parallel with 10 pF (max).

**Leakage Current:** 10 uA max.

**Input-Output Coupling:** 1 pF max.

**Input Voltage:** 105-125 VAC, 50-60 Hz, single phase.

**Output Voltage:**
**Output Current:**
**Voltage Adjustment:**
**Ripple:**
} See table.

**Load Regulation:** ±0.05%

**Line Regulation:** ±0.05%

**Polarity:** Output floating; either positive or negative terminal may be grounded.

**Ambient Operating Temperature:** −20 to +71°C. No derating required.

**Storage Temperature:** −55 to +85°C.

**Installation:** Plugs into standard octal socket. Mounting holes (6-32) provided at each corner for installation in any position.

**Weight:** 1 lb 8 oz

### OPTIONS

**Remote Output Adjustment:** All standard models are provided with local voltage adjustment. For remote (external) adjustment, add prefix "E" to model number. Example: Model 15X10 will be E15X10. No increase in price.

**Solder Terminals:** All Acopian plug-in power supplies are also available with solder terminals in place of an octal-type plug. To order, add suffix "L" to model number and $5.00 to price. Example: Model 12X20 becomes Model 12X20L.

# BENCHTOP POWER SUPPLIES

These benchtop power supplies provide all the performance and operating features necessary in a laboratory instrument. A wide choice of single and multiple output models offer optimum combinations of the operating features and output ratings that are most often needed.

They are also "human engineered" for convenience and ease of use. Two meters provide for the simultaneous monitoring of voltage and current on single output supplies, or a combination of two output voltages or currents on dual and triple output models. When more than one is required, they may be stacked to conserve bench space. Interlocking design prevents the upper units from slipping off.

Coarse and fine voltage controls permit setting outputs to a high degree of resolution, and adjustable current limiting prevents the load from drawing a higher current than intended. Many models provide constant voltage/constant current crossover, and may be used to deliver a regulated current to a varying impedance load. Some also include adjustable overvoltage protection.

The rugged casework is attractively finished in black and gold. "Five way" output binding posts and a retracting handle contribute to user convenience.

## SPECIFICATIONS

**Input Voltage:** 105-125 Vac, 50-400 Hz, single phase.

**Output Ratings:** See table.

**Regulation, Ripple (constant voltage operation):**
Line Regulation: ±0.01% or 2 mv, whichever is greater.
Load Regulation: ±0.01% or 2 mv, which is greater.
Ripple: 0.25 mv rms.
(Model KT7-20, ± 10-20 V outputs only: Line regulation, ±0.05%; load regulation, ±0.05%, ripple, 1.0 mv rms.)

**Regulation, Ripple (constant current operation):**
Line Regulation: 2.0 ma (Model K7S500, 6.0 ma).
Load Regulation: 10.0 ma.
Ripple: 1.0 ma rms (Model K7S500, 2.0 ma rms).

**Output Current Control:** Outputs marked ACL are short circuit and overload protected by means of a continuously adjustable rolloff type current limiting circuit.

Output marked CV/CC deliver a constant voltage with increasing load until the current limiting point (continuously adjustable) is reached, beyond which voltage decreases as required to maintain a constant current. In addition to providing short circuit and overload protection, this feature permits the supply to be used as a current regulated power source.

**Temperature Coefficient:** 0.015%/° C.

## SINGLE OUTPUT MODELS

| OUTPUT VOLTAGE RANGE | OUTPUT CURRENT, AMPS. | CURRENT CONTROL | PRICE | MODEL | CASE SIZE |
|---|---|---|---|---|---|
| 0-7 | 1.0 | ACL | $99 | K7S100 | K9 |
| 0-7 | 2.0 | CV/CC | 135 | K7S200 | K10 |
| 0-7 | 5.0 | CV/CC | 190 | K7S500 | K11 |
| 0-18 | 0.6 | ACL | 99 | K18S60 | K9 |
| 0-18 | 1.0 | CV/CC | 120 | K18S100 | K10 |
| 0-32 | 0.35 | ACL | 99 | K32S35 | K9 |
| 0-32 | 0.6 | CV/CC | 120 | K32S60 | K10 |
| 0-50 | 0.35 | CV/CC | 120 | K50S35 | K10 |

## DUAL OUTPUT MODELS

| OUTPUT VOLTAGE RANGES | CURRENT PER OUTPUT, AMPS. | CURRENT CONTROL | PRICE | MODEL | CASE SIZE |
|---|---|---|---|---|---|
| 0-20/0-20 | 0.25 | ACL | $139 | K20D25 | DK9 |
| 0-20/0-20 | 0.5 | ACL | 175 | K20D50 | DK10 |

## TRIPLE OUTPUT MODEL

| OUTPUT VOLTAGE RANGE | CURRENT PER OUTPUT, AMPS. | CURRENT CONTROL | PRICE | MODEL | CASE SIZE |
|---|---|---|---|---|---|
| 0-7<br>±10-20<br>(tracking) | 2.0<br>0.5 | CV/CC<br>Fixed | $235 | KT7-20 | TK10 |

**Stability:** Over an eight-hour period, following a 30 minute warmup.
Constant voltage operation: 0.1%.
Constant current operation: 15 ma.

**Temperature Range:**
Operating: 0 to +50° C.
Storage: −40 to +85° C.

**Protection:**
Input: Line fuse.
Overload: Adjustable electronic current limiting.
Overvoltage: "Crowbar" circuit, continuously adjustable down to 3 volts, protects load by effectively short circuiting output when "crowbar" trip point setting is exceeded. (Models K7S200, K7S500 and KT7-20 only.)

**Transient Response Time:** Less than 50 μsec, for a step change in input from 105 to 125 Vac, or in output current from no load to full rated output current.

**Output Impedance (constant voltage operation):**
Less than 0.03 ohms from dc to 1 kHz.
Less than 0.5 ohms from 1 kHz to 100 kHz.

**Meters:** Two, each accurate to 2% of full scale. On multiple output models, selector switches permit monitoring every output voltage and current.

**Controls:**
Power switch
Output voltage, coarse and fine adjustments
Output current limit
Overvoltage protection trip point (Models K7S200, K7S500 and KT7-20 only)
Meter switches (multiple output models only)

**Construction:** Gold-finished extruded aluminum top and sides. Bottom, perforated aluminum panel. Front and rear panels, molded black phenolic. Retracting handle. Input power cord, 3-wire UL approved. Output connections, "five way" binding posts.

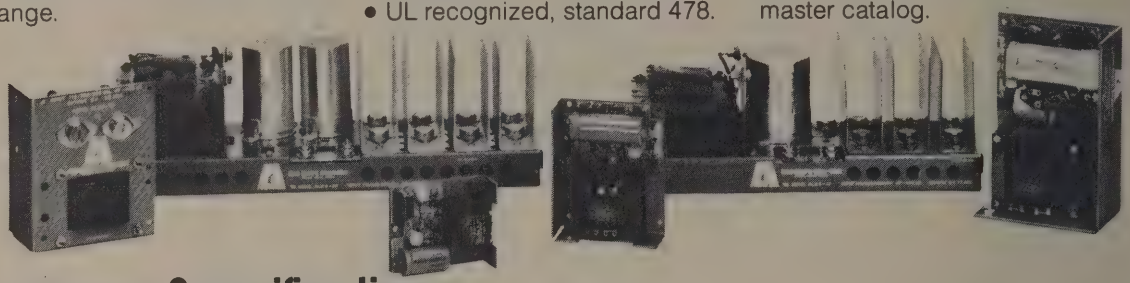
| Case Size | Dimensions (overall) H x W x D (inches) | Approx. Weight |
|---|---|---|
| K9<br>DK9 | 3.3 x 8.5 x 10.9 | 4 lb 1 oz<br>4 lb 6 oz |
| K10<br>DK10<br>TK10 | 3.3 x 8.5 x 11.3 | 5 lb<br>5 lb 6 oz<br>7 lb 6 oz |
| K11 | 3.3 x 8.5 x 12.2 | 7 lb 8 oz |

**Warranty:**
All Acopian products listed in this brochure are covered by a firm five year warranty which includes the cost of both parts and labor.

# Now the selection, availability, price, and performance you want in Open Frame Power Supplies

- Fifty-five models; single and dual outputs.
- Seven industry-standard sizes.
- In stock.
- Full performance over a wide 100-125 or 200-250 VAC input range.
- More power per package size.
- Full rated current with 50 Hz input.
- True remote sense capabilities.
- Fully adjustable current limit.
- Overload and shortcircuit protection.
- UL recognized, standard 478.

**More power conversion products:** Our Power House line includes a wide selection of encapsulated and ferroresonant power supplies as well as programmable solid state loads for testing. Write for our free master catalog.



## Common Specifications:

**AC Input:** 100-125 or 200-250 VAC, 47-440 Hz.
**Regulation** — Line or Load: 0.1%.
**Ripple and Noise:** 1.5 mV RMS, 5 mV P to P.
**Operating Temperature:** 0°-60°C.
**Transient Response:** 50 μsec.
**Cooling:** Convection.
**Stability:** ±0.2%.

## ALM Single Output Units:

### A Series — Price: $27

| Nominal Output Voltage | Current Rating @ 40°C. | Model No. |
|---|---|---|
| 2 | 1.5 | ALM 2-1.5 |
| 5 | 1.5 | ALM 5-1.5 |
| 6 | 1.3 | ALM 6-1.3 |
| 12 | 0.7 | ALM 12-0.7 |
| 15 | 0.7 | ALM 15-0.7 |
| 20 | 0.5 | ALM 20-0.5 |
| 24 | 0.5 | ALM 24-0.5 |

Overvoltage Protector — OVM-1 $8.00
Overall dimensions: 3.03 x 3.78 x 1.28.

### B Series — Price: $31

| Nominal Output Voltage | Current Rating @ 40°C. | Model No. |
|---|---|---|
| 2 | 4.0 | ALM 2-4.0 |
| 5 | 4.0 | ALM 5-4.0 |
| 6 | 3.3 | ALM 6-3.3 |
| 12 | 2.0 | ALM 12-2.0 |
| 15 | 1.7 | ALM 15-1.7 |
| 20 | 1.4 | ALM 20-1.4 |
| 24 | 1.3 | ALM 24-1.3 |

Overvoltage Protector — OVM-1 $8.00
Overall dimensions: 4.00 x 4.87 x 1.76

### C Series — Price: $54

| Nominal Output Voltage | Current Rating @ 40°C. | Model No. |
|---|---|---|
| 2 | 7.5 | ALM 2-7.5 |
| 5 | 7.5 | ALM 5-7.5 |
| 6 | 6.5 | ALM 6-6.5 |
| 12 | 4.0 | ALM 12-4.0 |
| 15 | 3.5 | ALM 15-3.5 |
| 20 | 3.2 | ALM 20-3.2 |
| 24 | 3.0 | ALM 24-3.0 |

Overvoltage Protector — OVM-1 $8.00
Overall dimensions: 4.87 x 5.62 x 2.50

### D Series — Price: $72

| Nominal Output Voltage | Current Rating @ 40°C. | Model No. |
|---|---|---|
| 2 | 11.0 | ALM 2-11 |
| 5 | 11.0 | ALM 5-11 |
| 6 | 10.0 | ALM 6-10 |
| 12 | 6.0 | ALM 12-6 |
| 15 | 5.0 | ALM 15-5 |
| 20 | 4.0 | ALM 20-4 |
| 24 | 3.8 | ALM 24-3.8 |

Overvoltage Protector — OVM-2 $16.00
Overall dimensions: 4.90 x 7.03 x 2.78

### E Series — Price: $88

| Nominal Output Voltage | Current Rating @ 40°C. | Model No. |
|---|---|---|
| 2 | 15.0 | ALM 2-15.0 |
| 5 | 15.0 | ALM 5-15.0 |
| 6 | 12.5 | ALM 6-12.5 |
| 12 | 8.8 | ALM 12-8.8 |
| 15 | 8.0 | ALM 15-8.0 |
| 20 | 7.0 | ALM 20-7.0 |
| 24 | 6.5 | ALM 24-6.5 |

Overvoltage Protector — OVM-2 $16.00
Overall dimensions: 4.87 x 9.00 x 2.75

### F Series — Price: $106

| Nominal Output Voltage | Current Rating @ 40°C. | Model No. |
|---|---|---|
| 2 | 20.0 | ALM 2-20.0 |
| 5 | 20.0 | ALM 5-20.0 |
| 6 | 17.0 | ALM 6-17.0 |
| 12 | 13.0 | ALM 12-13.0 |
| 15 | 10.7 | ALM 15-10.7 |
| 20 | 9.0 | ALM 20-9.0 |
| 24 | 8.2 | ALM 24-8.2 |

Overvoltage Protector — OVM-2 $16.00
Overall dimensions: 4.88 x 4.88 x 13.75

### G Series — Price: $128

| Nominal Output Voltage | Current Rating @ 40°C. | Model No. |
|---|---|---|
| 2 | 25.0 | ALM 2-25.0 |
| 5 | 25.0 | ALM 5-25.0 |
| 6 | 23.0 | ALM 6-23.0 |
| 12 | 16.0 | ALM 12-16.0 |
| 15 | 14.0 | ALM 15-14.0 |
| 20 | 11.5 | ALM 20-11.5 |
| 24 | 10.5 | ALM 24-10.5 |

Overvoltage Protector — OVM-2 $16.00
Overall dimensions: 4.88 x 4.88 x 16.75

## ALM Dual Output Units:

| Adjust Range | Current Rating @ 40°C. | Model No. | Series | Price |
|---|---|---|---|---|
| 12-15 | 0.55 | ALM 15D-0.55 | B | $ 45.00 |
| 12-15 | 1.10 | ALM 15D-1.1 | C | 55.00 |
| 12-15 | 2.20 | ALM 15D-2.2 | D | 68.00 |
| 12-15 | 3.30 | ALM 15D-3.3 | E | 91.00 |
| 12-15 | 4.40 | ALM 15D-4.4 | F | 114.00 |
| 12-15 | 8.00 | ALM 15D-8.0 | G | 136.00 |

Overvoltage Protector — Two OVM-1 $8.00 Each.

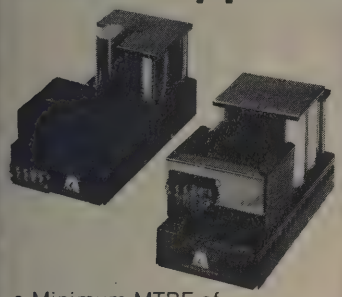
Now the simplicity, efficiency, and economy you want in

# Ferroresonant Power Supplies.



- Minimum MTBF of 150,000 hours.
- Inherent overcurrent, shortcircuit, and overvoltage protection.
- High efficiency rating of 70 to 90%.
- Ideally suited for series or parallel banking to fulfill bulk power demands.
- UL listed; 100% tested.
- Inexpensive to buy, simple and economical to operate.
- Common specifications: Regulation: ± 2%; Ripple: 1% RMS; AC Input: 100-130 VAC, 60Hz.

## Model Specifications

Now an easy, precise, convenient way to load and test DC power supplies and regulators.

# Programmable Solid State Loads

- Designed to fulfill a wide range of DC test applications requiring constant current, constant resistance, or both.
- Provides 0.02 ohm to 2K ohm adjustment in constant resistance mode.
- In the constant current mode, the PS²L may be used to load test DC regulators and power supplies, or act as a constant current discharge to battery and capacitor banks.
- Programmable with any number of waveforms for calculating or verifying power supply specifications, such as load regulation, transient response and output impedance.
- May be used with a DC power source to make an adjustable constant - current supply.
- Available in 500 and 1000 watt models.
- Bench top/rack mount adaptable.

## Performance Characteristics

| | PS²L-500 | PS²L-1000 |
|---|---|---|
| Maximum Loading Power @ 25°C | 500 Watts | 1000 Watts |
| Maximum Loading Voltage | 60 VDC | 60 VDC |
| Maximum Loading Current | 55 ADC | 110 ADC |
| Minimum Loading Voltage | 2 VDC | 2 VDC |
| Constant Resistance Range (Typ.) | .036Ω-2000Ω | .018Ω-2000Ω |
| Program Input Impedance (Typ.) | 50 K | 50 K |
| Programming Input Volt (Typ.) | .5V/10 Amp load | 1V/10 Amp load |
| Current Monitor Output (Typ.) | -100mV/Amp load | -50mV/Amp load |
| Square Wave Response (Typ.) | 80 μsec for 50 Amp step | 120 μsec for 100 Amp step |
| Regulation (constant current, constant resistance) | 1% | 1% |
| Overvoltage Crowbar Point (adjustable) | 70-78 VDC | 70-78 VDC |
| Operating Ambient | 0°-55°C. | 0°-55°C. |
| Input Voltage Requirements | 115/230VAC±10% | 115/230VAC±10% |
| Input Frequency Range | 47-63 Hz | 47-63 Hz |
| Maximum Input Current | 1 Amp | 1 Amp |
| Price | $630 | $725 |

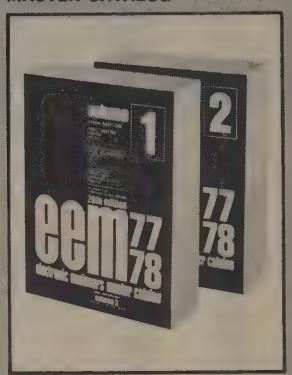
# WE KNOW OUR STUFF

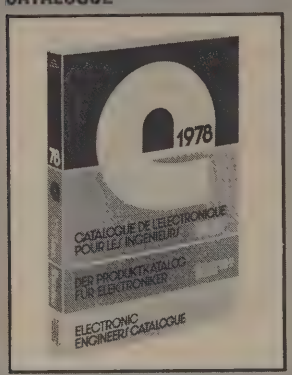
## 41 YEARS OF EXPERIENCE IN CATALOGING, 21 EDITIONS OF eem

### eem/ELECTRONIC ENGINEERS MASTER CATALOG —



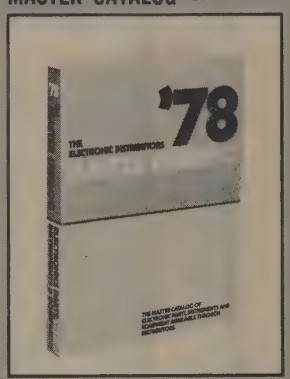
The "blue-ribbon" catalog/directory that has become "the standard of the industry" for electronic engineers, buyers and specifiers.

### ELECTRONIC ENGINEERS CATALOGUE



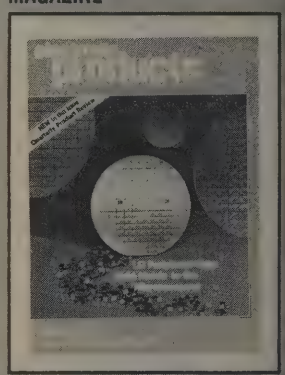
The new catalogue/directory of electronic products available to and from Western Europe and the United Kingdom. Designed especially for the European electronics engineer.

### ELECTRONIC DISTRIBUTORS MASTER CATALOG —



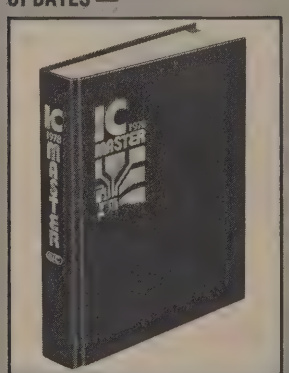
The only national catalog designed exclusively for distributors and their customers featuring electronic parts, instruments and equipment.

### ELECTRONIC PRODUCTS MAGAZINE —



The products magazine . . . A 100% product-oriented magazine including hundreds of new products and special features every month.

### IC MASTER AND THE UPDATES —



The only complete single-source directory including all IC devices manufactured in the United States. Updated three times yearly with accumulative supplements.

### eem FILE SYSTEM —

The only filing system designed especially for the electronics engineer. Instant retrieval and organization of data sheets and catalogs.

### UTP CUSTOM CATALOGS —

The Cadillac of individualized catalogs for the electronic parts distributor, featuring solely his lines and services.

### UNITED COST AND PRICING SERVICES —

The electronic distributors' proven method of being up to the minute on his cost and selling prices.

## AUC SERIES

Economy High Voltage Module. Output adjustable by varying input voltage. Hermetically sealed. Shielded. **Input:** 117 VAC nom., 50 to 400 Hz. **Ripple at F/L:** 1% rms. **Operating Temperature:** 0 to +85° C.

ADVANCED HIGH VOLTAGE CO., INC.

# THE SWITCHERS

SINGLE OUTPUT | DUAL OUTPUT | TRIPLE OR QUAD OUTPUT

High efficiency over extreme input line voltage variation makes Almond Switchers ideal for new system designs or existing system update.

Ruggedized, modular construction provides a reliable power source for single or multiple DC output voltages.

375 or 750 watts output over −10°C to +60°C without derating.

Output regulation <.25% − output ripple and noise (PARD) < 1%.

All protective circuitry standard (i.e. soft start, current limit, OVP, thermal).

56 Standard Models available providing standard voltage combinations of 5, 12, 15, 18, 24-and 28 VDC at currents from 2 to 70 amperes. Special output requirements can be assembled from standard modules.

High reliability with over 40,000 hour MTBF.

Delivery:
Off the shelf to 30 days.

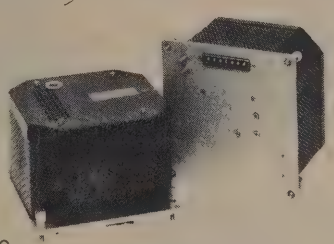
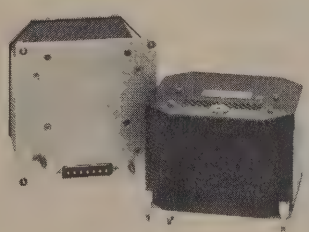
## MILITARY QUALIFIED POWER SUPPLIES

Over the past eight years, AIC has designed, developed and produced over 5,000 military-qualified power supplies for over 50 major programs. These power supplies are fully qualified to the following military specifications: MIL-E-16400, MIL-S-901, MIL-E-5400 and MIL-STD-461. Programs include U.S. Navy S3A; U.S. Navy DD963; U.S. Navy military retrofit programs; various U.S. Navy navigation systems; U.S. Air Force fighter aircraft; and aircraft computer power supplies. A few examples are shown below.

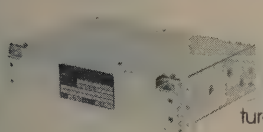
**LOW OUTPUT NOISE**
**P/N 2-11075**



Shipboard qualified to MIL-E-16400. Features 115V, 30, 400 Hz input ±15V at 3.2A output. Line/load regulation 0.01%. Output noise less than 10 microvolts narrow band noise from 100 Hz to 50 KHz.

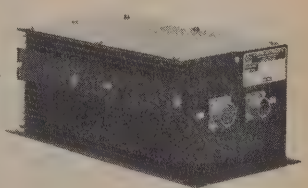


**P/N 2-10701**
Shipboard qualified to MIL-E-16400. Features 115V, 30, 400 Hz input, 5V at 25A output. Line/load regulation 0.5%. Ripple 25 mv p-p. Efficiency 47%.

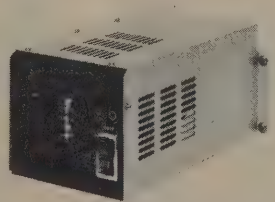


**P/N 2-11470**
Aircraft computer multiple output power supply qualified to MIL-E-5400. Input 28 ±4V. Features 4 separate regulated outputs and 2 watts/cu. in.

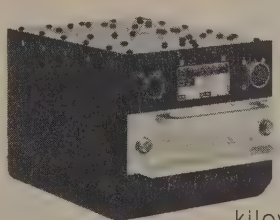
**P/N 2-10568D**
Shipboard qualified. Features low magnetic radiated noise. Input voltage 115/230, output 28V, 12A. Ripple 20 mv p-p.



**P/N 2-11020**



Shipboard qualified multiple input, multiple output. Features 115/230/28 Vdc input with 4 separate regulated DC outputs, output power 100 watts. This power supply contains internal battery charger and power on clear and power fail logic interface.



**P/N 2-11290**
480V input, 60 Hz, 30. Features low power line harmonic distortion reflected onto the power line due to rectification. This unit delivers up to 1 kilowatt of DC power and reflects less than 4% harmonic distortion onto the input power line.

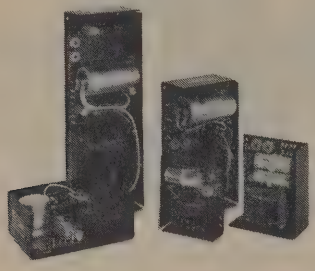
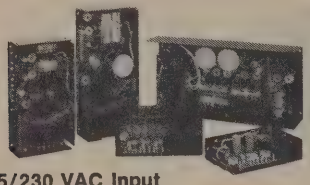
## SINGLE OUTPUT OEM III
### MODELS 3B, C, CC, D, DD



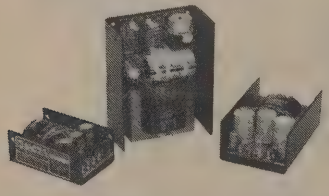
- 115/230 VAC Input
- OVP Built-in
- Industry Standard Case Sizes
- Foldback Current Limit
- 0.15% Regulation
- Remote Sense

## MULTIPLE OUTPUT OEM III
### MODELS 2BB, CC, D, P, Q, 3K, 3L



- 115/230 VAC Input
- OVP Built-in
- Foldback Current Limit
- 0.15% Regulation
- Remote Sense on 3K, L, and 5V Outputs
- Molex Output Connectors on 2P and 2Q Models

## MICRO-REG LOW POWER
### MODELS 1A, B, C



- Smallest, Lowest Priced Open Frame Available
- Fixed Voltage Monolythic Regulators Dramatically Increase Reliability
- OVP Built-in as Indicated

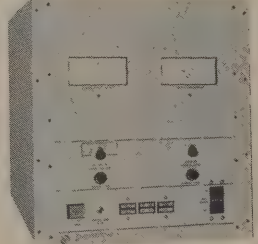
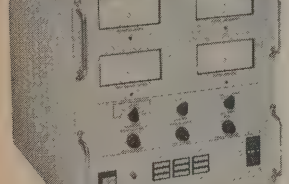
# FREQUENCY CHANGERS • INVERTERS UNINTERRUPTIBLE POWER SYSTEMS

**Model SMG-150-403**
150 KVA, 400 Hz Output

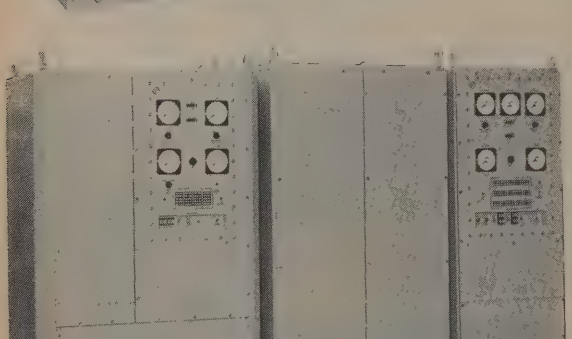
**Fully Militarized 10 KW System**
Operates Independently or Paralleled/Redundant



**Model SMG-5-51**
5 KVA, 50/60 Hz Output



**Model SMG-15-403**
15 KVA, 400 Hz Output



**Navy Shipboard System**
375 KVA, 400 Hz

**ALS has achieved major innovations in solid state power conversion techniques and power systems control. These accomplishments enable ALS to offer competitively priced frequency changers, inverters and uninterruptible power systems which embody the best characteristics of both solid state and rotating machine equipment without the performance and reliability limitations of either. Systems providing output capacities up to 1250 KVA and frequencies in the range of 45 to 450 Hz have been delivered.**

**In its SMG Series Frequency Changers, ALS has implemented a truly advanced and effective concept in solid state power conversion equipment. Immune to input power and output load conditions, these units are inherently dependable and totally self-protecting. Unlike ordinary units, the SMG Series will not be damaged or clear fuses despite line transients, loss of one or more input phases, output overload, short circuit or arbitrary operation of any control. Thermal and electrical stress of components is well below ratings. Power semiconductor devices in particular, are operated at less than 25% of ratings.**

**Most solid state systems produce less noise and vibration compared to their motor-generator predecessors. However, at 66 decibels, the SMG Series are the quietest units available.**

**Unquestionably, the SMG Series provides the optimum answer for most frequency changer requirements. However, should special requirements indicate the need for a unique design, ALS will welcome the opportunity to propose systems optimized to the application**

## EXCLUSIVE FEATURES

**Truly Quiet** — Produces a tenth or less of the noise inherent in other solid state units. The SMG Series is ideal for applications where noise is undesirable.

**Compact and Lightweight** — By far, the smallest and lightest units produced. The SMG Series is unexcelled for portable or mobile applications.

**Unprecedented Efficiency** — At full load, dissipates a third or less of the power lost by competitive units at no load. Relative to other systems, the SMG Series will recover the purchase price in saved energy alone within seven years.

**Convenient to Parallel** — Any number of units may be paralleled to increase capacity or obtain redundancy. Conversion to parallel operation is accomplished simply by mating a single cable for each unit. No control manipulation is required and units may be energized or de-energized in any sequence.

**Extremely Dependable** — Carefully limited stressing of critical components assures years of trouble-free operation.

**Total Protection** — Immune to problems associated with input power, output overload or short circuit, and control manipulation.

**Operational Simplicity** — Controls and indicators are self-explanatory and logically grouped. Training of operating personnel is not required.

**Reserve Capacity** — Will support loads with high inrush demand. The SMG Series is particularly useful for motor loads or systems with capacitive filters.

**Low Output Impedance** — Has about one-fourth the open loop impedance of ordinary frequency changers. In applications involving nonlinear or dynamic loads the SMG Series will out-perform other units of up to four times greater nameplate KVA ratings.

**Fast Response** — Following a 100% of rated current step change in load, the SMG Series will recover to the regulation band within two cycles of output. This in combination with its low impedance, makes the SMG Series absolutely unbeatable for the most demanding stepped load applications.

**Arbitrary Input Connection** — Operates on any input phase rotation. The SMG Series eliminates concern for damage whenever the input source is change

# SMG Series Solid State Frequency Changers 5 KVA to 300 KVA, 50/60 Hz or 400 Hz

## SPECIFICATIONS

**NPUT**

**Voltage:** Available in all standard, domestic and foreign nominal voltages ±10% or per customer specifications. Frequency 45 to 450 Hz.

**OUTPUT**

**Voltage:** Available in all standard, domestic and foreign voltages or per customer specifications. Output adjustment is ±10% from nominal or optionally 0 to 110%. Regulation is ±0.5% for the combined effects of line, load and temperature.

**Waveform:** 2% THD at full load. 1% available optionally.

**Current:** Adjustable current limit from 25 to 125% of ratings. Manual current limit override allows over 150% of rating for motor starting. Regulation is ±1% for the combined effect of line, load and temperature.

**Power Factor:** Full rated power from 0.5 capacitive to 0.5 inductive.

**Phase Displacement:** 120° ± < 1° for balanced loads. Load may be 100% unbalanced. Line-to-line voltage will remain within ±1% from the average for each 10% of load unbalance.

**Incidental Modulation:** 0.025% peak FM and 0.025% to 1.0% peak AM depending on input power frequency and phase unbalance.

**Response Time:** ¼ cycle for 400 Hz 3 phase, 1 cycle for 50 Hz single phase.

**Recovery Time:** 2 cycles for 400 Hz 3 phase, 4 cycles for 50 Hz single phase.

**Frequency:** 50, 60 and 400 Hz adjustable ±5% are standard. Stability is ±0.1% constant environment, ±0.5% from cold start. Quartz time base with ±0.001%.

**Instrumentation:** All indications are accurate to ±2% of full scale. Provided are input/output voltmeter, ammeter, dial and pointer frequency meter.

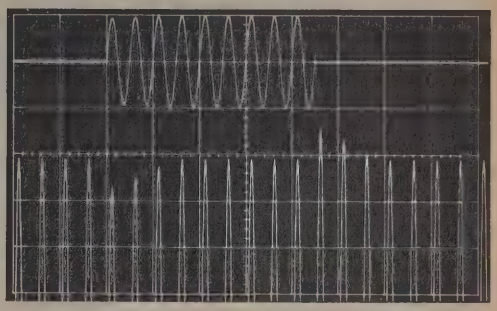
**Status Lamps:** Depending on model, 6 to 20 lamps indicate system operating status.

**Protection:** Combination of circuit breakers, fuses, sensing circuitry, air switches, thermostats and contactors positively protect the unit from fault loads, improper input voltages and consequential power train damage.

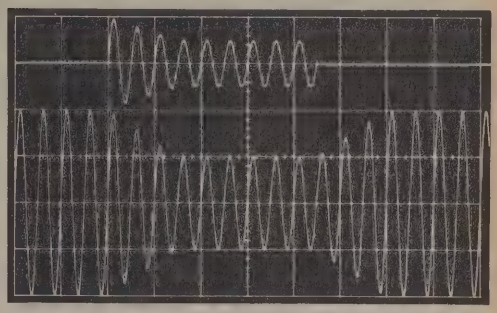
**Environment:** 0-50°C continuous, full ratings.

**EMI**

Shielded and filtered. Meets most EMI requirements. Optional filters for the most stringent requirements can be provided.



**Dynamic Characteristics** — The typical transient response and recovery characteristics of the SMG Series is shown. The upper trace is rated load current and the lower trace is output voltage expanded to 5% per division.



**Automatic Voltage/Current Crossover** — The typical crossover characteristics of the SMG Series is demonstrated by setting current limit at 50% of ratings and applying full rated load. For the first half cycle, full load current results. Thereafter the output voltage complies rapidly to half the initial value where the resulting load current is within the set 50% limit. Upon load removal, the output voltage returns to its initial value.

| Model | Power | Phase | Output Frequency | Size (Inches) H x W x D | Weight (Lbs.) | Paralleable Unit (Option 02) H x W x D | Paralleable Unit (Option 02) Weight |
|---|---|---|---|---|---|---|---|
| SMG-5-51 | 0-5 KVA | 1 | Fixed 50 or 60 Hz (Specify) | 21 x 17 x 25 | 450 | 21 x 17 x 25 | 485 |

**Special Requirements.** ALS will design systems optimized for specific applications. We welcome your inquiry regarding special requirements and our application engineers will be pleased to assist you in the formulation of specifications tailored to your needs.

Our extensive experience in providing AC power for a wide variety of applications will be of value in identifying any characteristics of your application that may require special consideration.

**Options (Specify by number)**

01 — 120/208 or 266/460 Dual Input Operation
02 — Parallel Operation
03 — Redundant Parallel Operation
04 — Wattmeter
05 — Dual Mode Fixed/Variable Output Frequency

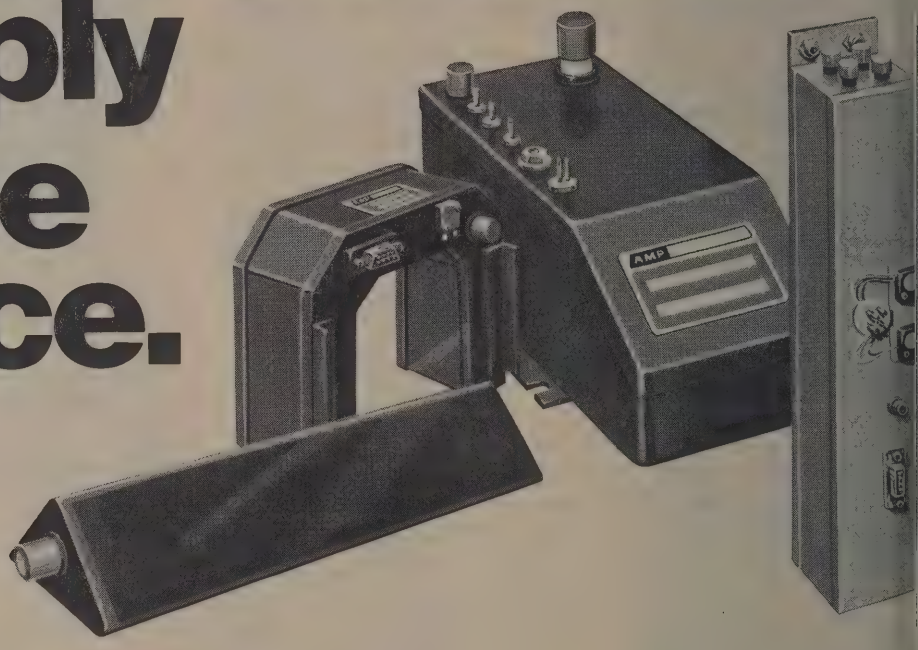
# AMP shapes the power supply to the space.



We specialize in special shapes for special problems. You'll get a perfect match to the space and system. AMP Capitron Division designs and manufactures power supplies to meet the most demanding environmental, performance, and miniaturization requirements. The use of advanced modular solid-state design and superior packaging techniques assure maximum voltage density in the smallest possible package.

Whatever your application, military or commercial, AMP engineers will work closely with you in the initial design phase of new electronic systems to precisely tailor a power supply to your need. Or one of our more than 2000 existing designs—up to 60 kv and 2 kw—may match your requirements.

Learn more about the benefits of custom design. Send for our free Power Supply Specifying Guide.

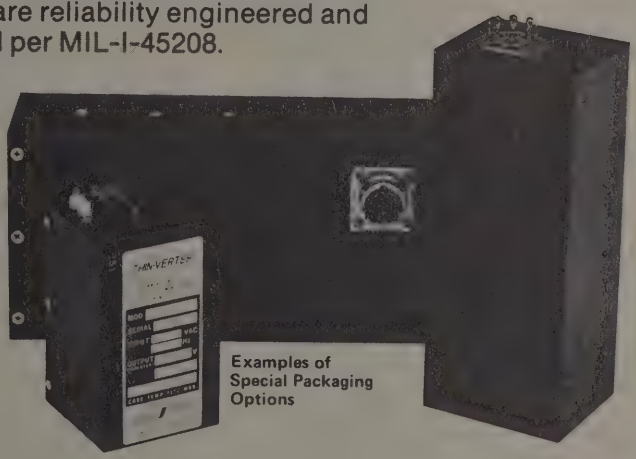
**Providing multiple outputs in a small and efficient package designed for extreme environments.**

# Design-as-you-Order

Our unique "Design-as-you-order" system offers you custom power supplies with the delivery and convenience of off-the-shelf units at catalog prices. All Arnold products are reliability engineered and inspected per MIL-I-45208.

- From 1 to 10 outputs, up to 400 Watts total
- Voltages from 4V to 300 VDC
- Up to 4 watts per cubic inch power density
- Compact, conduction-cooled design
- Fully potted to resist impact and vibration per MIL-STD-810B.
- High efficiency, low heat dissipation



Examples of Special Packaging Options

You select a Driver Module that is appropriate for your power source. That module then inverts the input to a high frequency waveform suitable for driving the supply's one or more Regulator Modules. The Regulator Modules convert the high frequency voltage into regulated DC outputs.

Also available are non-modular high-voltage AC-to-DC and DC-to-DC power supplies, and DC-to-AC solid state inverters.

ARNOLD MAGNETICS

## ARNOLD MAGNETICS CORPORATION

## You Design a Custom Power Supply

Arnold power supplies are designed and constructed to withstand extremely adverse environments. Pretested modules are mounted on a heat-sink base, and the completed assembly is fully tested. The unit is potted to withstand the vibration, humidity and other severe conditions of MIL-STD-810B. The power supply is then burn-in tested under full rated load before it receives final Quality-Assurance certification per MIL-I-45208.

## Driver Modules

Driver Modules operate with primary voltages of 115VAC (from 47 to 500Hz), or 12VDC, 28VDC, 48VDC, 115VDC and 150VDC. All Driver Modules are 25kHz switching inverters, with the exception of the 115V, 400Hz units (400Hz transformer input). Output windings on all Driving Modules are isolated (floating) and designed to fit into the custom power system.

## Driver Module Specifications

| MODEL | INPUT VOLTAGE & FREQUENCY | MAX. OUTPUT POWER |
|---|---|---|
| APS | 115 VAC 47-500Hz | 100 Watts |
| APT | 115 VAC 47-500Hz | 200 Watts |
| ATA | 115 VAC 400Hz | 50 Watts |
| ATB | 115 VAC 400Hz | 100 Watts |
| ASL | 12 VDC ±1 VDC — | 45 Watts |
| ASA | 12 VDC ±1 VDC — | 90 Watts |
| ASM | 28 VDC ±2 VDC — | 100 Watts |
| ASN | 28 VDC ±2 VDC — | 200 Watts |
| ASG | 48 VDC ±4 VDC — | 100 Watts |
| ASJ | 48 VDC ±4 VDC — | 200 Watts |
| ASH | 100-150 VDC — | 110 Watts |
| ASK | 100-150 VDC — | 220 Watts |

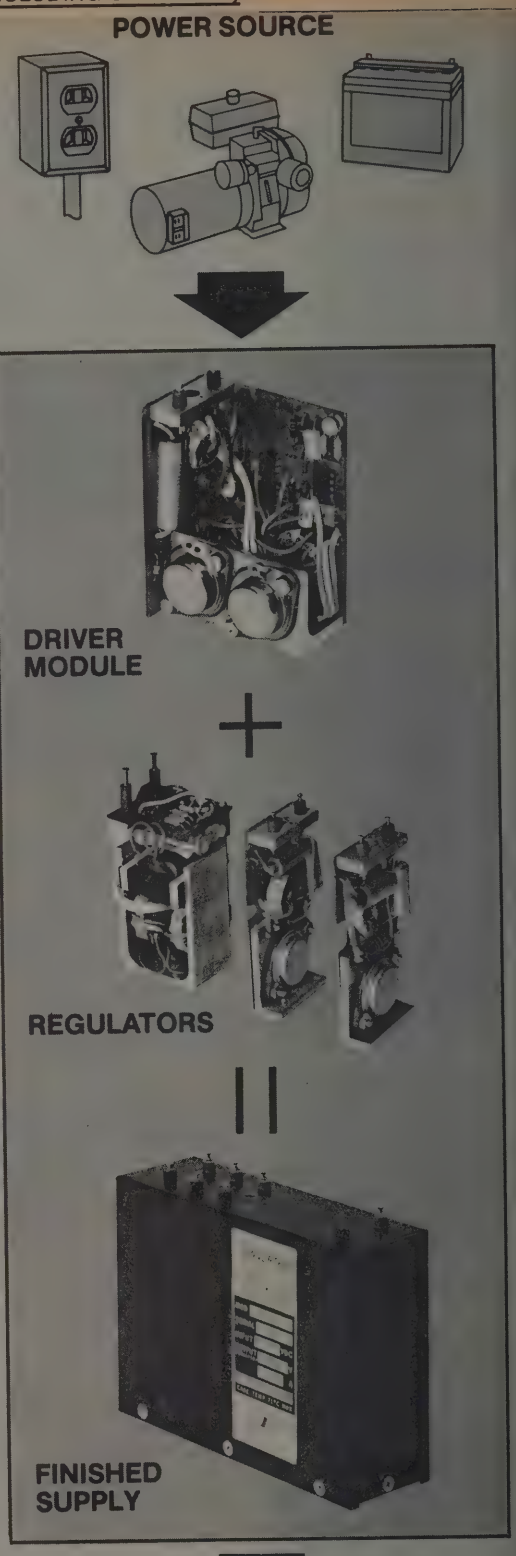
## Regulator Module Specifications

| MODEL | DESCRIPTION | VOLTAGE RANGE | CURRENT RANGE | MAX. POWER OUT |
|---|---|---|---|---|
| ARA | Series Pass* | 4 V to 30 VDC | 0 to 4 Amps | 30 Watts |
| ARC | Series Pass* | 4 V to 30 VDC | 4 to 6 Amps | 50 Watts |
| ARB | Series Pass* | 30 V to 300 VDC | 0 to 500 mA. | 30 Watts |
| ARF | Magnetic Amp** | 4 V to 100 VDC | 0 to 6 Amps | 40 Watts |
| ARM | Magnetic Amp** | 4 V to 100 VDC | 0 to 25 Amps | 125 Watts |
| ART | Switching** | 0 V to 30 VDC | 0 to 4 Amps | 30 Watts |

*Medium Efficiency **High Efficiency

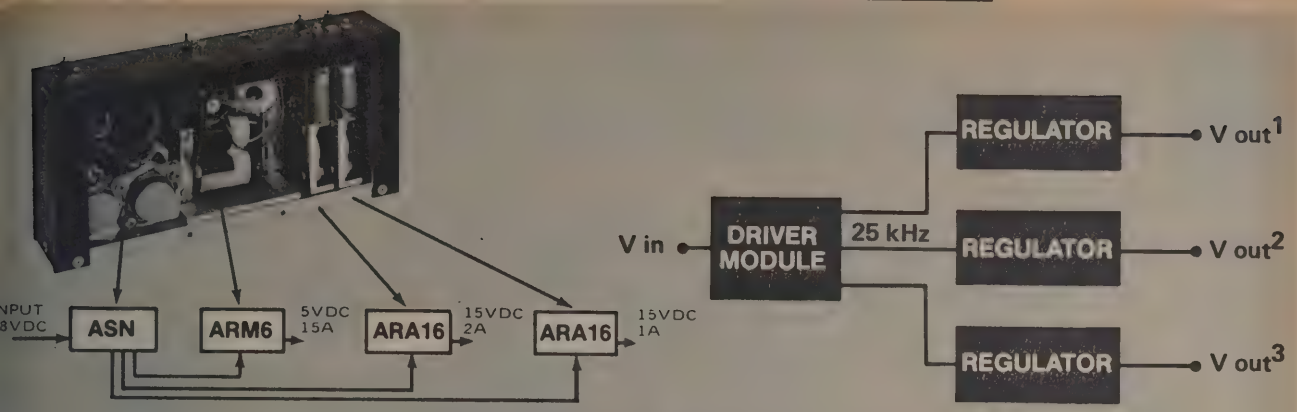
## Options

- Ultra Low Noise Filtering (to 10mV P-P)
- Input Transient Protection (per MIL-STD-704)
- Choice of Current Limit Setting
- Program-Voltage Control (zero to full output voltage)
- Special Packaging
  *(Contact the factory for special requirements.)*
- Brown-out Protection
- Tracking Outputs
- Over-Voltage Protection
- Turn-ON/OFF Sequencing
- Thermal Shutdown
- Varied Input Voltage Range
- Extreme Temperature Range



ARNOLD MAGNETICS

**ARNOLD MAGNETICS CORPORATION**



## Operating Specifications

**Line Voltage Regulation (max) for ±10% Variation**
0.1% + 10mV for ARA, ARB, ARC;
0.2% + 10mV for ARF, ARM;
1.0% + 10mV for ART.

**Output Load Regulation (max) from Half to Full Load**
0.1% + 10mV for ARA, ARB, ARC;
0.2% + 10mV for ARF, ARM;
1.0% + 10mV for ART.

**Output Adjustment Range**
±5% minimum voltage adjustment.

**Maximum Ripple and Noise (Volts rms)**
0.1% x Eout +10mV for ARA, ARB, ARC;
0.5% x Eout +10mV for ARF, ARM, ART.
(See option below.)

**Temperature Coefficient**
0.01% per °C for ARA, ARB, ARC;
0.02% per °C for ARF, ARM, ART.

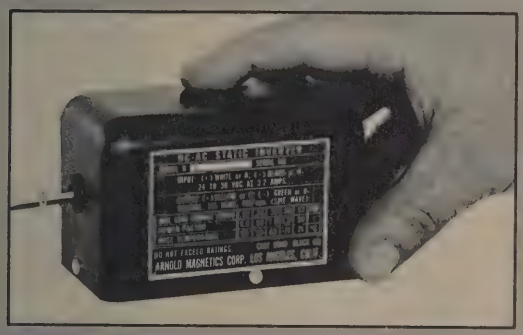
**Operating Case Temperature**
−10°C to +71°C.

**Isolation**
Input, case and outputs are isolated from each other (floating).

**Protection Circuitry**
All outputs short-circuit protected with foldback current limiting (straight-line current limiting on request, see options below).

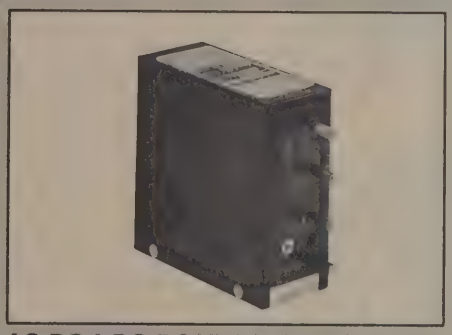
**Efficiency**
Varies with the driver module; typically 80%, minimum 55%.

**Dimensions**
Standard case widths are 1.625" and 3.25" with constant height of 3.625". Case length determined by number of output modules (regulators) selected.



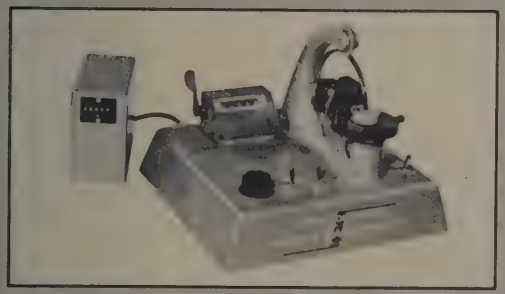
### Solid State Inverter

- Input 28VDC; Output 115VAC or 28VAC @ 400Hz
- Output Power Up to 100 Volt-Amps
- Low Harmonic Distortion
- Small Size and Light Weight
- Protected from: Short Circuit
  Input Transient
  Reverse Input Polarity



### AC-DC & DC-DC High Voltage Supplies

- Nominal Input Voltage 115VAC @ 47-500Hz, or 12V or 28VDC
- Any Output Voltage from 2VDC to 5,000VDC
- Single or Multiple Outputs in a compact 20 cubic inch case
- Conduction Cooled and Fully Potted
- Output Isolation to 5,000 Volts



### Model AMC-4 Toroidal Winding Machine

- Ideal for Prototype or Production Winding
- Low Cost
- Compact, Portable Design
- High Speed Winding with Variety of Wire Gauges

## AC-DC REGULATED POWER CONVERTERS

Pulse Width Modulated Inverters or Switching Output Regulators for Outputs > 10A or 100W ■ 220 VAC Input Option[2] ■ Operate on AC or DC Inputs
105-125 VAC, 47-420 Hz Input ■ 0.2% Line Regulation (LL-HL) ■ 0.2% or 20 mV Load Regulation (NL-FL) ■ 0.3% Maximum Ripple
Overload / Short Circuit Protected ■ Lightweight / Small Size ■ 5% Output Voltage Adjust Range ■ Overvoltage Protection Option[1]
Submodular Construction

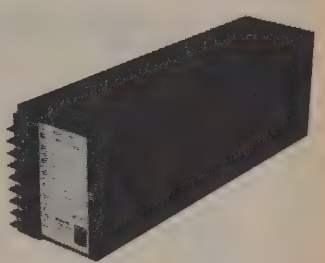
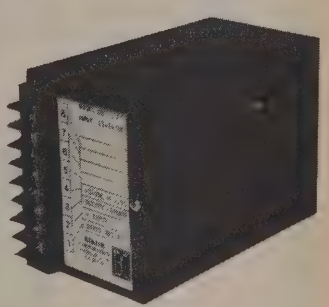
| +5 +15 −15 +250 | 5.0 0.5 0.5 0.1 | ADR 1126 | C | 359.40 |





Overvoltage Option: Add "V" followed by voltage to be protected. Example: ADR1128 V5 has 5 VDC output protected.
Price: $20, for outputs up to 12A, $30 over 10A.
[2] 220 VAC Input: Contact factory.

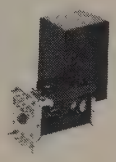
# CEA

## A DIVISION OF BERKLEONICS, INC.

# POWER SUPPLY PRODUCTS

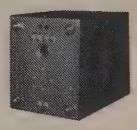
### CEA6



PRECISION VOLTAGE DISSIPATIVE REGULATORS SINGLE OUTPUT

Dissipated regulation allows for tighter output tolerances. Line plus load regulation on these models ranges from ±0.05% to ±0.0005% and up to 0.0003% RMS ripple, depending upon class of regulation specified. Output voltages from 3.5 to 500 VDC, 0.05 to 25 Amps (800 watts max.), 115 ± 10% VAC 50-420 HZ input.

### CEAT



RELIABLE TRIPLE OUTPUT POWER SUPPLIES AC/DC OR DC/DC

CEA's triple output power supplies, +5 and ±15 VDC, are dissipative regulators for low ripple and noise, 1mv RMS AC input and 50 mv (+5 VDC) 150mv (±15 VDC) on optional DC inputs. 5 different models: 12 watt, 23 watt, 55 watt, 95 watt and 175 watt. Inputs are AC: 115 ± 10%; 230± 10%; 50 to 420 HZ; or 10.5 to 55 VDC, depending upon options selected.

### CEAD6

PRECISION VOLTAGE DISSIPATIVE REGULATORS ± DUAL OUTPUT

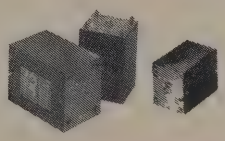
Dissipated regulation allows for tighter output tolerances. Line plus load regulation on these models ranges from ±0.05% to ± 0.0005% and up to 0.0003% RMS ripple, depending upon class of regulation specified. Output voltages from 3.5 to 500 VDC, 0.05 to 10 Amps (800 watts max.), 115 ± 10% VAC 50-420 HZ input.

### ISOLATOR

SHIELDED LINE ISOLATORS AC/AC

This series of highly shielded line isolators offers an opportunity to fully isolate electronic test equipment such as oscilloscopes, DVM's, power supplies, amplifiers, sensitive computer application and signal conditioning equipment. 5 different models, ranging from 250 VA to 2000 VA, and each type available in 0.01 pfd, 0.001 pfd or 0.0005 pfd coupling capacity. Input 115 ± 15 VAC, 50-65 HZ and output within 2% of input.

### CEA2



RELIABLE SWITCHING POWER SUPPLIES DC/DC

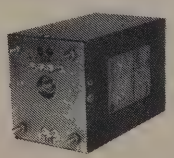
The efficient CEA 2 Series provides a regulated or unregulated DC input. These dependable modules are less than one-third the size of the CEA6 Series, which makes them ideal for high-density applications. Output voltages range from 3.5 to 500 VDC, 0.5 to 40 Amps (640 watts max.). Input options range from 10.5 to 60 VDC with 21 to 30 VAC standard.

### BATTERY CHARGER

FOR NI-CAD CELLS AND OTHER RECHARGEABLES

These 115 VAC, 60 HZ battery chargers are especially designed for nickel-cadmium and similar rechargeable cells. No damage if battery charger is left on indefinitely. Normal charge is 14-16 hours. Models range from 1.2 VDC to 36.0 (at 1.2 volt increments) and up to 1100 milliamps charging rate. Military and commercial styles available.

### CEA3



RELIABLE SWITCHING POWER SUPPLIES AC/DC

CEA has incorporated their reliable switching circuitry into the CEA3 Series for 115 VAC high-density applications. Like the CEA2 Series, this power supply will also work off 125 VDC input since the line is immediately rectified internally. Outputs range from 4.0 to 256 VDC, 0.1 to 40 Amps (640 watts max.).

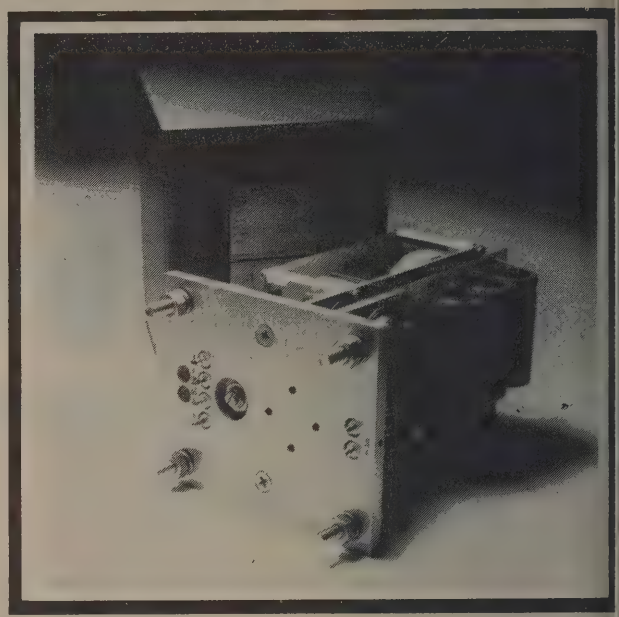
# CEA'S DC TO DC SWITCHERS

## SINGLE OR TRIPLE OUTPUTS AVAILABLE

### FEATURES INCLUDE

- OUTPUT from 3.5 to 500VDC, .05 to 40AMPS, to 640 WATTS.
- INPUTS from 10.5 to 60VDC on CEA2 Series (CEA3 Series, 105-190VDC. 105-125VAC)
- REGULATION 0.5% for line or load.
- 80°C BASE TEMPERATURE without derating.
  - Floating outputs, + or − output may be ±500VDC from case.
  - Remote sensing on regulated models, eliminating load lead errors.
  - Adjustment of output ±5% regulated models. Other ranges are optional.
  - Remote adjustment optional at no charge.
  - Short circuit output currents will not damage supplies.
  - Modular case sizes with removable covers for servicing.
  - Critical components pretested, aged, and graded.
- BURN-IN (stabilization), 16 hrs. min. at rated load and high base temperature.
- 100% TESTING after burn-in, test data with shipment. **Specifications guaranteed, not just typical.**
- 3 YEAR WARRANTY for parts and labor against defects in workmanship and materials.



## CEA2 SERIES — DC TO DC

### SPECIFICATIONS

REGULATION — STABILITY — RIPPLE

| Class of Regulation | Line Regulation for Full DC Input Change | Load Regulation from 10% to Full Load | Ripple P-P* | Temperature Coefficient Per Degree C | Efficiency Up to | Option Required |
|---|---|---|---|---|---|---|
| A | None | 10% + .5V | 3.0% | 0.1% | 90% | F |
| C | 0.5% | 0.5% | 1.0% | 0.02% | 80% | None |

*Output ripple measured at 300 kHz bandwidth.

**Input Voltage:** 21 to 30VDC standard, other input ranges are optional.

**Output Voltage and Current:** 3.5 to 500VDC .05 to 40A. Triple outputs available, CEAT Series AC or DC Inputs, refer to AC/DC products data sheet for technical information.

**Recovery Time:** As fast as 10 $\mu$s for "A" regulation supplies. For "C" supplies typically less than 1ms for a 50% to 100% load change.

**Insulation Resistance:** 100 Megohms DC for input, output and case.

**Temperature, Base:** −20°C to +80°C operating, −40°C to +85°C storage.

**Size-Weight-Terminations:** Details associated mechanical data (FA thru RA), tabulated below, are shown on the back cover of this data sheet.

See correlation in table below

### HOW TO FIND CASE SIZE DATA

1. Find the output voltage between the limits in the table below. Follow that row to the appropriate current column. Case sizes are listed as, FA, HA, GA, etc
2. Turn to the back cover of this data sheet for mechanical data.
3. See price list for ordering information.

| OUTPUT VOLTAGE | | OUTPUT RATED CURRENT | | | | | | | | | |
|---|---|---|---|---|---|---|---|---|---|---|---|
| 2 Digits Under 10V 3 Digits 10V and Over | Decimal Code | .05A (500) | .1A (101) | .25A (251) | .5A (501) | 1A (102) | 2.5A (252) | 5A (502) | 10A (103) | 20A (203) | 40A (403) |

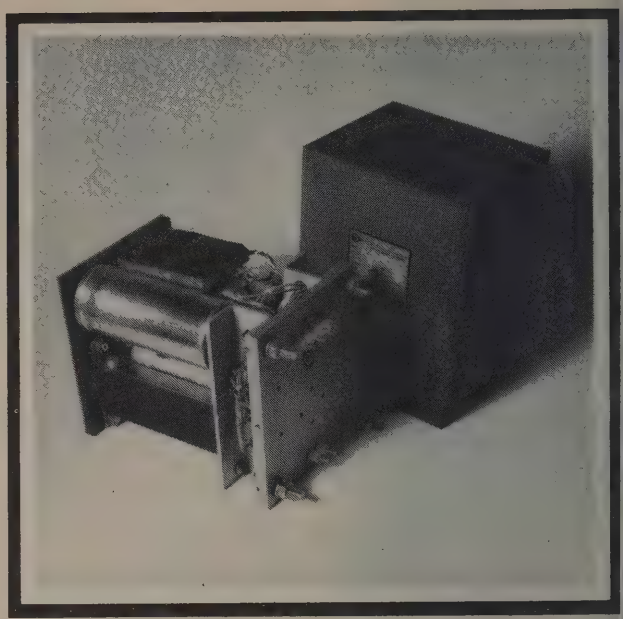
# AC TO DC POWER SUPPLIES

## STANDARD FEATURES INCLUDE

- INPUTS 50 to 420 Hz, 95 to 460VAC.
- REGULATION from .05% to .0005% for line plus load.
- 80°C BASE TEMPERATURE without derating.
- SHIELDING, line isolation, eliminating glitches and other noise problems. 20 db standard, up to 100 db optional.
  Floating outputs, + or − output may be ±500VDC from case.
  Remote sensing standard, all models, eliminates load lead errors.
  Adjustment of output ±5% standard. Other ranges are optional.
  Remote adjustment optional at no charge.
  Short circuit output current will not damage supplies.
  Modular case sizes with removable covers for servicing.
  Critical components pretested, aged, and graded.
- BURN-IN (stabilization), 16 hrs. min. at rated load and high base temperature.
- 100% TESTING after burn-in, test data with shipment.

**Specifications guaranteed, not just typical.**

- 3 YEAR WARRANTY for parts and labor against defects in workmanship and materials.



# CEA6 Single output and CEAD6 Dual output

## OPTIONAL FEATURES

Options for the CEA6, CEAD6 and CEAT power supplies vary according to product specifications and application. The options listed below are those common to all three output types. Other options and descriptions are available upon request. Please contact the factory in San Luis Obispo for details.

| Symbol Option | Option Description |
|---|---|
| | **FIXED OUTPUTS** |
| F | Fixed output ±1.0% |
| F1 | Fixed output ±0.1% |
| F2 | Fixed output ±0.01% |
| | **ADJUSTABLE OUTPUTS** |
| G | Output adjust range ±1% |
| Std. | Output adjust range ±5% |
| G1 | Output adjust range ±10% |
| G2 | Output adjust range ±20% |
| G3 | Output adjust range ±30% |
| G4 | Output adjust range ±40% |
| G5 | Output adjust range ±50% |

Note: Next larger case size may be required for Options G2, G3, G4 and G5. The temperature coefficient is degraded in Classes B, C and D for Options G2 thru G5.

| | |
|---|---|
| | **EXTENDED TEMPERATURE RANGE** |
| H1 | Temperature range −55°C to +80°C |
| H2 | Temperature range −40°C to +80°C |
| H3 | Temperature range −55°C to +115°C |
| | **DUAL OUTPUT ISOLATION** |
| K | Isolated outputs |
| | **AC INPUT VOLTAGE AND FREQUENCY** |
| L | Input 95-135V, 50-420 Hz |
| L1 | Input 208V ±10%, 50-420 Hz |
| L2 | Input 230V ±10%, 50-420 Hz |
| L3 | Input 460V ±10%, 50-420 Hz |
| L4 | Input 105-125V, 400 ±20 Hz |
| L5 | Input 115/230V, 50-420 Hz |
| | **SPECIAL CONNECTIONS** |
| N1 | Screw terminals #6-32 |
| | **PROTECTION CIRCUITS** |
| P1 | Current limiting |
| P2 | Overtemperature output |
| P3 | Crowbar voltage limit |

| Symbol Option | Option Description |
|---|---|
| | **REMOTE PROGRAMMING** |
| R | Remote adjust (no pot provided) |
| R1 | Remote adjust with 1% linearity |
| R3 | Remote adjust with pot provided (A&B only) |
| | **OPTIONAL STARTING CIRCUITS** |
| S1 | Start with 30,000 mfd/amp-100,000 mfd. max. |
| S2 | Start positive output first |
| S3 | Start negative output first |
| | **HIGH ISOLATION** |
| T | 40 db transformer shielding |
| T1 | 100 db transformer shielding |
| | **HIGH FLOAT VOLTAGE** |
| U | Output float up to ±1000V |
| | **RUGGEDIZED** |
| W | Potted for ruggedization in polyurethane resin |

Note: Power supplies potted with polyurethane resin have been tested to the environmental stress levels called out in MIL-STD-810B without preformance degradation.

SEE PRICE LIST FOR AVAILABLE OPTIONS AND PRICING.

**Input Voltage and Frequency:** 105 to 125VAC, 50 to 420 Hz are standard. DC and other voltage ranges are optional.

**Output Voltage and Current:** +5, ±15VDC. .25 to 20A. See correlation in table above. +4.5-6.0VDC. ±10-18VDC also available. Call factory.

**Voltage Setting Accuracy:** +5V ±1%. −15V ±1%. +15V tracks ±1%.

**Temperature, Base:** −20°C to +80°C operating. −40°C to +85°C storage.

**Size-Weight-Terminations:** Details associated with mechanical data (JA thru SA) in table above are shown on the back cover of this data sheet.

These standard catalog power supplies can be electrically and mechanically modified for specific applications. Our sales staff will be happy to discuss your particular requirements.

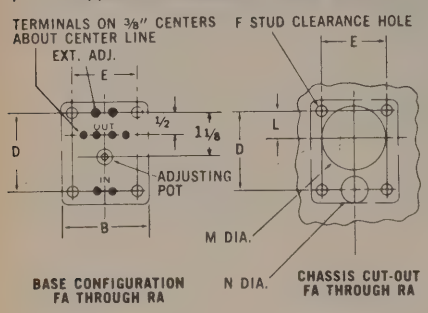
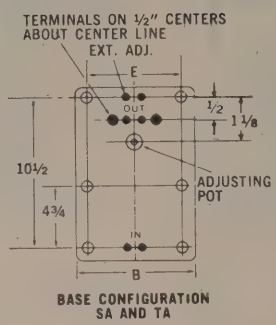
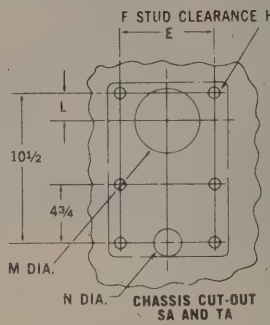
# MOUNTING AND TERMINATIONS

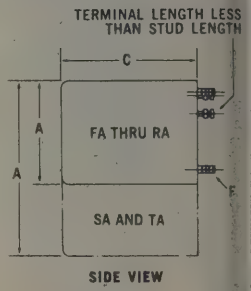
## MECHANICAL DATA

For convenience in mounting handling, the entire CEA line of standard power supplies are packaged in only 13 different case sizes. The physical dimensions and simplest chassis cutout dimensions are given below. Use adequate cooling to maintain base temperature below 80°C.









## MODEL DIMENSIONS/CASE SIZES AND WEIGHTS

| Size‡ | A | B | C | D | E | F | 1/8 L | Chassis Clearance Holes† M | N | Standard* Wt. Lbs. | Potted Units Option W Lbs. | Base Area Sq. In. | Volume Cu. In. |

Discounts on larger quantities negotiable.
Discounts applicable only on scheduled quantities
Contract not to exceed one (1) year.

## ORDERING INFORMATION

PS 207 — 22 — 3000 — VQ +F — P

❶ ❷ ❸ ❹ ❺ ❻

❶ **Basic Model Number Determines Wattage, Size and Mounting.**

❷ **Input Voltage: This number indicates $E_{IN\ MIN}$ on the regulated units and $E_{IN}$ Nom. on the unregulated units.**

❸ **Output Voltage: May be any voltage between 2 volts and 1500 volts AC or between 5 volts and 6000 volts DC.**

❹ **Rectifier System: Select for applicable output voltage, refer to rectifier systems above.**

❺ **When a positive ground is required add +F after rectifier system. Nothing is added for negative ground.**

❻ **Modifications:**
**—P for program connection.**
**—E for enable operation.**

A On output voltages less than 20 volts the switching spikes will be about 100 mv p-p. These can be easily reduced by adding a capacitor on the output terminals.

B Because of common mode ripple it is necessary to know when a positive ground system is used (see ordering information).

C The conversion frequency will be approximately 18KHz at nominal input and output voltages.

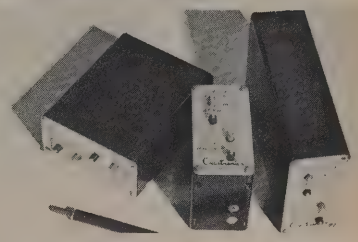
### ISOLATION

All outputs greater than 100 VDC will be isolated to 6000 VDC. All outputs less than 99 VDC will be isolated to 100 VDC. Isolation resistance will be greater than 10K Meg. For special isolation requirements call our engineering department.

**Reliability**

**Short Circuit Protected**

**Filtered Input**



**Crestronics Inc. DC to DC Converters are designed as a power supply for electronic circuits with a minimum of interference in the audio and rf ranges. The 18KHz conversion employed eliminates all audio range problems and an internal input filter reduces the rfi conductance noise to a level of less than 30 mv P-P across a one ohm resistor in series with the input.**

## REGULATED UNITS

**1.0 INPUT**

1.1 Voltage - $-E_{IN\ MIN}$ - - Customer may specify any input voltage between 11 and 28 volts DC. $E_{IN\ MIN}$ is the lowest input voltage applied. This should include the lowest excursion of ripple.

1.2 Input Voltage Differential - - $\Delta E_{IN}$ - - The normal $\Delta E_{IN}$ is 4 volts DC. For $\Delta E_{IN}$ greater than 4 volts derate the input current to

$$I \text{ derate} = \frac{6\ I_{IN\ MAX}}{\Delta E_{IN} + 2}$$

1.3 Input Current - - $I_{IN\ MAX}$ - - See Model Numbers

$I_{IN\ MAX}$ shall be derated for a $\Delta E_{IN}$ greater than 4 volts—See 1.2

$I_{IN\ MAX}$ shall be derated for greater than 70° operation—See 10.2

**2.0 OUTPUT**

2.1 Voltage - - $E_o$ - - Customer may specify output voltage up to 1500 VAC ⊓⊔ or 6000 VDC. See ordering information # ❸

2.1.1 The output voltage is screwdriver adjustable from —20% to +5% of nominal.

2.2 Power - - $P_o$ - - The output power is expressed as $(.7\ E_{IN\ MIN}\ I_{IN}) - I_o$

**3.0 REGULATION**

3.1 Line . . . . . .01%/△ input volt
3.2 Temperature . . . . . (.02%/°C) —2mv/°C
3.3 Load . . . . . 100% to 10%
For 30 VDC & Over . . . . . 3%
For 29 VDC & under . . . . . % = $\frac{(.02\ E_o) + .3}{E_o \times 10^{-2}}$

**4.0 EFFICIENCY** - - Efficiency is expressed in % as $\frac{(.7\ E_{IN\ MIN}\ I_{IN}) - I_o}{E_{IN\ MIN}\ I_{IN} \times 10^{-2}}$

## UNREGULATED UNITS

**5.0 INPUT**

5.1 Voltage - - $E_{IN}$ - - Customer may specify any input voltage between 5 and 35 VDC

5.2 Current - - $I_{IN}$ - - See Model Numbers

**6.0 OUTPUT**

6.1 Voltage - - $E_o$ - - Customer may specify any output voltage up to 1500 VAC or 6000 VDC.

$E_o$ is proportional to $E_{IN}$ Ratio = $\frac{E_{IN} - 1}{E_o}$

$E_o$ shall not exceed 1.1 $E_o$

6.2 Power - - $P_o$ - - $P_o = (.75\ E_{IN}\ I_{IN}) - I_o$

**7.0 REGULATION**

7.1 Line - - - - Directly proportional

7.2 Load - - - 100% to 10% % = $\frac{(.05\ E_o) + .3}{E_o \times 10^{-2}}$

**8.0 EFFICIENCY** - - Efficiency is expressed in % as $\frac{(.75\ E_{IN}\ I_{IN}) - I_o}{E_{IN}\ I_{IN} \times 10^{-2}}$

**9.0 RIPPLE** - - - - .3% P-P max.

## GENERAL

**10.0 TEMPERATURE**

10.1 Temperature measured at mounting surface

10.2 For temperature greater than 70°C — Derate input $I_{IN\ MAX}$ 1%/°C

**11.0 CASE** . . . . . Black Anodized Extruded Aluminum
11.1 Back Plate . . . . . Clear Anodized Aluminum
11.2 Name Plate . . . . . Metal Photo Corp.
11.3 Size . . . . . See Model
11.4 Mounting . . . . . See Model
11.5 Weight . . . . . 1.7 gram per cubic CM

**12.0 TO DETERMINE INPUT CURRENT** $I_{IN} = \frac{(E_o\ I_o) + I_o}{.7\ E_{IN\ MIN}}$

**13.0 PROGRAMMABLE** - - - - "P" Suffix with $E_o$ set at nominal, $E_o$ will be approximately 1%/.1ua or 1%/.1V. From the summing junction, approximately 7.0 volts.

**14.0 ENABLE** - - - - "E" Suffix unit will normally be inhibited with ½ $E_{IN}$ on enable lead. Unit will be Enabled when Enable lead is within 1V of negative input. Enable current will be $\frac{E_{IN}}{10K}$

# CHRISTIE

Since 1929, Christie has provided the very best in high-current power supplies, various types of battery chargers, and electro-optical systems to industry and governments around the world. Christie's extensive line of state-of-the-art products enjoys an unimpeachable reputation for reliability and dependability, unmatched performance, and unparalleled life cycle.

Christie maintains this reputation by exercising complete control over all phases of design, manufacture, production, and QC testing. Christie's in-house capabilities include transformer and reactor manufacturing, Ni-Cad battery welding, sheet metal fabrication, electrostatic painting, and complete assembly line operations.

For more detailed information about any of our products, price quotations, and delivery, call collect, call toll-free, or send a TWX.

## HI-CURRENT DC POWER SUPPLIES

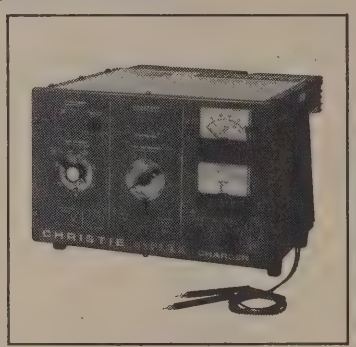
- Current ratings up to 1500 amps
- Unregulated
- Shunt regulated
- Magnetic amplifier regulated
- SCR regulated
- Transistor regulated

MOST ECONOMICAL — SCO — A — R/RA/T — K — EE — MOST SOPHISTICATED

This scale charts economy against sophistication. The darker the scale, the more sophisticated; the lighter, the more economical.

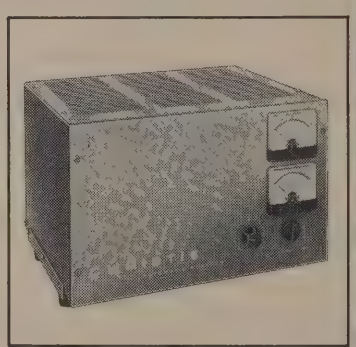
## REFLEX BATTERY CHARGER/ANALYZER MODEL RF80GT

- Aircraft Ni-Cad applications
- 1-hour full charge
- Frequent battery rejuvenation
- 95% vs. conventional 70% efficiency
- Higher battery capacity (Over 130% not unusual)
- Better cell balance, less "memory"
- Patented charging principle produces cool batteries



## SCR PRECISION BATTERY CHARGERS

- Float or Charge
- Lead-Acid Batteries
- Silver-Zinc Batteries
- ±0.25% regulation, typical
- 1% ripple, typical



| Nominal Battery Voltages | Std. Current Ratings (amps) Ratings with • are 3-ph; all others 1-ph. | Service | Typical Regulation | Typical Ripple |

# CHRISTIE K Magamp Regulated Power Supplies

- MOST ECONOMICAL LOAD AND LINE REGULATED 3-PHASE UNITS
- EXTREME RELIABILITY AND LONG LIFE
- UP TO 500% INTERMITTENT LOAD CURRENT CAPABILITY
- AUTOMATIC BATTERY CHARGING OPTION

## STANDARD FEATURES

**D-C VOLTAGE RANGE:** Continuous adjustment over the entire range by means of one knob.

**SERIES OR PARALLEL OPERATION:** Units may be operated in series. They may also be operated in parallel, if the Current Limiting option under Optional Extras is included.

**REMOTE SENSING:** Provision for selecting "local" sensing at the power supply terminals, or "remote" sensing at the load terminals.

**REGULATION & RECTIFICATION:** All solid state design including magnetic amplifier and hermetically sealed silicon diodes. Peak voltages and currents during operation and switching held well within rated values.

**INTERMITTENT RATINGS (% of Rated Current):** 125% for 5 minutes every 20 minutes; 250% for 5 seconds every 20 seconds; 350% for 1 second; 500% peak.

**ON-OFF CONTROLS:** By a-c magnetic contactor; 3-wire start-stop pushbutton switch on front panel.

**CIRCUIT ISOLATION:** Output circuit completely isolated from input; either positive or negative d-c bus can be grounded.

**PROTECTION:** Fan failure as well as thermal overload protection (automatic reset type) for sustained overloads.

**SAFETY:** All "MH" models listed by Underwriters' Laboratories.

**AMBIENT TEMPERATURE:** Continuous operation from 0 to +55°C. (also —55°C. to 0°C. with decreased performance); storage at —62°C. to +70°C.

**COOLING:** Fan cooling by means of induction motor with sealed ball bearings, silicone lubricated for low and high temperatures.

**STABILITY:** Negligible temperature influence. Adjustable time constant.

**PILOT LIGHT:** Indicates when unit is energized.

**METERS:** 3½" voltmeter and ammeter, 2% accuracy.

**MULTIPLE INPUT:** Can be set for various a-c supply voltages by a simple reconnection.

**CABINET:** Inside readily accessible from front for inspection and routine maintenance.

OPTIONS: Battery Charging, Parallel Operations, Remote Control, Militarizing, 50 Hz, Cabinet Styles

(1) Insert suffixes for optional features in alphabetical order just after suffix "K" or "KK".

(2) Deviation of the d-c voltage from its average value for any combination of rated load and line variations.

(3) Maximum over or undershoot for a step change from no load to full (half) load or full (half) load to no load.

(4) For 63% reduction of transient.

(5) 220-245V.; can be reconnected for 208V. ±10%. Available for 440/480V. — substitute "4" for "2".

(6) 400-490V.; can be reconnected for 480 V. ±10%. Available for 208/220 V. — substitute "2" for "4" (at extra cost for units rated 800 amps and above).

(7) Can be connected for 208V. ±10%, 200-245V., or 400-490V.

(8) 75 milliseconds, full load to no load.

(9) Behind front panel.

(10) Add 14" for handle.

(11) Add 2" for lifting eyes.

NOTE: All values based on balanced supply line. Dynamic Regulation and Response Time based on nominal input and output.

NOTE: All dimensions given in inches.

# CHRISTIE RECTODYNE

## Load Regulated and Unregulated Power Supplies

- MOST ECONOMICAL OF ALL 3-PHASE UNITS
- EXTREME RELIABILITY AND LONG LIFE
- UP TO 600% INTERMITTENT LOAD CURRENT CAPABILITY

## STANDARD FEATURES

**OUTPUT CONTROL:** Rotary tap switch in primary circuit.

**SERIES OR PARALLEL OPERATION:** Units may be operated in series or parallel.

**RECTIFICATION:** Hermetically sealed silicon diodes. Peak voltages and currents during operation and switching held well within rated values.

**REGULATION:** Series "A" units are unregulated. Series "T" units employ single-stage, Series "R" units employ two-stage patented voltage stabilizer. The stabilizer provides regulation against changes in load only. (If regulation against line voltage is also required, refer to "K" series, page 6.) Maintains substantially constant a-c line current and drop.

**INTERMITTENT RATINGS (% of Rated Current):** 125% for 5 minutes every 20 minutes; 250% for 5 seconds every 20 seconds; 350% for 1 second; 500% peak.

**ON-OFF CONTROLS:** By a-c magnetic contactor; 3-wire start-stop pushbutton switch on front panel.

**CIRCUIT ISOLATION:** Output circuit completely isolated from input; either positive or negative d-c bus can be grounded.

**PROTECTION:** Fan failure (on units with fans) as well as thermal overload protection (automatic reset type) for sustained overloads.

**SAFETY:** All "MH", "A" and "H" models listed by Underwriters' Laboratories.

**AMBIENT TEMPERATURE:** Continuous operation from 0 to +55°C.; Storage at −62°C. to +70°C.

**COOLING:** Fan cooling by means of induction motor with sealed ball bearings, silicone lubricated for low and high temperatures.

**PILOT LIGHT:** Indicates when unit is energized.

**METERS:** Voltmeter and ammeter, 2% accuracy.

**MULTIPLE INPUT:** Connectable for a-c supply voltages shown.

**CABINET:** Inside readily accessible for inspection and routine maintenance.

OPTIONS: Remote On-Off, Militarizing, Aircraft Starting, Cabinet Styles

(1) Insert suffixes for optional features in alphabetical order just after series suffix "A", "R", "T", or "RA", respectively.

(2) Deviation of the d-c voltage from its average value for rated load variations, with constant a-c line voltage.

(3) Available with 3-wire output.

(4) Available for 460 V. — substitute "4" for "2".

(5) Available for 208/230 V. — substitute "2" for "4".

{ = Reconnectable from lower voltage range and higher current rating to higher voltage range and lower current rating.

(6) For handle add 8" for "H", 14" for "MH", 16" for "A".

(7) Not available on "R", "T" and "RA" series.

(8) Behind front panel.

NOTE: All values based on balanced supply line.

NOTE: All dimensions given in inches.

# CHRISTIE SCO, EE SCR Regulated Power Supplies

- 1/10 RIPPLE AND AT LEAST TWICE AS GOOD REGULATION AND RESPONSE TIME AS "K" SERIES
- CONTINUOUS RANGE DOWN TO NEAR 0 VOLTS
- VOLTAGE/CURRENT REGULATION
- AUTOMATIC BATTERY CHARGING OPTION

## STANDARD FEATURES

**C VOLTAGE RANGE:** Continuous adjustment over the entire nge by means of one knob.

**RIES OR PARALLEL OPERATION:** Units may be operated in ies or parallel.

**MOTE SENSING:** Provision for selecting "local" sensing at e power supply terminals, or "remote" sensing at the load minals. If remote sensing leads are opened, voltage will stay a safe value.

**GULATION & RECTIFICATION:** All solid state design includ- hermetically sealed SCR's. Peak voltages and currents ring operation and switching held well within rated values.

**CONTROL CIRCUIT:** Plug-in card for easy servicing.

**CURRENT REGULATION:** Continuously adjustable from 5% to 100% of full load. Regulates down to 0 volts (short circuit). Voltage remains constant as long as load current is less than current setting. At this point, the unit crosses over automatically to current regulation and current limiting.

**ON-OFF CONTROLS:** By a-c circuit breaker on "SCO". By a-c magnetic contactor with start-stop switch on front panel and terminals for remote start-stop switch on "EE"

**CIRCUIT ISOLATION:** Output circuit completely isolated from input; either positive or negative d-c bus can be grounded.

**AMBIENT TEMPERATURE:** Continuous operation from 0 to +50°C. (also −20°C. to 0°C. with decreased performance); storage at −62°C. to +70°C.

**COOLING:** 40 and 50 amp units cooled by natural convection. Others cooled by means of induction motor driven fan.

**STABILITY:** Negligible drift and temperature influence.

**METERS:** 3½" voltmeter and ammeter, 2% accuracy.

**MULTIPLE INPUT:** Can be set for various a-c supply voltages by a simple reconnection (Where applicable).

**CABINET:** Inside readily accessible for inspection and routine maintenance.

OPTIONS: Remote Adjust, Voltage Programming, Militarizing, 50 Hz, Cabinet Styles

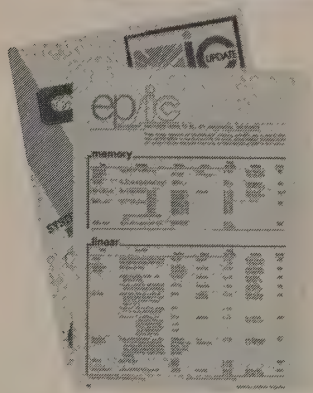
**SUBSCRIBE TO ELECTRONIC PRODUCTS MAGAZINE. IT'S YOUR *COMPLETE* GUIDE TO EVERYTHING THAT'S NEW IN THE FAST-CHANGING WORLD OF ELECTRONIC PRODUCTS AND SYSTEMS.**

**FEATURE STORIES** every month on electronic products, applications and availability.

**FORUMS**—Reports on meetings of manufacturers, users and distributors. Get the very latest news on a wide variety of products.

**NEW PRODUCT NEWS**—Hundreds of new products are introduced each month. You'll get the facts on not only what the new product is, but also where to get it, basic prices and current delivery.

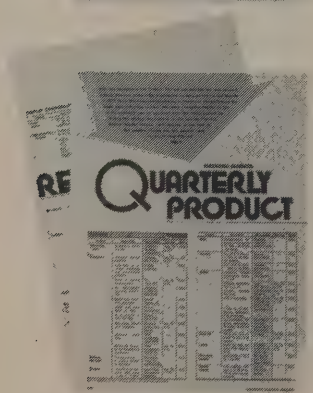
**EP/IC UPDATE**—Exclusive in ELECTRONIC PRODUCTS. A monthly report on *everything* that's new in the fast-moving world of integrated circuits.



**QUARTERLY PRODUCT REVIEW**—Another exclusive in ELECTRONIC PRODUCTS. A complete report of *every* new electronic product introduced in the previous quarter. This feature is in the January, April, July and October issues.

**QUARTERLY PRODUCT PLANNING DIRECTORY**—A compilation of the latest catalogs of a wide variety of electronic products and systems.

**OUTLOOK**—Important industry news affecting electronic products and systems.



**COMPONENT CAPERS**—A humorous look at the strange and wonderful world of electronics.

**MINI-GLOSSARIES,** Quizzes and more—Each and every month for over twenty years the readers of ELECTRONIC PRODUCTS learn something new about the products they work with and specify.

## DESCRIPTION

This line of single output, voltage regulated DC power supplies features six 5 volt output models with output currents from 250mA to 4 amperes. In addition, there are 4 other models with 6V to 15V outputs. All outputs have current limiting short circuit protection. Temperature coefficients are .02%/°C and output ripple voltage is 1 to 2 millivolts RMS.

## INPUT VOLTAGE SPECIFICATIONS

Standard input specification: 115VAC ±10% @ 60-440 Hz
E version: 220VAC ±10% @ 48-440 Hz
J version: 100VAC ±10% @ 48-440 Hz

There is no extra charge for E and J versions. When ordering, add E or J suffix after model number. Note that in some instances the module size is larger for the E version. MS-7 sockets are $3.50 each.

## DESCRIPTION

This broad line of dual output, voltage regulated DC power supplies features 10 different models with a wide choice of output voltages and currents. Output voltages are ±5, ±12, and ±15VDC with ±1% accuracy. Rated output currents range from ±60 to ±500mA with output short circuit protection.

Temperature coefficient is .02% per degree Centigrade and output ripple voltage is 1 to 2 millivolts RMS. These rugged, encapsulated modules are useful for powering a wide variety of devices including linear IC's, op amps, data converters, and other analog circuits.

## INPUT VOLTAGE SPECIFICATIONS

Standard input specification: 115VAC ±10% @ 60-440 Hz.

E version: 220VAC ±10% @ 48-440 Hz.
J version: 100VAC ±10% @ 48-440 Hz.

There is no extra charge for E and J versions. When ordering, add E or J suffix after model number. Note that in some instances the module size is larger for the E version. MS-7 sockets are $3.50 each.

# High Voltage Modules

This series of dual high voltage supplies is specially designed for use with high voltage operational amplifiers such as Datel Systems AM-300 series. The 3 supplies in this series offer output voltages of ±120, ±150, and ±180 volts with excellent regulation, stability, and low output ripple.

# MP Series: High Power Line Operated Supplies

The MP Series high power, line operated supplies are new entries in the field of low cost, open frame type supplies. Although priced competitively with the open frame units, the MP Series offers significant advantage in performance and design features. The 16 models in this series offer popular single, dual, and triple outputs for use with data conversion devices, operational amplifiers, and other analog and digital circuits. Output power capability ranges from 15 Watts to 105 Watts and prices are from $38 to $149.

The unique feature of the MP Series over open frame type supplies is its conservative thermal design which results in full rated output over 0°C to 65°C ambient temperature and only 15% derating at 71°C. This results in approximately twice the output power at 65°C compared with open frame supplies. The careful attention to thermal design is evidenced by use of conservatively rated components including 85°C computer grade aluminum electrolytic capacitors, integral heat sink and chassis design, and a high efficiency linear regulator design. The power transformer is a low loss type with no derating for 50 Hz operation. It is layer wound with polyester impregnation, and incorporates a Faraday shield which is connected to chassis ground. Power supply efficiency is 50% for ±12V and ±15V outputs and 40% for 5V outputs.

Other significant features include output current limiting protection, .05% tracking of dual outputs, barrier strip terminal connector, ventilating protective cover, remote sensing with open lead protection, and ±5% output voltage adjustment by means of externally accessible trimming potentiometers. In addition, all 5V outputs have built-in overvoltage protection as a standard feature.

| MODEL | OUTPUT VOLTAGE & CURRENT (0 to 65°C) | OUTPUT I AT 71°C[1] | LINE REG. (MAX.)[2] | LOAD REG. (MAX.)[3] | TEMPCO (TYPICAL) | RIPPLE (RMS MAX.)[4] |

## DESCRIPTION

This comprehensive line of higher power DC-DC converters features 34 different models with both single and dual outputs. Input voltages are 5, 12, and 28V with single output voltages of 5, 12, 24, and 28 volts, and dual outputs of ±12, ±15, and ±18 volts. Output voltage accuracies are ±1% with .02%/°C temperature coefficients. Other features include low output ripple, 100 megohm isolation, and output current limiting protection.

## GENERAL SPECIFICATIONS — ALL MODELS

| | |
|---|---|
| Output Voltage Accuracy | ±1% |
| Output Noise and Ripple, max. | 20mV P-P (2mV RMS) |
| Back Ripple Current, max. | 1% of $I_{IN}$ |
| Capacitive Coupling, max. | 250 pF |
| Breakdown Voltage, min. | 300VDC |
| Transient Recovery Time, max. | 50μsec. |
| Operating Temp. Range | −25°C to +71°C |
| Storage Temp. Range | −55°C to +85°C |
| Case Material | Diallyl Phthalate (G2)<br>Phenolic (CB) |

## MODULE SIZES

| | |
|---|---|
| G2 Size: | 2.0X2.0X.750 inches<br>50,8X50,8X19,1mm |
| Weight | 4.5 oz. (128g.) |
| CB Size: | 3.5X2.5X.875 inches<br>88,9X63,5X22,2 mm |
| Weight | 14 oz. (397g.) |

The 5 watt series use 2 DILS-1 or DILS-2 terminal strips (at $5.00/pair) for sockets. The 10 watt series use the MS-7 socket at $3.50 each.

## DESCRIPTION

This broad line of DC-DC converters features 17 one watt models and 18 three watt models with single and dual output voltages. Input voltages are 5, 12, and 28V with single outputs of 5, 12, 24, and 28V, and dual outputs of ±12, ±15, and ±18V. Output voltage accuracies are ±1% with .02%/°C temperature coefficient. Other features include low output ripple, 100 megohm isolation, and output current limiting.

## GENERAL SPECIFICATIONS — ALL MODELS

| | |
|---|---|
| Output Voltage Accuracy | ±1% |
| Output Noise and Ripple, max. | 20mV P-P (2mV RMS) |
| Back Ripple Current, max. | 1% of $I_{IN}$ |
| Capacitive Coupling, max. | 250 pF |
| Breakdown Voltage, min. | 300VDC |
| Transient Recovery Time, max. | 50μsec. |
| Operating Temp. Range | −25°C to +71°C |
| Storage Temp. Range | −55°C to +85°C |
| Case Material | Diallyl Phthalate |

## MODULE SIZES

| | |
|---|---|
| F Case: | 1.5X2.0X0.375 inches<br>38.1X50.8X9.5 mm |
| Weight: | 1.5 oz. (43g.) |
| G1 Case: | 2.0X2.0X0.432 inches<br>50.8X50.8X11.0 mm |
| Weight: | 2.5 oz. (71g.) |

Both 1 and 3 watt series use 2 DILS-1 or DILS-2 terminal strips (at $5.00/pair) for sockets.

# 4.5 Watt DC-DC Converters

These miniature, aluminum cased DC-DC converters are ideal for applications where mounting space is tight, yet highly regulated ±15VDC is required at up to 150mA output current. Specifications include voltage accuracy of ±1%, line regulation of .05% max., load regulation of .05% max., and tempco of .005%/°C. For convenient heat sinking, two 2-56 studs are provided on the bottom of the case. All models have output current limiting protection.

### OTHER SPECIFICATIONS

| | |
|---|---|
| Isolation Resistance, min. | 100 Meg. |
| Isolation Capacitance, max. | 100 pF |
| Breakdown Voltage, min. | 300VDC |
| Operating Temp. Range | −25° to +71°C |
| Storage Temp. Range | −55°C to +85°C |

MS-6 sockets are $3.50 each.

# Model 1200: μC Supply

Model 1200 microcomputer supply is a DC-DC converter designed to operate from a 5 volt logic supply to power a CPU and 4K of memory. The output voltages of +12, −5, and −9V in conjunction with the 5V input will power an 8080 CPU and four 2107A RAM's or four 1702A ROM'S. This supply operates with a full load efficiency of 48% and has output current limiting protection.

Operating temperature range is −25°C to +71°C and storage temperature range is −55°C to +85°C.

Mating sockets, 2 DILS-1 or DILS-2 terminal strips, are $5.00 per pair.

| SPECIFICATIONS, 25°C | MODEL 1200 |
|---|---|
| Outputs | +12VDC @ 160mA |
| | −9VDC @ 300mA |
| | −5VDC @ 2mA |
| Output Voltage Accuracy | ±1% (+12V & −9V), ±5% (−5V) |
| Input Voltage | 5VDC ±0.25V |
| Input Current, no load | 350mA |
| Input Current, full load | 1.75 Amp. |
| Efficiency, full load | 53% |
| Line Regulation, max., all outputs | .05% |
| Load Regulation, max., +12V out | .05% |
| Load Regulation, max., −9V out | 0.1% |
| Load Regulation, max., −5V out | 1.0% |
| Temperature Coefficient, max. | .02%/°C |
| Output Ripple, RMS max. | 1mV |

# HIGH VOLTAGE EQUIPMENT

## UNREGULATED MODULES COMPACT HIGH VOLTAGE

### SERIES "S"

These power supplies are designed for operation from either a 0-115 volt or 0-125 volt line at 60/400 cycles. Three input terminals are provided to permit proper line connection. The output is available from shielded polyethylene cables and may be varied over the full range by varying the input AC line. The two output cables are insulated for the full output voltage, so that either the positive or negative terminal may be grounded.* All units have selenium rectifiers and are hermetically sealed in an epoxy, vacuum filled, metal case.

Units for 50 cycle operation at various line voltages are available on request.

*Model 40-2-4 is designed with one output cable for single polarity operation. When ordering, please specify polarity.

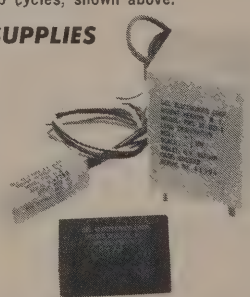
*Single polarity unit, state positive or negative output.
**Ripple at 400 cycles is 15% of ripple at 60 cycles, shown above.

## PHOTOMULTIPLIER POWER SUPPLIES PMS SERIES



The PMS Series is a family of extremely compact, rugged design DC to DC proportional converters for use as power sources for photomultiplier and other tube applications. They feature reverse polarity protection, output isolated from the input, and are momentary short circuit protected.

### SPECIFICATIONS

## HIGHLY REGULATED ADJUSTABLE HIGH VOLTAGE MODULES SERIES "HRM"

**SPECIFICATIONS**

**Input:** 115V ±10% 60 cps
**Output:** Regulation for 10% line change .03% max. Regulation for NL to FL .03% max
**Ripple:** .03% RMS max
**Temp. Range:** −54°C to +65°C operating
**Temp. Coefficient:** 0.02%/°C

- No voltage overshoot
- Adjustable output
- Short circuit proof (no fuses)
- Meet environmental and transient requirements of MIL-E-16400

| Model No. Pos. Output | Model No. Neg. Output | Output Voltage | Max. Current | Dimensions Inches | Net Wt. (Lbs.) |

## "HIGH POT" TESTERS "TC" SERIES POWER SUPPLIES

DEL TC Series multi-purpose D.C. Power Supplies are compact, fully instrumented and fully protected units providing ratings up to 80,000 volts D.C. continuously variable.

Seleninum Rectifiers used throughout to provide long life and instantaneous operation. No filament warm up time required.

All high voltage components immersed in special high grade insulating oil. This assures LONG trouble-free LIFE.

## RACK MOUNT POWER SUPPLIES "RHPT" SERIES HIGH POT TESTER

The Del RHPT series of rack mounted Hi Pot Testers are general-purpose power supplies which are fully instrumented, completely enclosed, and fully protected. These units are designed for standard 19-inch racks and have light gray panels. They are recommended for all commercial, industrial, and laboratory uses where reliable dc high-voltage sources are required.

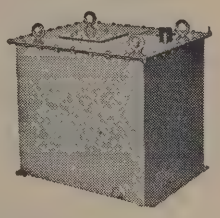
## SERIES "O" OIL INSULATED TANK UNITS



DEL SERIES "O", oil insulated, High Voltage Power Supplies offers one of the most comprehensive lines of basic high voltage units available to industry and laboratories. These D.C. supplies are designed to provide long, reliable service in such applications as dielectric testing, capacitor chargers, electrostatic precipitators, electron microscopes, image intensifiers, plasma research and accelerators. Series "O" supplies feature reversible polarity on most units, shielded polyethylene output cables, high quality insulating oil in dust free tank, quiet, long life operation with low corona.

† Polarity — All units feature reversible polarity except Models PSO 40-2-3, PSO 50-1-2, and PSO 60-1-1A which supply positive outputs only.

**NOTE:** Larger units are shipped without oil to reduce transportation costs. See notations on price list.

**COMPLETE LINE OF CONTROL PANELS AND REGULATED CONTROLS AVAILABLE FOR ALL SERIES "O" POWER SUPPLIES.**

## HRPS SERIES HIGHLY-REGULATED — POWER SUPPLIES

- Designed to Withstand Vacuum Sparkovers
- Automatic Overload Tripout
- Hybrid Series Regulator
- Fast Dynamic Response
- Short Circuit Protection

**Input:** 115 or 230 volts 50/60 Hz.

**Output:** Adjustable 5 to 100% (See Chart Below)

**Ripple:** .01% RMS — at full load

**Response Time:** 100$\mu$sec

**Regulation:** Line: ±.0025% (For ±10% Line Change). Load: ±.005% (0 to Full Load)

**Resolution:** 1%

**Size:** 1-15KV Units—24 x 29 x 53 in. 30-50KV Units—24 x 29 x 70 in.

| Model Number | Output Current | Output Voltage | Insulation |
|---|---|---|---|

| HRPS60-30 | 30MA | Also Available 30,000-60,000V | OIL |

## TRANSFORMER HIGH VOLTAGE LINE ISOLATION

**OPEN TYPE CONSTRUCTION — EPOXY COATED**

These Isolation Transformers are designed for continuous operation at rated voltage and power. They are epoxy coated for use in air and are well suited for applications requiring a reliable source of isolated line voltage at power ratings up to 1 KVA.

**Primaries:** 115/230V 60 Hz. **Secondaries:** 115V.

## HIGH VOLTAGE TRANSFORMERS

**FOR VOLTAGE DOUBLER OR ONE END GROUND OPERATION**

These transformers are designed for either voltage doubler or one end ground use (except where noted). When used in voltage doubler applications, the D.C. voltage will be approximately two times the peak secondary voltage and the maximum D.C. current from the doubler can be approximately 30% of the maximum secondary current (RMS) and depends on the value of the doubler capacitors. Units are designed for use under oil and for use in air up to 15KVP epoxy coated. **Primary:** 115V-50/60 Hz.

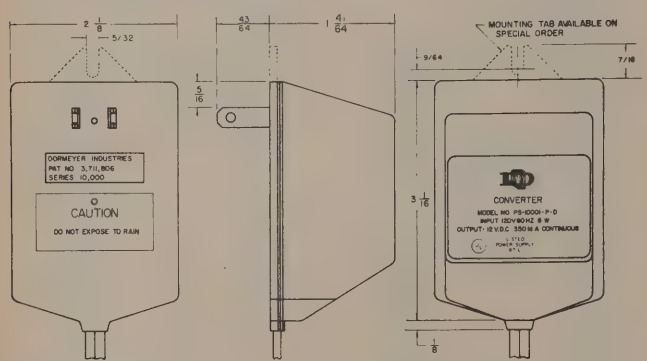
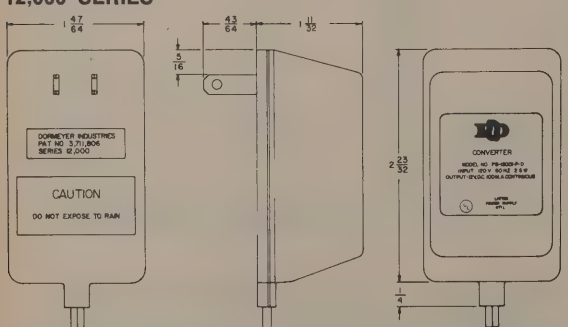
## FILTERED CONVERTER/CHARGERS

### PHYSICAL CONFIGURATIONS

#### 10,000 SERIES



#### 12,000 SERIES



This group of converters is primarily designed for products requiring low-voltage non-filtered DC with resistive or inductive loads such as light bulbs, DC motors and solenoids.

Table I lists the various current, voltage, duty and case sizes available.

Table I shows maximum continuous current output of the converter/charger. If the duty listed for the converter is rated intermittent, a maximum continuous current is listed for the charger. All current ratings are maximum.

The values of dropping resistor (R) are determined by the type, number of batteries and charge time required.

**TABLE I — HIGH POWER NON-FILTERED DC CONVERTER/CHARGER**

| Dormeyer Part No. | Converter Output Volts DC | Converter Output Amps DC Max. | Converter Duty | Max. Continuous Charger Current Amps | Input Watts | Case Size |

| PS-7020 | 20 | .35 | CONT. | .35 | 11 | 7000 |

NOTES:

Converter output current for continuous duty units is listed as maximum. Charger current is determined by the constant current dropping resistor. This current cannot exceed the values shown in Table I.

The values in Table I do not include voltage drops incurred in the output cord.

All converters rated intermittent duty or without a plug on the output cord will require U.L. application listing, if U.L. marking is required on the label.

All stock converters listed above have a #20/2 cord.

### FOR APPLICATION REQUIRING FILTERED DC WITH BATTERY OPERATED PRODUCTS

This group of AC to DC Converters is designed for battery operated products such as tape recorders, radios and calculators.

The stock filtered Converters listed in Table No. II, are designed and rated for operation with capacitor filters. The capacitor is located in the converter.

All filtered converters listed in Table No. II, are stocked with a filter capacitor rated at 1000 MFD for the 12,000 series and 1500 MFD for the 10,000 series. Converters with capacitor ratings other than noted above are available on special order.

This series of converters is designed with exceptionally low internal impedance and can be connected across the battery. This permits switching from the AC converter to battery operation without the need for an external switch.

**TABLE II — LOW POWER FILTERED D.C. CONVERTER**

| Dormeyer Part No. | Converter Output Volts DC | Converter Output Milliamps DC | Input Watts | Case Size |
|---|---|---|---|---|
| PS-12001 | 12 | 100 | 2.5 | 12,000 |
| PS-10001 | 12 | 350 | 8 | 10,000 |

| PS-10005 | 4.5 | 350 | 5 | 10,000 |
| PS-12006 | 3 | 100 | 1 | 12,000 |
| PS-10006 | 3 | 350 | 4 | 10,000 |
| PS-12007 | 1.5 | 100 | 1 | 12,000 |
| PS-10007 | 1.5 | 350 | 4 | 10,000 |

NOTES:

All stock converters listed in Table II are rated for continuous duty.

The stock converters have a maximum peak to peak ripple of .75 V for the 12,000 Series and 1.5 V for the 10,000 Series at rated output, resistive load.

All converters have an internal filter capacitor rated at 1000 MFD for the 12,000 series and 1500 MFD for the 10,000 series. Converters with capacito ratings other than noted above are available on special order.

The values do not include voltage drops incurred in the output cord.

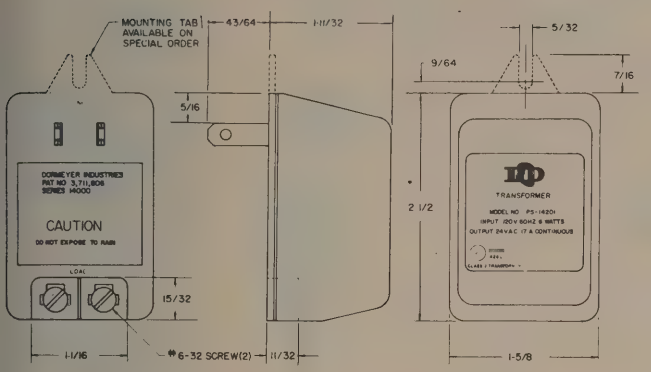
Stock converters with no plug on the output cord will require U.L. application listing, if U.L. marking is required on the label.

All stock converters have a #22 cord.

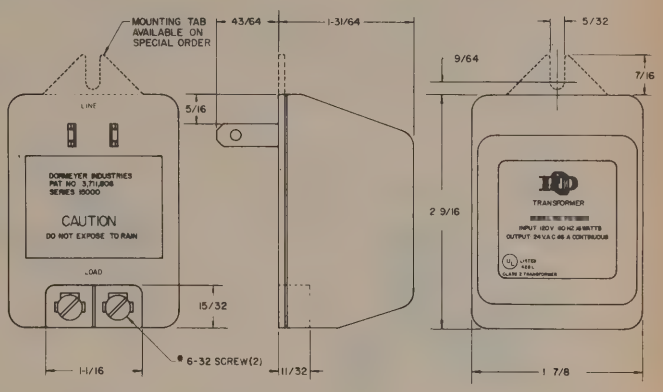
# TRANSFORMERS/CHARGERS

## AC/AC PLUG-IN TRANSFORMERS — PHYSICAL CONFIGURATIONS

**14,000 SERIES**



**15,000 SERIES**



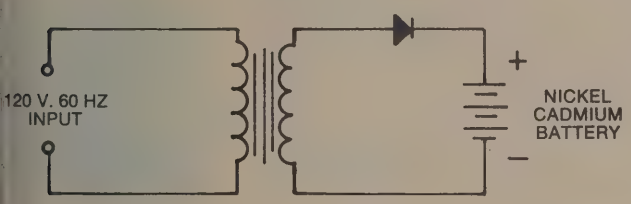
## BATTERY CHARGERS

### FOR APPLICATIONS REQUIRING SLOW RATE 14-16 HOURS CHARGING OF NICKEL-CADMIUM BATTERIES

A group of slow rate chargers for charging cylindrical type nickel-cadmium batteries is listed in Table III. All chargers are of the ½-wave design except those indicated by a †. The chargers indicated by a † are of the full-wave design. All chargers feature high internal resistance to provide a more constant charging current. See Fig. No. 5.

The chargers listed in Table III, are designed for applications requiring slow rate charging, 14 to 16 hours. Other types of chargers, fast rate and trickle charging are available. Chargers for other nickel-cadmium batteries such as button cells, industrial and cell sizes not listed in Table III, are also available.

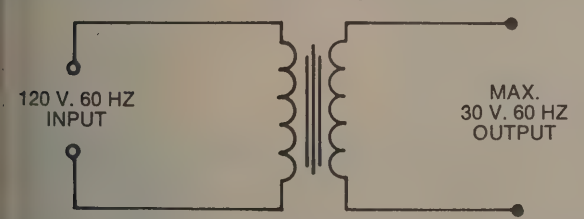
**FIG. No. 5**



For information on chargers other than those listed, write the Dormeyer Sales Department noting type of cell, number of cells and rate of charging required.

The basic converter can be used as an AC Class 2 plug-in, step-down transformer. Many secondary voltages are available, providing the secondary open circuit voltage does not exceed 30 volts. See Fig. No. 6.

**FIG. No. 6**



Stock AC/AC plug-in transformers are listed in Table IV. These stock transformers have screw terminal secondary connectors and are designated as the Series 14,000 and 15,000.

AC/AC plug-in transformers are available on special order with Type "A" #20 GA. cord outputs.

A mounting tab is available on special order for the 14,000 and 15,000 series.

| PS-8116 | 15 | 47 | AA .475 A.H. | 10 | 8000 |

NOTES:

All stock charges listed in Table III are rated for continuous duty.
The values do not include voltage drops incurred in the output cord.
Stock chargers with no plug on the output cord will require UL application listing, if UL marking is required on the label.
All stock chargers listed have a #22 cord.
Chargers indicated by a † in Table III are full-wave design. All others are half-wave.

NOTES:

All stock AC/AC plug-in transformers noted in Table IV are rated for continuous duty, are UL listed and have the UL seal on the label.

# WALL PLUG-IN LOW VOLTAGE

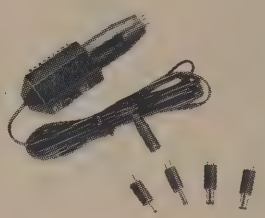
## CONVERTERS/POWER SUPPLIES/CHARGERS

### Modular Charging Systems

Makes any battery powered product instantly rechargeable without product redesign.

### Universal DC to DC Converters

For auto, truck, boat RV or motor home. Four replaceable tips fit all receptacles.



### Wall Plug In AC to DC Converters

- **Miniaturized external charging system.**
- **Compatible with commercially available battery holders having snap terminals.**
- **For AA penlights, C's, D's or 9-volt transistor type nickel-cadmium batteries.**
- **Charge 1000 times or more.**
- **No engineering or retooling required.**

**Dynamic Instrument Corp. has designed, developed and patented a complete range of low-voltage, filtered, transistor-regulated power supplies and chargers designed to supply the necessary power to a vast variety of Electronic equipment.**

**Utilizing a wall plug-in type unit eliminates or greatly reduces the problems involved with UL listing your product. They also remove the major heat source, reduce size and weight, and also greatly increase your design flexibility. The latest design applications of the Dynamic wall plug-in supplies are in conjunction with such sophisticated equipment as mini-computers, calculators, keyboard logic circuits, and remote CRT Terminals.**

**Just call or write: Dept. WPX-1.**

### AMERICAN AND EUROPEAN STANDARDS CATALOGS

- **Standard Converters**
- **Chargers**
- **Power Supplies**

...both wall plug-in and desk top models. Covers Nickel-cadmium and Lead-acid chargers. AC/DC converters. Contains:

- Specifications
- Regulation Charts and Curves
- Outline drawings

**Dynamic's product range and capabilities also cover:**

**POWER CONVERSION**
AC-AC for products requiring low-level AC voltage. AC-DC for small electric motor driven products that do not use batteries.

**SECONDARY BATTERY CHARGING**
Dynamic Chargers for charging Nickel-Cadmium; Lead-Acid and Manganese-Alkaline Batteries.

**AC-DC CONVERSION/CHARGING**
Dynamic Converter-Chargers providing rechargeability or instant use of battery operated products.

**FAST CHARGING SYSTEMS**
Dynamic design and production capability relative to Fast Charging Systems.

**TRANSFORMERS**
Internal, External and Wall-Mounted Dynamic Transformers.

**SPECIALTY TRANSFORMERS**
Dynamic Plug-In, Printed Circuit Transformers; Sub-Miniature Transformers; Ferro-resonant Transformers; Multi-Input Voltage and Multi-Output Voltage Transformers.

## ELECTRICAL SPECIFICATIONS: ALL MODELS

**INPUT:** 105-125 VAC, 50-420 Hz (230V OPTIONAL)

**REGULATION:** LINE: 0.005% or 2 MV MIN (10 VOLT CHANGE)
LOAD: 0.05% or 10 MV MIN (FULL LOAD CHANGE)

**RIPPLE:** LESS THAN 250 MICROVOLTS

**IMPEDANCE:** 100 Hz - 0.001 OHMS
1 KHz - 0.005 OHMS
10 KHz - 0.01 OHMS
100 KHz - 0.1 OHMS

**RECOVERY TIME:** 25 MICROSECONDS

**OVERSHOOT:** NONE ON TURN ON OR OFF

**TEMPERATURE:**
OPERATING −20 TO +71°C
STORAGE −65 TO +85°C
COEFFICIENT 0.01%/°C MAX

**CURRENT LIMITING:** FIXED - FOLD-BACK TYPE - AUTOMATIC RECOVERY

**OUTPUT:** FLOATING

**SEMICONDUCTORS:** SILICON

**CAPACITORS:** COMPUTER GRADE 10 YEAR LIFE

**OVERVOLTAGE PROTECTION:** OPTIONAL

## ORDERING INFORMATION

# POWER SUPPLIES

## FROM

# ELECTRONIC MEASUREMENTS

## DC OUTPUT SCR REGULATED

On the next three pages you will find the industry's largest selection of DC output SCR regulated power supplies in the 500 watt to 60 KW range. All units regulate voltage and current output to 0.1% and feature low ripple, high efficiency and reliability and the smallest package sizes available.

## FOR CUSTOM POWER SUPPLIES

If your requirements cannot be satisfied with standard E/M products we are eager to make modifications to meet specific applications. Standard units can have special panels, optional features or alternate packages. If you are an OEM, a custom power supply may be required. Our design and production technology includes series pass, ferroresonant, switch mode and SCR phase control techniques. Prompt technical appraisal of your specification and a realistic quotation are only a letter or phone call away — if you give us the opportunity.

## OTHER POWER PRODUCTS

E/M is also actively engaged in design and production of special purpose power sources. These include Arc lamp power supplies for krypton, xenon and mercury lamps, plasma arc power supplies, battery eliminators, open frame power supplies and switch mode power sources. Contact us for specific information and applications assistance in any of these areas.

# DC OUTPUT SCR REGULATED POWER SUPPLIES

## FEATURES

- Highest wattage per cubic inch in the industry
- High efficiency
- Constant-voltage or constant-current output, with automatic crossover
- Remote sensing and programming
- Series or parallel operation
- Master/slave operation
- Circuit breaker or fuse protected
- Thermal overload protection
- Mode indicator lights
- Rack or bench mount
- Optional over-voltage protection
- Optional input voltages
- Five-year warranty

## APPLICATIONS

- CW lasers
- Pulse lasers
- Capacitor forming
- Focusing coils for accelerators
- Cryogenic magnet applications
- Electroplating
- Battery charging
- Aging racks for semiconductors and IC's
- Electronic memory systems
- General electronic applications

## SINGLE PHASE SCR MODELS

(500, 800, 1600, 2400 WATTS)

## MAJOR SPECIFICATIONS

**AC Input Voltage:** 500, 800, 1600 W Models — 10 130V, 47-63 Hz; 2400 W Models — 190-253V, 47- Hz. Optional inputs available.

**AC Input Current:** 500 W — 7.5A; 800 W — 12 1600 W — 24A; 2400 W — 18A (220V).

**DC Output:** Regulation, voltage mode — 0.1%; re ulation, current mode — 0.25%; stability — 0.05% 8 hours; temperature coefficient — 0.02%/°C.

**Size:** 500, 800 W Models — 3½"H x 19"W x 18½" (88mm x 483mm x 470mm); 1600 W Models — 5¼" x 19"W x 18½"D (133mm x 483mm x 470mm); 2400 Models — 7"H x 19"W x 18½"D (177mm x 483mm 470mm).

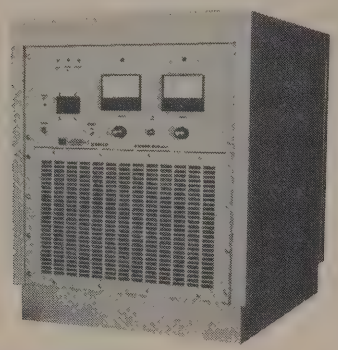
# THREE PHASE EMHP MODELS

(20, 30, 60 KILOWATTS)



## FEATURES

- Low cost
- Reduced delivery time
- Greatly increased efficiency
- High performance

## APPLICATIONS

- Electromagnets
- Magnetic beam bending
- Cryogenic magnets
- Precision electroplating
- Electrochemical processes
- DC motor power
- Large relay systems
- High energy electronic systems
- High power illumination systems
- Thermodynamic and thermonuclear research
- Inverter power source
- Battery charging
- Industrial DC power

## MAJOR SPECIFICATIONS

**AC Input Voltage:** 460 VAC ±10%, 60 Hz. Optional inputs available.

**DC Output:** Regulation, 0.1%; stability, 0.05%.

**Size:** Series 15 (19″ panel) — 21.69″W x 29.5″H x 25.00″D (55.1cm x 74.9cm x 63.5cm); Series 25 (24″ panel) — 26.75″W x 34.25″H x 25.00″D (67.9cm x 86.93cm x 63.5cm); Series 40 (24″ panel) — 26.75″W x 40.25″H x 29.00″D (67.9cm x 102.16cm x 73.6cm).

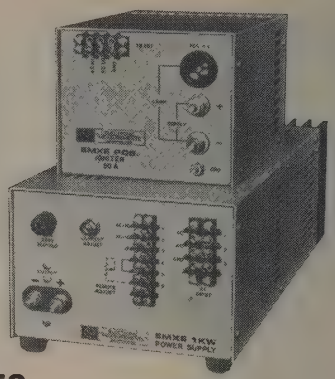
# ARC LAMP POWER SUPPLIES

(XENON & MERCURY—35W TO 1 KW)



## FEATURES

- Small size
- Light weight
- Flexible mounting
- High efficiency
- Low ripple (better than 1%)
- Excellent regulation (better than 1%)
- Low in-rush currents
- Long-term stability
- Remotely adjustable (500 W and 1000 W, standard; 200 W, optional)
- No audible noise
- Low energy starting
- Input surge protection
- Automatic starting
- Adjustable output
- Modulation capability (optional)

## APPLICATIONS

**Optical Instrumentation:**
Metallographs
Monochromators
Spectrophotometers
Fluorescent microscopes
Artificial aging equipment
Optical test stands
Laser pumping
Weathering & light fastness testers

**Graphic Arts:**
Integrated circuit manufacture
Color matching

**Image Projection:**
Slide projectors
Motion picture projectors
Contour projection
Photoelectric scanning
Railway identification systems

**Medical:**
Photo coagulators
Skin irradiation equipment

## SPECIFICATIONS

**AC Input:** 100-130 VAC, 47-63 Hz. 200 W package, 2.5A; 500 W package, 8.4A; 1000 W package, 15A. Optional inputs available.

**DC Output:** 200 W package, to 13A; 500 W package, to 27A; 1000 W package, to 55A. Ripple, less than 0.1% below 20 kHz.

| Basic Model | Power Supply Unit: Voltage | Power Supply Unit: Current (amps DC) | Power Supply Unit: Mode | Igniter Unit: Peak Volt. | Igniter Unit: Boost Volt. | Lamp Applications |

# All Series Shall Pass... Except The Switcher!

Now! For the first time you have your choice of Switching or Series Pass power supplies...right off the shelf...from your local Distributors everywhere!

Only ELPAC gives you this choice. Only ELPAC Distributors have this wide range of single and multiple output power supplies...ready right now for delivery.

Order from the ELPAC line. Get innovative design that's warranteed for faithful performance...at a practical, down-to-earth cost!

Order the ELPAC of your choice. Switcher, Series Pass or DC/DC.

Become a believer...call your local Distributor today for prompt delivery of your Ugly.™ Off-the-shelf! Out-of-this-world!

**Get UGLY™ Switchers, Series Pass and DC/DC power supplies from your local distributor:** Cramer, National; Broadline, Farmingdale, N.Y.; G.S.I., Roselle, N.J.; Q.P.L., Waltham, Ma.; Component Specialties, Inc., Tx. & Oka.; K.A., Garland, Tx; Series Pass Only: Newark, National; Utronics, Fairfields, Cn.; Shap, Huntingdon Valley, Pa.; Technico, Columbia, Md.; A.C.K. Radio Supply, Atlanta, Ga.

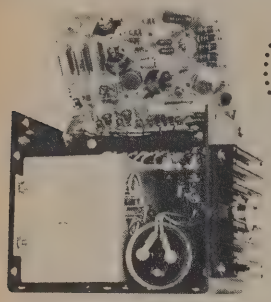
**MIL SPEC MS SERIES**

# REPAIRABLE MS SERIES • MILITARY SPECIFICATIONS SINGLE/DUAL OUTPUT DC MODULAR POWER SUPPLIES



**75°C FREE AIR RATING**

## MEETS COMPONENT, WORKMANSHIP AND ENVIRONMENTAL REQUIREMENTS OF MIL-E-4158, MIL-E-5400, MIL-E-16400, MIL-E-5272, MIL-T-21200

Transpac MS Series DC Power Modules are capable of meeting the highest military requirements. These units incorporate full MIL components where applicable and are designed to meet full military environmental and component specifications. Transformers are per MIL-T-27A, semiconductors are MIL-STD-701 or MIL-S-19500 preferred types. Tantalum foil capacitors per MIL-C-3965 are used throughout except in the filter sections of higher current types where MIL-C-62 military grade electrolytic capacitors are used. These units have been fully tested to meet the component, workmanship, and environmental requirements of MIL-E-4158, MIL-E-5400, MIL-E-16400, MIL-E-5272, MIL-T-21200 and are supplied with an independent testing laboratory certification as to compliance for representative models.

**CERTIFIED** Certificate of Conformity by Independent Laboratory supplied on request

**Input:** 103.5-126.5 VAC (standard) or 108-132 VAC (specify), 47-440 Hz

**Ripple:** Less than 800 $\mu$V RMS except 50 through 310 VDC where ripple is less than 0.005% RMS

**Line Regulation:** Less than ±0.01% or 5 MV, whichever is greater, for full input change

**Load Regulation:** Less than 0.05% or 8 MV for 0-100% load change

**Transient Response:** Less than 50 $\mu$sec for step line or load change

**Maximum Case Temperature:** 115°C

**Free Air Operating Temperature:** −55°C to +75°C (full tantalum type up to 1 ampere most models) −40°C to +75°C (semitantalum type above 1 ampere) full ratings, no external heat sinking

**Temperature Coefficient:** Less than 0.01% per degree C or 3 MV

**Long Term Stability:** Within 10 MV or 0.1%, whichever is greater for 8 hours (line, load, temperature constant)

**Interconnection:** Series or parallel operation

**Voltage Adjustment:** External screwdriver voltage control

**Remote Voltage Control:** Provision for external control of output voltage

**Remote Sensing:** Remote sensing facilities provided

**Short Circuit Protection:** Automatic short circuit protection and automatic recovery

**Overvoltage Protection:** Fixed 5 volt and dual output units add suffix (-O) to model number. For other MS units order model OV448M

**Polarity:** Ungrounded or +/− grounded

**Transistor Types:** MIL-STD-701 and MIL-S-19500

**Military Specs:** MIL-E-4158, MIL-E-5400, MIL-E-16400, MIL-E-5272, MIL-T-21200 where applicable

### SINGLE OUTPUT

**MTT SERIES**

# TECHNIPOWER "PM95" SERIES EQUIVALENTS FORM • FIT • FUNCTION DC MODULAR POWER SUPPLIES

**MEETS ENVIRONMENTAL REQUIREMENTS FOR "TYPE APPROVAL" OF MIL-E-4158, MIL-E-5400, MIL-E-16400, MIL-E-5272, MIL-T-21200**

DIRECT TECHNIPOWER REPLACEMENTS FOR "PM95" SERIES

ERA Transpac's "MTT" Series of Power Modules are designed to directly replace the Technipower "PM 95" Series . . . Form, Fit, and Function. The "MTT" Series allows OEM manufacturers a competitive alternate source for OEM or replacement.

**nput:** 105-125 VAC, 47-440 Hz

**ripple:** 2 MV RMS or .002%

**utput Control Range:** ±5%, screwdriver adjustment

**ine Regulation:** Less than 0.05% +5 MV for full input change

**oad Regulation:** Less than 0.05% +5 MV for 0-100% load change

**ransient Response:** Less than 50 microseconds for step line or load change

**emote Sensing:** Facilities provided

**perating Temperature:** −55°C to +95°C (Max. base Temperature)

**torage Temperature:** −62°C to +105°C

**emperature Coefficient:** 1MV/°C

**olarity:** Ungrounded or +/− Grounded

**hort Circuit Protection:** Automatic protection with automatic recovery

**vervoltage protection:** Optional

## SINGLE OUTPUT

| OUTPUT VOLTAGE (DC) | CURRENT | SIZE W x D x H INCHES | TECHNIPOWER MODEL | ERA MODEL |

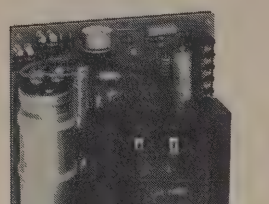
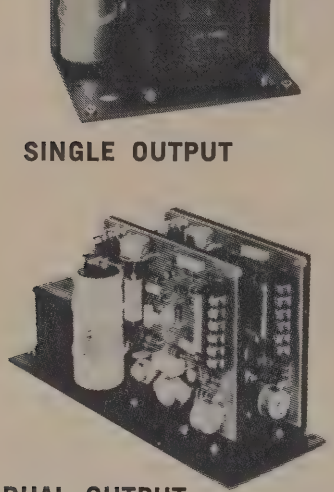
**OE SERIES**

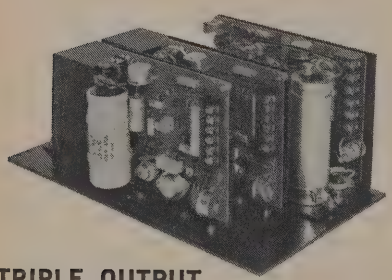
# "OEM" OPEN FRAME DC MODULAR POWER SUPPLIES



SINGLE OUTPUT



DUAL OUTPUT



TRIPLE OUTPUT

## "OE" SERIES POWER SUPPLIES

"OE" series power supplies are highly regulated open frame DC power supplies which come complete with isolating input transformers, OVP protective circuitry and full heat sinking. These low cost units are available in either single or multiple outputs and are ideally suited for OEM, IC, Op-Amp, Computer, and general application The "OE" series are premium engineere and conservatively designed using to quality components including comput grade capacitors. The power modules a fully repairable and of conservative the mal design.

**Input:** 105-125 VAC, 47-63 Hz, 380-420 Hz, single phase
**Output:** Refer to Model Table
**Adjustment Range:** ±0.5 volt or ±5%, whichever is smaller
**Input Regulation:** Within 0.05% +5 MV for ±10% input change
**Load Regulation:** Within 0.05% ±5 MV for 0 to 100% load change
**Ripple:** Less than 1.0 MV RMS
**Temperature Range:** −20°C to +71°C derated as follows:
(Percent of rated load) +40°C/100%, +50°C/75%, +60°C/50%, +71°C/40%
**Response Time:** Less than 50 μsec for 10-100% load change
**Overcurrent Protection:** Built-in, fold-back type
**Overvoltage Protection:** Built-in, full adjustment range
**Maximum Case Temperature:** 120°C measured at power transistor base
**Polarity:** Ungrounded or +/− grounded
**Line Derating:** Input 47-53 Hz, derated by 10%
**Logic Inhibit Circuitry:** Provided
**Remote Sensing:** Terminals are provided to maintain regulation at the load

## OPTIONS

**AC Input:** All models are available for 208 VAC input (Suffix "Y," or 230 VAC input Suffix "X")

**Dual AC Input:** Operation at either 115/230 VAC input can b provided. Use Suffix "Z"

## CUSTOM DESIGNS

The unique "building block" characteristics of ERA TRANSPAC DC power supply assemblies provide a practical solution to economic custom designed power supplies. Standard off-the-shelf assemblies are used to provide a variety of single or multiple voltage and current outputs. These are packaged to meet the customers unique form factor and only the transformer and metal work are custom designed. The result is a proven reliable desig with the high engineering and fabrication costs eliminated an available within a short delivery cycle.

Forward your specification requirements for our comments an fast quotation on a no obligation basis.

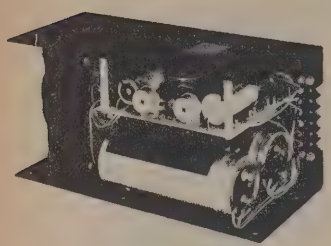
**S, D, T, SERIES**

# ACDC "OEM", "TR" & "HCM" SERIES EQUIVALENTS
# FORM • FIT • FUNCTION
# OPEN FRAME DC MODULAR POWER SUPPLIES



DIRECT ACDC REPLACEMENT FOR "OEM" SERIES

**Single, Dual and Triple Output**
**Open Frame Construction • 0.05% Regulation**
**Covers Available • Optional Overvoltage Protection**

ERA Transpac's "S, D, T" Series of power modules are designed to directly replace the ACDC "OEM" Series...Form, Fit and Function.The "S, D, T" Series allows OEM manufacturers a competitive alternate source for OEM or replacement.

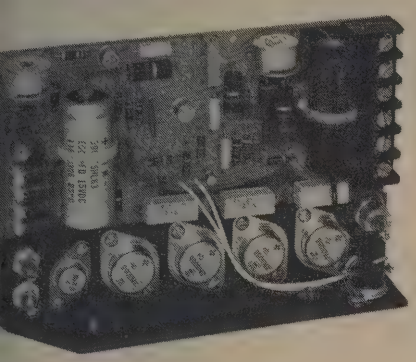
"R" SERIES

# "BUILD OR BUY" DC REGULATOR POWER SUPPLY ASSEMBLIES



The "R" series units are complete regulator assemblies which provide highly regulated DC output when used in conjunction with an external AC input source. The three and six ampere models (R53 and R56 types) require only an input transformer for operation. The higher current types (R512 and R520) require in addition, an input filter capacitance. Refer to "Application Notes" for recommended AC input, heat sinking, and other data.

**COMPLETE WITH:**

- ☐ Power Rectifiers
- ☐ Input Filter*
- ☐ IC Regulator
- ☐ Power Transistors
- ☐ Regulator Components
- ☐ Logic Inhibit

*Provided on R53 and R56 Models

- ☐ Adjust Controls
- ☐ Input/Output Terminations
- ☐ Mounting Facilities
- ☐ Over-Voltage Protector
- ☐ Over-Current Protector
- ☐ Thermal Protection†

†Provided on R512 and R520 Models

**nput:** AC center tapped, ±10% nominal, 47-63 Hz, 380-420 Hz. Refer to "Application Notes" for specific values.

**utput Voltage:** Nominal 4.7-30 VDC depending on model types. Refer to Model Chart.

**utput Current:** 1.2-20 amperes depending on model type and heat sinking. Refer to Model Chart and "Application Notes."

**nput Regulation:** Within 0.05% +5 MV for ±10% input change.

**oad Regulation:** Within 0.05% +5 MV for 0 to 100% load change.

**ipple:** Less than 1.0 MV RMS.

**emote Sensing:** Provided.

**Temperature Range:** −20°C to +71°C derated as follows: (Percent of rated load) +40°C/100%, +50°C/75%, +60°C/50%, +71°C/40%.

**Temperature Coefficient:** 0.01% +1 MV/per°C.

**Response Time:** Less than 50 μsec for 10-100% load change.

**Overcurrent Protection:** Built-in, fold-back type.

**Overvoltage Protection:** Built-in, full adjustment range.

**Maximum Case Temperature:** 120°C measured at power transistor base.

**Polarity:** Ungrounded or +/− grounded.

**Weight:** See listing under Case Size.

**Line Derating:** Input 47-53 Hz, derate by 10%.

**Logic Inhibit Circuitry:** Provided.

**SINGLE OUTPUT**

| Output Voltage | Current (40°C) | Model | Output Voltage | Current (40°C) | Model | Output Voltage | Current (40°C) | Model |

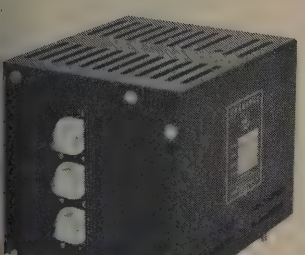
# Solid-State Sinusoidal AC Regulators



Transpac RT modular AC regulators are all solid-state designs for incorporation into equipment or for external and bench use. Utilizes a unique design approach incorporating a modulated AC bridge which is referenced to variations in the output level. This special circuitry permits fast-acting RMS regulation independent of input frequency, and provides sinusoidal output. RT units are highly efficient, require minimum no-load current and operate over a wide range of load power factors.

- Provide highly RMS-regulated sinusoidal output
- Operate over a wide range of AC inputs and frequencies
- Run cool and quiet with no distorted magnetic field interference
- Operate over a wide range of leading or lagging power factors
- Provide a modular AC Regulator for end-equipment or bench use

| Power Rating | Size (Inches) | Weight | Model |
|---|---|---|---|
| 250 VA | 6 5/16 x 7 1/4 x 4 7/8 | 13 lbs. | RT250 |
| 500 VA | 6 7/8 x 8 7/8 x 7 1/2 | 28 lbs. | RT500 |
| 1000 VA | 7 13/16 x 9 15/16 x 7 5/8 | 43 lbs. | RT1000 |

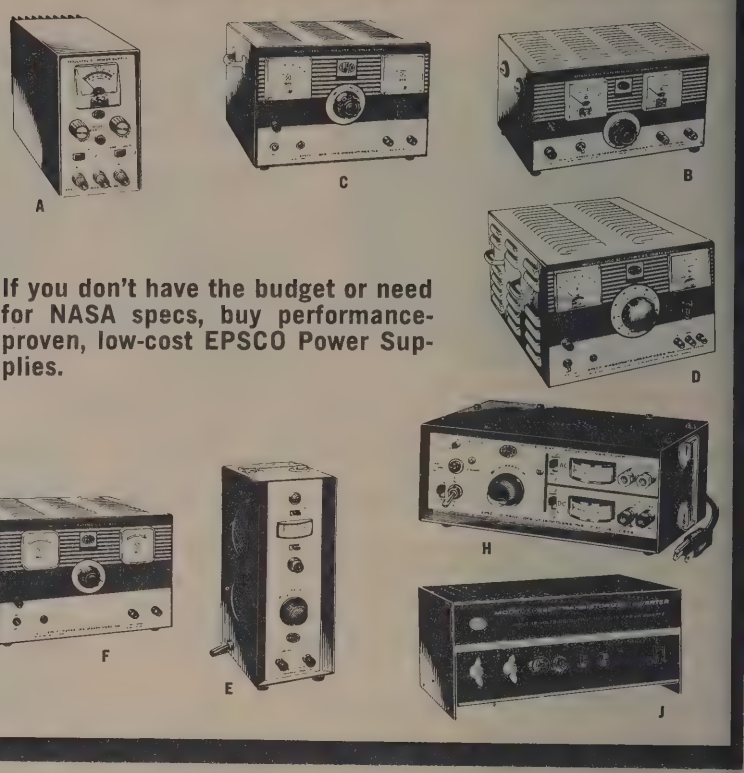
# EPSCO REGULATED & SEMI-REGULATED POWER SUPPLIES

Ruggedly-constructed, low voltage dc power supplies for use in design, development, testing of transistor circuitry . . . for servicing and operating auto, aircraft, marinecraft radio, electronic equipment . . . for production line testing, industrial and educational laboratory work and many other applications.

Precision made and engineered to give unequalled performance life per dollar. Features include: Voltage regulation, ac ripple filtering, adjustable output voltage, large easy-to-read meters, isolated output terminals, 1-year warranty.

INPUT — *Regulated Models:* 105-125 vac. 60 Hz *Industrial* and *General Purpose Models:* 117 vac 50/60 Hz. Models available to fit W.E. and EIA racks. Custom-design or modification of standard units to your specs.

INVERTER — Transistorized. Converts 12 vdc to 117 vac, 60 Hz to operate equipment from car, truck or boat battery, or other 12 vdc source for camping, traveling, boating. Reverse polarity and short circuit protection.



**If you don't have the budget or need for NASA specs, buy performance-proven, low-cost EPSCO Power Supplies.**

## REGULATED

# NOBRUSH® FREQUENCY GEORATOR™ CORPORATION

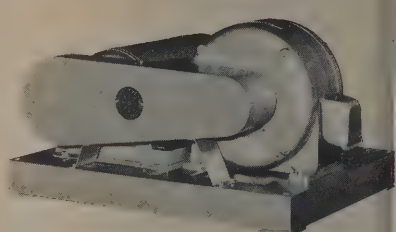
*Celebrating our 28th anniversary*

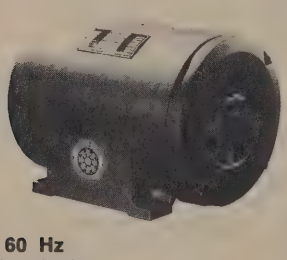
## PERMANENT MAGNET GENERATOR DESIGN

"NoBrush" Motor Generators and Frequency Converters are efficient, compact, dependable, quiet running units for powering all types of electronic systems and electrical equipment. The heart of each "NoBrush" power system is a "NoBrush" permanent magnet generator which features a cast aluminum rotor designed to give superior voltage stability. • A typical "NoBrush" generator is mounted with a high quality induction or synduction motor within a single aluminum alloy shell. • Oversize pre-lubricated ball bearings sealed for life, coupled with the absence of brushes, commutators or slip rings, insure long-term maintenance-free operation. • Georator brushless permanent magnet generators are noted for their compact construction, ruggedness, ability to withstand short circuits, and excellent wave form. • All Georator power systems whether utilized for frequency conversion or basic power requirements, provide true "line isolation and stabilization" for protecting sensitive electronic systems from momentary power interruptions, switching transients, brown outs, or voltage spikes.

**PERMANENT MAGNET FEATURES:**

- ☐ *Line Isolation and Stabilization*
- ☐ *Stable Output Voltage*
- ☐ *High Overload Capacity*
- ☐ *Withstands Short Circuits*
- ☐ *Extremely Low R. F. Noise*
- ☐ *Minimum Maintenance*
- ☐ *Lightweight*
- ☐ *Low Audible Noise*
- ☐ *Cool Operation*
- ☐ *Operates in Adverse Environments*



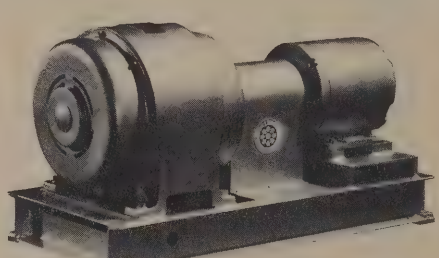


### 60 TO 60 Hz LINE ISOLATOR SERIES 30 UNIT SHELL

This small isolator stabilizer Motor-Generator offers full line isolation for small power requirements up to 1 KVA. Permanent magnet field generator coupled with the high inertia of the rotating system assures maximum electrical isolation between line and load. The rugged unit shell construction gives long, maintenance-free operation.

| Model No. | KVA Rating | Phase In/Out | Output Voltage | Input Voltage | Dimensions H"/L"/Weight |
|---|---|---|---|---|---|
| 35-118 | 0.35 | 1/1 | 115/230 | 115/230 | 14.5"/14.0"/110 lbs. |
| 30-194 | 0.5 | 3/1 | 115/230 | 230/460 | 14.8"/16.1"/120 lbs. |
| 30-198 | 0.5 | 1/1 | 115/230 | 115/230 | 14.8"/16.1"/120 lbs. |
| 30-195 | 1.0 | 3/3 | 120/208 | 230/460 | 14.8"/16.1"/130 lbs. |
| 30-199 | 1.0 | 1/3 | 120/208 | 115/230 | 14.8"/16.1"/130 lbs. |

These 60 to 60 Hz brushless generators, including those in the next column are designed to accept long term input variation of up to ±15% from nominal with no change in output. Inertia stabilization allows these units to absorb input line transients of as much as 30% for as long as 500 milliseconds with less than 1% change in output.



### 60 TO 60 Hz ISOLATOR STABILIZER SERIES 37 IN LINE

Larger Motor Generators in ratings up to 25 KVA are also available to provide full line isolation and distortion free power to protect electronic equipment from power line excursions and momentary power loss.

### 50 TO 60 Hz and 60 TO 50 Hz FREQUENCY CONVERTERS

These ruggedly built, belt driven, mot generator sets are mounted on a stur steel frame base. Units in the 0.5 to KVA power range are designed arou the highly efficient NoBrush Perman Magnet Generator. Units in the 6.25 to KVA power range have brushless rotati rectifier type generators with voltage re ulators, to provide ±1% output volta regulation. These motor-generators p vide frequency conversion, basic pow and superior line isolation and stabili tion for exported and imported electri and electronic equipment.

50 to 60 Hz

**LIGHTWEIGHT**
**400 Hz ENGINE-GENERATORS**

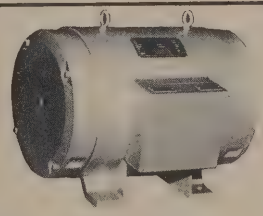
Lightweight 400 Hz permanent magnet engine-generators are available with 1Ø, or 3Ø, or DC, or dual AC/DC outputs. Applications include: geophysical, navigation, and communication systems; also fish conservation.

| Model No. | KVA Rating | DC/Phase Out | Output Voltage | Weight |
|---|---|---|---|---|
| 31-001 | 0.5 | 1Ø AC | 115/230 | 43 |
| 31-002 | 0.5 | DC/1Ø AC | 115/230 | 44 |
| 31-008 | 0.75 | 3Ø AC | 115/200 | 50 |
| 31-014 | 0.5 | DC | 250/500 | 44 |

**VOLTAGE REGULATED**
**60 TO 400 Hz**
**FREQUENCY CONVERTERS**

This new, Series 39, Regulated, Vertical Frequency Converter combines the "No-Brush" permanent magnet generator together with control windings and simplified sensing electronics, to provide both the traditional "Brushless" rugged design and a closely regulated 400 Hz power system. Voltage regulation is ±1.5% no load to full load, 0.8 to 1.0 power factor, with a voltage adjustment feature of ±5%.

| Model No. | KVA Rating | Voltage Output | Voltage Regulation | Phase In/Out |
|---|---|---|---|---|
| 39-001 | 5 | 120/208 | ±1.5% | 3/3 |
| 39-002 | 5 | 115/230 | ±1.5% | 3/1 |
| 39-004 | 6.5 | 120/208 | ±1.5% | 3/3 |



**60 TO 180 Hz, 360 Hz, 840 Hz**
**FREQUENCY CONVERTERS**
**FOR HIGH FREQUENCY**
**TOOLS, MOTORS, AND LIGHTING**

These frequency converters are available for powering high frequency metal-working tools, wood-working tools, motors, and lighting systems. The highly dependable, minimum maintenance, PERMANENT MAGNET BRUSHLESS DESIGNS are available in many ratings up to: 5 KVA for 180 Hz applications; 10 KVA for 360 Hz applications; and 30 KVA for 840 Hz applications.

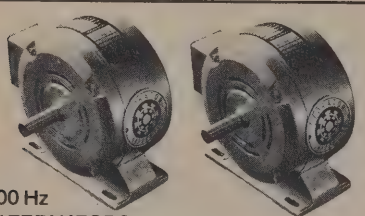
# GEORATOR™ CORPORATION

# PERMANENT MAGNET ALTERNATORS

## FEATURES:

- ☐ High Efficiency
- ☐ Excellent Wave Form
- ☐ Stable Output Voltage
- ☐ Short Circuit Immunity
- ☐ High Overload Capacity
- ☐ Essentially "0" RF Noise
- ☐ Brushless
- ☐ Compact Design
- ☐ Cool Operation



### 400 Hz ALTERNATORS PERMANENT MAGNET

The original, revolutionary, "NoBrush" generator. Permanent magnets yield stability, reproducibility, ruggedness and virtually zero R.F. noise. Available in large variety of ratings, frequencies and voltages. Supplementary windings with rectifiers available for D.C. output.

400 Hz ALTERNATORS

| Model No. | KVA Rating | Phase Out | Speed RPM | Dimensions H"/L"/Weight |

| 36-010 | 5.0 | 1 | 1714 | 17¼"/6¾"/137 lbs. |
| 36-011 | 5.0 | 3 | 1714 | 17¼"/6¾"/103½ lbs. |
| 36-012 | 7.5 | 3 | 1714 | 17¼"/6¾"/120 lbs. |
| 36-013 | 10.0 | 3 | 1714 | 17¼"/6¾"/135 lbs. |
| 36-151 | 15.0 | 3 | 1714 | 25"/11.2"/310 lbs. |
| 36-152 | 25.0 | 3 | 1714 | 25.3"/17"/730 lbs. |

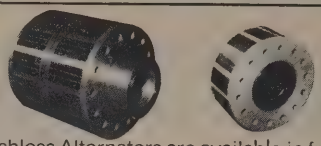
- ☐ Alternator Frequencies Available Include: 50, 60, 120, 180, 240, 300, 360, 420, 840 and 1000 Hz.
- ☐ All Units are Available with:
  - Standard and Non-Standard AC Voltages.
  - Multiple DC Outputs/Low Voltage taps.
  - Special Housings for Flange Mountings.
  - Double Shafts.
  - Militarized Construction.

### 60 Hz ALTERNATORS 50 Hz ALTERNATORS PERMANENT MAGNET

These industrial type generators provide output voltage stability within ±1% for constant load and constant driving speed (from cold to hot and ambient temperatures of −20° F to 130° F).

| MODEL NO. | KVA RATING | PHASE OUT | OUTPUT VOLTAGE NOMINAL | FREQUENCY Hz | SPEED RPM | DIMENSIONS H"L"/WEIGHT |
|---|---|---|---|---|---|---|
| 36-138 | 0.5 | 1 | 115/230 | 60 | 1800 | 12/10.3/90 lbs. |
| 36-103 | 1.0 | 3 | 120/208 | 60 | 1800 | 12/10.3/90 lbs. |
| 36-021 | 1.5 | 1 | 115/230 | 60 | 1800 | 14/19/185 lbs. |
| 36-149 | 2.5 | 3 | 120/208 | 60 | 1800 | 14/19/185 lbs. |
| 36-135 | 2.5 | 1 | 115/230 | 60 | 1800 | 14/19/200 lbs. |
| 36-006 | 5.0 | 3 | 120/208 | 60 | 1800 | 14/19/200 lbs. |
| 36-154 | 10.0 | 3 | 120 | 60 | 3600 | 18/25/753 lbs. |

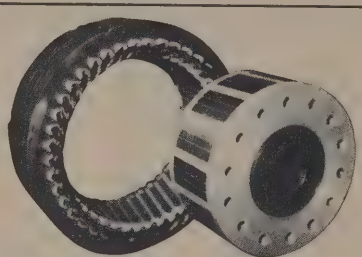
- ☐ All units listed are available with 50 Hz output.



## APPLICATIONS:

Permanent Magnet Brushless Alternators are available in frequencies up to 1,000 Hz and i power ratings from 150 VA to 25 KVA. Wherever a rugged, continuous duty, industrial typ long life generator is required for:

- Special industrial applications 120 Hz, 180 Hz, 360 Hz.
- High frequency power up to 1,000 Hz.
- Low frequency power 60 Hz, 50 Hz or lower.
- Variable frequency....
- Electrical power source in hazardous locations.
- Military 400 Hz electronic equipment.
- Source of multiple AC outputs for rectification to DC power.
- Power static exciter—voltage regulators of large engine generators.
- Pilot excitation and field flashing of large generators.
- Tachometer feedback for large rotating apparatus.
- Lighting Systems.
- Electric brake excitation.
- Power for process control equipment in hazardous environments.
- Special vehicular applications.
- As computer peripheral rotating power supply providing basic power, line isolation, rid through, and multiple outputs.



### ROTORS AND STATORS

Separate permanent magnet rotors and stators are available for a wide range of OEM applications engineered to fit customer shaft or shaft extensions. From speeds as low as 720 RPM to 12,000 RPM in selected ratings. In power ratings from 50 VA to 25 KVA.

### TOTALLY ENCLOSED AND EXPLOSION PROOF

Totally enclosed and explosion proof designs are available in selected ratings. Some typical units are:

| MODEL NO. | KVA RATING | PHASE OUT | VOLTAGE OUT | FREQUENCY/ RPM | DESCRIPTION |
|---|---|---|---|---|---|
| 36-168 | 1.5 | 1 | 120 | 60 Hz/1800 | Totally enclosed. |
| 36-173 | 1.5 | 1 | 115/230 | 60 Hz/1800 | Explosion Proof. |

### FLANGE MOUNTED ROTORS AND STATORS

Cast aluminum alloy housings to fit on cus mer stub shaft.

### SPECIAL PM DESIGNS

Examples of special 2 bearing units of uniq industrial application-

| MODEL NO. | RATING | PHASE OUT | VOLTAGE OUT | DESCRIPTION |
|---|---|---|---|---|
| 36-094 | 165 watts | DC | 5, 12, 24, 48 VDC | Multiple DC outputs for computer peripheral |
| 36-169 | 2.5 KVA | 1Ø | 240 VAC | 1000 Hz, 4286 RPM Un Industrial Application. |
| 36-167 | 3.0 KVA | 3Ø | 115/200 VAC | 200 Hz, 3000 RPM Vehicular application. |

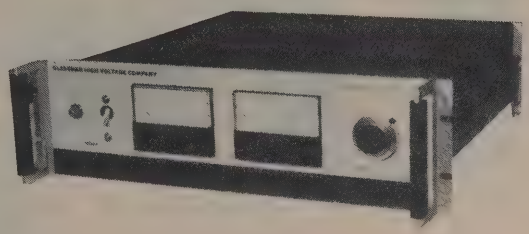
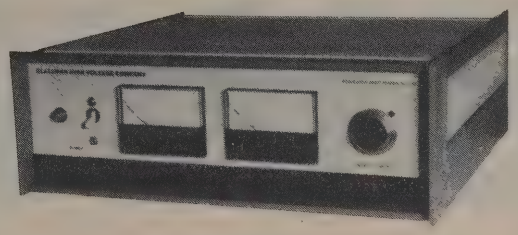
## REGULATED SOLID STATE/HIGH VOLTAGE HIGH FREQUENCY/LOW ENERGY POWER SUPPLIES





### *DESIGN FEATURES*

**Reversible Polarity:** The output voltage polarity of all Series LG models is easily reversed. All polarity sensitive circuitry in the control system operates automatically for either positive or negative output polarity.

**Voltage-Current Regulation with Automatic Cross-Over:** All models feature both **voltage** and **current regulation,** with automatic cross over to voltage or current mode.

**Remote Programming and Monitoring:** Remote programming capability is provided for both the voltage and current control function. Programming is accomplished by either a potentiometer (using the power supply internal reference system), or an external 0-10 volt positive programming voltage, with return to case ground.

Monitoring circuitry for both output voltage and load current is provided as a 0-10 volt signal with respect to ground.

**Metering:** All power supplies in this series are equipped with meters that display both the output voltage and the output current.

**Modular Construction:** All major functional circuitry, including power transistors, are mounted on a single printed circuit board, for ease of maintenance and repair. The high voltage circuitry in the entire family of power supplies is also constructed from modular subassemblies, so that replacement or repair, if required, is simple and economical.

**Protection:** The new oscillator-rectifier circuitry provides inherent self protection against four of the most common problems encountered in earlier high voltage power supply designs. In addition, overload, short-circuit, and arc protection is provided by automatic current regulation, and by careful surge limiting design.

**High Efficiency:** Efficiency is typically better than 75% at full load, which ensures low internal dissipation and thereby increases reliability.

**Low Stored Energy:** Like all RF oscillator power supplies, the LG series is inherently safer to operate than line-frequency high voltage supplies, because the output capacitance is extremely low, so that the total stored energy available is quite small . . . on the order of 1 Joule.

**Low Ripple:** The high oscillator frequency makes it relatively easy to achieve low ripple in these supplies. Standard ripple is 0.1%, and even lower ripple is available on special order.

**Excellent Transient Response:** The typical recovery time from a 50% load transient is less than 5 milliseconds.

**Tight Static Regulation:** Both line and load regulation are better than 0.005% over the entire rated range of input voltage and output current.

**Radio Frequency Interference:** A conducted-noise line filter is provided.

### *APPLICATIONS*

**Manufacturing Processes:** Spraying and Flocking Systems, Ion Implantation, Fault Detection, Corona Testing, Precipitation and Deposition Systems.

**Displays:** Image Intensification, Radar Displays, Flying Spot Generators and Scanners, Waveform Generators, Large Screen CRT Display, Oscilloscopes, Projection TV.

**R & D Instrumentation:** Mass Spectrometers, Electron Microscopes, Air Pollution Instrumentation, Capacitor Bank Charging, Nuclear Apparatus. Radiation Counters, Lasers, Voltmeter/Voltbox Calibrators, Plasma and Pinch System.

**Powering HV Devices:** X-ray Sources, Photomultipliers, BWO/TWT/Klystron Tubes, Radiation Detectors, Accelerators, Electron Gun Devices.

### *PARTIAL SPECIFICATIONS*

**Input:** 105-125 Vrms, 50-60 Hz, single phase.

**Output:** Continuous, stable adjustability from 0 to rated voltage and current.

**Voltage Regulation:** 0.005%.

**Stability:** 0.01% per hour after ½ hour warm-up. 0.05% per 8 hours.

**Temperature Coefficient:** 0.01%/°C.

**Polarity:** Reversible or fixed. Units available with positive, negative or reversible high voltage with respect to chassis ground.

**Protection:** Automatic current regulation protects power supply against all overload conditions, including arcs and short circuits.

**FRONT PANEL ELEMENTS**

Circuit breaker, pilot lamp, kilovoltmeter, milliammeter, 10 turn voltage control with "Duodial"® readout and lock set.

### *LG SERIES — RACK OR CABINET STYLE*

| Output Voltage | Output Current | Panel Height |
|---|---|---|
| 0-5 KV | 20.0 mA | 5¼" |

# The big switch

## ...is to switching power supplies.

For better performance more and more design engineers are switching from linear to switching power supplies.

Switchers are 1/3 the size and 1/4 the weight of linears; they use only half as much energy and they offer far better protection against brownouts and power interruptions.

And Gould makes it easy to make the switch.

Forty-six single and multiple output switchers with power levels from 8-2,250 watts are available in a wide variety of voltage/current combinations. The char below will give you a brief overview.

Or if you need custom supplies Gould can provide designs to meet your exact specification.

You'll be backed by a high-volume production capability and a worldwide service network that only a $1.6 billion company like Gould could offer.

Gould Inc., Electronic Components Division, 4601 North Arden Drive, El Monte, CA. Phone (213) 442-7755 or TWX 910-587-4934.

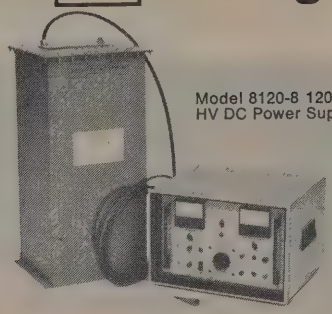
HIPOTRONICS

# High Voltage DC Power Supplies



Model 8120-8 120kV — 8 mA
HV DC Power Supply

**Hipotronics offers a full line of unregulated power supplies with output voltages ranging from 1 to 1,000 kV and current outputs from 1.3 mA to 50 A.**

**Conservatively designed for continuous use, every model is supplied with a fully instrumented control console. The type of transformer insulation varies according to the voltage requirements. All units below 30 kV are air insulated while oil insulation is provided for higher voltages.**

**A complete overload system with surge devices protects the control circuitry against repeated short circuits at full output and ensures safe, trouble free operation.**

## Design Features

- Reversible polarity
- Output-connected, triple-range voltage meter
- Triple-range current meter in return leg of HV circuit
- Adjustable overload relay, 10% to 110% rated current, with reset button
- Rated current available from zero to rated voltage
- Meter recalibration potentiometers

## Customized Capability

Hipotronics has designed and custom-manufactured a wide variety of power supplies for a wide variety of uses. Customized power supplies include application-oriented units for: Electrostatics, accelerators, lasers, high power radar, high voltage component testing, and many more.

## Personnel Safety Features

- Output shorting solenoid and/or bleeder resistor
- Series-limiting resistor in output circuit
- External interlock provision and pilot light
- Zero start interlock and pilot light

## Equipment Safety Features

- Surge protection for meters and relays
- Backup circuit breaker in primary of HV transformer
- Input circuit breakers and pilot light

### Specifications

**1 KILOWATT OUTPUT UNITS**

| Model No. | Current (mA) | Voltage (kV) |
|---|---|---|
| 801-1000 | 1000 | 1 |
| 802-500 | 500 | 2 |
| 803-330 | 330 | 3 |
| 804-250 | 250 | 4 |
| 805-200 | 200 | 5 |
| 806-165 | 165 | 6 |
| 807.5-130 | 130 | 7.5 |
| 810-100 | 100 | 10 |
| 815-65 | 65 | 15 |
| 820-50 | 50 | 20 |
| 825-40 | 40 | 25 |
| 830-33 | 33 | 30 |
| 840-25 | 25 | 40 |
| 850-20 | 20 | 50 |
| 860-16 | 16 | 60 |
| 875-13 | 13 | 75 |
| 890-11 | 11 | 90 |
| 8100-10 | 10 | 100 |
| 8120-8 | 8 | 120 |
| 8150-6.5 | 6.5 | 150 |
| 8200-5 | 5 | 200 |

**Input:** 115 volts, 50/60 Hz, 1 phase, 12 amps.
**Regulation:** 15% no load to full load.
**Ripple:** 2% rms.
**HV Output:** 20-foot shielded cable (bushing available on request).

**1.5 KILOWATT OUTPUT UNITS**

| Model No. | Current (mA) | Voltage (kV) |
|---|---|---|
| 801-1500 | 1500 | 1 |
| 802-750 | 750 | 2 |
| 803-500 | 500 | 3 |
| 804-375 | 375 | 4 |
| 805-300 | 300 | 5 |
| 806-250 | 250 | 6 |
| 807.5-200 | 200 | 7.5 |
| 810-150 | 150 | 10 |
| 815-100 | 100 | 15 |
| 820-75 | 75 | 20 |
| 825-60 | 60 | 25 |
| 830-50 | 50 | 30 |
| 840-37.5 | 37.5 | 40 |
| 850-30 | 30 | 50 |
| 860-25 | 25 | 60 |
| 875-20 | 20 | 75 |
| 890-17 | 17 | 90 |
| 8100-15 | 15 | 100 |
| 8120-12.5 | 12.5 | 120 |
| 8150-10 | 10 | 150 |
| 8200-7.5 | 7.5 | 200 |
| 8250-6.0 | 6 | 250 |
| 8300-5.0 | 5 | 300 |

**Input:** 115 volts, 50/60 Hz, 1 phase, 20 amps.
**Regulation:** 15% no load to full load.
**Ripple:** 2% rms.
**HV Output:** 20-foot shielded cable (bushing available on request).

**2.5 KILOWATT OUTPUT UNITS**

| Model No. | Current (mA) | Voltage (kV) |
|---|---|---|
| 801-2500 | 2500 | 1 |
| 802-1250 | 1250 | 2 |
| 803-830 | 830 | 3 |
| 804-625 | 625 | 4 |
| 805-500 | 500 | 5 |
| 806-425 | 425 | 6 |
| 807.5-300 | 300 | 7.5 |
| 810-250 | 250 | 10 |
| 815-160 | 160 | 15 |
| 820-125 | 125 | 20 |
| 825-100 | 100 | 25 |
| 830-80 | 80 | 30 |
| 840-60 | 60 | 40 |
| 850-50 | 50 | 50 |
| 860-40 | 40 | 60 |
| 875-33 | 33 | 75 |
| 890-27 | 27 | 90 |
| 8100-25 | 25 | 100 |
| 8120-20 | 20 | 120 |
| 8150-16 | 16 | 150 |
| 8200-12.5 | 12.5 | 200 |
| 8250-10 | 10 | 250 |
| 8300-8 | 8 | 300 |
| 8400-6 | 6 | 400 |
| 8500-5 | 5 | 500 |

**Input:** 115 volts, 50/60 Hz, 1 phase, 30 amps.
**Regulation:** 15% no load.
**Ripple:** 2% rms.
**HV Output:** 20-foot shielded cable (bushing available on request).

**5 KILOWATT OUTPUT UNITS**

| Model No. | Current (mA) | Voltage (kV) | Input |
|---|---|---|---|
| 801-5000 | 5000 | 1 | 208/220 v, 3 phase, 50/60 Hz, 20 amps |
| 802-2500 | 2500 | 2 | |
| 803-1666 | 1666 | 3 | |
| 804-1250 | 1250 | 4 | |
| 805-1000 | 1000 | 5 | |
| 806-840 | 840 | 6 | |
| 807.5-670 | 670 | 7.5 | |
| 810-500 | 500 | 10 | |
| 815-335 | 335 | 15 | |
| 820-250 | 250 | 20 | |
| 825-200 | 200 | 25 | |
| 830-166 | 166 | 30 | 208/220 v, single phase, 50/60 Hz, 35 amps |
| 840-125 | 125 | 40 | |
| 850-100 | 100 | 50 | |
| 860-84 | 84 | 60 | |
| 875-67 | 67 | 75 | |
| 890-56 | 56 | 90 | |
| 8100-50 | 50 | 100 | |
| 8120-41.5 | 41.5 | 120 | |
| 8150-33.3 | 33.3 | 150 | |
| 8200-25 | 25 | 200 | |
| 8250-20 | 20 | 250 | |
| 8300-16.6 | 16.6 | 300 | |
| 8400-12.5 | 12.5 | 400 | |
| 8500-10.0 | 10 | 500 | |

**Regulation:** 10% 3 phase, 15% 1 phase, no load to full load.
**Ripple:** 1% or 5% rms, 3 phase units; 2% rms.
**HV Output:** 20-foot shielded cable (bushing available on request).

**10 KILOWATT OUTPUT UNITS**

| Model No. | Current (mA) | Voltage (kV) | Input |
|---|---|---|---|
| 801-10A | 10 amp | 1 | 208/220 v, 3 phase, 50/60 Hz, 40 amps |
| 802-5A | 5 amp | 2 | |
| 803-3.3A | 3.3 amp | 3 | |
| 804-2.5A | 2.5 amp | 4 | |
| 805-2A | 2 amp | 5 | |
| 806-1.65A | 1.65 amp | 6 | |
| 807.5-1.3A | 1.3 amp | 7.5 | |
| 810-1A | 1 amp | 10 | |
| 815-650 | 650 | 15 | |
| 820-500 | 500 | 20 | |
| 825-400 | 400 | 25 | |
| 830-330 | 330 | 30 | |
| 840-250 | 250 | 40 | 440/480 v, single phase, 50/60 Hz, 35 amps |
| 850-200 | 200 | 50 | |
| 860-160 | 160 | 60 | |
| 875-130 | 130 | 75 | |
| 890-110 | 110 | 90 | |
| 8100-100 | 100 | 100 | |
| 8120-80 | 80 | 120 | |
| 8150-65 | 65 | 150 | |
| 8200-50 | 50 | 200 | |
| 8250-40 | 40 | 250 | |
| 8300-33 | 33 | 300 | |
| 8400-25 | 25 | 400 | |
| 8500-20 | 20 | 500 | |
| 8600-16 | 16 | 600 | |
| 8750-13 | 13 | 750 | |
| 81000-10 | 10 | 1000 | |

**Regulation:** 10% 3 phase, 18% 1 phase, no load to full load.
**Ripple:** 1% or 5% rms, 3 phase units; 2% rms, 1 phase units (see chart).
**HV Output:** Cable to 60 kV; Toroid over 600 kV.

| 8500-50 | 50 | 500 | |
| 8600-42 | 42 | 600 | |
| 8750-33 | 33 | 750 | |
| 81000-25 | 25 | 1000 | |

**Regulation:** 10% 3 phase, 18% 1 phase, no load to full load.
**Ripple:** 1% or 5% rms, 3 phase units; 2% rms, 1 phase units (see chart).
**HV Output:** Cable to 600 kV; Toroid over 600 kV.

**50 KILOWATT OUTPUT UNITS**

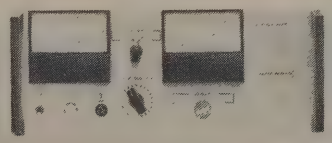
| Model No. | Current (mA) | Voltage (kV) | Input |
|---|---|---|---|
| 801-50A | 50 amp | 1 | 440/480 v, 3 phase, 50/60 Hz, 90 amps |
| 802-25A | 25 amp | 2 | |
| 803-16.6A | 16.6 amp | 3 | |
| 804-12.5A | 12.5 amp | 4 | |
| 805-10A | 10 amp | 5 | |
| 806-8.4A | 8.4 amp | 6 | |
| 807.5-6.7A | 6.7 amp | 7.5 | |
| 810-5A | 5 amp | 10 | |
| 815-3.3A | 3.3 amp | 15 | |
| 820-2.5A | 2.5 amp | 20 | |
| 825-2A | 2 amp | 25 | |
| 830-1.7A | 1.7 amp | 30 | |
| 840-1.25A | 1.25 amp | 40 | |
| 850-1A | 1 amp | 50 | |
| 860-830 | 830 | 60 | |
| 875-670 | 670 | 75 | |
| 890-560 | 560 | 90 | |
| 8100-500 | 500 | 100 | |
| 8120-420 | 420 | 120 | 1 phase, 160 amps |
| 8150-335 | 335 | 150 | |
| 8200-250 | 250 | 200 | |
| 8250-200 | 200 | 250 | |
| 8300-166 | 166 | 300 | |
| 8400-125 | 125 | 400 | |
| 8500-100 | 100 | 500 | |
| 8600-83 | 83 | 600 | |
| 8750-67 | 67 | 750 | |
| 81000-50 | 50 | 1000 | |

**Regulation:** 10% 3 phase, 18% 1 phase, no load to full load.
**Ripple:** 1% or 5% rms, 3 phase units; 2% rms, 1 phase units (see chart).
**HV Output:** Cable to 600 kV; Toroid over 600 kV.

# Metered Power Packs

The R Series consists of eight metered DC high voltage power packs with output voltages from 2.5 to 60 kV and a current rating of 5 mA on all models except the R60 A which has a 2.5 mA rating.

These compact, highly miniaturized units are designed for long life and trouble free operation. All units are housed in hermetically sealed cans, and are filled with mineral type transformer oil or epoxy. The conservative design precludes component failure caused by long term corona degradation of the insulation and guarantees a pure DC output free of interfering high frequency signals which might possibly influence or affect the system which it is powering.



MODEL R20B, 20 kV-5 mA HV SUPPLY

**Specifications**
**Input:** 0-125 volts, output voltages and currents (stated for nominal 117 volt input)
**Regulation:** 10 to 15% no load to full load
**Ripple:** 0.5% rms per milliampere output

**Optional Extras**
1. Bench top cabinet
2. Short circuit limiter — ideal for capacitor charging, flocking, electrostatic operations, etc. Supply will short circuit on output and limit current to 5 mA

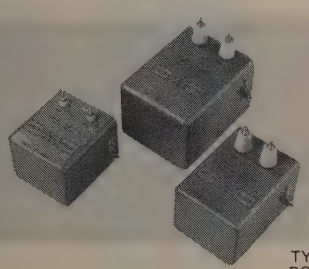
| Model No. | Output (kV) | Current (mA) | (% rms/mA) Ripple | Polarity | kV Meter (kV) | Current Meter (mA) | Size WxHxD (in.) |
|---|---|---|---|---|---|---|---|
| R2B | 0-2.5 | 5 | .5 | Reversible | 0-3 | 0-5 | 19x7x8 |
| R5B | 0-5 | 5 | .5 | Reversible | 0-6 | 0-5 | 19x7x8 |
| R10B | 0-10 | 5 | .5 | Reversible | 0-12 | 0-5 | 19x7x8 |
| R15B | 0-15 | 5 | .5 | Reversible | 0-15 | 0-5 | 19x7x8 |
| R20B | 0-20 | 5 | .5 | Reversible | 0-25 | 0-5 | 19x7x8 |
| R30B | 0-30 | 5 | .5 | Reversible | 0-30 | 0-5 | 19x12x10 |
| R50B | 0-50 | 5 | .5 | Reversible | 0-50 | 0-5 | 19x12x10 |
| R60B | 0-60 | 2.5 | .5 | Reversible | 0-60 | 0-2.5 | 19x12x10 |

# Standard HV Power Packs

A wide range of durable, lightweight power packs are available with outputs from 2.5 to 60 kV and current ratings from 2 to 10 mA. Solid state rectifiers ensure compactness and good regulation on every unit.

The output connections are high voltage ceramic bushings on Models 30 kV and below, and plug-in receptacles for coaxial cables on higher voltage units.

Every component in the supply is operated below its design rating and pre-assembly hipot tested at 1½ times its operating voltage.



TYPICAL HV POWER PACKS

**Specifications**

| Model No. | Output (kV) | Current (mA) | Size HxWxD (in.) |

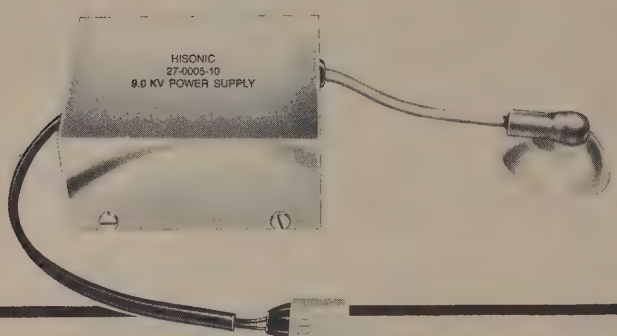
# CUSTOM POWER SUPPLIES

**DC To DC Or DC To AC**
- Custom designed
- High reliability
- Operation temperatures up to 125°C
- High efficiency
- Low E.M.I.
- Wide variety of package configurations.
- Voltage regulators designed to meet customer requirements.

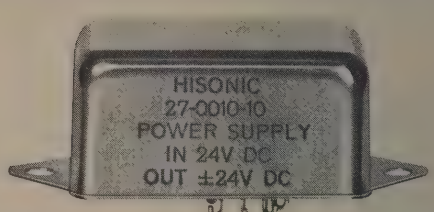


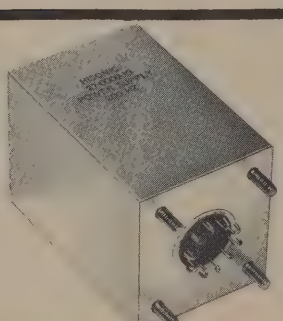
## HIGH VOLTAGE DC TO DC POWER SUPPLY

DC Input: 23 V @ 240 ma
Outputs: 9 KV DC @ 60 ua
400 V DC @ 4 ma
12 V RMS (13 KHZ) @ 75 ma
Special characteristics: designed for operation @ 35,000 ft.
Physical size:
3.7" x 2.81" x 1.75" metal cased

## LOW VOLTAGE DUAL OUTPUT DC TO DC POWER SUPPLY

DC Input: 24 V @ 350 ma
Outputs: +24 V @ 125 ma
−24 V @ 125 ma
Special characteristics: hermetically sealed.
Physical size: 2.125" x 1.25" x .875" metal cased





## MULTI-OUTPUT DC TO AC POWER SUPPLY

DC Input: 28 V @ 2.5 a
Outputs: 30 V peak @ 270 ma
30 V peak @ 630 ma
30 V peak @ 1 ma w/ct
3.8 V peak @ 320 ma
Special characteristics: all outputs are 200 HZ square wave — hermetically sealed
Physical size: 3.125" x 2.312" x 2.06" metal cased
Output voltage(s) may be revised as long as the total power remains the same.

## STANDARD EPOXY INCAPSULATED DC TO DC POWER SUPPLIES

DC Input 12 V @ 150 ma

| Part No's | Output |
|---|---|
| 27-0011-11 | ±6 V DC @ 100 ma |
| -12 | ±10 V DC @ 60 ma |
| -13 | ±12 V DC @ 50 ma |
| -14 | ±18 V DC @ 32 ma |
| -15 | ±24 V DC @ 25 ma |

Physical size: 1.65" x 1.3" x 1"

## DC/DC CONVERTERS

**ACTUAL SIZE**
.875″ × 1.75″ × .375″

- **UP TO 9 WATTS OUTPUT POWER**
- **SMALL SIZE – 1.5 IN² (10 CM²)**
- **HIGH-EFFICIENCY HYBRID MICROELECTRONICS DESIGN**
- **LOW COST — HIGH RELIABILITY**
- **SINGLE OR DUAL OUTPUTS**
- **FULLY ISOLATED TO >100 MEGOHMS AT 500VDC**
- **REGULATED AND UNREGULATED MODELS**
- **SOLID POTTED MODULE WITH HEAVY-DUTY PINS**
- **CUSTOM INPUT/OUTPUT CONFIGURATIONS TO YOUR SPECIFICATION**

*The* **μPower-MINI** product line is comprised of a broad family of miniature *DC-to-DC Converters designed for "on-card" power con* *version where high power outputs are required, but little space is provided.* **μPower-MINI** converters can provide up to 9 watts out put, depending on the input/output configuration selected. Available in *SINGLE or DUAL OUTPUTS,* these converters can provide + or ± OUTPUTS with *100 MEGOHM @ 500VDC ISOLATION.* The **μPower-MINI** converter's small size is misleading, as they operat very efficiently and reliably, even when operating at maximum loads. *HYBRID MICROELECTRONIC* construction provides mor power per dollar than competitive units in their size/price range.

**APPLICATIONS:** μProcessors, μComputers, Digital Circuits, Analog Circuits, Displays and Readouts in Computers, Industrial, Aerc space, Telephone, Automotive, Marine and Communications electronic equipment. **μPower-MINI** converters are also available, o special order, in Military grades which meet *MIL-STD-883,* CLASS B and *MIL-M-38510.*

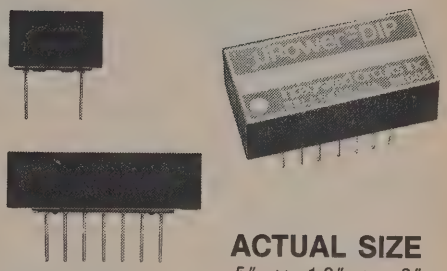
## DC/DC CONVERTERS

- 14 PIN SINGLE DUAL-IN-LINE (DIP) PACKAGE
- DIP SOCKET COMPATIBLE
- HIGH-EFFICIENCY HYBRID MICROELECTRONICS DESIGN
- LOW COST — HIGH RELIABILITY
- SINGLE OR MULTIPLE OUTPUTS
- 3 TO 7VDC, 5VDC, 12VDC, 24VDC AND 48VDC INPUT RANGES
- UP TO 1.5 WATTS REGULATED OUTPUT
- REGULATED AND ISOLATED MODELS AVAILABLE
- CUSTOM INPUT/OUTPUT CONFIGURATIONS TO YOUR SPECIFICATIONS



**ACTUAL SIZE**
.5″ × 1.0″ × .3″

The **μPower-DIP** product line is comprised of a broad family of micro-miniature *DC-to-DC Converters* designed for "on-card" power conversion. All **μPower-DIP** models are pin compatible with standard 14 PIN DIP sockets. Depending on the input/output configuration selected, up to 1.5 watts of output power can be provided by a single **μPower-DIP.** Their small size allows better use of space in new and existing designs by requiring only one primary supply source. Available in *SINGLE or DUAL OUTPUTS,* the **μPower-DIP** can provide +, +/− or ± voltages as shown in the chart below. The *HYBRID MICROELECTRONIC* construction of the **μPower-DIP** provides more power in a smaller package than any other competitive unit regardless of price.

**APPLICATIONS:** μProcessors, μComputers, Digital Circuits, Analog Circuits, Displays and Readouts in Computers, Industrial, Aerospace, Telephone, Automotive, Marine and Communications electronic equipment. **μPower-DIP** converters are also available, on special order, in Military grades which meet *MIL-STD-883,* CLASS B and *MIL-M-38510.*

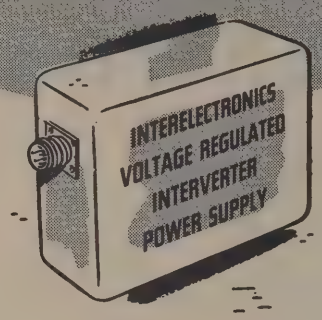
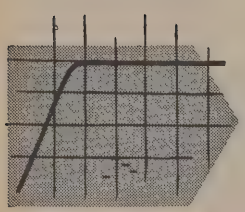
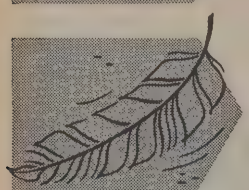
# PROVEN RELIABILITY—
## DC-DC, DC-AC, SOLID-STATE POWER INVERTERS
## over 260,000 logged hours— voltage-regulated, frequency-controlled, for missile, telemeter, ground-support, 135°C all-silicon units available now—

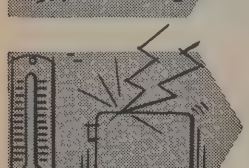




Interelectronics all-silicon thyratron-like gating elements and cubic-grain toroidal magneti components convert DC to any desired number of AC or DC outputs from 1 to 10,000 watts.

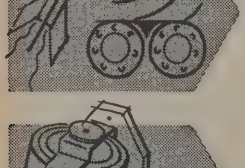


Ultra-reliable in operation (over 260,000 logged hours), no moving parts, unharmed by shortin output or reversing input polarity. High conversion efficiency (to 92%, including voltage regulatio by Interelectronics patented reflex high-efficiency magnetic amplifier circuitry).

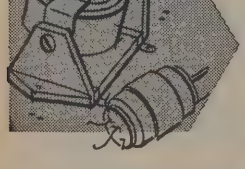


Wide input voltage range (1 to 250 volts DC). Wide input voltage regulation (output voltag maintained with variations up to 50% in input voltage).

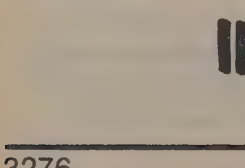
Light weight (to 6 watts/oz.), compact (to 8 watts/cu. in.), low ripple (to 0.01 mv. p-p), excelle voltage regulation (to 0.1%), precise frequency control (to 0.2%) with Interelectronics extrem environment magnetostrictive standards or to 0.0001% with fork or piezoelectric standards.



Complies with MIL specs. for shock (100G 11 misc.), acceleration (100G 15 min.), vibratic (100G 5 to 5,000 cps.), temperature (to 150 degrees C), RF noise (I-26600).



AC single and polyphase units supply sine waveform output (to 2% harmonics), will deliver u to ten times rated line current into a short circuit to actuate MIL type magnetic circuit breakers fuses, will start gyros and motors with starting current surges up to ten times normal operating lir current.



Now in use in major missiles, powering telemeter transmitters, radar beacons, electronic equi ment. Single and polyphase units now power airborne and marine missile gyros, synchros, servo magnetic amplifiers.

Interelectronics—first and most experienced in the solid-state power supply field produces its ov all-silicon solid-state gating elements, all high flux density magnetic components, high temperatu ultra-reliable film capacitors and components, has complete facilities and know how—has design and delivered more working KVA than any other firm!

For complete engineering data, write Interelectronics today, or call (914) EL 8-8000 in Conger

# POWER PLUG-IN ADAPTERS

- Transformers
- Battery Chargers
- Power Supplies
- Battery Eliminators
- Power Supply/Chargers.

## FOR USE WITH ELECTRICALLY OPERATED:

- Computers and Calculators
- Office Equipment
- Home Appliances
- Alarm Systems
- Instruments
- Photographic Equipment
- Games and Toys
- Medical Appliances
- Gardening Appliances

The Jerome plug-in power units are primarily isolation step down transformers (fig. 1) making the products they operate safer to use.

Power supplies, battery chargers, battery eliminators, and combinations of these, include the isolation transformers plus rectifying and voltage regulating circuits (fig. 2 and 3).

Although many standard units are available, electrically most are engineered and designed to meet the specific requirements of the products they are to energize. Accessories can also be designed for special applications.

By using these plug-in units the designer has more flexibility and can simplify, enhance the appearance, and improve the portability of his product by not having to include a power supply in the product enclosure.

Other advantages:

- Power supply heat not included in product
- Easier maintenance of power source
- Reduction or elimination of the costly need to submit equipment for U.L. and CSA investigation.

## MODELS PI-B, PI-D, PI-E, PI-F AND PI-G

These units come in attractive stylized molded cases to make them suitable accessories for any consumer, commercial or industrial product.

**MECHANICAL FEATURES**

- Model PI-B — cord set output (terminal plugs to specification)
- Model PI-D — screw terminal output
- Model PI-E (Same as PI-B except smaller case)
- Model PI-F — large version of PI-B
- Model PI-G (Large version of PI-D)
- Molded case — dual tapered surfaces for positive push-pull grip
- Case can be molded in a variety of colors and materials
- Hot leafed stamped logos or design enhance the case appearance.
- Designed for U.L. and C.S.A. listing

**ELECTRICAL FEATURES**

- Units available to supply voltage output up to 30 volts and 35 watts of power.
- Isolated — low voltage operation of product.

## GENERAL FOR ALL ADAPTERS

**AVAILABLE AS:**

- Transformers
- Power supplies
- Battery chargers for Ni-Cad, Lead Acid, Manganese-Alkaline and other batteries
- Battery eliminators

**OTHER AVAILABLE FEATURES**

- On and Off switch
- Pilot light
- Regulated output
- Fast Charge Circuits
- Cut off circuits
- And others to customer requirements.
- 240/120 switchable input

**Designed for Minimum Size and Weight, Single and Multiple Input and Output.**

# KEPCO power supplies

**Power Supplies for the OEM, Power Supplies for the Laboratory. Power Supplies for the System Designer . . .**

Kepco offers a broad spectrum of well made a-c to d-c and d-c to d-c voltage and current stabilizers employing various control techniques:

**LINEAR:** Series pass and shunt circuits.
**FERRORESONANT:** Modular & systems styles.
**SWITCHING:** 25 KHz modules for small size.

## KEPCO also produces a variety of specialty Power Supplies.

**UNIPOLAR OPERATIONAL:** programmable power supplies responsive to analog controls, variable resistance and analog inputs (including an IEEE-488 compatible programmer).

**UNIPOLAR OPERATIONAL - High Speed:** programmable at substantially faster rates than the conventionally filtered models for application where the energy storage of an ordinary output capacitor is not desired.

**BIPOLAR OPERATIONAL - High Speed:** called "BOP", these power supplies are programmable in four quadrants (plus and minus voltage, plus and minus current, source & sink) going linearly through zero. BOP's function just like a power op-amp.

**OEM MODULAR:** these models, provided without meters or controls, are designed to be built right into your system. There are three different types catalogued below; Linear (series pass), Ferroresonant (saturating transformer) and Switching (25 KHz).

## OEM LINEAR MODULES

(Please refer to the JQE and CPS designs which are available unmetered as OEM LINEAR MODULES.)

### 20 WATT PROGRAMMABLE MODELS

**PAT**

Programmable voltage stabilizer, current limited.

**PCX**

Programmable voltage stabilizer, current limited.

Table of volt-amperes for PAT, PCX, CCP and OPS-I.

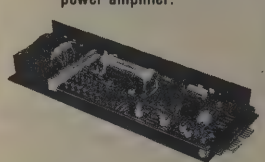
| VOLTS | AMPS |
|---|---|
| 0-7 | 0-2 |
| 0-15 | 0-1.5 |
| 0-21 | 0-1 |
| 0-40 | 0-0.5 |
| 0-72 | 0-0.3 |
| 0-100 | 0-0.2 |

**CCP**

Programmable current stabilizer, voltage limited.

**OPS group I**

Fast programmable, model for use as operational power amplifier.



### 50 WATT PROGRAMMABLE MODELS

**PTR**

Programmable voltage/current stabilizer with automatic crossover and optional overvoltage protection, conventional speed design.

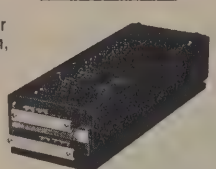


Table of volts-amperes for PTR and OPS-III.

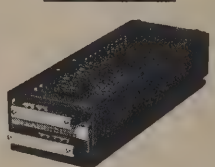
| VOLTS | AMPS |
|---|---|
| 0-7 | 0-5.5 |
| 0-15 | 0-3.3 |
| 0-21 | 0-2.5 |
| 0-40 | 0-1.4 |
| 0-72 | 0-0.8 |
| 0-100 | 0-0.6 |

**OPS group III**



OPS-III is like the PTR, except is a fast programmable design for high speed programming. As a current stabilizer, it has fast recovery. No OVP available.

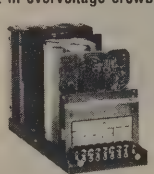
### LINEAR OEM POWER SUPPLIES

**BKFI**

Non-programmable voltage stabilizers with re-entrant current limiting, built-in overvoltage crowbar.

**BKFII**

Non-programmable, voltage stabilizer with re-entrant current limting. Built-in overvoltage crowbar.



**BKFI**

## LABORATORY/SYSTEMS MODELS

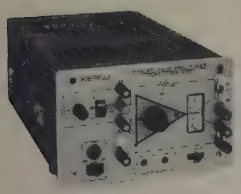
### BOP

Bipolar operational power amplifiers for bi-directional control linearly through zero.



| VOLTS | AMPS |
|---|---|
| +15 to −15 | +20 to −20 |
| +36 to −36 | +1.5 to −1.5 |
| +36 to −36 | +5 to −5 |
| +72 to −72 | +1.5 to −1.5 |
| +72 to −72 | +5 to −5 |

See HIGH VOLTAGE MODELS for additional BOP units.

### MPS

Multiple output voltage stabilizer with adjustable current limits.

| | |
|---|---|
| Output #1 | 0-6V, 0-5A |
| Output #2 | 0 to +20V, 0-1A |
| Output #3 | 0 to −20V, 0-1A |

Outputs 2 and 3 are tracked. Output 1 is protected by an overvoltage crowbar.

Model MPS 620M is the ideal bench power supply for the logic experimenter.

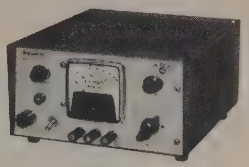
### PRR

Ferroresonant stabilized 1000 W designs producing fixed voltages.

| VOLTS | AMPS |
|---|---|
| 12 | 0-77 |
| 24 | 0-42 |
| 28 | 0-36 |
| 48 | 0-22 |

### ABC

Small bench-style voltage stabilizers with current limiting.

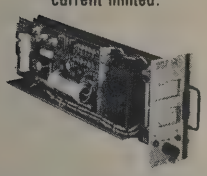


| VOLTS | AMPS |
|---|---|
| 0-2 | 0-1 |
| 0-7.5 | 0-2 |
| 0-10 | 0-0.75 |
| 0-15 | 0-1 |
| 0-18 | 0-0.5 |
| 0-30 | 0-0.3 |
| 0-40 | 0-0.5 |
| 0-100 | 0-0.2 |

## PLUG-IN POWER SUPPLIES

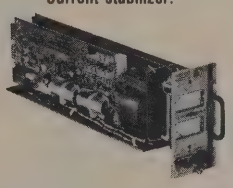
### PCX-MAT

Voltage stabilizers, current limited.



### CC

Current stabilizer.



### OPS group II

Fast programmable power amplifiers with operational patch panel.

Table of volts-amperes for PCX-MAT, CC and OPS II

| VOLTS | AMPS |
|---|---|
| 0-7 | 0-2 |
| 0-15 | 0-1.5 |
| 0-21 | 0-1 |
| 0-40 | 0-0.5 |
| 0-72 | 0-0.3 |
| 0-100 | 0-0.2 |

PCX-MAT, CC and OPS-II models may be plugged into a choice of single, dual or triple bench-style housings or into rack housings RA-32 and RA 22-6A. (See Hardware.)

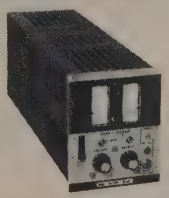
## 50-100 WATT STABILIZERS IN "QUARTER-RACK" FORMAT

### JQE

General purpose Laboratory/Systems voltage stabilizers featuring adjustable current limiting, programmability, optional overvoltage protection. JQE are also available unmetered for OEM use.

### JMK

System oriented automatic crossover voltage-current stabilizers with built-in overvoltage protector.



### OPS group IV-V

Similar to JMK, except the capacitorless output circuit is suitable for fast programming applications. No overvoltage protector.

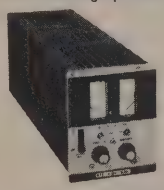


Table of volts-amperes for JQE* JMK and OPSIV-V

| VOLTS | AMPS |
|---|---|
| 0-6 | 0-5 |

| 0-200 | 0-0.1 |
| 0-425 | 0-0.05 |
| 0-1000 | 0-0.02 |
| 0-1500 | 0-0.01 |
| 0-2500 | 0-0.002 |

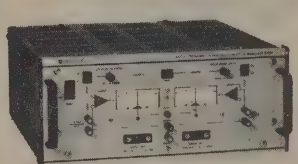
### APH

High voltage laboratory power supplies offering continuously adjustable/programmable voltage and current in an automatic crossover configuration.

| VOLTS | AMPS |
|---|---|
| 0-500 | 0-0.04 |
| 0-1000 | 0-0.02 |
| 0-2000 | 0-0.01 |

### BOP

Bipolar operational power amplifiers for bi-directional control linearly through zero.

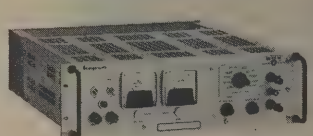


High Voltage Models

| VOLTS | AMPS |
|---|---|
| +500 to −500 | +0.08 to −0.08 |
| +1000 to −1000 | +0.04 to −0.04 |

### BHK

Programmable voltage and current stabilizer for high voltage arranged in an automatic crossover configuration. Provision is made for disconnecting the output capacitor for high speed programming.



| VOLTS | AMPS |
|---|---|
| 0-500 | 0-0.4 |
| 0-1000 | 0-0.2 |
| 0-2000 | 0-0.1 |

## HIGH VOLTAGE MODELS

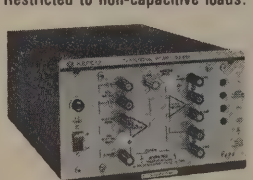
### HB

Adjustable voltage stabilizers.

| VOLTS | AMPS |
|---|---|
| 0-325 | 0-0.4 |
| 0-325 | 0-0.8 |
| 0-525 | 0-0.5 |

### OPS group IXB

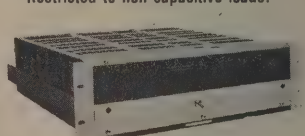
Similar to APH, except equipped with an operational patch panel and featuring a capacitorless output for fast programming applications. Restricted to non-capacitive loads.



| VOLTS | AMPS |
|---|---|
| 0-500 | 0-0.04 |
| 0-1000 | 0-0.02 |
| 0-2000 | 0-0.01 |

### OPS group X

A capacitorless, fast-programmable design for high voltage. Restricted to non-capacitive loads.

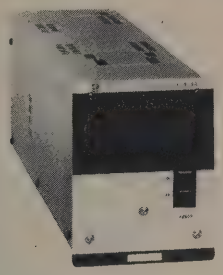


| VOLTS | AMPS |
|---|---|
| 0-3500 | 0-0.01 |
| 0-5000 | 0-0.005 |

KEPCO, INC. • 131-38 SANFORD AVENUE • FLUSHING, N.Y. 11352 U.S.A. • (212) 461-7000 • TWX #710-582-2631 • Cable: KEPCOPOWER NEWYORK

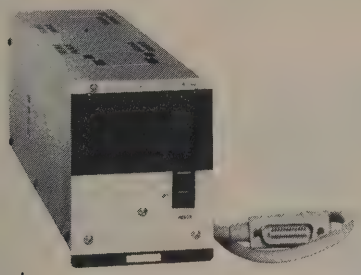
# PROGRAMMERS

**These programmers are designed for use with all Kepco operationally-programmable power supplies (high speed *and* conventionally filtered). They enable you to interface your d-c power supplies with the logic bus of a computer-controlled system.**



**SN-500**—Parallel Input

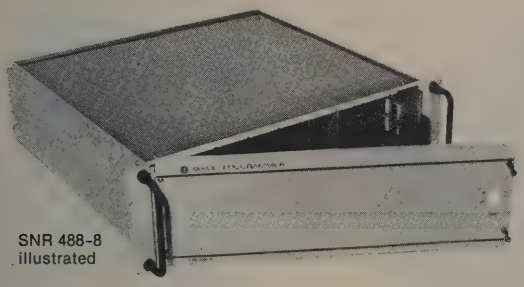
| | | |
|---|---|---|
| SN 500-121 | 1 channel | 12-bit binary |
| SN 500-122 | 2 channel | 12 bit binary |
| SN 500-031 | 1 channel | 3-digit BCD |
| SN 500-032 | 2 channel | 3-digit BCD |



**SN-488**—Serial Input

A Kepco implementation of IEEE-488 for small one and two channel systems on the GP-IB.

| | | |
|---|---|---|
| SN 488-121 | 1 channel | 12-bit binary |
| SN 488-122 | 2 channel | 12-bit binary |
| SN 488-031 | 1 channel | 3-digit BCD |
| SN 488-032 | 2 channel | 3-digit BCD |



SNR 488-8 illustrated

**SNR-488:** A Kepco implementation of IEEE-488 for multiple channel installations on the GP-IB.

SNR 488-4 can accommodate (4) plug-in, 2-channel program cards.

SNR 488-8 can accommodate (8) plug-in, 2-channel program cards.

**Plug-in Cards for SNR Card Cages:**

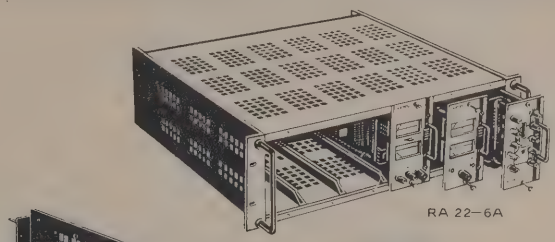
| | | |
|---|---|---|
| SN-488B | 2 channels | 12-bit binary |
| SN-488D | 2 channels | 3-digit BCD |

# KEPCO POWER SUPPLIES HARDWARE

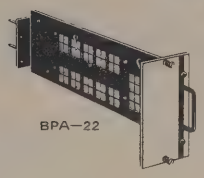
## RA 22-6A Rack System

**FOR PLUG-IN MODELS: OPS–II, PCX–MAT and CC**

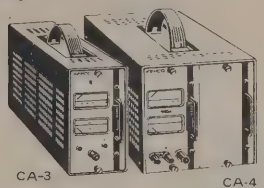
(OPS-I and PCX models can also be mounted using BPA-22 Adapter)



RA 22–6A

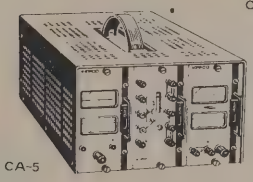


BPA–22



CA-3

CA-4

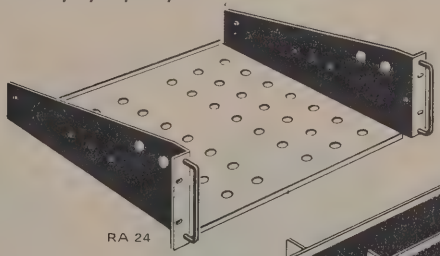


CA-5

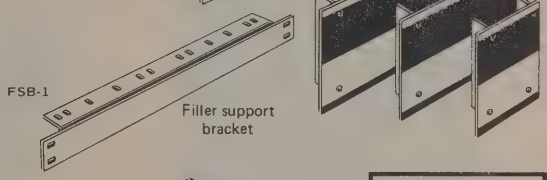
Bench Housings:
CA-3 — Single
CA-4 — Dual
CA-5 — Triple

## RA 24 Rack System

**The RA–24 will house ¼-, ½-, and ¾-rack models in the following groups: APH, BOP, CPS, JMK, JQE, NTC, MPS, OPS IV, V, VI, VII, IX-B.**



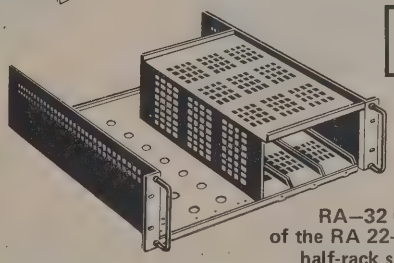
RA 24



FSB-1

Filler support bracket

## RA-32 Rack System



**RA–32 Combines (3) slots of the RA 22–6A system with a half-rack space from RA–24.**

# Switchers from

**Wide selection of power ratings and configurations**

We make a wider variety of switching regulated power supplies than anybody else. And that's all we make. Seven standard series, 22 case styles, in thousands of different models, 75 to 1500 watts. Convection-cooled and fan-cooled.

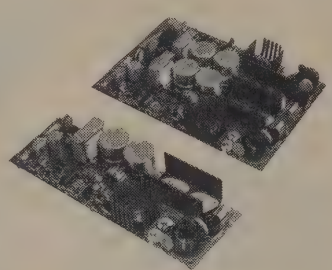
We offer one- through seven-output units — and a variety of packaged and open-frame configurations for a broad range of applications.

**More power in smaller packages**

Nobody packs more power in smaller, more compact, lightweight (as little as 1.25 lbs.) packages than we do. Up to 2.45 watts/in.$^3$—more than twice the density of competitive switchers; four to five times the density of linears... Up to 80% efficiency ... Many models UL-recognized; all models designed to meet UL 478... Each carries a 2-year guarantee.

**Seventh in the MITE Series**

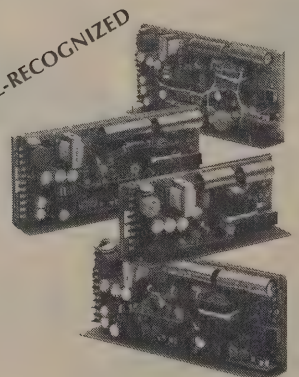
Here's our newest — the Teeny-Tiny MITE Series. This economical, plug-in circuit board switcher series is convection-cooled, 75 watts, 1 - outputs, UL-designed. Input: 92 - 1 V AC or 180 - 260 V AC, 47-440 Hz. TTM-11 delivers 75 watts in a singl output unit, 5 - 28 V DC, that me sures 10.5" L x 3.5" W x 2" H. TTM- Series delivers 75 watts in multipl output (1 - 4) models — primary: 5 DC @ 10 amps; auxiliary: 5 - 24 V D @ up to 1.5 amps — that (tentativel measure 10.5" L x 7" W x 2" H.



**Have we got switchers for you!**

Review the general specificatio for our switchers. Chances are you find that we *do* have a switcher tha ideal for your application. Sized to small-space requirements. Priced to small-budget requirements. Less tha 60¢/watt in quantity. Call or write f details.

UL-RECOGNIZED



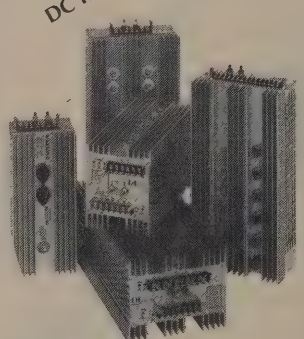
## Tiny-MITE™

**TM Series**

Economical, open-frame, convection-cooled, low power, UL-recognized.

| | |
|---|---|
| **Input** | 92 - 130 V AC or 180 - 260 V AC, 47 - 440 Hz |
| **Power** | 100 - 175 watts |
| **Outputs** | 1 - 4 |

DC INPUT



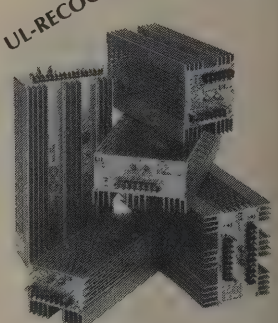
## Dyna-MITE™

**DM Series**

DC input, convection-cooled, medium power, UL-designed.

| | |
|---|---|
| **Input** | 48 ±10% V DC |
| **Power** | 250 - 600 watts |
| **Outputs** | 1 - 4 |

UL-RECOGNIZED



## Little-MITE™

**LM Series**

Convection-cooled, medium power, UL-recognized.

| | |
|---|---|
| **Input** | 92 - 130 V AC or 180 - 260 V AC, 47 - 440 Hz |
| **Power** | 250 - 600 watts |
| **Outputs** | 1 - 4 |

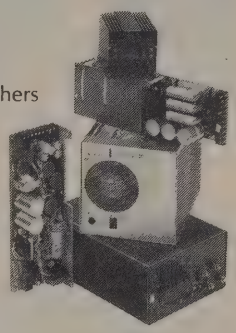
LH RESEARCH

**THE WORLD'S LARGEST SWITCHER MANUFACTURER**
**Representatives in Major Industrial Areas.**

# LH Research

**SPECIFICATIONS**
(Applicable to all series unless otherwise noted).
Efficiency ... Up to 80%
Load Regulation ... 0.4% from zero to full load.
Line Regulation ... 0.4% over entire input range.
Ripple and Noise ... 1% or 50 mv peak-to-peak.
Overvoltage Protection ... Standard on primary output, factory set at 125% ±5%. Optional for auxiliary outputs.
Overshoot and Undershoot ... 2% peak deviation for a load change of 25% @ 5A/μsec.
Response Time ... 200 μsec to 1% after a 25% load change @ 5A/μsec.
Dropout Time ... Outputs remain in regulation for 20 msec (SM Series, 50 msec) after nominal AC power is removed.
Current Limit ... Fold-back current limiting provided. Constant current limiting optionally available.
Temperature Coefficient ... ±0.02%/°C.
Operating Temperature Range ... 0°C to +50°C (0°C to +40°C on LH and MM Series), derating to 70°C.
Storage Temperature Range ... −55°C to +85°C.
Power Fail Detection ... When AC is removed, power-fail signal drops to logic (0) — logic (1) for LH Series — 10 msec before output loss.
Straight Paralleling ... Parallel operation standard on TTM. TM, LM, MM, DM, and SM Series (primary output only). Available on LH Series with constant current option.
Added Brown-out Protection ... Standard on TTM, TM, LM, and SM Series. Special AC input ranges can be provided for added protection against brown-out on LH and MM Series.
DC Inputs ... Standard 48 V DC on DM Series. LH Series units can be configured for 24, 28, 48, and 120 V DC.

**Custom designs, too**
If LH's standard switchers aren't quite suited to your needs, we can custom-design one that fits perfectly. Send us your inquiry. We'll get back to you with technical data—price and delivery information, too.



## *Mighty-**MITE*** ™

**MM Series**

Fan-cooled, medium-to-high-power, UL-recognized.

115 ±10% V AC or 230 ±10% V AC, 47 - 63 Hz; 115/230 ±10% V AC, 47 - 63 Hz (optional)

375 - 750 watts

1 - 7

## *Super-**MITE*** ™

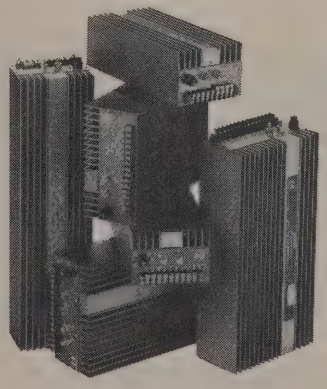
**SM Series**

Fan-cooled, high power, UL-pending, VDE internal filter meets N minus 12 curve.

85 - 130 V AC or 166 - 260 V AC, 47 - 63 Hz

750 - 1000 watts

1 - 4



## LH Series

Convection- and fan-cooled, medium power, UL-designed.

115 ±10% V AC or 230 ±10% V AC, 47 - 440 Hz (externally selectable) 47 - 63 Hz (for LH-700 and LH-800)

**Input**

250 - 1500 watts

1 - 4

**Power Outputs**

# HIGHER VOLTAGE

**REGULATED POWER SUPPLIES:** Precise voltage or current regulation of ±0.01% for line or load changes. Adjustable from Zero. Short circuit protected. R or E programming. **Completely solid state.** AC/DC ratings to 2 Megavolts and 1 Megawatt.

**Bulletin RDC-1000**

**ADJUSTABLE POWER SUPPLIES:** DC unregulated. All models fully controlled and protected with ratings from 1KV to 2000 KV at 1 Megawatt. Special "S" model with simple or no controls. Many variations in options and features available.

**Bulletin ADC-1000**

**PRECISION DIVIDERS:** Accuracies of 0.01%, 0.1%, 1.0%. DC/ACP, DC, AC RMS. Variable ratios.

**Bulletin HVD-1000**

**DC INSULATION TESTERS:** Qualitative or quantitative testing to 1 Megavolt. Portable or mobile. Burn and "Thumper" feature.

**Bulletin DCI-2000**

**AC INSULATION TESTERS:** Ratings to 400KV/1000KVA. Memory meter indicates breakdown voltage. High speed overload. Options include, Corona free, automatic voltage sequencing, variable speed control. Conforms to ASTM.

**Bulletin ACI-3000**

**TRANSFORMERS:** Isolation to 500KVDC. Filament. Air, Oil, Gas, Insulation. Ratings to 300KVRMS/400 KVA.

**IMPULSE GENERATORS:** Ratings to 5 megavolts, 10KJ.

**Bulletin IGS-1000**

**CUSTOM COMPONENTS:** Spark gaps. Crowbars. Oil filled bushings. Anti-corona Spheres and Toroids. Shielded cables. Shorting and Disconnect Switches. Series Limiting Resistors. Capacitors. Rectifiers.

**TYPICAL APPLICATIONS** Dielectric Heating • Electro Static Cooling • Carbon Deposition • Beam Separator • X-Ray Thickness Gauge • Pulse Charging Lines • Capacitor Charging • Air Purifying • Paint Spraying • Fiber Flocking • Mineral Separation • Grain Cleansing • Recovery of Precious Metal Dust • Electron and Field Ion Microscopy • Testing Large Rotating Machinery • Cloud Chamber • Vacuum Arc Experiments • Removal of Liquid Fuel Contaminants • Killing Bacteria • Electron Beam Welding and Machining • Zone Heating • Testing Liquid and Solid Dielectrics • Processing Razor-Blades • Processing Vegetables • Spectroscopy • Spark Chamber • Processing Synthetic Rubber • Charging Electrostatic Antennae for Cloud Study • Ion Propulsion Engines • Injection and Focusing Devices on High Energy Accelerators • Sparking of Cathode Ray Tubes • Life Testing and Processing of Vacuum Tubes • Energizing Laser Devices • Charging Paper for Xerography Printing • Radar • Image Intensifier • Sputtering Processes • Impulse Testing • Explosive Forming • Electrophoresis • Ion Implantation • Tomography • TWT

- 400 Standard Models with Voltage Ranges to 2 Megavolt and Powers to 1000 KW
- Completely Solid State, Self Protecting
- Safe Simple, Foolproof Operation
- Maximum Personnel and Equipment Protection
- Standard Models Easily Modified for Custom Design.

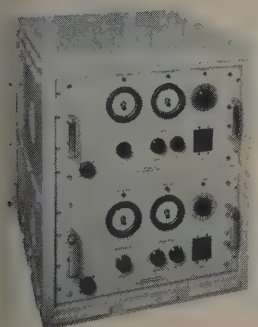
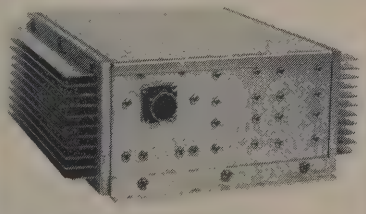
| RA 125-10 | 0-125 | 0-10 | 0.01% | 0.01% | 7" | 1250. |

Options include: meters, overvoltage, 10-turn potentiometers, and special input voltages.

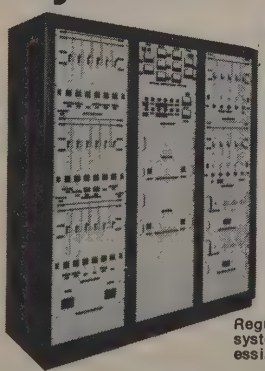
## Custom Power Supplies and Systems



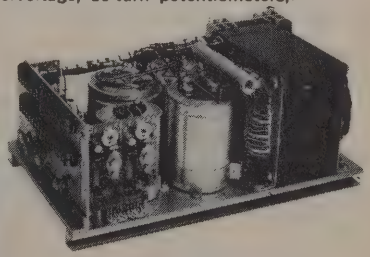
High power, 150-Volt, constant current//constant voltage, shipboard-qualified power supply.



Mil Spec 4 output regulated power supply.



Regulated, no-break, redundant power distribution system with battery back-up for petroleum processing industry.



Regulated multi-output power supply for mini-computer.

PRICES SUBJECT TO CHANGE WITHOUT NOTICE.

# PRECISION CURRENT & VOLTAGE SOURCES

## PRECISION CURRENT SOURCES

**ACCURACIES TO 0.01%** **STABILITIES TO 2 PPM**

**APPLICATIONS:**

- Laboratory and Production Testing of Semiconductors, Gyros, Lamps, Meters, Thermistors, etc.
- Systems requiring a Precision Constant Current Setting such as X-ray Equipments, Electron Beam Welders, and Electron Beam Microscopes.

**FEATURES:**

- Digital In-Line Current Setting and Readout.
- 5 or 6 Decade Dividers for Setting to 1 Part in 100,000 or 1 Part in 1,000,000 of Full Scale.
- Uni- and Bi-Polar Models.
- Externally Programmable Models.
- External Modulation Capability.
- Automatic Protection Circuits.

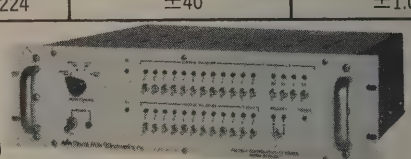
| DCVS-222 | ±20 | ±2.0 |
| DCVS-224 | ±40 | ±1.0 |



DCVS-220

## PRECISION VOLTAGE/CURRENT SOURCES

These highly stable and accurate precision sources can be operated in either constant voltage or constant current modes.
All models include such features as manual and remote programming, and output voltage regulation by either local or remote sensing.
Voltage and current outputs are selected on decade switches whose markings form an in-line digital readout.

Automatic protection limits output voltage and current to safe levels. No voltage or current overshoot occurs during turn-on or turn-off. A warning indicator alerts the operator if the actual output should differ from the dialed setting beyond the specified limits. Models TC-100.2BR and TC-602CR include a panel meter to monitor output current.

| Model | Constant Voltage (V) | Constant Current (mA) | Accuracy (%) | Stability (ppm) | Decades |
|---|---|---|---|---|---|
| CVS-264 | 0 to ±100 @ 100 mA max. | 0 to ±100 @ 100 V max. | 0.1 | 25 | 5 |
| TC-100.2 BR | 0 to 100 @ 200 mA max. | 0 to 100 @ 100 V max. | 0.01 | 5 | 5 + vernier |
| TC-602 CR | 0 to 60 @ 2 A max. | 0 to 2000 @ 60 V max. | 0.01 | 5 | 5 + vernier |

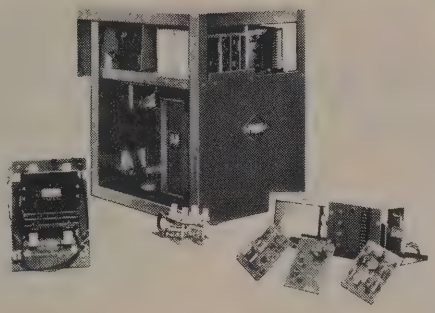
TC100.2BR

# CUSTOM BUILT AC/DC POWER SUPPLIES, INDUSTRIAL AND LABORATORY TYPES,

## TO YOUR SPECIFICATIONS – HIGH OR LOW CURRENT, VOLTAGE OR FREQUENCY, CONSTANT OUTPUT, PRECISE REGULATION FOR SPECIALIZED APPLICATIONS

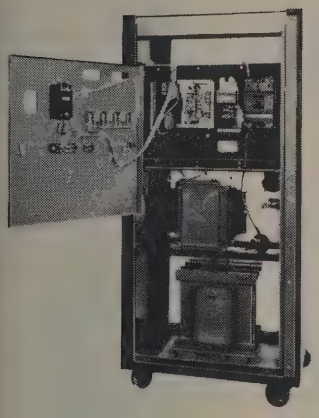
**Manufacturing power supplies utilizing forced air, water, natural convection and oil cooling systems; both regulated and non-regulated using saturable reactor; variac or SCR controls.**



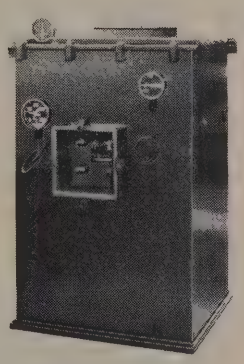
75 KVA water-cooled SCR controlled supply for electric melting furnace.

**MANUFACTURING RANGE**

Up to 150 KV
1 ma to 50,000 AMP
4 Hz to 20 Khz
5 KVA to 2000 KVA
50 lb. to 15,000 lb.

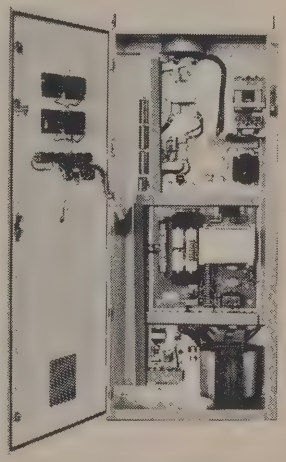


45.5 KVA Saturable Reactor controlled precisely regulated high voltage power supply for sputtering film application.



This unit is typical of our oil-filled power supplies and is rated 45 KV DC at 1 amp output.

Distortion free high current low voltage programmed power supply with precise regulation used for laboratory component testing.



Solid State SCR type Controller with current limiter and spark rate control used with an NWL manufactured Transformer Rectifier set.

**NWL also manufactures various types of power transformers, reactors, chokes. See our full page ad in the transformer section of EEM.**

**Our engineers are available to assist you in selecting magnetic components to meet your application requirements.**

**NWL TRANSFORMERS**

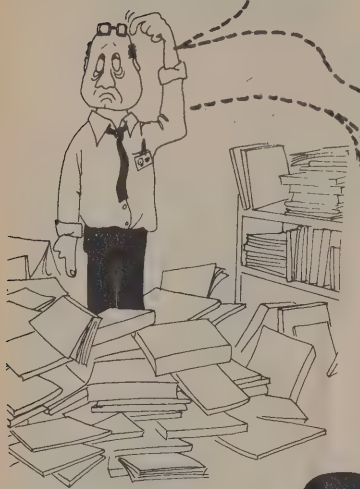
***What can I use to keep all the manufacturers' product data I receive in order?***

***What system makes filing or retrieving manufacturers' catalogs fast and easy?***



***Which file system have thousands of engineers purchased because they know it works?***

# eem FILE SYSTEM

## THE ONLY FILE SYSTEM DESIGNED SPECIALLY FOR THE ELECTRONIC ENGINEER!

The publishers of **eem** have put together a unique filing system for electronic product information. The complete system includes: a product index booklet which classifies electronic products into 3,000 listings both alphabetically and by product group, and 45 file folders imprinted with the **eem** product sections (extra gummed labels included for expanding the system.)

As you receive manufacturers' catalog data sheets, technical bulletins, or clip magazine articles, jot down the proper Product Section Numbers from the **eem** PRODUCT-TO-SECTION INDEX. Then simply file in order. When you require information on a specific product, refer to PRODUCT-TO-SECTION INDEX again to locate the correct file folder. It's simple, and you'll always have the necessary data to compare, specify and buy, right at your fingertips.

**Here's how to order your eem FILE SYSTEM:**

For the complete system send $10 (plus tax; N.Y., 8%, CA, 6½%) in check or money order to:

United Technical Publications, Inc.,
645 Stewart Avenue, Garden City, N.Y. 11530
Att: Circulation dept.

For an **eem FILE SYSTEM** without file folders send $7.50 (plus tax; N.Y. 8%; CA, 6½%).

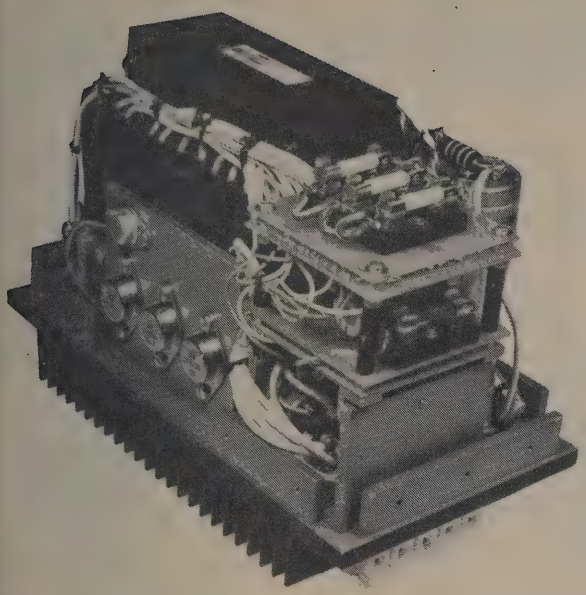
# CUSTOM POWER SUPPLIES
# CUSTOM TRANSFORMERS



This custom Naval Underwater 3 Phase 400 Hz multiple output power supply was delivered ready for dockside installation exactly eight weeks after receipt of order.

## CUSTOM POWER SUPPLIES

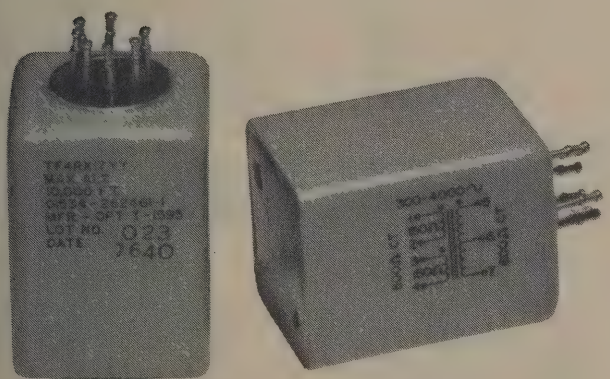
- Switching Regulator
- DC to DC Converter
- Linear
- Ferroresonant

OPT specializes in custom designed high reliability military, and hi-grade commercial linear and pulse width modulated switching regulator power supplies.

At OPT, custom power supplies are professionally designed and skillfully manufactured to achieve outstanding reliability and performance.

Our high quality standards are reflected by our strong participation in many advanced military and aerospace programs.

We would be pleased to discuss your requirements. Our outstanding power supply design team, augmented by our excellent magnetics group, offers seasoned engineering solutions to your power supply requirements.



## CUSTOM TRANSFORMERS

- MIL-T-27
- MIL-T-16315
- MIL-T-21038
- Quality OEM Commercial Magnetics

OPT offers you one source for all your custom transformer requirements, military and commercial. Our technology and production capability run the full gamut of todays demanding magnetic requirements and include: power, audio pulse, hybrid, D.C. converter, reactor, toroids, ferroresonant, multiphase, high Q coils, magnetic amplifiers and special purpose transformers.

**SEE OTHER OPT INDUSTRIES PRODUCT LINES IN eem**
**OPT INDUSTRIES ALSO MANUFACTURES CUSTOM FILTERS/CRYSTAL, L. C. AND ACTIVE**

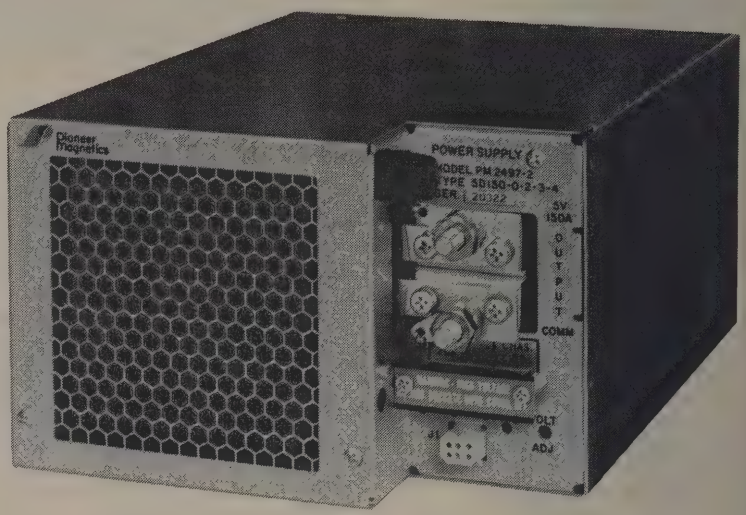
# Pioneer Magnetics' Brownoutproof Switching Power Supplies: the Dependables.

## Features:

- ☐ Widest range of brownout protection
- ☐ 30 mS typical output holdup after input power loss with full load
- ☐ Full output rating at 50°C ambient
- ☐ 60% to over 80% efficiency
- ☐ Soft start
- ☐ Shortcircuit proof
- ☐ Overvoltage protection
- ☐ Designed to meet or recognized to UL478 and CSA154
- ☐ MTTR less than 15 minutes
- ☐ Field proven MTBF of 100,000 hours for slot supplies; calculated over 72,000 hours per MIL-HBK-217B



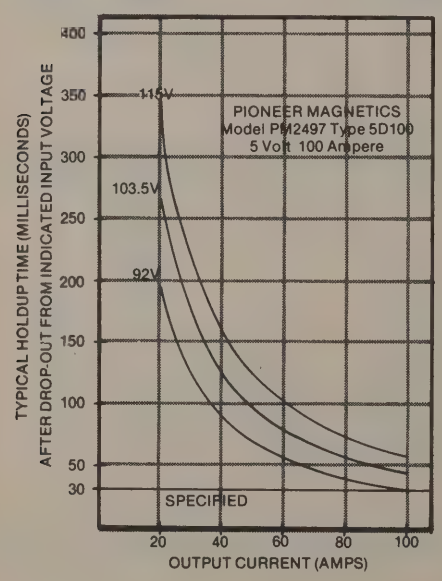
**The Dependables**

The Dependables are a family of single and multiple output, high current, switching regulated power supplies designed primarily for OEM digital applications where superior dynamic load and line performance is required. Their low RFI/EMI radiation and low output ripple also make them attractive for analog applications.

**Brownoutproof = More Uptime**

Beyond inherent advantages of switching supplies over linear types (i.e., high efficiency, low weight and small size), the Dependables are uniquely immune to most utility power variations. They can supply their specified regulated outputs at full load over input variations from 92 to 138 or 184 to 250 VAC; and they'll continue to do so for several minutes even if input voltages drop to 70 or 140 VAC.

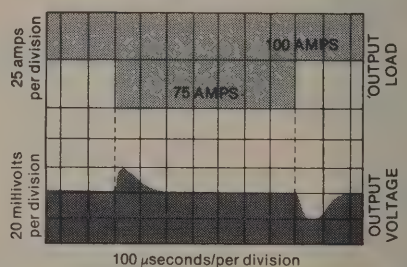
**HOLDUP TIME VS OUTPUT CURRENT**



**Easy to Specify**

Unique to the Dependables is a worst-case method of specifying voltage regulation that simplifies the design engineer's task by giving a known limit to cumulative tolerances. This limit, ±2%, defines the maximum deviation from a set value from any combination of Drift, Line Regulation, Static and Dynamic Loads, and Peak-to-Peak Noise and Ripple. Well within this ±2% error band, the typical transient response of a 5 Volt 100 Ampere supply to a 25 Ampere load step is approximately 20 mVolts.

**TYPICAL TRANSIENT RESPONSE TO 25% LOAD STEP**



This is the response of a Model PM2497, 5 Volt, 100 ampere unit to a 25 ampere load step.

**DC to DC Units Too**

The Dependables are also available as DC input versions with 24, 48, 120 or 240 VDC as standard source voltages. Pioneer Magnetics can provide units that operate from both AC and DC sources allowing ease of switching to battery back-up for UPS applications. Check with us for further information.

**Our Experience**

Since 1958 Pioneer Magnetics has specialized in the design and manufacture of switching power supplies. A continual development program ensures that every switching supply we manufacture is properly designed, conservatively rated and thoroughly tested. Only then do we feel that it has earned the name: the Dependables.

# General Specifications

**Total Error Band:** ±2% (±100 mV for 2 and 3-volt units) including the following (See factory for 4th channel ratings.):
- Input power variation over the specified range.
- Static loads from 0 to 100%.
- Dynamic Load Steps (10μSec rise) 25% on 5 VDC units, up to 90% on higher voltage units.
- Ripple and switching spikes.
- Temperature stability over full operating range 0° to 50°C.
- Drift for an 8-hour period following initial warmup.

**Overshoot:** No turn-on or turn-off overshoot.

**Power Loss Holdup:** For AC-input units only. Output will remain within regulation 30 milliseconds after loss of AC input when operating at full load and nominal line.

**Overvoltage Protection:** *Single Output Units* - Overvoltage shutdown to protect the load is provided and set at 125% ±10% of rated output. An additional overvoltage crowbar is available as an option. *Multiple Output Units* - Automatic shutdown is provided on the main channel as standard. OVP on other channels can be provided as an option. Overvoltage crowbar is optionally available for the main channel.

**Overload Protection:** Current limiting (foldback) circuits protect all units against overload and short-circuits. The output automatically recovers from overcurrent shutdown after load fault is removed.

**Overtemperature Protection:** Automatically shuts unit down in the event of an overtemperature condition.

**Reverse Voltage Protection:** Supply is protected against reverse voltage applied across the output terminals.

**Remote Sense:** *Single Output Units* - Standard on all units. Handles up to one volt drop in output leads.
*Multiple Output Units* - Standard on main and channels two and three. Handles up to one-half volt drop in the output leads.

**Input Fuse:** Standard on all units.

**EMI:** Meets VDE 0875 Level N requirements for input conducted EMI with external filter.

**Environmental:** *Temperature, operating* - 0° to 50°C at 100% rated power, derates linearly to 80% of rated power at 71°C.
*Temperature, storage* - -55°C to +85°C.
*Humidity* - 5% to 95% without condensation.

**Safety Standards:** Standard models recognized to UL478.

**Size and Weight:** *Single Output Units* - See output chart.
*Multiple Output Units* - Size 5" × 8" × 11¾" (PM2677 and PM2678 add 1-9/16" for external fan). Weight: 20 pounds.

# Options

The following standard options are available:
- Power Fail Signal
- Logic Inhibit
- True Inhibit
- OV Crowbar
- Remote Program/Margin Check to ±5% or ±10%
- Local Margin Check
- Paralleling
- Reverse Input Protection (DC-Input Units)
- Output Out of Tolerance
- Output Power Good

Other special options are available and designed to exact requirements:
- Additional Outputs
- Automatic Battery Backup and Charging
- Additional EMI Filtering
- Sequencing

# Single Output Power Supplies

**AC-Input Units:** 92 to 138 or 184 to 250 VRMS (specify choice), other ranges available on request, single phase, 47 to 63 Hz, 380 to 440 Hz also available. Will regulate through line dips to 70 or 140 VRMS.

**DC-Input Units:**

| NOMINAL VOLTAGE | INPUT RANGE |
|---|---|
| 24 | 22-31 |
| 48 | 42-66 |
| 120 | 100-145 |
| 220 | 200-250 |

**Outputs:** See chart below.

| WEIGHT | | | 16 pounds | 18 pounds | 35 pounds |

*Other output volt/amp combinations are available.
**For 24 VDC input, check factory for output ratings.

# Multiple Output Power Supplies

Standard Multiple Output Power Supplies with the flexibility to meet your exact custom requirements. Specifications are similar to single-output supplies.

**Outputs:** Up to four completely isolated outputs. Either polarity can be chosen for each output. See chart below.

| AC INPUT MODEL / DC INPUT MODEL (See note 6.) | | PM2675 / PM2775 | PM2676 / PM2776 | PM2677 / PM2777 | PM2678 / PM2778 |
|---|---|---|---|---|---|
| MAXIMUM TOTAL OUTPUT POWER IN WATTS | | 375 | 600 | 750 | 850 (see note 1) |
| MAIN CHANNEL (see note 2) | OUTPUT VOLTAGES AVAILABLE | 2, 3, 5, 12, 15, 18, 21, 24, 28, 48 | | | |
| | MAXIMUM POWER IN WATTS (see note 3) | 250 | 500 | 600 | 750 |
| SECOND CHANNEL | OUTPUT VOLTAGE | 5 | 12 / 15 | 18 / 21 | 24 / 28 |
| | OUTPUT CURRENT MAX. (see note 4) | 7 | 7 / 7 | (see note 5) | |
| THIRD CHANNEL | OUTPUT VOLTAGE | 5 | 12 / 15 | 18 / 21 | 24 / 28 |
| | OUTPUT CURRENT MAX. (see note 4) | 10 | 10 / 10 | (see note 5) | |
| FOURTH CHANNEL | OUTPUT VOLTAGE | 5 | 12 / 15 | 18 / 21 | 24 / 28 |
| | OUTPUT CURRENT MAXIMUM | 4 | 4 / 4 | 4 / 4 | 3 / 3 |

**NOTE** 1. Brownout capability reduced for this Model.
2. Main channel must maintain 50 watt minimum load so that other channels regulate properly.
3. Maximum power for 2 and 3 volt outputs is 60% figure given.
4. Check with factory for higher current ratings.
5. Check with factory for current ratings on these and other special voltages.
6. Check with factory for 24 VDC ratings.

Contact us today for complete details on our line of standard and customized switching power supplies to meet your specific needs.

# ± 15 VDC DUAL POWER SUPPLIES

## $16.75 MODEL P31 1-9 QTY

## +5VDC @ 500MA $25. MODEL P37 1-9 QTY.

## FEATURES

**FROM STOCK**

- OUTPUT VOLTAGE ERROR - ± 1% MAX
- LINE & LOAD REGULATION - 0.2% TO 0.02%
- SHORT CIRCUIT PROTECTION - CURRENT LIMITED
- INPUT ISOLATION - 50 MEGOHMS
- DESIGNED FOR P.C. CARD MOUNTING

**The Polytron Devices, Inc. P30 Power Supply Series is designed specifically for use with Digital or Linear IC'S, function modules and similar devices requiring clean, well regulated dual or single voltage excitation.**

**Useful for industrial and laboratory applications, these power supplies are manufactured with all hi performance solid state components offering exceptional reliability over extended periods; the P30 series features the lowest cost modular supplies on the present market.**

## PARTIAL LIST OF AVAILABLE UNITS

• Laboratory workhorse power supplies with over 15 years of field history • Continuously adjustable voltage, current or current limiting controls with limiter or current mode indicating lamps • No RFI generating SCR or switching circuits • Modular package construction suitable for bench or rack mounting • Processed under a "Predictable Reliability" Program for 5-year minimum operation to published specifications. This program features: Avalanche-controlled rectifiers, 100% stress testing of transistors, pre-aged zener references with maximum I/F noise specifications, computer grade capacitors, low T.C. 1% tin oxide film resistors in critical circuits, etc. • Supplies are burned in under full load for a minimum of 50 hours prior to test.

# HIGH VOLTAGE POWER SOURCES

MODEL 1556B

## CALIBRATED POWER SOURCES FOR PHOTOMULTIPLIER PROPORTIONAL AND SOLID STATE DETECTORS, ELECTRON OPTICS, LASERS, CRT DISPLAYS

Calibrated high voltage power sources supplying tightly regulated DC for critical applications where stability, low noise and reliability are of prime consideration. • .25% calibration accuracy • 10 MV resolution • Sealed transformers and rectifiers • Self-restoring overload and short circuit protection • All solid state except for "Series" Pass Tube • Voltage and current metering.

## PARTIAL LIST OF AVAILABLE UNITS

| Model | Voltage | Current mA | Regulation Line or Load | Ripple Pk to Pk mV | △Size Panel Ht. | PRICE |

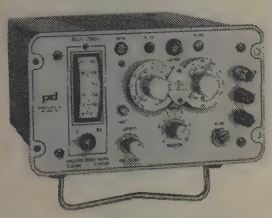
TECHNICAL DATA

# CALIBRATED POWER SOURCES

## CALIBRATED, STABLE, LOW NOISE, HIGH RESOLUTION POWER SOURCES FOR PRECISION LABORATORY APPLICATIONS

### 0-20 VDC/0-500 mA

**MODEL 2005A**

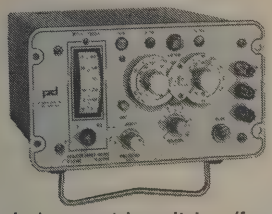


***$370.00**

• Two dual concentric switches (four decades) and a calibrated potentiometer provide digital readout to five significant figures • A toggle switch provides readout to six figures above 10 volts • Last-place potentiometer has 10 μV resolution • Source impedance is less than two milliohms at DC, less than 0.5 ohms at 1 MHz • Recovery time is less than 25 microseconds to return within a 100 μV band of the programmed voltage for an 80% load change • Front and rear access terminals.

• Better than 0.1% calibration accuracy • Critical components in temperature stabilized oven • 10 PPM plus 100 μV stability for 8 hours • Temperature coefficient better than 10 PPM or 50 μV per °C • Self-restoring overload and short circuit protection with adjustable current limit control and flashing limit indicator • 100 μV maximum peak-to-peak ripple (250 μV on Model C400) • Solid silver decade switch contacts • 100 hour minimum burn-in prior to calibration • Individual calibration data furnishd with each unit • Provisions for remote sensing and remote resistance programming at 1000 Ω/volt • Voltage or current metering.

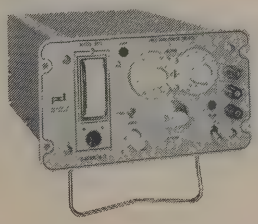
### 0-20 VDC/0-2 A



• Two dual concentric switches (four decades) and a calibrated potentiometer provide digital readout to five significant figures • A toggle switch provides readout to six figures above 10 volts • Last-place potentiometer has 10 μV resolution • Source impedance is less than two milliohms at DC, less than 0.5 ohms at 1 MHz • Recovery time is less than 25 microseconds to return within a 100 μV band of the programmed voltage for an 80% load change • Front and rear access terminals.

**MODEL 2020A** ***$395.00**

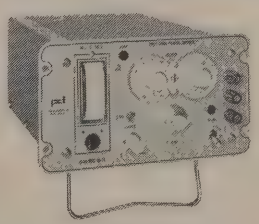
### 0-40 VDC/0-1 A



• Two dual concentric switches (4 decades) and a calibrated 10-turn potentiometer provide calibrated readout to six significant figures • Sixth place interpolation with 10 microvolt resolution • Dial accuracy is 0.1% plus one millivolt below one volt, 0.1% from one to forty volts • Front and rear access terminals • Bail/carrying handle tilts front panel for viewing ease • Electrical characteristics similar to Model 2005A.

**MODEL 4010** ***$395.00**

### 0-100 VDC/0-400 mA



• Two dual concentric switches (4 decades) and a calibrated 10-turn potentiometer provide calibrated readout to six significant figures • Sixth place interpolation with 10 microvolt resolution • Dial accuracy is 0.1% plus one millivolt below one volt, 0.1% from one to 100 volts • Front and rear access terminals • Bail/carrying handle tilts front panel for viewing ease • Electrical characteristics similar to Model 2005A.

**MODEL C400** ***$395.00**

## PARTIAL LIST OF AVAILABLE PRECISION POWER SOURCES

| Model | Range Volts | Current Amps | Regulation Line/Load | Max. Ripple Pk to Pk | Stability | TC Per °C | Size | Special Features | *Price |

**TECHNICAL DATA**

# Uniply®

## A Laboratory of Power Supplies in a Single Package

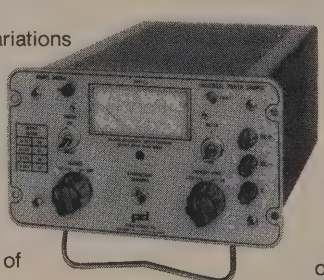
The UNIPLY® principle involves a regulator technique that provides a general purpose power source functionally replacing four conventional power supplies.
The regulator system comprises a number of unregulated DC sources, a number of power semiconductors selected for optimum voltage and current characteristics and a single control amplifier which selects through "OR" gates that combination of unregulated source and power semiconductors that satisfy the demands of the load and the panel control settings with minimum power supply losses.
Ranging is automatic and transient-free. Operation is electronic, without relays or manual switching and utilizes linear circuits only. No triacs, SCR's or switching circuits are employed.

A built-in front panel continuously adjustable overvoltage "crowbar" in conjunction with an inhibit switch limiting the automatic ranging to 6 volts provides completely safe operation with digital circuit loads. The UNIPLY® technique permits increased power supply capability with increasing AC line voltages. Up to 150% of panel ratings is available at line voltages over 105 volts. Useful output at reduced levels is available at line voltages as low as 85 volts. A flashing panel indicator signals loss of regulation if load demands exceed the regulator capability or AC input voltages are inadequate.
Two voltage and current ranges are provided on the taut-band suspension panel meter to increase resolution. Ranges switch automatically with range switch setting.

## Model 6050A: 0-7V at 5A / 0-15V at 3A / 0-25V at 2A / 0-60V at 1A *$259.00

### SPECIFICATIONS

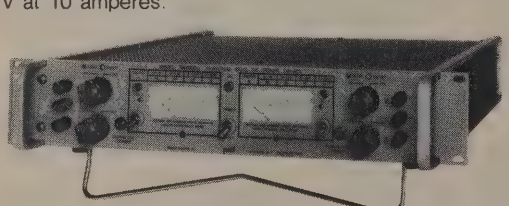
**Input:** 105-125 volts, 57-440 Hz, 100 watts nominal.
**Line Regulation:** 0.01% + 1 millivolt.
**Load Regulation:** 0.01% + 1 millivolt for load variations from 0-100% of rated output current.
**Polarity:** Either positive or negative output terminal may be operated at ground potential
**Ripple and Noise:** Less than 1 millivolt peak-to-peak.
**Source Impedance:** <0.005 Ω at DC, 0.1 Ω to 20 KHz, 1.0 to 1 MHz.
**Recovery Time:** Less than 50 microseconds to return to within a 15 millivolt band of the original voltage for a step change in rated load of 10% to 100% (1 microsecond rise time).
**Stability:** 0.02% +3 millivolts per 24 hours.
**Operating Temperature:** 0-50°C at full load. Storage: −20°C to +85°C.
**Temperature Coefficient:** 0.02% per degree C.



**Current Limiting:** Concentric switch/potentiometer provides continuous adjustment in two ranges: 0-500 milliamperes, 0-5 amperes.
**Metering:** Front panel taut-band meter and a selector switch permit monitoring voltage or current with an accuracy of ±3% of full scale. Voltage ranges 0-6V/0-60V change automatically with voltage range control. Current ranges 0-500 mA/0-5A change automatically with current range control.
**Output Terminals: Front Panel:** Three binding posts for positive, negative and ground.
**Rear Panel:** Seven terminal barrier strip for output voltage, sensing, voltage programming and parallel operation.
**Dimensions:** 8⅜" wide x 4¾" high x 11⁹⁄₁₆" deep.
**Weight:** 15½ lbs.
**Overvoltage Crowbar:** Built-in overvoltage crowbar adjustable from 2.0 V to 70 V from the front panel.

## Model TW6050A: TWO MODEL 6050A SOURCES IN A 3-1/2" x 19" RACK MOUNTING PACKAGE *$449.00

More compact than two Model 6050A units, the Model TW6050A offers two independent sources which are electrically identical to the Model 6050A, but permit series operation to 120 V at 1 ampere or parallel operation to 7V at 10 amperes.



## Model 6150: 0-7V at 15A / 0-15V at 7.5A 0-25V at 5A / 0-60V at 2A *$370.00

The Model 6150 offers more than twice the output power of the Model 6050A, with essentially the same electrical characteristics. Two taut-band meters are provided. Each instrument has two voltage and current ranges 0-6V/0-60V, 0-1.5A/0-15A. Ranges switch automatically with range switch setting. The Model 6150 mounts in a 19" rack, measures 3½"H x 16"D and is suitable for laboratory bench operation as well.

**TECHNICAL DATA**

# MODULAR HIGH VOLTAGE PRECISION POWER SOURCES

## 10-2000 VDC, 0-20 MA
## 10-3000 VDC, 0-10 MA
## 10-5000 VDC, 0-5 MA

The UPMD series of high voltage sources are compact modular units designed for critical applications where high stability, low noise and flexibility of output voltage control are important considerations.

They are ideal for such applications as photomultipliers, Geiger-Muller counters, proportional detectors, CRT sources, high resolution video displays, electrostatic lenses, etc.

Remote control of the high voltage output is achieved by means of an external potentiometer operating at low potentials with respect to ground. Output voltage resolution is a function of the resolution of this control. Options are available for remote voltage control at any desired input/output voltage ratio or for digital operation with an external D/A converter.

A unique overvoltage/arc suppression system is incorporated to protect the supply and its load in the event of loss of output voltage control or an overvoltage due to L di/dt transients generated by sustained load arcing. The circuit operates to clamp the output voltage to approximately 200 volts above any setting, hold this clamp for approximately two seconds and shutting down the supply electronically if the fault persists. The supply may be manually reset by momentary interruption of the AC line.

An internal 1% multiplier permits connection of an external meter for monitoring. A zener diode across the metering terminals minimizes shock hazard.

The compact size (4½″ x 6″ x 7½″), excluding the high voltage connector and light weight (8 lbs.) is achieved through the use of high frequency inverter technology in conjunction with a fast series regulator. RFI and EMI is held to low levels through the use of careful shielding and low pass AC line and DC output filters.

High voltage transformers and high voltage components encapsulated in readily replaceable epoxy modules. Low voltage components are accessible on epoxy coated PC boards.

An SHV (Safety High Voltage) BNC receptacle is utilized for the output voltage. A mating connector is furnished with each unit.

### Characteristics

**INPUT:** 105-125 V, 47-440 Hz, 60 w (115 V line)

**OUTPUT:** See Table

**REGULATION:** .001% or 10 MV (whichever is greater), for line or load variations.

**NOISE AND RIPPLE:** 10 MV peak-to-peak to 1 MHz

**STABILITY:** Less than .01% or 15 MV (whichever is greater)

**TEMPERATURE:** 0-50°C

**TEMPERATURE COEFFICIENT:** Less than 50 PPM/°C

**PROTECTION:** Current limiter and overvoltage system limits output to safe levels.

**SIZE:** 4½″ x 6″ x 7½″

**WEIGHT:** 8 lbs.

**MOUNTING:** In any plane

### Table

| MODEL | *OUTPUT POLARITY | VOLTAGE RANGE | OUTPUT CURRENT | **UNIT PRICE |
|---|---|---|---|---|
| UPMD-220N | NEGATIVE | 10-2000 VDC | 0-20 MA | $385.00 |

**ALSO MARKETS:**

Emergency lighting units.
Flashlight and lantern rechargeable batteries.
Custom and prototype design battery packs built to your specifications.
Battery chargers for all types of batteries.

Batteries - NICKLE CADMIUM - SILVER CADMIUM - SILVER ZINC - MERCURY - SEALED LEAD-ACID.

All cylindrical and oval battery types feature a pressure safety device for security and reliability making them especially suited for cordless consumer and electronic products.

### CUSTOM BATTERY PACKS

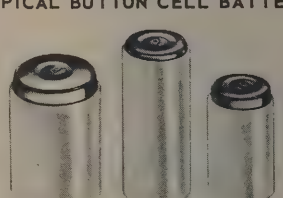
Cylindrical cells are incased in a rigid, high impact case. Case materials are highly dielectric to provide maximum cell insulation at minimum cost. The case is vented to each cell to provide cooling and long life. Packs are available to your specifications in any voltage.

### FAST CHARGE CELLS

Special fast charge cells are available on special order either individually or in custom battery packs with thermistors for extra fast recharge capability.

Button cell batteries are constructed of sealed nickle cadmium button cells (see fig. B) to meet almost any application requirement. The compact size of button cells permits easy stacking to form multiple cell batteries of optimum power/volume ratio and space utilization. Completely sealed button cells are ideally suited for portable radios, flashlights, photoflash, alarms, and any low-drain, high capacity application.

**TYPICAL BUTTON CELL BATTERIES**



**INVESTIGATE** direct current emergency power sources available in any regulated voltage or current, featuring automatic SCR solid state switchover to a self-contained battery. We have the answer to reliable economical D.C. power with automatic emergency back-up.

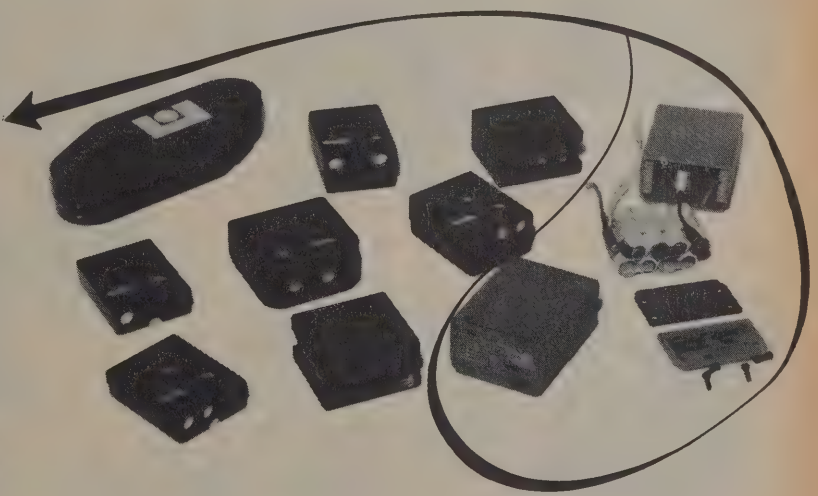
# Custom Replacement Batteries for portable test equipment and other battery operated devices available.

**Send us your dead battery for a quotation. Custom chargers available for all battery types.**

**Our specialty is manufacturing new rechargeable nickel-cadmium batteries . . . but we are also equipped to rebuild dead batteries . . . send us your dead battery . . . we can rebuild it at a lower cost.**

**For example, we have developed a do-it-yourself battery kit for all RCA hand held radio rechargeable nickel cadmium batteries. When a dead battery is sent to Power Incorporated, the case is cut open, threaded inserts are placed on the walls, a special gasket is supplied and counter sunk holes are placed in the cover. The dead internal battery pack is removed and replaced with a new unit.**

**We can offer this general type of repair service on portable test equipment and other battery operated designs.**



*"If we can't help you — no one can!"*

90% of all catalog items are ready to be shipped to you today.

Power/Mate's East and West Coast plants are fully stocked with reliable open frame, sub-modular and switching power supplies ready for immediate delivery.

But our in-depth stock isn't the only thing that has kept us the leader in the field of power supplies.

Our in-the-field representatives, factory trained applications engineers, telephone salespeople and complete repair facilities make us a company that's just as dependable when it comes to service.

We'll make sure you get the power supply you need when you need it. Because keeping you ahead of your competition keeps us ahead of ours.

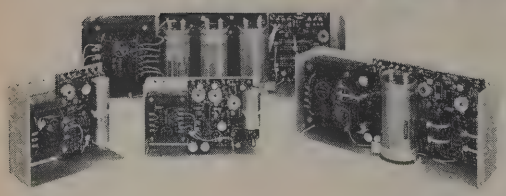
# OPEN FRAMES

NUMBER 1 IN OPEN FRAMES



## ONLY POWER-ONE OFFERS THESE EXCLUSIVE FEATURES:

**QUALITY** • Two-Year Warranty — fully transferable to your customer • Two-Hour Burn-in — plus *two* full functional tests on every unit • UL Recognized, CSA Certified
**SERVICE** • 83 Standard Stocked Models — the industry's largest selection • Local Stocking Centers Nationwide — stocked for immediate delivery
**ECONOMY** • The industry's most cost-effective D.C. power supplies • Liberal discount for quantity buyers

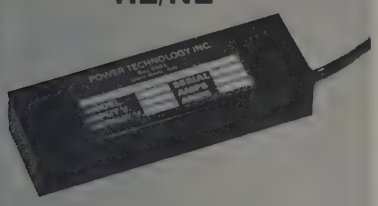
# ELECTRO-OPTIC POWER

## LASER POWER SUPPLIES

### HE/NE



**L23**

Tried and proven, the L23 features exceptionally high efficiency, switching mode current regulation of ± 0.1mA, compact size, and low cost. Many shapes and sizes are available, including numerous options. Input range is 10 to 17V DC; and the power output is 5 to 25W. Size: 15/16″ X 1 7/16″ X 4 1/2″.

### HE/NE

**L41 — L43 — L45**

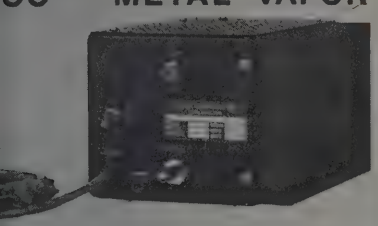
This series allows your choice of AC input voltages from 117 to 265V AC, 50-400Hz., which is particularly appropriate for foreign applications. All three models are exceptionally compact, .945″ X 1.445″ X 6.05″, and lightweight, 8.8 ounces, for supplies that deliver up to 24 watts with high efficiency and switching mode regulation.

### HE/NE

**L80 — L81**

Unbelievable! The ultra miniature L80 and L81. The L80 is just ONE cubic inch in size and weighs 40 grams! Starting voltage is 6KV minimum, output power 2 to 8 watts, current regulation ± 0.1mA, output voltage 500V to 2.5KV, and input voltage 10 to 16V DC. Superior efficiency, minimum heat dissipation, and switching mode regulation are features that you will appreciate. The L80 measures 1/2″ X 1″ X 2″, and the L81, 1″ dia. X 2″ length.

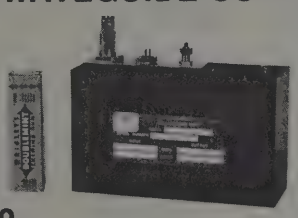
### $CO^2$ — METAL VAPOR



**L35 — L36 — L37**

Pick from this series to power $CO^2$ lasers requiring 300W or less input. They are compact, lightweight, operate from 117V AC, 50-400Hz, and utilize switching mode regulation. Select from an output voltage range of 2 to 18KV and starting voltages of 5 to 20KV. Size: 5″ X 6 3/4″ X 9″.

### WAVEGUIDE $CO^2$



**L29**

Designed for operating low power single discharge waveguide $CO^2$ lasers from 28V DC sources. Positive or negative output is available for any of seven operating ranges from 2 to 18KV. The regulated output current is field programmable, and the output power is 25 to 50W. Size: 1 3/16″ X 3″ X 4 7/8″.

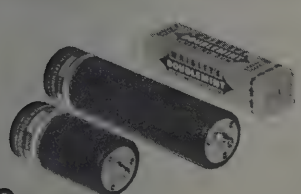
### WAVEGUIDE $CO^2$

**L42 — L44**

Designed for waveguide $CO^2$ lasers, these two units supply regulated dual outputs (both positive or both negative) and operate from 117V AC, 50-400Hz. Model L42 delivers 50 to 75 watts power output and L44, 100 to 150 watts. Output voltage is factory adjusted 2 to 18KV. The current output is field programmable and regulated to ± 0.1mA.

## DIODE PULSERS

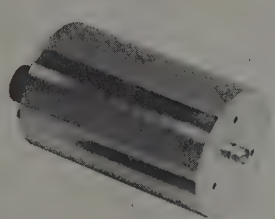
### SINGLE OR STACK



**ILC**

The ILC produces more average output power for driving laser diodes at 7 to 200ns pulse widths than avalanche or SCR pulsers. Models are available for pulse currents of 1 through 100A. Fast rise and fall times, with internal clock for pulse rates of 1 through 10,000 PPS. Size: (with internal supply) 1 or 1 1/4″ dia. X 4 1/4″, (with customer supplied external supply) 1 or 1 1/4″ dia. X 2 1/2″.

### ARRAY



**ILA**

Multi-junction stacks and arrays containing 7 to 60 series junctions may be driven with the ILA Series. Pulse currents of 25 to 75A and widths of 20 to 200ns are available at a rate limited only by the duty factor of the laser. Voltage input range 24 to 32V DC or 90 to 110V DC. Size: 2 3/4″ dia. X 4″ length.

## SIMULATOR

### 1.06 MICRON

**CS100 — CS101**

These convenient, easy to use laser simulators are compact and self contained. They provide a pulsed 1.06u infrared signal source emulating a laser. Because of their portability, they are ideally suited to laboratory or field testing of laser systems or fiber optics. A double pulse option allows testing of laser rangefinders. Output power is 20mW at 20ns and 1.06 microns. Input voltage can be 115V AC, 230V AC, or 12V DC. The CS101 is a cabinet or rack mount with higher optic power output.

CUSTOM DESIGNED POWER SUPPLIES FOR OEM APPLICATIONS

Power Systems, Inc. designs, develops and manufactures power supplies and power control systems for O.E.M. applications. Power Systems offers an experienced approach to application engineering which assures complete system compatibility, optimum performance and long term reliability.

Circuits are chosen to fit the requirements of the end user system — these include switching regulators, series regulators, ferroresonant and unregulated supplies, DC-DC converters and DC-AC inverters.

Power Systems provides complex sub-systems which are designed to interface successfully with the complete production unit. Power supplies are fabricated not only to meet customer's specs but to integrate fully with the entire system.

Power Systems will review your particular specifications — or help write them. Our custom crafted power supplies are designed to meet your goals for cost, performance, size, mounting, environment, packaging, and most of all, reliability in the field.

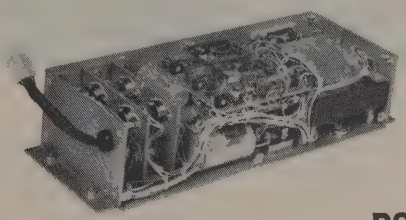
# SERIES REGULATED SUPPLIES

**Power Systems inc**

Power Systems designs are noted for high reliability, high efficiency (up to 55%) and for packaging concepts that solve critical space problems. Outputs are adjustable, short circuit and OV protected; offer good regulation and low ripple/noise.

## PS-1348

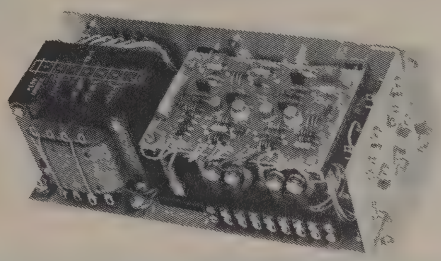
Six regulated outputs, 95 watts including a 115 W. surge; no forced air or conduction; weight 10 lbs.
Size: 12 L x 4.75 x 3 H.



**PS-1348**

## PS-1331

115/230 VAC 47-63 Hz
+12 VDC at 2.5 A Reg. ±0.1% L & L
−12 VDC at 2.5 A Reg. ±0.1% L & L
+15 VDC at 0.5 A Unreg.
If either + or − 12 deviates by more than 10% both shall decay in <100 μsec.
Size: 9.6 x 4.0 x 3.0 H



**PS-1331**

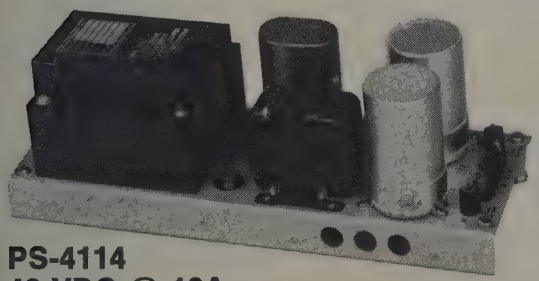
## PS-1273

DOUBLE DISK POWER SUPPLY
115/230 VAC 57-63 Hz
+5 VDC at 7 Amps
+12 VDC at 4 Amps
−12 VDC at 4 Amps
Reg. ±0.25% L & L

**PS-1273**

# FERRORESONANT D.C. POWER SUPPLIES

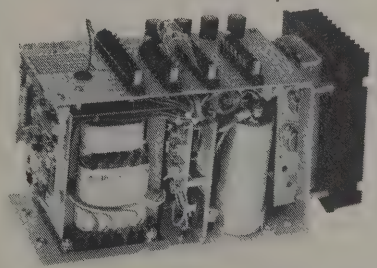
Best choice for reliability, efficiency and low cost.
Inputs: 115 VAC 60 Hz or 230 VAC 50 Hz
Outputs: Single or Dual outputs from 6 to 48 VDC



**PS-4114**
**48 VDC @ 10A**

# FERRO WITH SERIES REGULATORS

These designs combine the best features of ferro transformers with the good regulation and low ripple/noise of the series regulator.
Inputs: 100/110/115/120/127/200/208/220/240 VAC 50/60 Hz.
Outputs: +5.1 VDC at 10 Amps
+12 VDC at 4.0 Amps
−12 VDC at 1.0 Amps



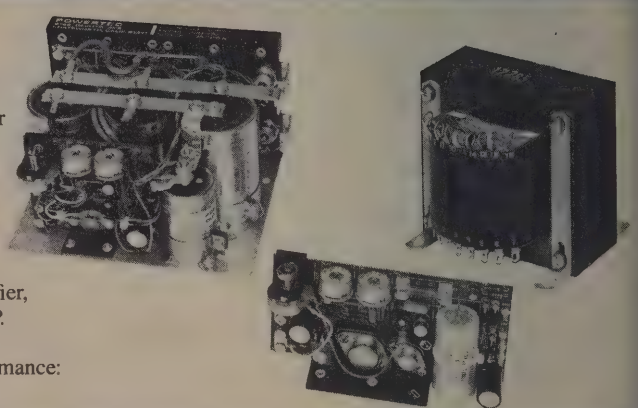
**PS-1258**

Product data sheets, catalogs, specification guidelines available directly or through our authorized representatives.

**POWER SYSTEMS, INC.** 12 Tobey Road, Bloomfield, CT 06002 (203) 243-0357

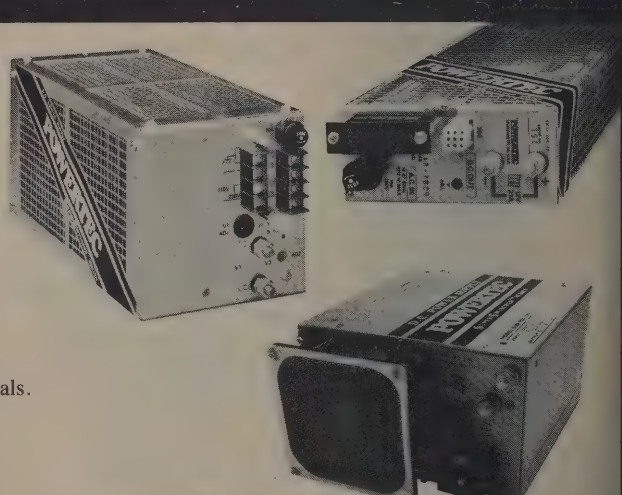
# THE BEST POWER FROM THE BEST

## SM SERIES



**SUB-MODULES** These standard "off-the-shelf" sub-modular units enable custom DC power supplies to be joined at minimal assembly cost and maximum form factor flexibility. Transformers, heatsinks, and sub-modules are the only components required for ease of sparing and maintenance. Sub-modules can be combined in a completely engineered, tested, and documented kit form. A custom input transformer will provide an almost unlimited variety of multiple outputs, each at the required voltage and current. FEATURES—Built-in rectifier, filter, regulator. Adjustable voltage, current limit and OVP. Logic inhibit function. Remote sensing and programming. Computer-grade capacitors. Fuse protected. Proven performance: 100,000 + hour MTBF per MIL-HDBK 217B.

## SUPERSWITCHERS

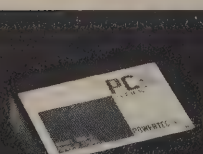


**SWITCHING REGULATORS** 9N Series—The industry "standard," forced-air SuperSwitcher provides up to 750 watts of DC output power in a compact 5″ x 8″ x 10″ package. This series is field proven with more than 10,000 units in operation during the past 5 years.

9E Series—Versatile low profile (2.25″) packaging offers 250 watts of DC output power with a density of 1.4 watts/inch.$^3$ Absolutely quiet 40KHz convection-cooled operation is perfectly suited to either office or lab environments.

9F Series—New, 250 watt multiple output power supply offers up to three independent outputs enabling it to power complete microprocessor based systems or computer peripherals.

The entire SuperSwitcher series has a wide input range of +10 to −20% with 20 milliseconds or more of hold-up. Complete protective circuitry and logic inhibit are standard on all units. Efficiency is rated to 80%.



**PC SERIES**
- Fixed DC voltage
- PC card mountable
- Single/dual output
- Potted construction
- 5-24 VDC to 1 Ampere

**DCR SERIES**
- DC voltage regulators
- Up to 24 VDC
- Up to 12 Amperes
- 2 power ratings

**XR SERIES**
- 3 Package sizes
- Single/dual output
- Up to 36V
- Up to 3 Amperes
- Built-in OVP

**SR SERIES**
- 4 package sizes
- Up to 28V
- Up to 35 Amperes
- Built-in OVP
- 55°C full rated

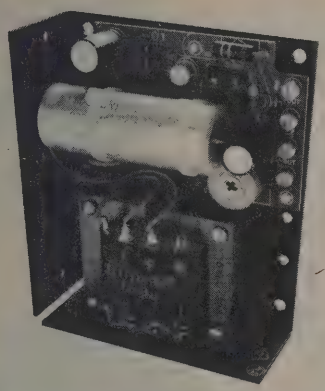
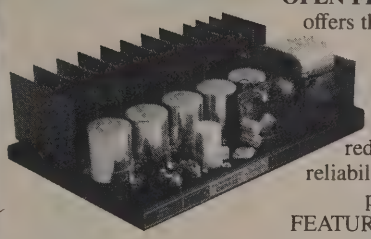
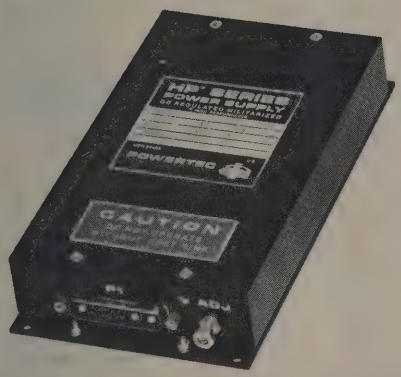
# POWER SUPPLIER





## OEM II

**OPEN FRAMES** This second generation open-frame design offers the industry's widest choice of voltages and package configurations. Single, dual, and triple output units are available at power levels to 375 watts. FEATURES—Standard 115/230 VAC input eliminates dual stocking. Electrostatic shielding reduces transients. Improved thermal design increases reliability. Conservatively rated computer-grade capacitors provide longer life. UL recognized. ADDITIONAL FEATURES—IC regulator design. Lifetime guaranteed, all hermetically sealed power semiconductors. Adjustable current limiting. Remote sensing. Fully isolated multiple outputs which can be connected in any positive/negative configuration.



## HP SERIES

**HIGH PERFORMANCE** These high performance units are designed to MIL-E-5400 specifications. Their flat pack, high density packages are well-suited to submarine, shipboard, fixed or mobile land based and airborne applications. They have excellent power/cost ratios and *no* NRE. FEATURES—Input: 115VAC, 3Ø, 400Hz. Outputs to 28VDC and up to 120 Amperes. Low RFI, series regulated design. Completely protected for overvoltage and overload conditions. High efficiencies of 50% or greater plus conduction cooling allows power densities of 5 watt/inch.$^3$

- **Powertec maintains a strong applications group and an innovative engineering staff for modified standard and custom designs.**

**Reaction Formulae:** • Anode Reaction: $Li \rightarrow Li^{+} + e$ • Cathode Reaction: $MnO_2 + Li^{+} + e \rightarrow MnO_2(Li^{+})$ • Total Cell Reaction: $Li + MnO_2 \rightarrow MnO_2(Li^{+})$

# Multi-Output, 25 Watt, Off-Line Converters... Accept AC or DC Input, Outputs Protected

**US, CS**

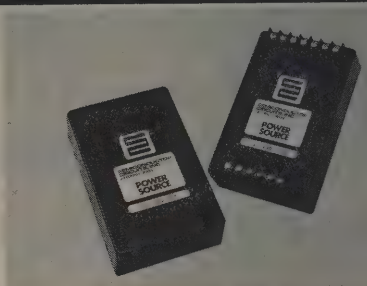
*Value Products from the NO. 1 SOURCE* **ANOTHER NEW PRODUCT**

- **AC OR DC: 70-140VAC/100-200VDC OR 140-280VAC/200-400VDC**
- **OPTO-ISOLATED REMOTE POWER SHUTDOWN**
- **O.V. CLAMPED POWER OUTPUT PROTECTS LOGIC CHIPS**

**The US, CS Series** are highly efficient Off-Line converters with quadruple, triple and single outputs that deliver up to 25 Watts. Featuring bi-modal operation, each model performs equally well from an AC or DC power input which may vary over a 2:1 range.

All models feature overcurrent-protected outputs, employ overvoltage clamping and include opto-isolated remote power shutdown via standard logic-level signals. Other features include a $\pi$ input filter to minimize input reflected ripple and floating outputs having I/O isolation to 2500Vdc.

The E option allows operation from inputs of either 70-140Vac, 140-280Vac or 200-400Vdc by external pin connection.



## GENERAL SPECIFICATIONS (Derived outputs are ±12V, ±15V and −5V)

**INPUT VOLTAGE RANGE**
See Ordering Table

**A.C. INPUT FREQUENCY**
47-440 Hz

**INPUT INRUSH CURRENT**
25 Amperes (max)

**OUTPUT VOLTAGE TOLERANCE**
±2% Fixed (Primary)
±1% Fixed (Derived)

**REGULATION**

## MECHANICAL INFORMATION

FIG. 1

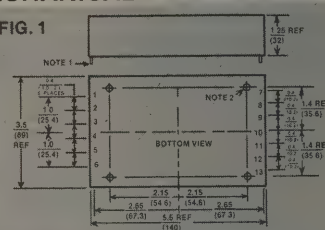

FIG. 2

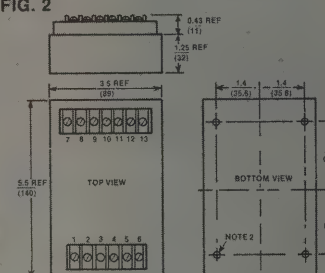

**CONNECTIONS**

| PIN/TERM. | COMMENTS |
|---|---|
| 1. TTL Input (floating) | Isolated Power Shutdown Input |
| 2. TTL Return (floating) | Isolated Power Shutdown Return |
| 3. Case ground | Connect to Pin 12 |
| 4. Vin Return | Return for Pin 5 and Pin 6 |
| 5. 110 Vac In. | AC (Standard) |
| 6. 220 Vac In. | AC (E Option) |
| 7. −5 Vdc Out | Derived Output No. 1 |
| 8. +12/15 Vdc Out | Derived Output No. 2 |
| 9. Common Out | Derived Output Common |
| 10. −12/15 Vdc | Derived Output No. 3 |
| 11. TTL Input | Non-Isolated Shutdown − Input Return is Pin 12 |
| 12. −Vdc Out | Primary Output Common |
| 13. +Vdc Out | Primary Output Voltage |

NOTES:
1. Thirteen Pins, 0.040 (1) Dia. × 0.20 (5.1) Lg. Min.
2. Four Mounting Inserts, 4-40 × 0.10 (2.5) Dp. Min.
3. Four Mounting studs, 4-40 × 0.4 (10) Lg. Max.

**PRIMARY (+5Vdc) OUTPUT CURRENT DISTRIBUTION FOR TRIPLE OUTPUT MODELS**

In triple output models, the Primary power supply delivers +5Vdc @ 5A max. This output powers both the internal DC/DC converter and an external load. The amount of Primary Output current available for powering its external load (I load) is determined by Derived Output loading:
−5D10 Models: I load = 5-4 (Pda/Pdm) in Amperes
−5D20 Models: I load = 5-3 (Pda/dm) in Amperes
Pda = Total required Derived Output power
Pdm = Maximum available Derived Output Power (total)

Example: The Model USI-1256-5D10 can deliver fully rated Derived Outputs of −5Vdc @ 1A and +12Vdc @ 0.6A. for a Pdm of 12.2 Watts, total. For Derived Output loading of −5Vdc @ −0.5A and +12Vdc @0.3A, Pda = (2.5 + 3.6) Watts = 6.1 Watts. For this −5D10 Model: I load = 5-4 (6.1/12.2) = 3 Amps, the amount of Primary Output current available for its external load.

# High Efficiency Power Supplys® Chassis Mount and Plug-In Packages

**ES, EA, EC**

*alue Products from the NO. 1 SOURCE*

**NEAR-CONSTANT EFFICIENCY TO 80%: 105-125 VAC IN**
**LINE TRANSIENT IMMUNITY >60 dB**
**LOW CASE TEMPERATURE RISE: 15°C TYP**

**he ES, EA and EC Series** of line operated power supplys ature high, near constant efficiency over the rated input oltage range. These electrically-identical families employ a ghly efficient, closed loop ripple regulation circuit which con- ins a low pass filter. This combination provides cooler opera- on, higher overall system reliability and greater line transient mmunity. . .all to a degree unmatched by equivalent conven- onal power supply designs.

he ES and EA Series are plug-in modules offering a choice of wo industry-standard pin-outs. The EC Series are chassis ount versions with a top-mounted, five-terminal barrier strip r power entry/exit.

# Multi-Output, 76 Watt Ripple Regulator Power Supplys® — High Efficiency

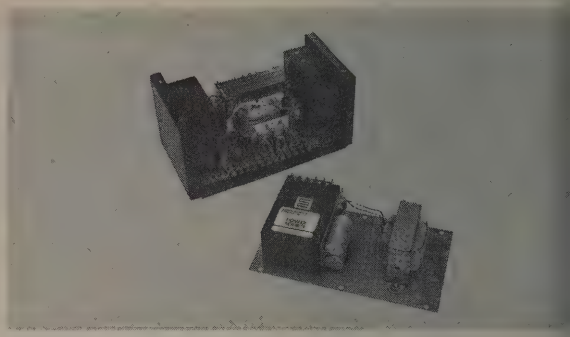
OE

*Value Products from the NO. 1 SOURCE*

- **SINGLE, DUAL & TRIPLE OUTPUTS — TO 76 WATTS**
- **LINE TRANSIENT IMMUNITY EXCEEDS 60 dB**
- **HIGH, NEAR-CONSTANT EFFICIENCY — 60 to 70%**

**The OE Series** of high efficiency ripple regulator power supply consists of single and multiple isolated-output models which deliver up to 76 Watts of power. Any model can be user-connected to operate from inputs of either 105 to 125 Vac or 210 to 250 Vac at 50 to 440 Hz.

All OE series models maintain high, nearly constant efficiency over the entire input voltage range. High efficiency reduces internal power losses, promoting cooler operation and greater overall system reliability. The key to this performance is ripple regulation, which dissipates only 20 to 25% the power of equivalent conventional power supply designs. In addition, low pass filtering within the ripple regulator circuit affords a degree of immunity to line transients which far surpasses that of other regulation techniques.



## GENERAL SPECIFICATIONS

**INPUT VOLTAGE AND FREQUENCY**
By External Connection, Either:
105 to 125Vac @ 50 to 440Hz or
210 to 250Vac @ 50 to 440Hz.

**OUTPUT VOLTAGE TOLERANCE**
±2% (Adjustable): Single Output Models
±2% (Fixed): Multi-Output Models

**REGULATION (Line/Load)**
0.5/0.5%

**RIPPLE AND NOISE**
13mV RMS (PARD)

**OPERATING TEMPERATURE RANGE**
−25°C to +60°C (No Derating)

**STORAGE TEMPERATURE RANGE**
−25°C to +85°C

**EFFICIENCY**
60 to 70%

**I/O ISOLATION**
Voltage: 1500V RMS
Resistance: 50 Megohms
Capacitance: 125pF

**OVERCURRENT PROTECTION**
Power Foldback

AC Input Connections
Transformer interconnections same as for Figure 1.

NOTES FOR SINGLE OUTPUT MODEL ONLY:

1. The circuit below provides a ±5% trim which zeroes the output voltage tolerance offset.
2. If TRIM ADJ potentiometer leads exceed 4", connect a 0.01µ capacitor close to or at regulator terminals 3 and 4.
3. Pins 2 and 5 are internally connected. For specified performance these pins must be externally connected as below.

# Industry Standard, High Performance Power Higher Voltage Models for Plasma Displays Supplys®

**P, SP5900 ED**

*ue Products from the NO. 1 SOURCE*

**HIGH PERFORMANCE-REGULATION TO 0.01%**
**FULL OPERATION TO +85°C (M OPTION — P & SP5900**
**OUTPUTS TO 250 VOLTS — ED SERIES**

**e P and SP Series** boast a decade of reliable, field proven service and are the lustry standard for high performance encapsulated modular power supplys. ntinuous design improvements give these units MTBF's >150,000 hrs, lower se heat-rise (to 18°C cooler) and the highest in-circuit performance. Milita- ed versions (M Option) for demanding environments employ hermetically aled components and tantalum capacitors to maintain full rated operation ough +85°C.**

e ED Series models deliver higher voltage outputs for powering a variety of e more widely used plasma digital displays.

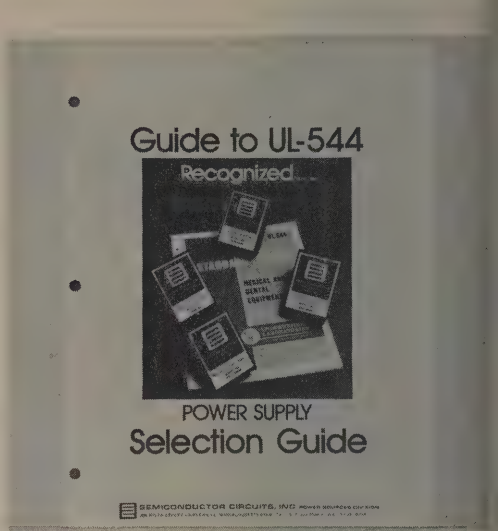
# Standard for Safety — Medical & Dental Equipment

UL544

*Value Products from the NO. 1 SOURCE*

- **PATIENT CONTACT RATED (W OPTION)**
- **2500 VOLT BREAKDOWN**
- **FARADAY SHIELDED TRANSFORMERS**

**The UL544 Series** consists of more than 250 power supply models which have met the stringent requirements for Patient Contact rating as defined by Underwriters Laboratories, Inc., under UL544; STANDARD for SAFETY — MEDICAL and DENTAL EQUIPMENT. All models are recognized and listed accordingly under File E50975 of the U.L. Component Recognition Program. These units are based upon standard, reliable, S.C.I. product families which are specifically modified to meet the severe demands of UL544. All models utilize a Faraday shielded power transformer which holds AC leakage current down to well below the 10 μA maximum. Effective isolation techniques give these units a higher-than-required Voltage Breakdown rating of 2500 V (min).



## GENERAL SPECIFICATIONS

# Multi-Output, 25 Watt DC/DC Converters. . . Input & Outputs Protected, Economy Priced

U,CU

*Value Products from the NO. 1 SOURCE* **ANOTHER NEW PRODUCT**

- **INPUT RANGE TO 4:1**
- **SHUTS DOWN FOR INPUT UNDER/OVER VOLTAGE**
- **CLAMPED LOGIC POWER OUTPUT PROTECTS CHIPS**

**The U,CU Series** are quadruple, triple and single output DC/DC converters which efficiently deliver up to 25-Watts of output power. Featuring self-resetting shutdown for input over/under voltage and output over voltage conditions, these unique converters protect both the input source and the output load from damage. All models tolerate extremely large input voltage variations — up to 4:1 — and employ a Pi-input filter which isolates the input source from internally generated "spikes." All outputs are free of chip-damaging overshoot.

All models feature floating outputs with input-to-output (I/O) isolation of 2500Vdc min and primary-to-derived output isolation of 300Vdc min. These devices are ideal for powering data conversion/acquisition systems, μP's and memories in mobile and portable applications where reliability and battery life are prime concerns.

## GENERAL SPECIFICATIONS (Derived outputs are ±12V, ±15V and −5V)

**INPUT REFLECTED RIPPLE**
20 mA pk-pk(max)

**OUTPUT VOLTAGE TOLERANCE**
±2% Fixed (Primary)
±1% Fixed (Derived)

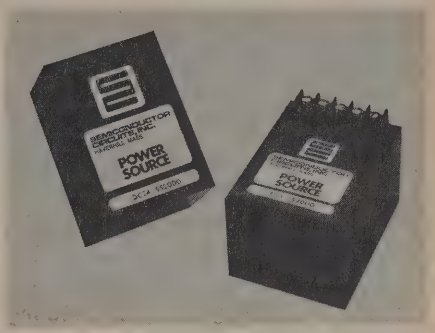
# Higher Efficiency, Broad Input Range Single Output DC/DC Converters

DC, CC

*Value Products from the NO. 1 SOURCE*

- **WIDER INPUT RANGE - to 200%**
- **IDEAL FOR BATTERY OPERATION**
- **CHOICE OF PC BOARD OR CHASSIS MOUNT PACKAGE**



**The DC and CC Series** are highly efficient, single output, regulated DC/DC converters that tolerate input voltage variations to 200% and operating efficiencies to 80% (See catalog page 11). These units are ideal for operation from batteries, motor generators, fuel cells and other poorly regulated sources of dc input power. All models feature I/O isolation, which enables the user to obtain either polarity of output regardless of the input voltage polarity.

The DC Series models are designed for PC board mounting. The electrically identical CC Series are chassis mount versions, which achieve power entry and exit via a top-mounted, 5-terminal barrier strip.

Models having rated outputs of 180Vdc and 250Vdc for powering plasma digital displays are available on request.

## GENERAL SPECIFICATIONS

**OUTPUT VOLTAGE TOLERANCE**
±2% (Fixed)

**REGULATION**
Line/Load: 1.0/1.0%

**RIPPLE AND NOISE**

# High Efficiency, Ripple Regulator, Single Output DC/DC Converters

SW, CW

*Value Products from the NO. 1 SOURCE*

- **OUTPUT POWER TO 40 WATTS**
- **IDEAL FOR BATTERY APPLICATIONS**
- **WIDE INPUT RANGE - TO 200%**

**The SW and CW Series** are highly efficient, single output DC/DC converters. Proportional energy transfer techniques enable these encapsulated modular converters to maintain well regulated outputs despite large variations of input voltage. The SW and CW Series are ideal for applications where the input dc power is derived from a battery, a motor generator or other types of poorly regulated power sources.

## GENERAL SPECIFICATIONS

**OUTPUT VOLTAGE TOLERANCE**
±2% (Trim Adjustable)

**REGULATION (Line/Load)**
0.3/0.3% — Rated Output to 3 Amps
0.5/0.5% — Rated Output above 3 Amps

**RIPPLE AND NOISE**
7 mV RMS — Rated Output to 3 Amps
13 mV RMS — Rated Output above 3 Amps

**OPERATING TEMPERATURE RANGE**
−25°C to +71°C — Rated Output to 3 Amps
−25°C to +60°C — Rated Output above 3 Amps

**STORAGE TEMPERATURE RANGE**
−25°C to +85°C

**EFFICIENCY**
60-70% — Rated Output to 12V
60-80% — Rated Output above 12V

**I/O ISOLATION**

# μP Compatible, Multi-Output DC/DC Converters. . . Including High Performance, Low Noise Duals

**100C, MC**

- **TRIPLE AND DUAL OUTPUTS FOR μC AND LINEAR APPLICATIONS**
- **OUTPUT POWER TO 12 WATTS — OVERCURRENT PROTECTED**
- **PI INPUT FILTER FOR LOW INPUT REFLECTED RIPPLE**

The 100C and MC Series are efficient multi-output DC/DC converters that match the power requirements for a wide variety of μC and linear applications. These converters are ideal local power sources with short circuit protected outputs that are free of chip-damaging overshoots; a high performance π input filter isolates the input source.

The MC Series models feature triple outputs at levels suitable for μP's, data converters, DAS's and memory arrays. Input ratings of 5, 12, 24 or 48Vdc are available by model designation.

The 100C Series consists of dual output models which deliver tightly regulated ±12 or ±15Vdc outputs (depending on model) for critical linear applications.

All models have MTBF's in excess of 100,000 hours and deliver full rated outputs in a 71°C ambient.

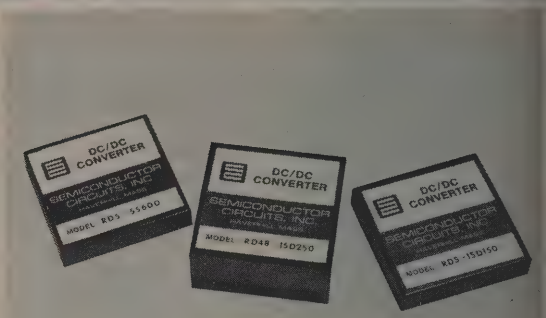
# Low Profile, Second Sourceable Regulated DC/DC Converters. . .Two Pin-Outs

**LD, LA, RD, RA**

*Value Products from the NO. 1 SOURCE*

- **LOW PROFILE CASED ONLY 0.375" HIGH (LD, LA SERIES)**
- **HIGH PERFORMANCE INPUT FILTER**
- **OVERCURRENT-PROTECTED OUTPUTS**



**The LD, LA and RD, RA Series** are economy priced, high performance DC/DC converters designed for all but the most demanding analog and digital applications. The LD and LA Series models feature low profile packaging for 0.5 inch on-center card file applications. The RD and RA Series models deliver greater output power from within a slightly higher profile case. Both families feature efficiency to 65%, a $\pi$ input filter for minimum input reflected ripple, MTBFs >150,000 hrs. and overcurrent-protected outputs.

The LD and RD Series pin-out enjoys widespread industrial useage. The LA and RA Series models are pinned out for plug-in compatibility with equivalent competitive units.

# 24 Pin Dip DC/DC Converters. . . Regulation to 0.2%

μD, μR

*lue Products from the NO. 1 SOURCE*

**24 PIN DIP PACKAGED-NEW REGULATORS IN μR SERIES**
**0.5" ON-CENTER P.C. BOARD MOUNTING**
**SHORT CIRCUIT-PROTECTED OUTPUTS**

**e μD and μR Series** are Ultra-miniature DC/DC converters that are nned-out for 24 pin Dip-compatibility. These units are encased in low ofile, minimal area packages and are ideal for P.C. card files requiring 5 inch on-center mounting.

e μD Series features high efficiency. These units contain no output gulator, but effective design affords them ample regulation for a wide riety of analog and digital application. The μR Series are higher per-rmance devices which feature 0.2% regulation and low output noise. oth families offer single and dual output models. All outputs are over-rrent protected and require no derating to +71°C. Input-to-output O) Isolation is a standard feature.

## MECHANICAL INFORMATION

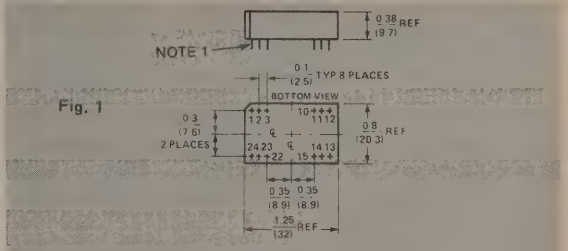

Fig. 1

### CONNECTIONS

| PINS | μD and μR Series ±5, 12 or 15Vdc | μR Series ±12 or ±15 Vdc | μD Series Only 24 or 30Vdc |
|---|---|---|---|
| 1 & 24 | +Vdc in | +Vdc in | +Vdc in |
| 2 & 23 | Do not connect | −Vdc out | −Vdc out |
| 3 & 22 | −Vdc out | Common out | Do not connect |
| 10 & 15 | −Vdc out | Common out | Do not connect |
| 11 & 14 | +Vdc out | +Vdc out | +Vdc out |
| 12 & 13 | −Vdc in | −Vdc in | −Vdc in |

NOTE: 1. Twelve pins 0.020 (0.5) Dia × 0.15 (3.8) Lg Min

LOAD CURVE

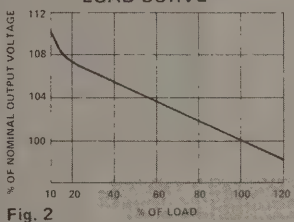

Fig. 2

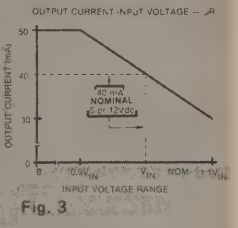

Fig. 3

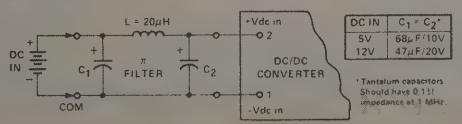
HINTS

1. IMPORTANT: In both test and usage, each μD Series output should be decoupled by connection of a 10uF tantalum capacitor AS CLOSE AS POSSIBLE TO THE LOAD. Dual output models require 2 capacitors. Noise measurements taken across each bypass capacitor — rather than at the supply — will give the most realistic and useful readings.
2. If required, the user can connect the π filter of Fig. 4 for a 60dB attenuation of switching spikes appearing at the converter input.

EXTERNAL π FILTER FOR 60 dB SPIKE ATTENUATION



| DC IN | $C_1 = C_2$* |
|---|---|
| 5V | 68μF/10V |
| 12V | 47μF/20V |

*Tantalum capacitors Should have 0.1 Ω impedance at 1 MHz.

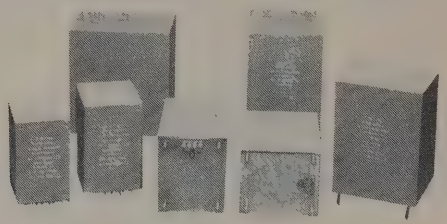
POWER ELECTRONICS

MAGNETICS

# HIGH RELIABILITY/HIGH TEMP. / SERIES STABILIZED AC-DC POWER SUPPLIES



## FEATURES

- Hermetically Sealed
- Hi-Temp +212°F (base temp.) F.R.
- 8-500 Watts
- Wide input voltage and frequent operation
- Input transient protected
- Short circuit protected with foldback
- Qualified to MIL-Environments

## SPECIFICATIONS

**Input Voltage:** 103 to 132 VAC.

**Input Frequency:** 47 to 420 Hz, 1 phase (3 phase units available).

**Input Transient Protection:** MIL-S70-704A Fig. 3, Limit 1.

**Line and Load Regulation (combined):** 0.25% std. models, 0.05% "A" models.

**Ripple:** 5 mv or .01% std. models (47-63 Hz oper.) "A" models 1 mv or .002%. 10 mv or .04% std. models (380-420 Hz oper.) "A" models: 3 mv or .004%.

**Voltage Adjustment:** +5% @ Full rating (F.R.), ±10% @ 80% F.R.

**Temp. Coefficient:** .025%/°C.

**Recovery Time:** (½ load to F.L. to ½ load): 50μ sec. max.

**Operating Temperature:** −55°C to +100°C.

**Storage Temperature:** −62°C to +115°C.

**Polarity:** Floating, either positive or negative may be grounded up to 250 V — consult factory for higher potentials.

**Protection:** Overload and short circuit protected with foldback dissipating equal to or less than normal operation. Automatic recovery.

**Reliability:** 50,000 hrs. MTBF @ max. base temp./MIL-HDBK-217A.

**Environments:** Qualified to MIL-Environments (including 50 G's for 11 m sec. and 100 G's for 6 m sec.)

# HIGH VOLTAGE POWER SUPPLIES

## RACK MOUNTED • MODULAR • CUSTOM

*for Commercial, Industrial, Military Applications*

***The Spellman line of rack mounted high voltage power supplies offers —***

- Models through 400KV and 400 Watts
- Wide variety of options
- Fixed or reversible polarity
- Fully protected — "Arc-Proof"
- Current Limiting
- Low temperature coefficients

***Spellman's line of high voltage power supply modules includes —***

- Models through 30KV and 30 Watts
- Fully adjustable
- Super-regulated, Well-regulated, Regulated and Proportional Models
- Multiple Output CRT Supplies
- "Slot" units
- Excellent Regulation, Ripple and Transient response
- Militarized to MIL-E-5400

STANDARD POWER SUPPLIES

# Standard Power Supplies Selector Guide

## FEATURES

- **Stocked and Sold Thru 70 Plus Distributor Locations**
- **200 Plus Standard Models to Select**
- **Field Proven Reliability**
- **U.L. Recognized**
- **Quality Production**
- **New Switchers**
- **State of the Art Engineering and Design**
- **Fully Tested**

*Select the power supplies that set the standards for dependability and value.*

## GENERAL SPECIFICATIONS*

**Input:** 115/230 VAC ± 10%, 47 to 440 Hz.
**Line Regulation:** ± 0.1%.
**Load Regulation:** ± 0.1%, no load to full load.
**Ripple:** 0.1%, typically 0.5 to 2mV rms.
**Short Circuit Protection:** Fold-back current limiting, adjustable from 20% to full load.
*Excluding unregulated Black Line and Switchers.

**Response Time:** 50 microsec.
**Temperature Rating:** 0 to 50° C. (to 70° C with derating.)
**Adjustable Voltage Range** ± 10%
**Models with fans:** 50/60 Hz

All dimensions in inches. All weight in pounds.

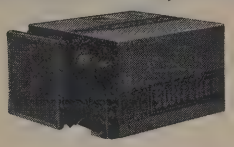
## Switchers – State of The Art

- All New
- 80% Efficient
- Hi-Rel Line
- 20 KHz
- Low EMI/RFI
- No Turn-on or Turn-off Voltage Overshoots
- Lowest Component Count



SWS Series
